A HANDBOOK OF AEROSPACE DEFENSE ORGANIZATION 1946 – 1986
A HANDBOOK OF AEROSPACE DEFENSE ORGANIZATION

1946–86

OFFICE OF HISTORY
Air Force Space Command
Peterson Air Force Base, Colorado
FOREWORD

This handbook provides basic lineage information on organizations whose mission was aerospace defense during the period 1946-86. Earlier editions (1973 and 1980) contained only the lineage of USAF units; this one has been expanded to include unified and specified commands and NORAD. Entries are necessarily brief, but additional detail can be found in the histories and archive of the AFSPACECOM History Office or can be obtained from the USAF Historical Research Center. The possibility for error in a publication such as this is great. Should the reader find one we urge him/her to contact this office.

ROBERT M. KIPP

SECTION I
THE EVOLUTION OF AEROSPACE DEFENSE

Before World War I defense against air attack was hardly considered a problem. The airplane was so limited in performance that military planners envisioned it capable of little more than short range reconnaissance flights. During the first three years of war on the Western Front the airplane underwent remarkable technological and operational improvement, but air defense was not considered a special factor in the overall conduct of the air war. Few tactics were developed specifically for air defense; combat patrols generally doubled for both offensive and defensive purposes. Large numbers of antiaircraft guns and searchlights were eventually emplaced behind the lines, and captive barrage balloons were added for defense of specific installations. Then as now, emphasis was on early warning. Forward observers reported by telephone the approach of hostile aircraft and were assisted eventually by sound locating devices. Air patrols then intercepted and engaged the attackers. Effective air defense of allied ground forces was achieved by mid-1918 only through the achievement of air superiority.

The defense of national capitals had mixed success. When German Zeppelin raids against England began in 1915, British defenses proved inadequate. Only second-rate training aircraft and a few guns were available, and no warning system had been organized. For a time the Zeppelins could approach undetected over the North Sea, but by 1917 they were compelled virtually to abandon their attacks because of greatly strengthened British fighter defenses. Fast pursuit planes firing incendiary bullets were found to be far more effective against airships than antiaircraft guns. The Germans then turned to large bombers. Their initial success compelled the British again to reorganize their defenses. In 1918 an elaborate system of barrage zones was finally established in which searchlights, antiaircraft guns, and warning posts were located in groups between London and the coast. Balloon aprons were also installed around London and the blackout was extended to most English cities. The most effective defenders remained the highly trained, and by this time experienced, pursuit squadrons. Heavy losses and poor bombing results forced the Germans to abandon their raids in the summer of 1918.

Although bombardment aviation made rapid strides during the last months of WW I, such progress seemed to bode ill only for the capitals and peoples of Europe; America's ocean frontiers seemed sufficient guarantee against attack on the North American continent, and no real threat emerged until the rise of Japan and Nazi Germany in the mid-thirties. Discussions of air attack tended to be theoretical in nature because aeronautics was still in its adolescence, but General Billy Mitchell argued for the future that not only were carrier-based raiders a possibility but heavy bombers could attack the vital areas of the northeast US directly from Europe. Mitchell discounted any air
exercises. This experience was invaluable in developing tactics and procedures, as were lessons learned during the fall of 1940 from the Battle of Britain. But although greatly impressed by British air defense organization, techniques, and equipment, the ADC commander, Brigadier General James E. Chaney, believed that Britain's highly integrated system was impracticable for the United States because of the great geographical distances involved. More realistic, he thought, would be a number of self-sufficient and tailor-made air defense networks to service the needs of "strategic air areas."

In a conference held in February 1941, General Marshall assigned the responsibility for air defense to the air forces. In line with General Chaney's theory, GHQ Air Force was given four continental air forces, each of which contained an interceptor command. The interceptor commands were charged with air defense of their areas, but were subject to the overall supervision of four new air defense commands, coterminous with the four Army areas, which were invested with overall defense responsibility. With the training of the staffs of the new interceptor commands, ADC's work was virtually completed. In June 1941 it was inactivated, but its doctrines guided air defense operations for the remainder of the war.

When the US entered World War II, air defense facilities underwent a major expansion, especially on the east and west coasts. Ninety-five radar stations were eventually completed, although about 75 was the maximum number operational at any one time. The principle radars used were the SCR-270 (mobile) and the SCR-271 (fixed), with ground control intercept radars (SCR-588) being added during 1943 for close-in coverage (up to 50 miles) for tracking and controlling fighters from the ground.

ADC's work with ground observers in air defense exercises in 1940-41 greatly facilitated the War Department's organization of the AAF Ground Observer Corps in 1942. The information net eventually grew to 15 centers along both coasts and four standby centers along the Gulf coast, with a total of 14,000 observation posts and an estimated 1,500,000 civilian volunteers enrolled.

The shortage of fighter planes early in the war was a serious handicap. Although the situation improved during 1942 with the receipt of the P-38 and P-47, until the introduction of the P-61, lack of all-weather aircraft made the success of interception at night or in inclement weather highly doubtful.

Antiaircraft artillery provided local defense. AAA underwent drastic changes during the war, with unified AAA commands emerging on both coasts after Pearl Harbor. After considerable controversy, the control of AAA was placed under AAF interceptor commands.

No air attack tested this elaborate air defense system. Until the Battle of Midway in June 1942, air defenses remained in a high state
Weapons carried by the modern fighters were also modernized. The F-89D was modified to accept the Falcon guided missile (F-89H) and Genie atomic rockets (F-89J). The F-86D was modified (F-86L) to include data link, thereby permitting more precise control from the ground. The F-86L and the F-89H became available in 1956, the F-89J a year later. Even more advanced were the Century Series supersonic interceptors. The first, the F-102A, appeared in 1956; the F-104 came along in 1958; and the F-101B and F-106A were delivered in the first half of 1959. Complementing the manned interceptor was the BOMARC supersonic interceptor missile which first entered the inventory in September 1959. It was based along the eastern seaboard and the northern border.

Since the operation of the expanding air defense network required daily coordination on tactical matters and the merging of plans to a greater extent than ever before, issues of command and control became paramount. In 1954, with all three services forging ahead with contributions to air defense, the JCS formed a joint air defense command, Continental Air Command, and gave it operational control of all forces assigned to air defense in the United States. The larger issue of continental defense was also under review by this time in the US and Canada. From their experience in joint planning activities since the late 1940s, it had become obvious to air defense officers of the two nations that the most effective defense required common operating procedures, deployment according to a single plan, the means for quick decision, and authoritative control over all weapons and actions. On the basis of talks between the RCAF Chief of Staff and the commander of ADC in the spring of 1954, their staffs drew up a plan which called for a combined air defense organization under a single commander. Over the next two years studies and consultations at various levels of the two governments culminated finally in a joint announcement on 1 August 1957 by the US Secretary of Defense and the Canadian Minister of Defence that the two nations would soon set up a system of centralized operational control of their air defense forces. On 12 September the North American Air Defense Command was activated at Ent AFB, CO. The formal NORAD Agreement was signed on 12 May the following year. By the early 1960s a quarter million Canadian and US personnel operated a multi-layered and interlocking complex of sensor sites, control centers, manned interceptors, and surface-to-air missiles which constituted probably the best defense ever erected against bomber attack.

The decade of the 1960s saw the character of the threat begin to change as the Soviets focused on creation of intercontinental and sea-launched ballistic missile forces. In response, the US built a network of three Ballistic Missile Early Warning (BMEWS) sites. Additional radars were also located along the east and west coasts to detect missiles launched from submarines. The potential for military operations from space had been understood theoretically long before Sputnik in 1957, but only after the event and the subsequent
to change its plans at that time, space organization remained an important future agenda item. A Secretary of the Air Force-directed Space Mission Organization Planning Study in 1979 considered various options for future space organization. Field commanders agreed that whether space went to an existing organization or to a newly formed one, stronger centralized management was needed. During the next several years the Air Force took several interim steps to strengthen management and clarify the distinction between space research and development and space operations. In early 1982 both the Secretary of the Air Force and the Chief of Staff acknowledged that the Air Force was moving toward the formation of a space command. Several months of effort by a Chief of Staff study group culminated in a briefing to General Allen in April. He agreed that the organizational direction should be toward formation of a space command. On 1 September Undersecretary of the Air Force Aldridge announced formation of a new command as a "... prudent evolutionary step in the management and operation of Air Force space systems." The Air Force chose General James V. Hartinger to head the new command. Lieutenant General Richard C. Henry, commander of Space Division, was named its vice commander. On 1 September Space Command was officially activated at Peterson AFB, CO. Manpower resources for Space Command, the first major command created by USAF since 1950, came from organizations already in existence in Colorado Springs, from space and missile warning units operated by SAC since 1979 and reassigned, and from new authorizations.

The history of the development of military space systems had been one of the military services developing specialized space operations and support systems suitable for their individual needs. The Navy had an interest in high altitude rockets and early satellite technology and eventually fleet support communications and navigation space systems; the Army focused on booster and launch vehicles; and the Air Force concentrated on ICBMs and later extensive satellite applications for military use in communications, weather, surveillance, and navigation. By the early 1980s the importance of space and the growing number of space systems caused the Air Force and the Navy to establish commands dedicated to space operations. Both these actions were initial steps toward a unified space command which could integrate operational systems into the national command structure to ensure control and management of space forces for direct war-fighting needs. Beginning in 1983, the JCS took specific action to form a unified space command. Following study of a proposal by Air Force Chief of Staff General Charles Gabriel, on 6 November the JCS recommended establishment of such a command. Later that month, the Secretary of Defense recommended to the National Security Council that President Reagan approve the proposal. In February 1984 the JCS formed the Joint Planning Staff for Space to conduct transition planning. On 20 November 1984, the President approved the formation and activation of a United States Space Command by October 1985.
SECTION II
SIGNIFICANT COMMAND CHANGES

1946
21 March Air Defense Command (ADC) constituted at Mitchel Field NY. Activated on 27 March.

1948
1 December Continental Air Command (CONAC) created and given air defense mission. ADC remained an "operational" command, but all air defense units assigned to CONAC.

1950
1 July ADC discontinued.

1951
1 January ADC reestablished as a major command at Mitchel AFB NY. Command moved to Ent AFB CO beginning 8 January.

1954
1 September Continental Air Defense Command (CONAD) activated as a JCS joint command at Ent AFB CO. ADC was USAF component command; Army Air Defense Command was Army component; and Naval Forces CONAD the Navy component.

1957
12 September North American Air Defense Command activated at Ent AFB CO.

1968
15 January ADC redesignated Aerospace Defense Command, but retained abbreviation ADC.

1973
1 July ADC and CONAD staffs consolidated.

1975
On 30 June CONAD disestablished. 1 July new JCS Unified Command Plan designated ADC as a specified command Aerospace Defense Command (ADCOM). It retained its MAJCOM status.
SECTION III
CHRONOLOGY OF OTHER SIGNIFICANT CHANGES

1946-49

21 March 1946 - ADC organized at Mitchel Field NY with interim mission "to organize and administer the integrated air defense system of the Continental US . . . exercise direct control of all active measures, and coordinate all passive means of air defense."

27 March - The AAF Air Defense Command activated at Mitchel Field NY. It assumed control of 414th Night Fighter Squadron, which was a purely paper organization, and 425th Night Fighter Squadron, which was manned by one officer and two enlisted men. Two bases, Mitchel Field and Hamilton Field, California, also assigned to ADC.

10 June - The ADC mission expanded to extent that ADC was required to coordinate within the US the means available from other services for air defense, such as Naval and Marine aircraft units temporarily shore-based.

21 May 1947 - The 505th AGW Group—first postwar aircraft control and warning organization—activated at McChord Fld, Washington.

25 October - The 25th Air Division—first air division for defense—established with headquarters at Silver Lake (near Everett) Washington; 26th Air Division formed 16 November, the first one on east coast, at Roslyn NY.

1 December - Continental Air Command (ConAC) created and given mission of air defense. ADC left as "operational" command but all air defense units assigned to ConAC. TAC also placed under ConAC to provide additional fighter strength. General Stratmeyer became ConAC commander, and General Saville assumed command of ADC.

1 March 1949 - The six ConAC air forces relieved of air defense responsibilities which were given to Eastern and Western Air Defense Liaison Groups.

1 September - Eastern and Western Air Defense Forces activated 21 October and fighter aircraft were placed under their continuous operational control. They were assigned to ADC as follows: HQ and HQ Sq, EADF and HQ and HQ Sq, WADF, effective 1 Jan 51; both were redesignated HQ EADF and WADF effective 1 Sep 51.

8 December 1949 - 32d and 28th Air Divisions activated at Stewart AFB NY and Hamilton AFB CA, respectively.

16 December 1949 - 30th Air Division activated at Selfridge AFB MI.
* ADC was assigned to ConAC on 1 Dec 1948.

* ADC was discontinued on 1 Jul 1950.
*ADC was reestablished as a major command at Mitchel Fld, NY on 1 Jan 51; the headquarters moved from Mitchel Fld to Ent AFB, Colo. on 8 Jan 1951.
1957

8 January - New York ADS activated and assigned to 26th Air Division. Same day Detroit ADS activated and assigned to 30th Air Division; Syracuse ADS assigned to 32d Air Division; Washington ADS assigned to 85th Air Division; Boston ADS assigned to 26th Air Division; Bangor ADS assigned to 32d Air Division.

8 March - Chicago ADS activated and assigned to 37th Air Division.

15 April - ADC assigned operational control of DEW Line with the inactivation of Northeast Air Command (NEAC). 64th Air Division transferred from NEAC to ADC effective 1 April and assumed operational control of DEW Line.

1 July - 73d Air Division (Weapons) activated at Tyndall AFB FL and ADC assumed control for use as Weapons Employment Center replacing the facility at Moody AFB GA.

1 July - 8th Division at McClellan AFB inactivated.

8 September - Montgomery ADS activated and assigned to 35th Air Division.

8 October - Duluth ADS activated and assigned to 37th Air Division.

8 December - Grand Forks ADS activated and assigned to 31st Air Division.

1958

8 January - Seattle ADS activated and assigned to 25th Air Division.

15 January - 4751st Air Defense Missile Wing activated at Eglin AFB (GA), Florida, to develop and train BOMARC units.

15 April - 4601st Support Squadron activated at Paramus NJ to represent ADC in the contract administration of DEW Line.

10 June - NORAD activated Alaskan, Central, Eastern, Northern, and Western NORAD Regions.

15 August - 32d Air Division inactivated.

15 August - 9th Air Division (Def) inactivated.

1 September - Portland ADS activated and assigned to 25th Air Division.
1959 cont'd

1 August - 32d NORAD/CONAD region redesignated 32d NORAD Region at Dobbins AFB GA.

September - SAGE Combat Center No. 2 (30th Air Division) became operational.

1 September - 46th Air Defense Missile Squadron at McGuire AFB NJ—the first BOMARC squadron—became operational.

1 October - 27th Air Division (Defense) inactivated.

1 October - Sioux City ADS activated and assigned to 20th Air Division.

1960

1 January - Central NORAD Region at Richards–Gebaur AFB MO discontinued.

1 January - 33d Air Division (Defense) redesignated 33d Air Division (SAGE), transferred from CADF to ADC and its headquarters moved from Oklahoma City AFS OK to Richards–Gebaur AFB MO.

1 January - 20th Air Division (Defense) at Richards–Gebaur AFB discontinued.

1 January - 29th Air Division (Defense) redesignated 29th Air Division (SAGE) and transferred from CADF to ADC.

1 January - Kansas City ADS (Manual) and Oklahoma City ADS activated and assigned to 33d Air Division.

1 January - Albuquerque ADS, 33d Air Division, activated at Kirtland and same date 34th Air Division (Def) discontinued. The sector discontinued 1 Nov 60.

1 January - 31st Air Division (Def) headquarters at Fort Snelling MN discontinued.

1 January - Eastern and Central Air Defense Forces inactivated.

15 January - 33d NORAD Region activated at Richards–Gebaur AFB MO.

1 April - Goose ADS (Manual) activated and assigned to 64th Air Division.
(1963 contd)

15 November - 10th Aerospace Defense Squadron organized at Vandenberg AFB CA and assigned to ADC.

1 December - Grand Forks ADS discontinued.

15 December - Sault Ste Marie ADS discontinued.

1964

1 August - 10th Aerospace Defense Squadron transferred from HQ ADC to 9th Aerospace Defense Division.

1965

3 September - Space Defense Center moved from Ent AFB to newly completed Cheyenne Mountain Combat Operations Center and activated.

1966

1 April - Numbered Air Forces organized as follows:

HQ First Air Force at Stewart AFB NY
HQ Fourth Air Force at Hamilton AFB CA
HQ Tenth Air Force at Richards-Gebaur AFB NO
HQ 14th Air Force at Gunter AFB AL

1 April - Ten new Air Divisions organized:

HQ 20th Air Division at Truax Field WI
HQ 21st Air Division at McGuire AFB NJ
HQ 27th Air Division at Luke AFB AZ
HQ 31st Air Division at Oklahoma City AFS OK
HQ 32d Air Division at Gunter AFB AL
HQ 33d Air Division at Fort Lee AFS VA
HQ 34th Air Division at Custer AFS MI
HQ 35th Air Division at Hancock Fld NY
HQ 36th Air Division at Topsham AFS ME
HQ 37th Air Division at Goose AB, Labrador
(1966 contd)

1 April - The following reassignments occurred as a result of the ADC reorganization and reconfiguration:

<table>

1 April - 26th NORAD Region redesignated Eastern NORAD Region.

1 April - 28th NORAD Region redesignated Western NORAD Region.

1 April - 29th NORAD Region redesignated Central NORAD Region.

1 April - 32d NORAD Region redesignated Southern NORAD Region.

1 April - 30th NORAD Region discontinued.

25 June - HQ Los Angeles ADS at Norton AFB CA discontinued as was HQ Reno ADS at Stead AFB NV.

1967

1 January - HQ 73d Aerospace Surveillance Wing organized at Ent AFB CO.

31 October - Air Defense Weapons Center USAF, established at Tyndall AFB FL. USAF dropped from title 2 Nov 67.

31 December - HQ 21st Air Division discontinued, but reactivated at Hancock Fld NY 19 Nov 69 and reassigned from 1 AF to HQ ADC 1 Dec 69.

1968

1 July - First Aerospace Control Squadron reassigned from 9th Air Division to 14th Aerospace Force.
ARTAS OF RESPONSIBILITY FOR AIR DEFENSE

July 1973

July 1975
(1975 contd)

1 July - ADCOM designated specified command.

1 October - 18th Surveillance Sq, Edwards AFB CA, and three detachments inactivated as contractor operations and maintenance began for Baker-Nunn Spacetrack sensors.

1 October - HQ Alaskan ADCOM Region designated and activated at Elmendorf AFS AK (with DAF ltr, later determined to be in error, see 1 May 85 entry).

1976

21 April - 4699th Aerospace Defense Squadron inactivated at Cheyenne Mountain Complex CO.

21 April - 47th Communications Group, Ent AFB CO, redesignated 47th Communications Squadron and reassigned from HQ ADCOM to 46th Aerospace Defense Wing.

21 April - 4699th Aerospace Defense Squadron inactivated at Cheyenne Mountain Complex CO.

30 April - 552d Airborne Early Warning and Control Group inactivated at McClellan AFB CA.

31 May - 17th Radar Squadron inactivated at Ko Kha, Thailand.

1 October - 14th Aerospace Force, Ent AFB CO, inactivated and its personnel and units (missile and space surveillance) reassigned to HQ ADCOM, divisions, and the Alaskan ADCOM Region.

1977

30 June - 656th Radar Squadron inactivated at Saratoga Springs AFS NY.

30 June - 676th Radar Squadron inactivated at Antigo AFS WI.

1 November - 319th Fighter Interceptor Training Squadron inactivated at Tyndall AFB FL.

31 December - 630th Radar Squadron inactivated at Houston TX.
1978

1 April - 752d Radar Squadron inactivated at Empire AFS MI.
1 April - 716th Radar Squadron inactivated at Kalispell AFS MT.
1 April - 644th Radar Squadron inactivated at Homestead AFB FL.
30 September - 632d Radar Squadron inactivated at Roanoke Rapids SC.
1 October - 6th Missile Warning Squadron activated at Otis AFB MA.

1979

30 March - 757th Radar Squadron inactivated at Blaine AFS WA.
29 June - 702d Radar Squadron inactivated at Savannah AFS GA.
29 June - 763d Radar Squadron inactivated at Lockport AFS NY.
29 June - 764th Radar Squadron inactivated at St Albans AFS VT.
30 June - 689th Radar Squadron inactivated at Mt Hebo AFS OR.
30 June - 907th Radar Squadron inactivated at Bucks Harbor AFS ME.
1 July - 7th Missile Warning Squadron activated at Beale AFB CA.
13 July - 17th Defense Systems Evaluation Squadron inactivated at Malmstrom AFB MT.
29 September - 765th Radar Squadron inactivated at Charleston AFS ME.
29 September - 778th Radar Squadron inactivated at Havre AFS MT.
29 September - 779th Radar Squadron inactivated at Opheim AFS MT.
29 September - 780th Radar Squadron inactivated at Fortuna AFS ND.
29 September - 786th Radar Squadron inactivated at Minot AFS ND.

1 October - First of a two-part reorganization of aerospace defense and surveillance and warning resources took place with transfer of ADCOM atmospheric defense resources (interceptors and warning radars) to Tactical Air Command (TAC) and communications and electronics assets to Air Force Communications Service (AFCS). Thereafter, those two commands had resource management responsibility.
(1979 continued)

1 December - The second part of the ADCOM reorganization took place with transfer of missile warning and space surveillance assets to SAC. Units reassigned to SAC:

- 2d Communications Sq, Buckley Fld CO
- 5th Defense Space Communications Sq, Woomera ASN, Australia
- 6th Missile Warning Sq, Otis AFB MA
- 7th Missile Warning Sq, Beale AFB CA
- 12th Missile Warning Sq, Thule AFB, Greenland
- 14th Missile Warning Sq, MacDill AFB FL
- 19th Surveillance Sq, Pirinckik, Turkey
- 20th Missile Warning Sq, Eglin AFB FL
- 4684th Air Base Group, Sondrestrom AB, Greenland

1 December - Aerospace Defense Center activated at Colorado Springs CO.

1 December - Aerospace Defense Combat Operations Staff (ADCOS) activated at Cheyenne Mountain Complex CO.

7 December - 4690th Aerospace Intelligence Sq inactivated at Cheyenne Mountain Complex CO.

1980

31 March - Aerospace Defense Command, a major air command, inactivated at Colorado Springs CO.

1 December - HQ ADCOM Combat Operations Center inactivated.

1981

1 October - Cheyenne Mountain Support Group activated.

1982

1 September - ADCOM and NORAD Airborne Command and Control Squadrons activated at Tinker AFB OK.

1 September - 3d Airborne Command and Control Sq activated at Tinker AFB OK.

1 September - Air Defense Operations Center activated at Cheyenne Mountain Complex CO.
23 September - 21st NORAD Region moved from Hancock Field NY to Griffiss AFB NY and inactivated.

23 September - 24th NORAD Region moved from Malmstrom AFB MT to Griffiss AFB NY.

1 October - 1025th Satellite Communications Squadron, Mobile, activated at Holloman AFB NM.

9 December - 26th NORAD Region moved from Luke AFB AZ to March AFB CA.

1985

1 May - Alaskan Aerospace Defense Command Region activated (by JCS authority) assigned to ADCOM (specified).

1 July - 9th Missile Warning Squadron activated at Robins AFB GA.

8 July - 2d Space Wing activated at Falcon AFS CO.

1 October - 2d Satellite Control Squadron activated at Falcon AFS CO.

15 November - Space Command redesignated Air Force Space Command.

1 December - 1st Manned Spaceflight Squadron activated at L. B. Johnson Space Center TX.

1986

1 April - 8th Missile Warning Squadron activated at Eldorado AFS TX.

1 April - 1000th Satellite Operations Group reassigned from 1st Space Wing to 2d Space Wing.

1 August - 3d Airborne Command and Control Squadron reassigned from AFSPACECOM to TAC.

1 August - 3d Communications Squadron activated at Kapaun ADM, Federal Republic Germany.

1 August - 10th Missile Warning Squadron activated at Cavalier AFS ND.

1 August - 4th Satellite Communications Squadron (Mobile) activated at Holloman AFB NM.
SECTION IV
ORGANIZATIONAL LINEAGE

REGIONS

ADCOM

Alaskan ADCOM Region: desig and act at Elmendorf AFB AK, 1 Oct 75, by DAF ltr authority and asgd to ADCOM (ADCOM SO G-175). This was later determined to have been a mistake so the Region was again act 1 May 85 (ADCOM SO GC-3) and asgd to ADCOM (specified). Authority JCS UCP and JSCP. Region inact 19 Dec 86 in conjunction with inact of ADCOM (specified).

20th ADCOM Region: desig and act 8 Dec 78 at Fort Lee AFS VA, and asgd to Aerospace Defense Command (ADCOM), specified command; inact 1 Jun 83.

21st ADCOM Region: desig and act 8 Dec 78 at Hancock Fld NY, and asgd to Aerospace Defense Command (ADCOM), specified command; inact 23 Sep 83.

23d ADCOM Region: desig and act 8 Dec 78 at Duluth IAP MN, and asgd to Aerospace Defense Command (ADCOM), specified command; inact 19 Dec 86.

24th ADCOM Region: desig and act 8 Dec 78 at Malmstrom AFB MT, and asgd to Aerospace Defense Command (ADCOM), specified command; inact 19 Dec 86.

25th ADCOM Region: desig and act 8 Dec 78 at McChord AFB WA, and asgd to Aerospace Defense Command (ADCOM), specified command; inact 19 Dec 86.

26th ADCOM Region: desig and act 8 Dec 78 at Luke AFB AZ, and asgd to Aerospace Defense Command (ADCOM), specified command; inact 19 Dec 86.

NORAD

Alaskan NORAD Region: act 10 Jun 58 at Elmendorf AFB AK.

Canadian NORAD Region: redesig from 22 NORAD Region 1 Jun 83 at Canadian Forces Base North Bay, Ontario.

Central NORAD Region: act 10 Jun 58 at Richards-Gebaur AFB MO, disc 1 Jan 60; react 1 Apr 66 (redesig from 29 NORAD Region); disc 15 Sep 69.
