I hereby request the following records pursuant to the Freedom of Information Act, 5 U.S.C. §552 et seq.: a copy of all Open Internet complaints submitted to the FCC during the period of June 12, 2015 through July 14, 2015. I would like to request the following information. On the FCC website, " https://www.fcc.gov/encyclopedia/connecting-america " there is a section for grants and loans provided for IT & Telecommunications infrastructure and broadband services in underdeveloped or rural areas of the Continental United States. On The official FCC webpage it explains, "Broadband has gone from being a luxury to a necessity for full participation in our economy and society - for all Americans. For that reason, the FCC has adopted comprehensive reforms of its Universal Service Fund (USF) and Intercarrier Compensation (ICC) systems to accelerate broadband build-out to the approximately 23 million Americans (as of December 31, 2013) who lack access to infrastructure capable of providing 10/1 Mbps fixed broadband. This reform will expand the benefits of high-speed Internet to millions of consumers in every part of the country by transforming the existing USF into a new Connect America Fund focused on broadband. Consumers everywhere - both urban and rural - will benefit. Reform will not only drive economic growth in rural America, but will expand the online marketplace nationwide, creating jobs and businesses opportunities across the country." We are trying to obtain some form of information that details or explains the FCC's involvement in the oversight and regulation of the services provided by CaptionCall LLC. We have an employee of our firm that is utilizing a captioning telephone provided by CaptionCall LLC and we have not been able to get documentation from the vendor that explains how the CaptionCall datacenter is protected from misuse of private information seen by the employees of CaptionCall. The service, as we know, works with a combination of Dragon Voice transcribing a voice call into text while an operator oversees and monitors the call and makes corrections to the transcription. Our concern is that the conversations that our employee is having are with clients of Morgan Stanley and some of the content of these conversations could contain account numbers, trade information, and other Personally identifiable information. We are looking to get some documentation that shows us evidence that this data center is in fact secure and that the employees have no ability to record the conversations. Are there audits done by the FCC, is the FCC actively involved in regulating this company and ensuring that these conversations are kept secure? MASC is requesting a database in Excel format of all information filed by a company on their 499-A as presented on the FCC's website.

FCC-2015-000757		09/04/2015 10/13/2015 09/25/2015	Closed	Improper FOIA request for other reason On May 31 2015 I had a private investigator, PI, CESCO scan my body for any frequencies or/and other anomalies. As I have had for the past few years a variety of physical symptoms that have resulted in the decline of my health and my life. I would like to request an official investigation to be done as to why my body has ELF/EMF frequencies detected all over my body they detected signals. With other instruments used they detected Radio frequency signals as well as two single spectrum frequency signals. Also any and all records pertaining to these primary entities that were traced. The signals have been traced back to several groups by going thru the FCC. They traced back to Matthew Robert Krug, lake worth florida, LAC fetish group in south florida, NASA-center for space terahertz technology at the university of Michigan, us army research office, electronics division at office of naval research. One signal was not traced as it was military I have requested separately information on the signal. I have also separately requested information, patents, etc on ELF/EMF frequency that is used inside the body and transmits such signals. I would like to know if an investigation were to be conducted any and all information regarding why I have frequencies detected and why these groups are sending/receiving information with my body. I have findings from toxicologist in California Dr. she did patch testing, hair analysis, and signal analysis. Her findings were astounding. Lab work showed that I have nanoparticles in my body along with other types of advanced material, CMOS nanoparticles, smart dust, etc. I did not consent to anyone ever in my life to put such technology in my body nor did I consent to anyone monitoring, gathering information, among other things that this type of technology can do. If the FCC cant conduct an investigation I would like to request the FCC I should contact. I will attach documentation that show results. Request all records held by the government and or the FCC for a individual Sprint Account that I had under my name since 11/8/2014.

Because of this evil event I am experiencing employment issues - defamation, libel and slander on behalf of law enforcement and agencies such as myself. I have not been notified of the daily and minute to minute broadcasting of my affairs both private and public. I am being harassed and told that I am (T.I., targeted individual) I do not know what laws allowed for such an evil agenda to hope to deprive a human from Civil and Human Rights given by citizenship and birth from the Lord, GOD. But, this FOIA request is submitted with pray on hopes of getting the truth of this matter corrected or explained as to why and how are or is your agency or connecting agencies are broadcasting me and wiretapping and blocking the www(World Wide Web) internet access for basic online needs that this society has been mandated into now. FCC-2015-000836		09/25/2015	10/27/2015	10/21/2015	Closed	Partial grant/partial denial	Dear FOIA Officer, This is a request filed under the Freedom of Information Act, 5 U.S.C. 552. I request access to and copies of all records since Jan. 1, 2014, related in any way to American Addiction Centers -- as a group and individually (attached document identifies individual centers). This request includes, but is not limited to, all records of meeting/visitor logs; complaints; examinations and/or investigations of any kind; fines and/or other sanctions; FOIA request letters, all other communication related to the requests and all responsive materials; provides for requesters, and congressional correspondence. Please justify each deletion separately by reference to specific exemptions of the Act, and release all reasonably segregable portions of otherwise exempt material. I, of course, reserve the right to appeal any decisions. Include information contained in the material that otherwise would be considered non-responsive to the specific request. Please exercise your discretion and release information that otherwise could be considered technically exempt. I will only modify this request in writing, not via telephone. If any portion of the requested records is exempt from disclosure, considered too voluminous or denied for any other reason, please provide an index of those documents, as required under Vaughn v. Rosen, 484 F.2d 820 (D.C. Cir. 1973), cert. denied, 415 U.S. 977 (1972). I am willing to pay up to \$150 for costs associated with this request. Please notify me if the costs exceed that amount and provide a detailed invoice. I look forward to your reply within 20 business days, as the statute requires. Thanks for your assistance. I would ideally also like to obtain the dollar amount (or other remedy/remedies) involved in the settlements, if that information is possible. FCC-2016-000156	MuckRock	11/20/2015	12/21/2015	12/21/2015	Closed	Request withdrawn	Dear Sir or Madam, This letter constitutes a formal request under the Freedom of Information Act ('FOIA'), 5 U.S.C. Sections 552, et seq., and the Federal Communications Commission implementing regulations, 47 CFR Section 0.461. This FOIA request seeks the following records created between October 13, 2015 and the present: 1. Reports relating to informal complaints lodged with the FCC's Consumer Inquiries and Complaints Division, numbers #586823 and #586818 (herein complaints), and the same reports' supporting documentation to include, but not limited to, memoranda, opinions, email communications, or approval records; 2. Any email, memoranda, opinion, draft or otherwise, relating to the above mentioned complaints created by FCC personnel at the level of GS-11 and above; and 3. Any email, memoranda, opinion, or white paper relating to the above mentioned complaints submitted by interested parties to the FCC relating to complaints #586823 and #586818. Under present FCC regulations pertaining to FOIA, I believe that these documents are available to me and copies of complaints filed to the public. However, should the FCC deny this request, I request and determine that the requested records or any discrete part of the requested records are protected under one or more of the enumerated exemptions to FOIA, 5 U.S.C. Section 552(b), or under FCC implementing regulations, 47 CFR Section 0.461. I request you to detail a statement of reasons for denial. I believe that my requester category is 'other' and, therefore, consistent with FCC regulations, I may be responsible for fees associated with the cost of searching and reproducing responsive records (except for the first 100 reproduced pages and the first two hours of search time). Therefore, I ask that records be supplied to me in electronic format (PDF preferred) and acknowledge that I am willing to pay reasonable charges up to \$100.00 in fees. Consistent with FCC FOIA guidance, please see attached. I would like to access a list of fines issued over to television broadcasters by the FCC in the month of September of 2014. I'm looking for the number of fines issued more so than the reasons behind the fine. It is also of interest in the total amount fined for the month as well. FCC Order or Orders described in the attached press release/summary: https://www.fcc.gov/document/fcc-takes-next-big-steps-reducing-inmate-calling-rates

<p>I would like to know all the phone calls from (which was my current number for the past year). It is a NET10 phone, and if this phone had a tap on it from any 3rd party, and whom, and why. Every time I have called any customer service on any communication line, I have always received a foreign country. I currently have been charged twice (2 times) for each tap. I am deducted minutes off my time card for either the recording or sending of texts, and then an unknown "Call Divert Set" appears, and I am charged again. I do not understand this, and should not ever be charged twice. Also, even though I send these texts, some are put in my "drafts" folder. This is why I want a break-down of any and all charges on this phone. I have had 3 SNAP benefits phones, which were defective, with the telephone number. This telephone could not even keep the atomic time, (an Oregon benefit), and most of the customer service representatives, were young, and did not even know what I was talking about, when I mentioned atomic time. My daughter's phone number, which she established in 2004 was subsequently disconnected sometime in 2014. This was a Sprint phone number. Someone has this number in 2014, around August, and I know she would NOT get rid of this phone number, after having it so long. I have had breaches, and death threats on my daughters while in High School, and living with me. My computer has reported her as being in Syria. Something is desperately wrong. The police are not cooperating with me, so I have a right to this information. The communication between my daughters and myself has been compromised, and I do not know by whom, but whoever has done this has broken the law without due cause, and no known reasons.</p>

<p>I'm requesting under the Freedom of Information Act (FOIA) any and all correspondence from consumers related to Comcast's usage-based pricing trials. Such correspondence from consumers to the FCC may refer to Comcast's &quot;usage-based pricing&quot; or data &quot;caps&quot; of 300 gigabits per month. Since the FCC has already released such data to the blog CutCabToday (link below), I thought the commission could meet my request without delay. http://www.cutcabtoday.com/fcc-complaints-comcasts-data-caps/ Thank you, Gerry Smith Bloomberg News 212-617-3712 gsmith233@bloomberg.net</p>

Please consider waiving any costs associated with this request or keep the work within your policy of what you'd do for free. In the interest in saving on postage and paper, I request records be printed double-sided (duplex printing). I request the following records: 1. A table of contents for the Code of Federal Regulations, Title 47. I do not have access to the internet to obtain any of these records online. I hereby request copies of any letters or emails sent from Sen. Bob Corker (or employees in his office) to the Federal Communications Commission regarding media companies owned by Henry Lukens. These media companies go by the following names: - Lukens Holdings - Lukens Communications - Equity Media - Digital Networks LLC I am looking for copies of any and all communications between Jan. 1, 2007 and the present. Any such communications would likely have been sent to the Office of the Chairman, the Media Bureau or the Office of Legislative Affairs. If you determine that any of the documents sought by this request are exempt from disclosure, and you decide to apply an exemption, please state the legal and factual basis for that decision. If you determine that only portions of either document must be withheld under an exemption, I request that the documents be produced with redactions. I intend to use these records with a story to be published in The Wall Street Journal that will provide a benefit to a large segment of the public, and therefore request that any fees be waived. I request in the interest of public disclosure all emails, faxes, texts and transcribed conversations between the FCC and Comcast and all of its subsidiaries regarding a tiered pay per usage pricing system for cable internet services. As it is in the public domain that FCC Chairmen Tom Wheeler was a cable lobbyist at one point in his career, I request all emails, documents, faxes, letters and transcribed communications between Tom Wheeler and Comcast and any of its subsidiaries regarding billing or operational policies and proposed policies, as well as any communications in any form regarding consumer usage of internet [Update] As there was only a response with previous FOIA requests and did not require search time, I request that I receive the full 2 hours of search time, regarding all communication, faxes, emails (including attachments) between Tom Wheeler and Comcast. As I have called multiple people in the FCC numerous times and have been ignored each time, I request a count of all phone numbers originating outside of government agencies that have left messages with the FCC that were not returned. I also request a list of all FCC complaints that were closed with the consumer being the last person to leave an update on the FCC Consumer Complaints website, and any FCC complaints that were escalated and what the FCC has done in order to rectify the situation. I request in the interest of public disclosure all documentation, emails, faxes and transcribed conversations regarding the pricing of access to high speed internet in the United States compared to that in other countries. The FCC is meant to protect consumers and the following disclosure all emails, faxes, texts and transcribed conversations between the FCC and high quality video is roughly 3GB per hour. Allowing Comcast to put a cap on the amount of data as well as the speed is an obvious attempt to force customers back to television, which does not have a cap on the amount of data that can be used in a month. Adding in that a standard game download is 40 to 100GB, this is an unreasonable cap for data. I also refer to the attached chart showing prices for internet access around the world as evidence that the FCC is not fulfilling it's duty to consumers as a watchdog organization. I am requesting complaints fitting a specific set of criteria, and filed with the FCC between Jan. 1 2014 and February 1, 2016, from complainants in the state of New Mexico. Please produce any and all complaints filed by customers of AT&T, Verizon, Sprint, T-Mobile, MetroPCS, TracFone, Cellular One, Choice Wireless, Fuego Wireless LLC, and Leaco Wireless Inc., indicating interruption in calls to emergency services 911. Complaints responsive to this request will include any and all complaints indicating wireless/mobile phone calls to 911 either dropped, disconnected, or otherwise inaccessible to customers of the aforementioned wireless providers. Thank you for your response. Please see attached. Any and all correspondence or complaints pertaining to the Super Bowl broadcast on Feb 7, 2016, including the halftime show, football game, and postgame remarks All communications between the Federal Communications Commission and Zipwhip, Inc. ("Zipwhip"), including any non-public submissions made by Zipwhip to the Commission. Please note that this FOIA request does not seek any confidential information that may have been submitted by Zipwhip to the Commission. To the extent that any confidential information exists that is responsive to this request, please contact me to discuss the most efficient way to produce the non-confidential portions of such responsive documents. Thank you. FCC regulations prohibit the use of mobile phones in flight. I request all records examining and approving the use of cell site simulators on an aircraft or near an airport. If the data further shows who the incumbent LEC's are and Competitive LEC's are, I request that data as well. More specifically, I would like to receive a copy of the GIS layer(s), preferable in polygon vector format (GIS layers) with all attribution that accompanied the GIS layers used during the study. The attribution would include company name. I also request the resulting data/layers that were a byproduct of the study, such as the overlapping boundaries. FCC-2016-000457	03/11/2016 04/08/2016 03/21/2016	Closed	No records	On Feb. 19, 2016 Fadi Chehade, President and Chief Executive Officer of ICANN wrote to Senators Cruz, Lankford and Lee about the commitment the U.S. government has made to the world since 2000 to remove the central role of governments from the technical administration of the one global internet. Earlier, in January 2016, Mr. Chehade has been quoted as stating that the proposed IANA transition was important symbolically because the U.S. was really a steward for the internet, but for the day-to-day accountability, it is minimal. See Internet set up out cord with U.S. government this year. The Star Online, 14 Jan. 2016. Please provide any and all written information in your agency's possession concerning the response to Mr. Chehade's Feb. 19, 2016 letter particularly in light of the March 30, 2014 Wall Street Journal article, Open Internet: Clinton v. Obama, noting that M. Clinton defended U.S. oversight of the domain name system. Please provide any and all written information, if any, in your agency's possession confirming any U.S. government statement concerning the commitment the U.S. government has made to the world, including the specific person making any such commitment, his or her name and job title, and the statutory authority for such a commitment. Please include any and all written information, if any, since the 14 Jan. 2016 statement to refute Mr. Chehade's statement that the U.S. has been a good steward of the internet or that its day to day role has been minimal. Please also include any and all written information since the Feb. 19, 2016 statement concerning the question whether the proposed ICANN IANA transition and transfer of control to a foreign President of ICANN would be consistent with the fiduciary responsibilities of the ICANN Board of Directors and with the terms of the ICANN contract with NTIA.

Please include your current classification of fax services in light of your assessment of the "substantial replacement" if any, of the transmission of fax over telephone service by email or other methods. Please also provide me with any and all information associated with the coordination of the FCC decision to transfer administration of the North American Numbering Plan to a Swedish for-profit company and the ICANN proposal to NTIA to transfer administration of U.S. assigned names and numbers to a Swedish-controlled non-profit company. Verizon Wireless has found numerous locations where the Ubiquiti NanoBridge was causing interference at 780 MHz which is licensed to Verizon Wireless nationwide. This problem was identified in early 2013 in Salt Lake City, the FCC had a field agent come to town and conducted testing at 3 different locations. I understand that the FCC laboratories had purchased this device back in 2013 and tested it. I would like to see a copy of the report and the findings. What do you have to do to get a copy of the report?
