MISSION AREA BRIEFING MATERIAL

Each Mission Area template contains the following sections:

I. **Organizational Overview**

   Mission Area Fact Sheet
   Organizational Chart
   Biographies for Career and Political Staff in Key Leadership Positions
   Overview of Agency Programs and Operations
   Budget and Staffing Summary

II. **Top Issues/Hot Topics**

   Timeline
   Mission Area Issues
   GAO and OIG Audits
AGENCY BRIEFING MATERIAL

Each Executive Operation template contains the following sections:

I. **Organizational Overview**

   Agency Fact Sheet
   Agency’s Mission/Strategic Plan
   Key Mission Delivery Performance Measures
   Organization’s History
   Organizational Chart
   Biographies of Career Staff in Key Leadership Positions
   Biographies of Political Staff in Key Leadership Positions
   Organizational Budget and Financial Management
   Enterprise Workforce Data

II. **Policies and Regulations**

   Statutory Authorities
   Important Policies and Regulations
   Overview of the Policy/Regulation Review Process
   GAO and OIG Audits

III. **Congressional Relations and Issues**

   Overview

IV. **Internal and External Stakeholders**

   Important Relationships with Other Federal Departments or Organizations
   Stakeholder Group Overview
   Recent Engagements with Stakeholder Groups

V. **Top Issues**

   Hot Topics
   Timeline

**Appendix A: Acronyms**
WHAT WE DO: OUR MISSION

We provide leadership on food, agriculture, natural resources, rural development, nutrition, and related issues based on sound public policy, the best available science, and efficient management.

WHO WE ARE: OUR WORKFORCE

As of mid-September 2016, USDA had a total of 111,193 employees, including 25,709 part-time employees. This equated to having 95,098 total staff years (SYs).

Of the 111,193 total employees 101,003 were outside the Washington, D.C. area and 10,190 were in the Washington D.C. area.

KEY UPCOMING DECISIONS

Establish Decision-making Process. Incoming policy officials may wish to set forth operating procedures to be followed by agencies and offices with regard to actions that involve significant resource commitments, make public announcements with longer range implications or involve other potentially policy-sensitive actions to ensure incoming policy officers are fully involved in matters of policy interest.

Determine priorities to be addressed in the FY 2018 President’s Budget. Developing a fiscal year 2018 Budget will likely be an immediate priority of the new Administration. The exact timeline and request for information will be subject to guidance from OMB, but it is likely that Departments will be required to provide FY 2018 Budget proposals to OMB within the first month to six weeks of the Administration. In previous Presidential transition years the new Administration has released a budget overview in early February, which outlines key policy priorities from the new Administration. The detailed FY 2018 budget materials will likely be submitted to the Congress in spring, 2017 (historically April or May).

Develop a new USDA Strategic Plan as statutorily required to guide longer term policy priorities. The Government Performance and Results Act (GPRA) Modernization Act of 2010 requires all Departments to produce a new Strategic Plan at the beginning of each new term of an Administration. An initial draft of the new USDA Strategic Plan FY2018 – 2022 is due to OMB June 2nd, 2017.

Identify USDA regulatory priorities. A review of recent regulatory actions and the development of rulemaking priorities will be needed within the first months of the Administration. The current Administration’s Regulatory Plan and Fall Regulatory Agenda are expected to be published sometime in November. The new Administration will likely be publishing its first Regulatory Agenda in the spring of 2017.

Develop a Farm Bill reauthorization strategy. The Agricultural Act of 2014 (2014 Farm Bill) was enacted on February 7, 2014. While some provisions of the 2014 Farm Bill are permanent legislation many other provisions expire with the 2018 crop, calendar, or fiscal year and would need to be reauthorized or amended in order to continue beyond the expiration date. The exact timeline for the development of the next Farm Bill will be determined by Congress, but the incoming Administration will need to determine the extent and process for engaging with stakeholders and the Congress.

The Agricultural Outlook Forum sponsored by the Office of the Chief Economist is currently scheduled to take place in late February. The Forum generally includes a key role for the Secretary. This will be one of the first opportunities for the incoming Administration to communicate policy priorities with a large number of stakeholders.
BUDGET HIGHLIGHTS FY 2016

Approximately 84 percent of USDA budget authority is mandatory and 16 percent is discretionary funding. About 67 percent of the Department’s total budget authority is in the Nutrition Assistance area.

Over half of the $26 billion in FY 2016 discretionary funding is in five programs: the Women, Infants and Children Program; PL 480 Title II; Rental Assistance; Wildland Fire; and Food Safety.

EMPLOYMENT HIGHLIGHTS FY 2016

Total Employment: 111,193
REAL PROPERTY OVERVIEW

As the fourth largest Executive Agency landholder in the Federal Government, and the fifth largest agency in terms of building square foot usage, the Department's real property asset portfolio consists of the following:

- 20,645 owned buildings totaling 41.3 million square feet;
- Approximately 193 million acres of land, 99% of which is public domain and stewardship land;
- 15.2 million square feet of commercially-leased building space with an annual rent of $241 million; and
- Approximately 1,100 GSA space assignments, occupying 10.2 million usable square feet with $228 million in annual rent

Of the USDA agencies and offices that occupy space, four agencies account for approximately 99 percent of the total owned real property portfolio. These are:

- Agricultural Research Service (ARS);
- Animal and Plant Health Inspection Service (APHIS);
- Forest Service (FS); and
- Natural Resources Conservation Service (NRCS)
The United States Department of Agriculture (USDA) works to support the American agricultural economy to strengthen rural communities; to protect and conserve our natural resources; and to provide a safe, sufficient, and nutritious food supply for the American people. The Department’s wide range of programs and responsibilities touches the lives of every American every day. The following pages provide information about some of our agencies and offices, their missions, responsibilities, and services they provide.

Farm and Foreign Agricultural Services

Farm Service Agency
The Farm Service Agency (FSA) ensures the well-being of American agriculture, the environment, and the American public through the administration of farm commodity programs; farm ownership, operating, and emergency loans; conservation and environmental programs; emergency and disaster assistance; and domestic and international food assistance. FSA programs are delivered through an extensive network of field offices in 2,248 USDA County Service Centers and 51 State Offices.

Foreign Agricultural Service
The Foreign Agricultural Service (FAS) works to improve foreign market access for U.S. products and administers market development and export financing programs. FAS helps U.S. exporters develop and maintain markets overseas for U.S. food and agricultural products. FAS helps developing countries improve their agricultural systems and build their trade capacity.

Risk Management Agency
The Risk Management Agency (RMA) administers the Federal Crop Insurance Corporation (FCIC) programs and promotes national welfare by improving the economic stability of agriculture through a secure system of crop insurance and risk management tools. Through a network of public and private-sector partners, RMA creates crop insurance and risk management products, provides risk management education and outreach, and ensures program accessibility and integrity.

Food, Nutrition, and Consumer Services

Food and Nutrition Service
The Food and Nutrition Service (FNS) administers the USDA nutrition assistance programs that provide children and low-income people access to food, a healthful diet, and nutrition education. Programs include the Supplemental Nutrition Assistance Program (SNAP, formerly called the Food Stamp Program), the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC), School Lunch and Breakfast, among others.
**Center for Nutrition Policy and Promotion**
The Center for Nutrition Policy and Promotion (CNPP) establishes Federal nutrition policy through the Dietary Guidelines for Americans, sets priorities for nutrition research, sets nutrition standards, and disseminates dietary guidance. It maintains the MyPlate food guidance system.

**Food Safety and Inspection Service**
Touching the lives of millions of people every day, the Food Safety and Inspection Service (FSIS) is the public health agency responsible for ensuring that the Nation's commercial supply of meat, poultry, and processed egg products is safe, wholesome, and correctly labeled and packaged. FSIS also manages the USDA Meat and Poultry Hotline, which provides consumers with answers to their food safety questions.

**Marketing and Regulatory Programs**

**Agricultural Marketing Service**
The Agricultural Marketing Service (AMS) administers programs that facilitate efficient, fair marketing of U.S. agricultural products, including food, fiber, and specialty crops. AMS identifies and promotes the development of marketing opportunities for the agricultural community by conducting and supporting research and providing information on farmer direct marketing activities. AMS programs promote a strategic marketing perspective that adapts product and marketing practices and technologies to the issues of today and the challenges of tomorrow.

**Animal and Plant Health Inspection Service**
The Animal and Plant Health Inspection Service (APHIS) makes a significant contribution to the value of the Nation’s food supply by protecting U.S. agricultural resources from pests and diseases, managing wildlife damage, regulating genetically engineered organisms, and administering the Animal Welfare Act. APHIS programs integrate plant and animal disease surveillance, epidemiology, emergency response, and information delivery to ensure the marketability of U.S. agricultural products. APHIS also works to resolve and manage trade issues related to animal or plant health.

**Grain Inspection, Packers and Stockyards Administration**
The Grain Inspection, Packers and Stockyards Administration (GIPSA) facilitates the marketing of livestock, poultry, meat, cereals, oilseeds, and related agricultural products. The agency promotes fair and competitive trading practices for the overall benefit of consumers and American agriculture.

**Natural Resources and Environment**

**Forest Service**
The Forest Service (FS) manages 193 million acres of public lands in 155 national forests and 20 grasslands and is the largest forestry research operation in the world. The Forest Service provides technical and financial assistance to help rural and urban citizens, including private landowners, care for forest, watersheds, and rangelands in their communities.
The Natural Resources Conservation Service (NRCS) helps people help the land through scientifically based, locally led voluntary conservation efforts and improve natural resources on private lands. NRCS work results in productive lands and a healthy environment through reduced soil erosion; water and air quality; energy conservation; restored woodlands and wetlands; enhanced fish and wildlife habitat; and reduced upstream flooding.

**Research, Education and Economics**

**Agricultural Research Service**  
The Agricultural Research Service (ARS) is the principal in-house research agency of the USDA. ARS is charged with extending the Nation's scientific knowledge through the administration of its national programs, as well as by conducting research projects in animal and crop production and protection, human nutrition, food safety, bioenergy, the environment, and other topics that affect the American people on a daily basis.

**Economic Research Service**  
The Economic Research Service (ERS) is a primary source of economic information and research in USDA. ERS conducts its research program to inform public and private decision making on economic and policy issues involving food, farming, natural resources, and rural development. ERS's economists and social scientists conduct research, analyze food and commodity markets, produce policy studies, and develop economic and statistical indicators. ERS staff disseminates economic information and research results through an array of outlets.

**National Agricultural Statistics Service**  
The National Agricultural Statistics Service (NASS) is the official Federal statistical agency for agriculture. The agency serves U.S. agricultural and rural communities with accurate, timely, and useful statistical products and services that are vital information to monitor the ever-changing agricultural sector and carry out farm policy. Every 5 years NASS conducts the Census of Agriculture, which is the only source of uniform, comprehensive agricultural data for every county in the United States.

**National Institute of Food and Agriculture**  
The National Institute of Food and Agriculture (NIFA) impacts the lives of millions of Americans each day by supporting exemplary research, education, and extension that address many challenges facing our Nation through collaboration with historically Black colleges and universities, Hispanic-serving institutions, and Tribal colleges. You are connected to NIFA through your nearest Extension office, which provides answers to concerns through educational materials and Web-based information.
**Rural Development**

USDA Rural Development (RD) is composed of Rural Business-Cooperative Programs, Rural Housing and Community Facilities Programs, and Rural Utilities Programs. RD offers rural communities a broad array of financial, technical, and educational resources in order to establish and grow rural businesses and cooperatives. RD provides financing for single family homes and multi-family housing developments, and essential community facilities. RD helps to finance the development of electric, telephone, telecommunication, and water and wastewater infrastructures to create affordable utilities.

**Departmental Management**

Departmental Management (DM) provides managerial leadership and integrated services to enable USDA to achieve its priorities and works to ensure through applicable laws, treaties, and regulations that all citizens are provided full access to USDA services and programs.
Strategic Goal 1. Assist Rural Communities to Create Prosperity so They Are Self-sustaining, Repopulating, and Economically Thriving
   1.1 Enhance Rural Prosperity, Including Leveraging Capital Markets to Increase Government’s Investment in Rural America
   1.2 Increase Agricultural Opportunities by Ensuring a Robust Safety Net, Creating New Markets, and Supporting a Competitive Agricultural System
   1.3 Contribute to the Expansion of the Bioeconomy by Supporting Development, Production, and Consumption of Renewable Energy and Biobased Products

Strategic Goal 2: Ensure Our National Forests and Private Working Lands are Conserved, Restored, and Made More Resilient to Climate Change, While Enhancing Our Water Resources
   2.1 Improve the Health of the Nation’s Forest, Grasslands and Working Lands by Managing Our Natural Resources
   2.2 Lead Efforts to Mitigate and Adapt to Climate Change, Drought, and Extreme Weather in Agriculture and Forestry
   2.3 Contribute to Clean and Abundant Water by Protecting and Enhancing Water Resources on National Forests and Working Lands
   2.4 Reduce Risk of Catastrophic Wildfire

Strategic Goal 3: Help America Promote Agricultural Production and Biotechnology Exports as America Works to Increase Food Security
   3.1 Ensure U.S. agricultural resources contribute to enhanced global food security
   3.2 Enhance America’s Ability to Develop and Trade Agricultural Products Derived from New Technologies

Strategic Goal 4: Ensure that All of America’s Children Have Access to Safe, Nutritious, and Balanced Meals
   4.1 Improve Access to Nutritious Food
   4.2 Promote Healthy Diet and Physical Activity Behaviors
   4.3 Protect Public Health by Ensuring Food is Safe
   4.4 Protect Agricultural Health by Minimizing Major Diseases and Pests to Ensure Access to Safe, Plentiful, and Nutritious Food

Strategic Goal 5: Create a USDA for the 21st Century that is High Performing, Efficient, and Adaptable
   5.1 Develop a Customer-centric, Inclusive, and High-performing Workforce by Investing in and Engaging Employees to Improve Service Delivery
   5.2 Build a Safe, Secure, and Efficient Workplace by Leveraging Technology and Shared Solutions across Organizational Boundaries
   5.3 Maximize the Return on Taxpayer Investment in USDA Through Enhanced Stewardship Activities of Resources and Focused Program Evaluation
I. **Organizational Overview**

Organizational Chart

Organizational Chart/Structure: The organizational structure of the immediate Office of the Secretary and Deputy Secretary is at the discretion of the Secretary. The Secretary and Chief of Staff should work in collaboration with the White House Liaison to staff the office and determine the roles and responsibilities of each person.

**Biographies for career and political staff in key leadership positions**

**Secretary of Agriculture Tom Vilsack**

Tom Vilsack serves as the Nation's 30th Secretary of Agriculture. As leader of the U.S. Department of Agriculture (USDA), Vilsack is working hard to strengthen the American agricultural economy, build vibrant rural communities and create new markets for the tremendous innovation of rural America. In more than six years at the Department, Vilsack has worked to implement President Obama's agenda to put Americans back to work and create an economy built to last. USDA has supported America's farmers, ranchers and growers who are driving the rural economy forward, provided food assistance to millions of Americans, carried out record conservation efforts, made record investments in our rural communities and helped provide a safe, sufficient and nutritious food supply for the American people.
The Obama Administration and USDA have made historic investments in America's rural communities, helping create ladders of opportunity for rural people and building thriving rural economies for the long term. As chair of the first-ever White House Rural Council, Secretary Vilsack and USDA are taking steps to strengthen services for rural businesses and entrepreneurs by finding new ways to make the connection between the demand for investment in rural areas and the financial community.

USDA is promoting American agriculture by conducting cutting-edge research and expanding markets at home and abroad. The years 2009-2014 represent the strongest six years in history for agricultural trade, and new trade agreements President Obama signed with Colombia, South Korea and Panama will create even more export opportunities for American farmers and ranchers. Here at home, USDA has helped increase the number of farmers markets by 180 percent since 2006, and made more than 500 investments in local food infrastructure - including food hubs, local processing facilities and distribution networks - to help connect farmers and consumers and create jobs all along the supply chain for local food.

Vilsack knows that conserving natural resources is critical to the long-term strength of our economy. That is why USDA has enrolled a record number of private working lands in conservation programs and implemented new strategies - such as landscape-scale efforts - to restore our forests and clean our water supply. This work is creating private sector jobs protecting and rehabilitating our forests and wetlands, and providing increased opportunities for outdoor recreation, which supports 6.1 million direct jobs across the country.

Under Vilsack's leadership, USDA has partnered with First Lady Michelle Obama's Let's Move! initiative to improve the health of America's children. He helped pass and implement the Healthy, Hunger Free Kids Act, enabling USDA to help combat child hunger and obesity by making the most significant improvements to school meals in 30 years. He has led a comprehensive effort to improve the safety of the American food supply, implementing changes to food safety standards to prevent illnesses by reducing the prevalence of E. coli, salmonella and campylobacter in our meat and poultry.

He has made civil rights a top priority, reaching historic resolutions to all major past cases of discrimination brought against USDA by minority groups, and taking definitive action to move USDA into a new era as a model employer and premier service provider.

Prior to his appointment, Vilsack served two terms as the Governor of Iowa, in the Iowa State Senate and as the mayor of Mt. Pleasant, Iowa. A native of Pittsburgh, Pennsylvania, Vilsack was born into an orphanage and adopted in 1951. After graduating Hamilton College and Albany Law School in New York, he moved to Mt. Pleasant, his wife Christie's hometown, where he practiced law. The Vilsacks have two adult sons and two daughters-in-law - Doug, married to Janet; and Jess, married to Kate. They also have four grandchildren.
Acting Deputy Secretary of Agriculture Michael Scuse

Michael Scuse was appointed Acting Deputy Secretary of the U.S. Department of Agriculture on March 30, 2016. Alongside Secretary Vilsack, Acting Deputy Secretary Scuse leads the department's charge to strengthen the agricultural landscape, sustain vibrant rural communities and create new markets that support the innovation of rural America. A lifelong Delaware farmer, Acting Deputy Secretary Scuse is a champion for America's farmers and ranchers and the unique challenges they often face. Upon assuming the role of Acting Deputy Secretary, Scuse has stated his highest priority is to advocate for America's farmers and ranchers, emphasizing the importance of agriculture and its dynamic influence on the lives of Americans and the economy.

Most recently, Acting Deputy Secretary Scuse served as the Under Secretary for Farm and Foreign Agricultural Services (FFAS), following nomination by President Barack Obama and confirmation by the U.S. Senate in April 2012. In this capacity, he also served as President of the USDA Commodity Credit Corporation.

As FFAS Under Secretary, Scuse oversaw USDA's Farm Service Agency, Risk Management Agency, and Foreign Agricultural Service, where he led initiatives to improve competitiveness of American products in the global marketplace, create new markets to increase rural economic opportunity, and deliver farm assistance programs that help keep America's farmers and ranchers in business in the wake of uncertainty caused by markets and weather. As President of the Commodity Credit Corporation, he worked to stabilize, support and protect farm income and prices while helping to maintain balance and adequate supplies of agricultural commodities and aids in their orderly distribution.

Acting Deputy Secretary Scuse is a distinguished public servant. Before joining USDA in 2009, he served as Delaware Secretary of Agriculture, President of the Northeast Association of State Departments of Agriculture (NASDA), and Vice President of the National Association of State Departments of Agriculture (NASDA), and later as Chief of Staff to Governor Ruth Ann Minner. He was previously Chairman of the Kent County Regional Planning Commission in Delaware and Chairman of USDA's Delaware FSA Committee. His commitment to service has been lauded by many, and in 2012, Delaware Agriculture Secretary Edward Kee presented him the Award for Distinguished Service to Agriculture. Scuse was also awarded the Medal of Achievement from the Delmarva Poultry Industry in 2006.

Scuse and his wife, Patrice, reside in Smyrna, Delaware, where they operate a corn, soybean and wheat farm that's been in their family for generations.
Chief of Staff to the Secretary Karla Thieman

Karla Thieman has served as the USDA Chief of Staff since September 2015. Thieman first joined the USDA in April 2014, serving as a Senior Policy Advisor to Secretary Tom Vilsack and later as Chief of Staff to Deputy Secretary Krysta Harden. Prior to joining USDA, Thieman worked for the Senate Agriculture Committee for more than five years, serving under three Chairs of the Committee: Senator Tom Harkin, Senator Blanche Lincoln, and Senator Debbie Stabenow. As senior professional staff on the Agriculture Committee, she handled a portfolio that included livestock, food safety, dairy, energy and climate change. Thieman previously served in leadership positions on the campaigns of Senators McCaskill, Udall and Bennet. Thieman grew up on a third-generation family farm in central Missouri where her family raised cattle, corn and soybeans. She has a degree in Agricultural Economics from the University of Missouri.

Chief of Staff to the Deputy Secretary Trevor Reuschel

Trevor Reuschel joined the Department in February of 2015 to serve as the Legislative Director before taking on the role of Deputy Assistant Secretary for Congressional and eventually Chief of Staff to the Deputy Secretary. He also is the current Energy Policy Advisor in the Office of the Secretary. Prior to joining the Department, Trevor spent seven years in Senator Durbin’s office in a variety of roles including most recently as Legislative Assistant covering Agriculture, Labor, Telecom, and Consumer Safety issues. In this role, he was tasked with moving the Assistant Majority Leader’s legislative agenda in these areas, advising on issues under consideration at the relevant committees, and monitoring and identifying potential problems on the Senate floor. Trevor grew up in the small community of Astoria in Fulton County, IL. He attended and received a B.A. in History from Quincy University in Quincy, IL.

Deputy Chief of Staff for Operations Bianca Oden

Bianca Oden was appointed as a Special Adviser to the Chief Administrative Services Officer (CASO) at the General Services Administration in 2012. Over the next three years, she accepted roles within the organization of increasing reasonability, including: Acting Director of the Freedom of Information Act and Chief of Staff for the CASO. In these positions, she managed communication and directed portfolio/projects related to internal management and support services within agency: Personnel, Procurement, Organizational Design, Workforce Management, and Freedom of Information Act (FOIA), Records Management, and Administrative/Professional Services Management. She also formulated strategic plans, short-/long-term goals, and mission statements for organization and ensured compliance with organizational directives.

Ms. Oden previously worked in Senate and House Congressional offices. In these capacities, she worked on judiciary, foreign relations and human trafficking issues. In these roles, she provided research and assisted with development of public policies and legislation; participated in meetings and gained firsthand experience in legislative process; collaborated with team and worked on developing legislative proposals, researching and analyzing bills, and responding to constituent inquiries. Before working in Congress, Ms. Oden was a Law and Policy Analyst for the University of Maryland, Center for Health and Homeland Security (CHHS), where she provided
United States Department of Agriculture  
2016 Presidential Transition  
Office of the Secretary (OSEC)

legal analysis and development of plans, policies and strategies for government, corporate, and institutional clients.

A native of Upstate New York, Ms. Oden earned a Bachelor of Arts in Bio-psychology and a Master’s degree in Public Policy from the University of Maryland, Baltimore County. Ms. Oden also received a doctor of jurisprudence degree (J.D.) from the Pennsylvania State University, Dickinson School of Law.

Deputy Chief of Staff for Policy Dr. Melinda Cep:

Dr. Cep is the Deputy Chief of Staff of Policy to the Secretary. She joined USDA in August 2013 as Senior Advisor to the Under Secretary of Marketing and Regulatory Programs, before working in the Office of Congressional Relations. She most recently served as Senior Advisor in the Office of the Secretary. Prior to USDA, she worked on the Hill for several years for Congresswoman Rosa L. DeLauro.

She holds a BS from Virginia Tech and a DVM from Virginia-Maryland Regional College of Veterinary Medicine. Dr. Cep served as a Congressional Fellow with the American Veterinary Medical Association and the American Association for the Advancement of Science.

Overview of Agency Programs and Operations

The organizational structure of the immediate Office of the Secretary and Deputy Secretary is at the discretion of the Secretary. The Secretary and Chief of Staff should work in collaboration with the White House Liaison to staff the office and determine the roles and responsibilities of each person.

Office of the Secretary - Along with the Mission areas and offices headed by Assistant Secretaries, the following offices report directly to the Office of the Secretary (these offices have submitted their own transition materials):

- **Office of Budget and Program Analysis** coordinates the preparation of the Department’s budget estimates, legislative reports and regulations.

- **Office of the Chief Financial Officer** serves as the principal advisor to the Secretary and Senior Officials on all matters related to financial management, financial management systems, financial control and accounting, internal control and assessment and financial management training.

- **Office of the General Counsel** is an independent legal agency within the U.S. Department of Agriculture (USDA). OGC provides legal advice and services to the Secretary of Agriculture and to all other officials and agencies of the Department with respect to all USDA programs and activities.
Office of the Inspector General performs audits and investigations of the Department's programs and operations. Further, OIG works with the Department management on activities to promote economy, efficiency, and effectiveness or that prevent and detect fraud and abuse in programs and operations, both within USDA and in non-Federal entities that receive USDA assistance.

Office of Communications provides leadership, expertise, counsel, and coordination for the development of communications strategies which are vital to the overall formulation, awareness and acceptance of USDA programs and policies, and serves as the principal USDA contact point for the dissemination of consistent, timely information.

Office of the Chief Economist advises the Secretary of Agriculture on the economic implications of policies and programs affecting the U.S. food and fiber system and rural areas. OCE supports USDA policy decision making by analyzing the impact of proposals and coordinating a response among several USDA agencies.

Faith Based and Neighborhood Partnerships focuses on partnering with non-profit and community organizations, both secular and religious to make a positive impact.

The Office of Advocacy and Outreach (OAO) serves as an advocate and avenue for underserved constituents to participate in and benefit from the programs offered by the Department.

The Office of Tribal Relations (OTR) serves as a single point of contact for Tribal issues and works to ensure that relevant programs and policies are efficient, easy to understand, accessible, and developed in consultation with the American Indians and Alaska Native constituents they impact.

Office of the Deputy Secretary - While the exact role of the Deputy is assigned at the discretion of the Secretary, the Deputy Secretary has traditionally served more of a Chief Operating Officer role – including spearheading, in coordination with OBPA, the Departments budget development process. Further, the Deputy Secretary has monthly briefings provided by CIA. In addition to offices reporting to the Secretary, the following offices currently report directly to the Office of the Deputy Secretary (these offices have submitted their own transition materials):

Office of Hearings and Appeals (OHA) (formerly the National Appeals Division (NAD)) is responsible for all administrative appeals arising from program activities of assigned Agencies, as well as such other administrative appeals arising from decisions of Agencies of USDA designated by the Secretary.

Office of Small and Disadvantage Business Utilization (OSDBU) works to ensure that the Department’s purchasing agencies engage small businesses so that we have a dynamic, diverse and reliable small vendor pool. While the OSDBU is technically
housed within Departmental Management, they report directly to the Secretary or his designee (the Deputy).

- **Office of Pest Management Policy (OPMP)** coordinates the Department's strategic planning and activities related to pest management, including serving as USDA’s voice in the pesticide regulatory process and related interagency affairs, primarily with the Environmental Protection Agency. Further, the office promotes the development of new pest management approaches that meet the needs of an evolving and sustainable U.S. agricultural system. (full description is included in ARS’ transition materials)

**OSEC Senior Advisor Portfolios:** In addition to mission area staff and offices reporting to the OSEC, the current OSEC organization includes several Senior Advisors (portfolios listed below).

**Senior Advisor:**
- Local and regional food systems
- Organic agriculture
- Urban agriculture
- Access to healthy food
- Labeling and marketing issues
- Food Safety Modernization Act (FSMA) Implementation

**Senior Advisor:**
- Rural Development loan & grant portfolio
- Rural Opportunity Initiative (ROI)
- Interagency Place-Based Investment Initiatives
- White House Rural Council
- Opioids

**Senior Advisor:**
- Office of Advocacy and Outreach and related programs
- Contact for Feds Feed Families

**Senior Advisor:**
- Conservation
- Pollinators (habitat)
- Immigration
- Opioids

**Senior Advisor:**
- Food safety
- Food waste
- Climate change
United States Department of Agriculture  
2016 Presidential Transition  
Office of the Secretary (OSEC)

- Secretary’s priority reports
- Disaster recovery and response
- Misc special projects (Puerto Rico debt crisis/Vietnam drought conference)
- Foundation for Food and Ag Research

Senior Advisor:

- Oversight of USDA Biotechnology Deregulations and Petitions
- GMO Labeling, including USDA Process Verified Program
- Oversight of all USDA Pesticide and Ag. Chemical Issues under the FIFRA
- Regulatory Oversight for CFR Part 340 (Biotech Regulations)
- Policy lead for White House Coordinated Framework for the Regulation of Biotechnology
- Oversight of USDA’s AC21 Committee on Coexistence
- Bioeconomy and Biopreferred Program
- White House Made in Rural America Initiative
- Energy and Biofuels

Department Wide Cross Cutting Issues and Initiatives – The following list highlights several ongoing or upcoming Department wide issues or initiatives that may require attention moving forward. The list also includes a career contact who is familiar with or leading the work in each of these areas. (The list does not encompass every issue underway that may involve work at multiple agencies within the Department.)

- New and Beginning Farmers, Veterans and Women – Lilia McFarland; 
  Lilia.McFarland@osec.usda.gov
- Placed Based Initiatives (Strikeforce, Promise Zones, Community Economic Development) – Claudette Fernandez; Claudette.Fernandez@wdc.usda.gov
- Local and Regional Food Systems – Tricia Kovacs; Tricia.Kovacs@ams.usda.gov
- Climate (Climate Hubs and Building Blocks for Climate Smart Agriculture) – Bill Hohenstein; WHOHENST@oce.usda.gov
- Antimicrobial Resistance – Neena Anandaraman; neena.anandaraman@osec.usda.gov

Budget and Staffing Summary

The organizational structure and budget expenditures (except when explicitly directed by Congress) of the immediate Office of the Secretary and Deputy Secretary is at the discretion of the Secretary. The Secretary and Chief of Staff should work in collaboration with the White House Liaison to staff the office and determine the roles and responsibilities of each person.

WHO WE ARE: OUR MISSION AREA

The USDA Center for Faith-based and Neighborhood Partnerships works to build bridges between USDA and nonprofit organizations, both secular and faith-based, to better serve Americans in need. The Center advances this work through collaboration with USDA agencies, counterpart Centers across the Federal government as well as the White House Office of Faith-Based and Neighborhood Partnerships.

WHO WE ARE: OUR WORKFORCE

The Center has a Director, Staff Assistant and Partnership & Outreach Specialist. Relationships with the agencies are established depending on the initiative, project, or level of engagement.

WHO WE SERVE: OUR CONSTITUENTS

The Center works with diverse partners from both faith and secular communities who are often role models in their communities. We are proud to support these leaders by providing the resources they need to serve, making sure families are safe, and that children can be healthy and free of the scourge of hunger.

KEY UPCOMING DECISIONS

Depending on the start date, three key decisions for the first 30-60 days include:

- Conclude Affordable Care Act (ACA) Open Enrollment outreach.
- Develop summer engagement strategies:
  - FNS Summer Food Service Program (SFSP), Summer Youth Employment Program (SYEP), and Pathway Internships.
- Identify key religious observances to celebrate within the Department.

BUDGET HIGHLIGHTS FY 2016

- The Center is funded through the Green Book.
- The budget primarily funds staff, secondarily travel. The center does not operate any programs independently.

FY 2016 Budget Authority

- 83% Expenses
- 17% Salaries
I. Organizational Overview

Organizational Chart

The Center is responsible for three staff, a Director, Staff Assistant and Partnership & Outreach Specialist. The Director reports to the USDA Deputy Chief of Staff. Key relationships with agency POCs are established depending on the initiative, project, or level of engagement.

The Center works in coordination with various counterpart centers across the federal departments which are coordinated by the Executive Director of the White House office of Faith-Based and Neighborhood Partnerships and Special Assistant to the President.

Biographies for career and political staff in key leadership positions

Norah Deluhery
Director [Political]
202-720-2032, norah.deluhery@osec.usda.gov

Norah Deluhery serves as the Director of Faith-Based and Neighborhood Partnerships at USDA with a mission to connect both secular and faith-based organizations to government resources to aid underserved communities across rural America. In 2012, Deluhery completed a detail to the White House as Policy Advisor for First Lady Michelle Obama's Let's Move! Initiative, which aims to end childhood obesity in a generation. Deluhery expanded outreach to local and national stakeholders in the public, non-profit, and private sectors. Prior to working at the White House, Deluhery served as Special Assistant to the Under Secretary of Food, Nutrition, and Consumer Services at the USDA, which promotes the health and well-being of Americans by developing and promoting science-based dietary guidance and administering USDA's 15 nutrition assistance programs. FNCS programs seek to end hunger in the United States and provide nutrition assistance as well as federal dietary guidance, nutrition policy coordination, and nutrition education.
In 2008, Deluhery worked on the Obama campaign as a field organizer in northern rural Iowa as well as a volunteer in several state primaries. Prior to joining the campaign, she worked at the Columbia University Graduate School of Business in New York City. A proud native of Davenport, Iowa, Deluhery graduated from the Catholic University of America in Washington, D.C. with a degree in English and a minor in vocal performance.

Torey Powell

Partnership & Outreach Specialist [Career]
202-720-2032, toreypowell@osec.usda.gov

Torey Powell currently serves as an Outreach Specialist for the Center for Faith-Based and Neighborhood Partnerships at the Department of Agriculture. Prior to this he served as a Presidential Management Fellow with USDA Forest Service in the position of Partnership and Outreach Specialist on the Chugach National Forest in Anchorage, AK. Torey's work on the Chugach focused on community partnerships including the Chugach Children's Forest, 2015 U.S. Capitol Christmas Tree, and developing/updating forest agreements to assist in field. During his fellowship, Torey completed a 6-month detail with USDA Forest Service - Washington Office Conservation Education and National Partnership Office. In this capacity he provided leadership for the Every Kid in a Park Urban Engagement Working Group and provided coordination of the Urban Natural Resources Stewardship working group and Washington Office Director's Group.

Torey is a veteran of the United States Army, including a 2010 deployment to Kandahar, Afghanistan. His distinguished service concluded in 2016 with multiple commendations that include Army Commendation Medal (3 OLC), Army Achievement Medal (3 OLC), Good Conduct Medal, National Defense Service Medal, and NATO Medal (Afghanistan).

Torey received his Bachelor of Arts Degree in Marketing and Communications from Concordia University Texas in Austin, Texas and Master of Social Work (MSW) Degree with a specialization in policy from the University Of Houston Graduate College Of Social Work.

Katherine Braga

Staff Assistant [Career]
202-720-2032, katherine.braga@osec.usda.gov

Katherine Braga (Axelsen) serves as a Staff Assistant with the USDA Center for Faith-Based and Neighborhood Partnerships, one of several centers within the Federal Government that work in coordination with the White House to form partnerships between government and both secular & faith based organizations to more effectively serve Americans in need. Braga formerly served with the Center at the Small Business Administration. Prior to her time with Faith Based and Neighborhood Partnerships, Braga was a Peace Corps Volunteer in Ukraine where she specialized
in teaching English as a foreign language as well as leadership, critical thinking and healthy lifestyles.

Braga graduated from the University of Michigan - Go Blue! - with a degree in Comparative Religion as well as English Language & Literature. She is currently a Masters student at American University studying International Relations. Her languages include Brazilian Portuguese and Russian. Braga holds a private pilot certificate and enjoys volunteering with the Civil Air Patrol squadron at Joint Base Andrews.

Overview of Agency Programs and Operations

Mission Statement: The USDA Center for Faith-based and Neighborhood Partnerships works to build bridges between USDA and nonprofit organizations, both secular and faith-based, to better serve Americans in need. The Center advances this work through collaboration with USDA agencies, counterpart Centers across the Federal government as well as the White House Office of Faith-Based and Neighborhood Partnerships.

Priority Goals: We provide leadership on food, agriculture, natural resources, rural development, nutrition, and related issues based on sound public policy, the best available science, and efficient management. In 2016, our priority goals were:

- Goal 1: Increase awareness of ACA during open enrollment periods and through subsequent implementation.
- Goal 2: Build bridges between USDA and faith-based organizations that have or desire equity in agriculture.
- Goal 3: Engage in the Obama Administration’s My Brother’s Keeper initiative by developing a recruitment and retention program for young boys and girls of color.
- Goal 4: Direct update to religious regulations.
- Goal 5: Support the recovery of Detroit through support of USDA programs.
- Goal 6: Elevate support for initiatives that diminish and prevent LGBT poverty.
- Goal 7: Facilitate international initiatives as they relate to underserved communities.

Mission Area Focus & Relationship to USDA’s Strategic Goals: When President Lincoln established the United States Department of Agriculture in 1862, he referred to it as “the People's Department.” More than 150 years later, we’ve carried on Lincoln’s vision and sustained a commitment to all Americans characterized by service, access to opportunity and preservation of our nation’s natural resources.

To fulfill Lincoln’s promise, USDA’s Center for Faith-Based and Neighborhood Partnerships works with diverse partners from faith and secular communities to better serve those in need. These Faith leaders are often role models in their communities and strive to achieve the common good on a daily basis. Their leadership inspires action which improves quality of life for many and enhances the vibrancy of America’s rural communities. We are proud to support these leaders.
by providing the resources they need to serve, making sure families are safe, and that children can be healthy and free of the scourge of hunger.

When we come together for a common purpose, the results are tremendous. That’s why under the Obama Administration, USDA’s Center for Faith-Based and Neighborhood Partnerships has made it a priority to strengthen relationships with faith-based and community partners, improving the quality of our services to reach all Americans more efficiently. We believe the power of community makes a difference, and together, we’ve taken strides toward a more inclusive America. Here are a few things we’ve accomplished together since 2009.

Major Programs:

- **Food and Nutrition Service**: Faith and community leaders are often role models in their communities and strive to serve the common good each day. Their leadership inspires action and the Center is proud to support these leaders by providing resources to help them serve their communities and work to ensure that families and children can be free of the scourge of hunger and have access to safe, decent and affordable housing. The U.S. Department of Agriculture (USDA) partnered with faith and community organizations to promote access to safe and healthy meals for children. These organizations play a critical role in providing meals to students during summer months, when school-based meals are unavailable. A few notable examples include:
  - **Islamic Relief USA**: Following a forum held at the White House with faith and community leaders, Islamic Relief USA (IRUSA) provided grants to help increase summer meal participation. These grants were used to provide staffing, refrigeration and other food storage equipment, and program activities for children at meal sites. In 2015, IRUSA awarded 10 grants in 9 states that are estimated to feed 35,575 children.
  - **Salvation Army**: The Salvation Army served more than 65,000 additional meals in summer 2014 compared to the previous year. This includes close to 40,000 meals served in Worcester and Boston, Mass. through the Salvation Army’s Summer Mobile Feeding Program. In 2015, they partnered with Share Our Strength to disseminate information on summer meals to 7,546 of their centers nationwide. Their efforts continued to expand in 2016 to youth camps across the country.
  - **Catholic Charities USA**: A longtime supporter of USDA nutrition programs, in 2014 Catholic Charities USA had 286 summer meal sites and expanded their effort in 2015 by providing information to their 475,000 contacts nationwide on how to get involved in the Summer Food Service Program, and hosting kick-off events throughout the country. In 2016, they set aside $140,000 from a larger grant from the Walmart Foundation to provide $10,000 mini grants to agencies interested in launching the Summer Food Service Program or expanding upon their current programs.
  - **The Church of God in Christ (COGIC)**: To help spread the word about the Summer Food Service Program, COGIC used their communication platform to reach over 25,000 of their members that represented 12,000 churches nationwide.
  - **The National Baptist Convention (NBC)**: Through Vacation Bible Schools at over 200 sites in 2015, NBC promoted summer meal programs and included the Summer
United States Department of Agriculture
2016 Presidential Transition
Center for Faith-Based and Neighborhood Partnerships (FBNP)

Food Service Program as part of their education curriculum in 16 counties throughout Alabama and Mississippi. In addition, they provided information on SFSP to 25,000 attendees at the National Baptist Congress 134th Annual Session in Detroit as well as their network of over 30,000 churches.

- **Office of the Secretary - Cultural Transformation:** To celebrate the rich religious diversity of the United States, the USDA recognized various holidays related to food and agriculture. During each year of the Obama Administration, the USDA Center for Faith Based and Neighborhood Partnerships has recognized the essential and important role of the Muslim community in the United States by hosting an Iftar celebration for employees, their families and members of the community. In addition, the Jewish harvest festival Sukkot, the Jewish New Year of the Tree, Tu B’Shevat, celebrated a Food and Justice Passover Seder, and hosted an event for Diwali, the Festival of Lights for many Hindus, Jains, Sikhs and Buddhists were recognized.

- **White House Initiatives**
  - **Let’s Move: Faith and Communities:** USDA’s Center was deeply involved in “Let’s Move: Faith and Communities,” which sought to help faith and community organizations participate in the work of First Lady Michelle Obama’s Let’s Move! Initiative, promoting nutrition, physical activity, and other healthy choices. Faith-based and neighborhood organizations have a unique and critical role to play in ending childhood obesity and addressing related issues of hunger and access to nutritious food. Trusted leaders in communities and congregations can empower families and communities to make better choices to improve the health of our nation’s children and coordinate activities that encourage healthy living and well-being. To support participation, we contributed to a toolkit in 2010 with steps on how community leaders can have a lasting impact on children and families in our communities. Toolkit: [http://www.letsmove.gov/sites/letsmove.gov/files/pdfs/TAKE_ACTION_COMMUNITY_LEADERS.pdf](http://www.letsmove.gov/sites/letsmove.gov/files/pdfs/TAKE_ACTION_COMMUNITY_LEADERS.pdf)
  - **Young African Leaders Initiative (YALI):** The USDA joined other governmental offices, American NGOs and private companies to provide leadership development, professional training, cultural exchange and networking opportunities to Mandela Washington Fellows of President Obama’s Young African Leaders Initiative (YALI). Upon returning to their home countries, the Fellows continue to build upon the skills they learned through their experience in the US, as well as share their knowledge with local communities. The USDA Center coordinated the placements of three Fellows from Senegal, Nigeria, and Uganda, a first for the Department.
  - **The Affordable Care Act:** Living in a rural community shouldn’t have to come with a hefty price tag for health care. Thanks to the Affordable Care Act, substantial new resources have been dedicated to address rural challenges. USDA has invested more than $3 billion since 2009 to build rural hospitals and clinic and support telemedicine.
services for remote rural areas. Infographic: https://www.flickr.com/photos/usdagov/15835288045/sizes/l

- **My Brother’s Keeper:** President Obama launched the My Brother’s Keeper initiative to address persistent opportunity gaps faced by boys and young men of color and ensure that all young people can reach their full potential. Through this initiative, the Administration is joining with cities and towns, businesses, and foundations who are taking important steps to connect young people to mentoring, support networks, and the skills they need to find a good job or go to college and work their way into the middle class.

  - Increasing Diversity in the Federal Government: Partnering with the Office of Personnel Management (OPM), USDA has hosted over 20 on-site application acceptance events across the United States and Puerto Rico. These events, held in conjunction with 1862, 1890, and 1994 land grant institutions, Hispanic Serving Institutions, and other minority serving institutions, provided an opportunity for USDA hiring managers to collect applications for Pathway Intern and Recent Graduate positions on location. In 2015, over 360 positions were filled or offers made through this method. More than 50% of these hires either identified themselves as minorities or attended minority serving institutions.

  - Promoting Agriculture and Opportunity in Puerto Rico: On March 1, USDA signed a MOU with Puerto Rico’s Department of Commerce and Economic Development (DCED). Under the first-of-its-kind partnership, USDA will host student employees of DCED’s Juvenile program, providing them with unique professional experiences within USDA’s offices in Puerto Rico. The program offers first-time job experience to students between the ages of 18 to 29. Students are generally in their last year of college, and are allowed to work for USDA for up to 6 months. II. Top Issues/Hot Topics

• Timeline

January:
  o Conclude Affordable Care Act (ACA) Outreach Strategy
  o Develop any summer engagement strategies including:
    ▪ FNS Summer Food Service Program (SFSP)
    ▪ Summer Youth Employment Program (SYEP)
    ▪ Pathway Internships
  o Support participation in MLK Day (January 16)
  o Monitor additional religious rule feedback on implementation
  o Identify key religious observances to celebrate
  o Winter Conference of the US Conference of Mayors

February:
  o Identify key USDA leadership to attend Detroit Food Policy Council Meeting (Spring)
  o Initiate Iftar observance planning meetings
  o Initiate Take Our Daughters & Sons to Work Day planning meetings (4/27/2017)
  o Connect with Alice Deal Middle School to discuss annual volunteer day

March:
  o Establish communications plan & determine what platforms to utilize
  o Connect with YALI Mandela Washington Fellowship manager at IREX to state interest in hosting 2017 fellows at USDA.
  o Peace Corps Week

April
  o Identify appropriate USDA hosts for 2017 Mandela Washington Fellows.

May
  o Travel to Summer Food Service Program Site Opening

June
  o Ensure observance of World Refugee Day (June 20)
United States Department of Agriculture
2016 Presidential Transition
Center for Faith-Based and Neighborhood Partnerships (FBNP)

Mission Area Issues

On March 31, 2016, USDA, along with other federal agencies, published a final rule that provided new religious liberty protections for beneficiaries of federally funded social service programs, while also adding new protections for the ability of religious providers to compete for government funds on the same basis as any other private organization. Specifically, an organization that receives direct federal financial assistance is required to give notice to beneficiaries that—

1. The organization may not discriminate against a beneficiary based on religion, a religious belief, a refusal to hold a religious belief, or a refusal to attend or participate in a religious practice;
2. The organization may not require a beneficiary to attend or participate in any explicitly religious activities that are offered by the organization, and any participation by the beneficiaries in those activities must be purely voluntary;
3. The organization must separate in time or location any privately funded explicitly religious activities from activities supported by direct federal financial assistance;
4. If a beneficiary or prospective beneficiary objects to the religious character of the organization, the organization will undertake reasonable efforts to identify and refer the beneficiary to an alternative provider to which the beneficiary does not object; and
5. A beneficiary or prospective beneficiary may report violations of these protections, including any denials of services or benefits, to the federal agency or intermediary administering the program.

For further information, visit the federal register notice. These regulations have the greatest impact on Food and Nutrition Service food distribution programs, such as TEFAP and CSFP. FNS guidance was issued on June 10, 2016.

GAO and OIG Audits

N/A
WHO WE ARE: OUR MISSION AREA

Housed in the Office of the Secretary, the Office of Tribal Relations (OTR) facilitates the relationship between all seventeen USDA agencies and Tribes, tribal organizations, and American Indian / Alaska Native citizens. OTR serves as a single point of contact for consultation on matters relevant to Indian Country, working to ensure that relevant programs and policies are efficient, easy to understand, accessible, and developed in consultation with the American Indian / Alaska Native constituents they impact.

WHO WE ARE: OUR WORKFORCE

The OTR is currently composed of 5 Full Time Employees: Director, Acting Deputy Director, Tribal Specialist (hiring 12/2016), Program / Outreach Assistant, Administrative Assistant. The Director and Acting Deputy Director are both political appointees.

WHO WE SERVE: OUR CONSTITUENTS

The OTR helps bridge Secretarial and White House level priorities with the needs of Tribes, tribal organizations, and American Indian / Alaska Native citizens. Additionally, the OTR helps train USDA staff on their responsibility to consult and collaborate with Indian Country.

KEY UPCOMING DECISIONS

1. Establish mandatory training in USDA on Indian Country and USDA responsibilities for incoming executives and career staff.

3. Rollout the Consultation Database as well as training on its use to the general USDA population in accordance with USDA Departmental Regulation 1350-002 Tribal Consultation, Coordination, and Collaboration.

BUDGET HIGHLIGHTS FY 2016

- Overall authority: $2.335M
  - Discretionary - Office of Tribal Relations: $502k
  - Reimbursements – Indian Technical Assistance Network (ITAN): $1.8M
- The OTR Discretionary budget in its first year was $681k. After being zeroed out, it was restored to $498k in 2011; then reduced in 2012 and 2013 before being restored to $498k in 2014. It was raised to $502k in 2015.
- The Intertribal Technical Assistance Network budget has been flat at $1.832M since 2013.
I. **Organizational Overview**

**Organizational Chart**
The Office of Tribal Relations was formally instituted in the Office of the Secretary by the 2014 Farm Bill. The Director of the Office of Tribal Relations is a General Officer of the Department.

(7 CFR § 2.38 - DIRECTOR, OFFICE OF TRIBAL RELATIONS)

The current Director and Senior Advisor in the Office of Tribal Relations is a Presidential Appointee. The office has combined Discretionary and Reimbursement funding to support three-four staff members in addition to the Director. Currently an additional Presidential Appointee serves as Senior Advisor & Acting Deputy Director, allowing OTR a greater ability to meet the required attention to consultations and work with the White House.

An organization chart showing the alignment of the OTR within the Office of the Secretary can be found at: [http://www.usda.gov/documents/usda-organization-chart.pdf](http://www.usda.gov/documents/usda-organization-chart.pdf)
Biographies for career and political staff in key leadership positions

Leslie Wheelock  
**Director and Senior Advisor to the Secretary [Political]**

202-260-1613, leslie.wheelock@osec.usda.gov

Leslie Wheelock was appointed the Director of the Office of Tribal Relations in the Office of the Secretary of the U.S. Department of Agriculture in 2013.

An enrolled member of the Oneida Nation of Wisconsin, Ms. Wheelock previously served as Director of Economic Policy at the National Congress of American Indians. During her tenure at NCAI, she worked on a variety of economic development initiatives involving small business, financial literacy, rural infrastructure, access to capital, expansion of broadband to Indian Country and agriculture. She also previously worked at the Smithsonian National Museum of the American Indian as a manager on the museum opening transition team and as a strategic planning consultant on cultural and intellectual property. Leslie currently serves on the National Council for the Museum as well as the board of directors for the Smithsonian Indian Museum in New York.

Leslie earned her JD and MBA degrees from Cornell University. She has more than 20 years of legal and management experience at the executive level of US and international corporate technology and telecommunications companies, including IBM, MCI/British Telecommunications, NANA/AKIMA Development Corporation and Euronet. She is a member of the bar in New York, Connecticut and Washington, DC.

Sedelta Oosahwee  
**Senior Advisor/Acting Deputy Director [Political]**

202-205-2249, sedelta.oosahwee@osec.usda.gov

Sedelta Oosahwee was appointed to the Office of Tribal Relations in January 2016. An enrolled member of the Three Affiliated Tribes of Fort Berthold, North Dakota, Ms. Oosahwee previously served as Associate Director of the White House Initiative on American Indian and Alaska Native Education (WHIAINE). During her time at WHIAINE, she worked on a variety of Indian education issues including the Bureau of Indian Education realignment and the President’s Interagency Working group on Indian Education.

Sedelta has over fifteen years of experiencing working for and on behalf of tribes. She served as the Special Projects Officer for Deputy Chief Joe Crittenden of the Cherokee Nation. Prior to her time at Cherokee Nation she was a Legislative Associate for Ietan Consulting, LLC, a federal government relations firm specializing in the representation of tribal governments and tribal business enterprises. Sedelta began her career at Northeastern State University in the Center for Tribal Studies as the Program Coordinator.
Sedelta earned her B.S. in Public Affairs and Administration and M.Ed. degrees from The University of Oklahoma.

Overview of Agency Programs and Operations

Housed in the Office of the Secretary, the Office of Tribal Relations (OTR) facilitates the relationship between the seventeen USDA agencies and Tribes, tribal organizations, and American Indian / Alaska Native citizens. OTR serves as a single point of contact for consultation and matters relevant to Indian Country, working to ensure that relevant programs and policies are efficient, easy to understand, accessible, and developed in consultation with the American Indian / Alaska Native constituents they impact.

OTR provides consultation support across USDA and reviews all USDA regulations to ensure consideration is included for special situations applicable to tribes, tribal organizations and tribal members and to determine whether, when and how consultation is required for each regulation.

OTR staff also work in collaboration with White House and Interior staff and other Federal Departments, Agencies and Entities to support numerous cross-federal tribal and youth programs and initiatives.

Tribes, tribal organizations and tribal citizens are eligible for almost all USDA programs. Within USDA, the Office supports all efforts and all agencies of the Office of the Secretary and the Department, OTR works daily-to-weekly with: Rural Development, Natural Resources Conservation Service, Farm Service Agency, Forest Service, Agricultural Marketing Service, Animal and Plant Health Inspection Service, Food and Nutrition Service, the National Institute of Food and Agriculture and OAO’s 1994 Tribal College and University Land Grant Office.

OTR also provides additional guidance, outreach and support to the National Agricultural Statistics Service when it is preparing material for the Census of Agriculture and in its efforts to encourage tribal farms and farmers to obtain and complete their census materials.

OTR also represents USDA and its programs across the federal government, specifically in conjunction with the White House Council for Native American Affairs. In that capacity, the Office staffs (or has USDA staff attending) working subcommittees on Health and Wellness; Sacred Sites; Environment, Climate and Natural Resources; Energy; and Education as well as co-chairing the Economic Development and Infrastructure Subcommittee together with the Small Business Administration. Additionally, the OTR staff works on cross-federal subject areas including Broadband, Homelessness, Suicide Management, Relocation of Climate-impacted Communities, Human Trafficking and Substance Abuse and the United Nations Declaration on the Rights of Indigenous Peoples (UNDRIP). Additionally, OTR regularly leads discussions on tribal food security, food sovereignty, agriculture exports, education and other subject areas featuring USDA programs.

Outside of the Federal Government, in addition to working directly with sovereign Tribal Governments, the Office of Tribal Relations partners with the National Congress of American
Indians (NCAI), First Nations Development Institute (FNDI), Intertribal Agriculture Council (IAC), the University of Arkansas, the Native American Financial Officers Association (NAFOA), the Aspen Institute Center for Native American Youth (CNAY), the National Indian Education Association (NIEA), the American Indian Higher Education Consortium (AIHEC) and other national and regional tribal organizations and educational institutions on conference planning, tribal outreach and advocacy, technical assistance, education and messaging to support OTR, USDA and White House efforts.

Due to the small size of the office and the work required to support requirements of the Department, the White House and our constituent sovereign Tribal Nations and their citizens, the Office of Tribal Relations works closely with USDA tribal liaisons and state executives throughout the country. It is important to recognize the work of the more than 250 full- and part-time Tribal Liaisons working throughout the Department.

Additionally, OTR relies heavily on the Office of Budget and Program Analysis (OBPA) and the Native American Working Group (NAWG), that is comprised of agency Tribal liaisons, to assist with and help coordinate USDA and OTR work across the Department. The Native American Working Group (NAWG), established by Departmental Regulation 1020-005, also makes recommendations to the Secretary through the Director of OTR on practices and methods for coordinating USDA activities of interest to Indian tribes.

The Discretionary budget of $500k supports the Director, a GS-12/13 and an Administrative Assistant. The additional administrative fees from the Reimbursed Intertribal Technical Assistance Network (ITAN) Cooperative Agreement with Intertribal Agriculture Council which funds 2 FTEs – typically Schedule R Fellows – on a 1 to 4-year assignment in the office.
II. **Top Issues/Hot Topics**

**Outreach Efforts**

OTR utilizes conferences across the United States to provide outreach and advice on USDA programs to as broad an audience as possible. In addition to working with state USDA representatives to staff conference booths, OTR seeks out keynote and panel opportunities (for USDA Executives and Subject Matter Experts as well as OTR staff) at a regular number of conferences. OTR also supports on-site hiring efforts at educational organization conferences and holds “ONE USDA” sessions at the larger conferences. Upcoming conferences include:

The organizations identified above and the additional OTR partners identified in the Overview of Agency Programs and Operations provide shared resources to OTR as well, including web-site announcements, forwarding of notices and announcements, webinar hosting and subject-matter forums on topics like tribal housing, energy, food sovereignty, education and the like.
United States Department of Agriculture
2016 Presidential Transition
Office of Tribal Relations (OTR)

Hot Topics (Note: these are NOT in order of priority.)

Specific to USDA

1. **Increase and improve knowledge of USDA programs among Tribes, Tribal organizations and Tribal individuals.** Along with Tribal Consultation and USDA Staff Education and Support, this is one of the cornerstones of the work of the Office of Tribal Relations. OTR creates tribal-specific materials and works with tribal leaders to increase their understanding and utilization of USDA programs. The breadth of USDA programs always surprises people, and we work to convince tribes that the grants and set asides from other federal programs should be considered as only part of a solution that also includes USDA.

2. **Establish mandatory training on USDA’s relationship to Indian Country and consultation for incoming USDA executives as well as career staff.** OTR has been informed by tribal leaders that some of the USDA executives understand the nation-to-nation relationship between tribes and the federal government, but others, especially some field execs and field staff, do not have that background or knowledge. OTR must create appropriate education and training modules as required by Departmental Regulation 1350-002 – Tribal Consultation, Coordination, and Collaboration.

3. **Rollout the USDA Consultation Database and training on its use in accordance with the USDA Departmental Regulation 1350-002 – Tribal Consultation, Coordination, and Collaboration.** Pursuant to the Departmental Regulation, OTR, in collaboration with the staff of the Forest Service Office of Tribal Relations, has developed a tool that collects information on tribal consultations in a database that can be queried. This tool needs to be brought under the jurisdiction of the USDA Information Technology Officer and standardized so it is available across the USDA. A training module must also be created for the tool. OTR has been working with the Office of the Chief Information Officer on this effort, but it is likely to need to be picked up and completed during the transition.

4. **Publish Consultation Guidance for USDA leadership and staff and Implement remaining elements of USDA Departmental Regulation 1350-002 – Tribal Consultation, Coordination, and Collaboration.** OTR has identified USDA practices that should not be identified as consultation, as well as meetings that clearly are consultation. This guidance is designed to help USDA staff understand the steps required to set up and manage a tribal consultation and the nuances of consulting with tribes. OTR expects to publish the guidance to USDA staff prior to the end of 2016 – in time to work through some training on the guidance and have it ready for staff transitioning in to USDA.
5. **Continue managing the Council for Native American Farming and Ranching (CNAFR) and the Food Distribution Program in Indian Country (FDPIR) Tribal Leader Working Group.** The Office of Tribal Relations manages the FACA Council for Native American Farming and Ranching. The OTR Director is a member of the CNAFR; and the OTR staffs the CNAFR, including providing the Designated Federal Officer. The CNAFR was reestablished by the Secretary of USDA in August 2016 and the newest set of Council members is expected to be seated in November 2016. The CNAFR Tribal Council members have decided to hold its meetings on reservations around the country. Travel and meeting expenses of the CNAFR are provided through donations of USDA agencies via transfer to the CNAFR account that is managed by OTR.

The FDPIR Tribal Leader Working Group was established in 2016 at the request of tribal leaders. As it is made of up elected government leaders, it does not work under FACA rules. It has a regional representation similar to that of the Bureau of Indian Affairs. The Working Group’s goal is to work with the Food and Nutrition Service, and possibly OGC, to make the FDPIR program healthier and easier to operate through practice, regulatory and legislative reviews. The Director of OTR manages the meetings and OTR is responsible for scheduling, note taking and follow up for all Working Group meetings. Tribal leaders cover their own expenses as well as the expenses of off-site meeting locations that are not at either USDA or other expense-free facilities.

The Secretary and the Deputy Secretary have been instrumental in the work of the Council and the Working Group and have committed to continue to support both with continued OSEC leadership.

6. **Continue efforts to support tribal requests for Food Sovereignty and Agriculture Economies.** This is a fast-growing area of interest among tribes. As tribes regain access to agriculture land and water, they are relearning how to farm and ranch. One of the demands we are seeing from tribal youth is to increase school and community gardens to combat physical and mental health concerns. It is additionally recognized that strong agriculture economies allow tribes to export their agriculture products off the reservation and bring money into the local economy. OTR strongly supports these initiatives.

7. **Staff, fund and plan the program for Let’s Move in Indian Country – a new initiative for the office, handed over by HHS in 2016.** HHS had contractors that provide substantial services to support the program when they ran it. OTR does not have such resources. OTR is working with FNS to coordinate this program with other FNS Let’s Move coverage. HHS did not provide such coordination with FNS.
8. **Improve and increase tribal outreach and education across USDA, including education and support for the upcoming AG CENSUS.** The outreach to tribes by USDA agencies and personnel across the United States varies dramatically. The Council for Native American Farming and Ranching has made recommendations concerning increased use of webinars and computer-based staff training to ensure better consistency across the Department.

9. **Continue strong OTR Support for USDA Strikeforce and Tribal Promise Zone efforts in tribal areas.** OTR has worked with both Strikeforce teams and Promise Zone tribes and desk officers to ensure tribes identified by both initiatives understand the Cross-Departmental and cross-Federal role of OTR and have information to programs and partners across the department and the federal government.

10. **Continue efforts to bring USDA financial and educational support to the 1994 Land Grant Tribal Colleges and Universities at a comparative level as the support provide USDA provides to the other land grant institutions, especially the 1890s.** When the 1994 Land Grant college program was established, the colleges and universities in that program were denied access to the formula funding distributed to the non-tribal land grant colleges through formulas found in the Hatch Act (7 U.S.C. 361a et seq.), the Smith–Lever Act (7 U.S.C. 341 et seq.), the McIntire–Stennis Act (16 U.S.C. 582a et seq.), and the Evans–Allen Act (7 U.S.C. 3222). The 1994 tribal land grants have separate but unequal funding mechanisms that prevent them from growing and reduce their ability to service their students adequately. OTR has been working on identifying the disparities that are driven by the history of the 1994 Program compared to the other land grant programs in USDA - rather than by legislation.

11. **Complete Guide to Youth Programs at USDA.** This guide, currently in draft review, describes the variety of summer programs, internships and job opportunities available to youth through USDA agencies. Publication is expected in late 2016.

12. **Complete Tribal Guide to USDA.** This guide, currently in draft review, describes the variety of programs available to tribes, tribal organizations and tribal members across the USDA. Publication is expected in late 2016.
1. **White House Council on Native American Affairs (WHCNAA):** Continue as co-chair of Economic Development and Infrastructure Subcommittee and STAFF all other subcommittees (Sacred Sites; Environment, Climate and Natural Resources; Health and Wellness; Energy; and Education). OTR has a significant presence on all of the subcommittees of the WHCNAA at this time except for the Education subcommittee. Executive Order 13592 -- Improving American Indian and Alaska Native Educational Opportunities and Strengthening Tribal Colleges and Universities – provides the foundation for the Education subcommittee, but the Departments of Interior and Education have ignored USDA OTR requests to be included in their meetings. Forest Service and Rural Development career personnel assist with the staffing of these subcommittees on behalf of USDA.

2. **STAFF Interdepartmental MOUs on Tribal Homelessness; Treaty Rights; Sacred Sites and Community Resiliency/Relocation in the face of Climate Change.** Throughout the last several years, Federal Departments have undertaken Memoranda of Understanding on specific topics that lend themselves to a structured format and collective, cross-federal effort. OTR works actively on the teams working under the above MOUs.

3. **Continue efforts with the State of Alaska, Alaska Congressional delegation, and Alaskan health care and educational organizations to focus on food security, reductions in subsistence food sources, and economic development issues specific to Alaska.** On the topic of food security in Alaska, OTR has worked with multiple entities on local food objectives, food safety and outreach on alternative storage methods. The 2014 Farm Bill provided for donations of traditional food to schools and elder care facilities, but challenges continue to exist – many in food processing and preparation as well as focusing on an Alaska-specific version of the FDPIR program for remote tribal villages as availability of traditional subsistence foods decreases.

4. **STAFF Arctic Executive Steering Committee (AESC) on behalf of Deputy Secretary’s Office.** OTR is the lead executive representing USDA on the AESC. With substantial support from Rural Development – Alaska, Forest Service Research and NIFA, USDA has been well represented on the science and research efforts, energy working group and indigenous issues, including tribal consultation. Continuing support of the USDA role on the AESC will require a working group consisting of OTR, NIFA, Forest Service Research, Rural Development, APHIS and FNS.

5. **Complete updating 2 Memoranda of Understanding between the Bureau of Indian Affairs and Rural Development and NRCS/FSA.** The MOUs facilitate cross-departmental efforts in Indian Country between the Department of Interior Bureau of...
Indian Affairs (BIA) and Rural Development in one MOU and BIA together with Natural Resources Conservation Service (NRCS) and Farm Service Agency (FSA) in the second MOU.

6. **Continue to support efforts by tribes to create food codes for reservations.** Tribal Reservation Food Codes supplant State Food Codes where the same topics are covered by the tribal codes. **Work WILL BE NEEDED with BIA to ensure that BIA does not require tribes that develop food codes to go through a NEPA review before those codes can be implemented by the tribe.** Tribes are developing their own food codes to govern their sovereign lands – thus displacing state food codes. OTR recently learned that the Bureau of Indian Affairs is planning to require NEPA reviews of such codes prior to their implementation by tribes. This review is unnecessary and unwarranted and slows the ability of the tribes to develop their internal food systems and agriculture economies.

**GAO and OIG Audits**

**USDA’s Controls Over Economy Act Transfers and Greenbook Program Charges Audit Report 50099-0001-23**

WHO WE ARE: OUR MISSION AREA

The White House Liaison Office (WHLO) serves as USDA’s primary coordinator for the non-career candidate selection process of Schedule C, Non-Career Senior Executive Service employees, Presidential Appointments with Senate confirmation (PAS) and Presidential Appointments without Senate confirmation (PA). The WHLO is also responsible for coordinating and managing the charter and appointment process for USDA’s 200+ Federal Advisory Committee Act (FACA) and non-FACA Advisory Boards and Committees.

WHO WE ARE: OUR WORKFORCE

WHLO has 6 staff – 3 career and 3 political appointees – in the DC headquarters.

WHO WE SERVE: OUR CONSTITUENTS

We work with the White House Presidential Personnel Office and USDA managers to fill political positions.

KEY UPCOMING DECISIONS

Staffing the 248 politically appointed positions at USDA and coordinating with OCR to confirm new appointees that require Senate confirmation.

Renewing the charters and memberships of boards and committees that expire in early 2017 – which requires approval by the Secretary in order for an agency to conduct advisory committee business and activities.

BUDGET HIGHLIGHTS FY 2016

The WHLO budget is included in the Office of the Secretary.

The Federal Advisory Committee Act (FACA) was enacted into law (P.L. 92-463; 5 U.S.C. App.) on October 6, 1972. The budget for managing the Federal Advisory Committees is funded through departmental shared cost programs.
The White House Liaison office (WHLO) has a staff of 6 full-time employees. Three staff are political appointees – the White House Liaison, the Deputy White House Liaison and the Special Assistant. The Committee Management Officer, Program Analyst and Program Specialist are career employees. The Committee Management Officer and Program Analyst work solely on the Federal Advisory Boards and Committees.

In addition, the WHLO will house 1 temporary contractor from September 2016 – September 2017 to assist with the federal advisory committee vetting process.

Biographies for career and political staff in key leadership positions

**Political Staff:**

**Jessie L. Crabb**  
White House Liaison  
202-720-5454, [Jessie.Crabb@osec.usda.gov](mailto:Jessie.Crabb@osec.usda.gov)

Jessie Crabb is the White House Liaison and is responsible for the recruitment, initial vetting, placement, professional development and retention of 248 Presidential appointees in all 50 states. Jessie joined USDA in February 2016 as the Deputy White House Liaison. She previously was at the White House in the Office of Management and Budget, working in the Director’s front office with the Chief of Staff. Prior to OMB, she was the Senior Executive Assistant in the Office of the US Executive Director at the World Bank. Jessie also served on Capitol Hill for a number of years in the offices of Senator Bob Casey and Senator Barbara Mikulski. Prior to moving to DC, she worked with human rights nonprofit organizations in Johannesburg, South Africa for a year and as a student affairs professional at Whitman College in Walla Walla, Washington. Born and raised in Odessa, Texas, Jessie received her undergraduate degree from Lewis & Clark College in Portland, Oregon and her Master in International Affairs from the University of Pittsburgh’s Graduate School for Public and International Affairs.

**Bernadette L. Hobson**  
Deputy White House Liaison  
202-720-7652, [Bernadette.Hobson@osec.usda.gov](mailto:Bernadette.Hobson@osec.usda.gov)

Bernadette Hobson is the Deputy White House Liaison and is responsible for assisting the White House Liaison in managing the 248 political appointees at USDA. In addition to this, she is also responsible for all aspects of human capital management, and for the facilitation of professional development opportunities for all appointees. Prior to USDA, Ms. Hobson was a U.S. Department of Energy Scholars Program, Fellow, where she led the bilateral coordinating efforts of the U.S. – Mexico Clean Energy and Climate Policy Task Force resulting in the North American goal to reduce methane emissions 40-45% by 2025. Prior to this role, Bernadette interned with the National Economic Council at the White House where she provided policy analysis and recommendations to White House Senior Leadership on energy, travel and tourism. Ms. Hobson also interned with the Management Office at the U.S. Embassy Mexico City and the Office of Commercial and Business Affairs at the U.S. Department of State. Prior to her policy work, Bernadette has 11 years of experience in financial services, private wealth management, and investment banking. She holds a B.A. in International Development Studies with distinction from the University of California, Berkeley, and an M.A. in Latin American Studies from the School of Foreign Service at Georgetown University.
Career Staff:

Cikena Reid
Committee Management Officer
202-720-8351, cikena.reid@osec.usda.gov

Cikena Reid is the Committee Management Officer for the United States Department of Agriculture (USDA) in the White House Liaison Office and provides oversight for all USDA’s Federal Advisory Committee Act (FACA) related committees. She manages the advisory committee management program and provides strategic advice and guidance in support of USDA’s mission, including committee management policy. Ms. Reid has served more than 20 years of federal government service in grants administration and advisory committee management positions supporting several agencies at the National Institutes of Health. Specifically, she managed and modernized advisory committee programs for the National Institute on Drug Abuse and National Institute of Neurological Disorders and Stroke.

Overview of Agency Programs and Operations

WHLO

The White House Liaison Office (WHLO) serves as USDA's primary coordinator for the non-career candidate selection process Schedule C, Non-Career Senior Executive Service employees, Presidential Appointments with Senate confirmation (PAS) and Presidential Appointments without Senate confirmation (PA). USDA is allocated 14 PAS positions, 3 PA positions, 51 Non Career-SES positions and 179 GS positions. There are 2 appointees in every state across the USA as a Rural Development State Director and Farm Service Agency State Executive Director.

The White House Liaison and the Deputy White House Liaison are responsible for understanding Administration policies related to personnel matters and to advise senior staff on matters having a potential effect on the Department. The White House Liaisons Office facilitates policy communications between the Department and the White House related to personnel matters. This office works directly with and assists the Office of the Secretary with a wide range of confidential assignments. The WHLO serves as the liaison with the White House, other federal agencies, congressional offices, state/local governments and private interest groups on matters regarding political appointments.

FACA

The White House Liaison Office (WHLO) is also responsible for coordinating and managing the charter and appointment process for USDA’s 200+ Federal Advisory Committee Act (FACA) and non-FACA Advisory Boards and Committees. The Committee Management Officer (CMO) ensures that the Department’s 200 Federal advisory committees are in full compliance with the rules and regulations of the Federal Advisory Committee Act, the Freedom of Information Act and other administrative and ethics laws. This includes review and coordination of charter renewals, establishment of new committees, committee meetings, annual reports and records management. The CMO manages the Departmental clearance process through its entirety as well.
as the various filing and reporting mechanisms required by the General Services Administration (GSA) and Congress. The CMO also ensures that the membership of the Department’s advisory committees reflects the broad diversity (regional, experiential, ethnic, gender, etc) that represents the constituency of USDA. The WHLO also completes vetting and background checks on all nominated candidates for boards and committees.

**Budget and Staffing Summary**

**Budget Summary:**

The WHLO budget is within the Office of the Secretary.

From 1983 through 1996, a central appropriation provided for direction and financial support of all authorized USDA Advisory Committee activities other than those included in the Forest Service and those financed from user fees. Beginning in 1997, language in the General Provisions of the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act permits agencies funded in the Act to finance the activities of selected committees that advise them from their own funds, subject to a Department-wide limitation on expenditures for those committees. The statuses of these programs provide information on the activities of committees during fiscal year 2016.

As authorized by General Provisions Section 712, provided below is a list of the Advisory Committees Limitations from the “Advice of Allotment” for FY2014-2016 allocations.

II. Top Issues/Hot Topics

Timeline

**January 2017**
- **January 7**: Charter for Grain Inspection Advisory Committee expires
- **January 20**: New political appointees can be appointed to work at USDA
- Vetting of candidates for nomination to serve on boards/committees to replace expiring members (this is ongoing throughout the year)

**February 2017**
- **February 5**: Charters for Plant Variety Protection Advisory Board and National Advisory Committee on Microbiological Criteria for Foods expire
- **February 6**: Charter for Advisory Committee on Beginning Farmers and Ranchers expires

**March 2017**
- **March 13**: Charter for Advisory Committee on Biotechnology and 21st Century Agriculture expires
Mission Area Issues

1) *Staffing the political appointee positions*
USDA is allocated 179 Schedule C positions and 51 Non Career-SES positions. In addition, there are positions that are filled by a Presidential appointment with Senate confirmation (PAS). For the PAS positions, once the President has nominated a person, the WHLO needs to coordinate with the Office of Congressional Relations on the appointee’s nomination hearing. For the state-level political appointments, the WHLO should work with the White House Presidential Personnel Office to solicit recommendations from the Congressional delegation from each state. For the Schedule C and NC-SES political appointments, the WHLO should work closely with the White House Presidential Personnel Office to identify candidates.

2) *Renew or re-establish expiring charters for advisory committees*
USDA has 200+ Federal Advisory Committee Act (FACA) and non-FACA Advisory Boards and Committees. The internal Departmental review for charters is a minimum of 9-weeks long. The Designated Federal Officer (DFO)/Program Manager should discuss with the Committee Management Officer (CMO) at the beginning of their preparation period to discuss the charter package requirements and start the agency level preparation 4-6 months prior to the CMO due date. The offices in USDA that review charters include: Ethics, Civil Rights, OBPA, OGC and the agency’s Under Secretary before the package is sent to the Secretary for approval. Upon the Secretary’s approval, a federal register notice is published and then the charter is filed with Congress and the Library of Congress. If a charter expires, an agency may not conduct any advisory committee business or activity until the Committee is re-established with a new charter.

**GAO and OIG Audits**

Not applicable.
WHO WE ARE: OUR MISSION AREA

FFAS is comprised of the Farm Service Agency (FSA), the Foreign Agricultural Service (FAS) and the Risk Management Agency (RMA). FFAS provides a safety net for farmers and ranchers by providing commodity payments, farm loans, disaster assistance, and crop insurance. Facilitating foreign trade, capacity building and developing new markets bolsters American farm incomes and connects American agriculture to the rest of the world. FFAS also contributes to global food security, conservation and stability into the marketplace. FFAS’s unique footprint includes more than 2,100 state and county offices in the U.S. and over 90 overseas offices.

WHO WE ARE: OUR WORKFORCE

- FAS – 1,257 employees
- FSA – 12,266 employees, including 399 temporary and 555 intermittent employees
- RMA – 475 full time employees

WHO WE SERVE: OUR CONSTITUENTS

FFAS serves U.S. farmers, ranchers and rural communities directly, as well as beneficiaries in emerging global markets such as schoolchildren, farmers and agribusinesses. We partner with NGOs, the private sector, insurance providers and others to further our impact.

KEY UPCOMING DECISIONS

- Implement a FSA IT strategy that reflects the results of a third-party assessment (MITRE Report) and analysis of alternative recommendations.
- Develop agricultural trade policy agenda, assessing status of TPP, TTIP, trade enforcement and relationship with China.
- Determine whether administrative changes will be made to ARC-County yield calculations or data sets used. This will likely be an early issue raised by stakeholders.

BUDGET HIGHLIGHTS FY 2016

FFAS’ total budget authority is approximately $15,923 billion.
- FAS - 79% is mandatory spending for P.L. 480 and CCC-funded programs
- FSA - 86% is mandatory spending
- RMA - 99.4% is mandatory spending for the costs of the FCIC
I. Organizational Overview

The Farm and Foreign Agriculture Agency (FFAS) oversees three agencies; Foreign Agriculture Service (FAS), Farm Service Agency (FSA) and Risk Management Agency (RMA). Deputy Under Secretary Alexis Taylor (political) is delegated the duties of Under Secretary and leads the mission area. Chief of Staff to the mission area is Lesly Weber McNitt (Political) and Deputy Chief of Staff is Jane Beard Kadish (political) and both report directly to Deputy Under Secretary Taylor. Deputy Under Secretary Lanon Baccam (political) oversees the two domestic FFAS agencies, FSA and RMA, while Deputy Under Secretary Jonathan Cordone (political) oversees FAS.
Biographies for career and political staff in key leadership positions

Alexis Taylor  
Deputy Under Secretary, Farm and Foreign Agriculture Service (Political)  
202-720-3111, alexis.taylor@osec.usda.gov

Alexis Taylor was delegated the duties of the Under Secretary for the FFAS mission area by Agriculture Secretary Tom Vilsack in March 2016.

In her previous role as Deputy Under Secretary, Alexis oversaw the department's international activities. She had key responsibilities in international trade policy and export assistance programs, and coordinated USDA's role in international food assistance.

Alexis Taylor was formerly the Chief of Staff for FFAS where she worked to implement provisions of the 2014 Farm Bill.

Before joining USDA, she served as the legislative advisor to Congressman Leonard Boswell of Iowa, a member of the House Agriculture Committee, and later to Senator Max Baucus of Montana, a senior member of the Agriculture Committee and Chairman of the Finance Committee. During her time in Congress, Alexis negotiated key provisions of the 2008 Farm Bill, as well as the Senate version of the 2012 Farm Bill which was ultimately enacted into law as the 2014 Farm Bill.

Alexis served in the United States Army Reserves from 1998 to 2006. During her time in the Reserves she did one tour in Iraq with the 389th Combat Engineer Battalion.

Alexis is a graduate of Iowa State University and grew up on her family farm in Iowa which has been in her family for over 150 years.

Lanon Baccam  
Deputy Under Secretary, Farm and Foreign Agriculture Service (Political)  
202-720-3111, lanon.baccam@osec.usda.gov

Lanon Baccam is Deputy Under Secretary for Farm and Foreign Agricultural Services (FFAS) and oversees the domestic programs within the FFAS mission area (Farm Service Agency and Risk Management Agency). He also serves as the USDA Military Veterans Agricultural Liaison. This position, created by the 2014 Farm Bill, is responsible for connecting veterans with opportunities in the field of agriculture, providing information to returning veterans about programs and services available to them through USDA, and advocating for veterans’ interests within the Department.

Baccam previously served as the Director of Scheduling and Advance in the Office of the Secretary at the USDA. Baccam planned, prepared, and implemented Secretary Vilsack’s vision at USDA.

Prior to his role as Director, Baccam served in several other capacities at USDA, including as special assistant in the Foreign Agricultural Service, executive assistant to the Secretary, and
deputy director of scheduling. Before joining the Administration in 2011, Baccam worked in Iowa state government and on several statewide and national political campaigns.

Baccam is a military veteran and spent eight years in the U.S. Army and Iowa National Guard and was deployed to Afghanistan in 2004-2005. During his time in the Army, Baccam held leadership roles as a unit movement officer and served as a Combat Engineer in charge of explosive demolitions at a Provincial Reconstruction Team base in Kandahar, Afghanistan.

Baccam is a graduate of Drake University in Des Moines, Iowa and a native of Mt. Pleasant, Iowa. Baccam currently lives in Washington, DC with his wife, Alissa Brammer, and their new daughter, Freya.

Jonathan Cordone
Deputy Under Secretary, Farm and Foreign Agriculture Service (Political)
202-720-3111, jonathan.cordone@osec.usda.gov

Jonathan Cordone is the Deputy Under Secretary for Farm and Foreign Agricultural Services (FFAS), overseeing the Foreign Agriculture Service (FAS). In this role, Cordone leads the Department's international activities, including key responsibilities for trade policy and export assistance, as well as food aid, international economic development, and trade capacity building.

Previously, Cordone served as USDA's Principal Deputy General Counsel, the Department's second highest ranking attorney. He came to USDA from the U.S. Senate Committee on Agriculture, Nutrition, and Forestry where he was the Deputy Staff Director and Chief Counsel under the leadership of Sen. Debbie Stabenow (D, MI).

During his time on the Committee, Cordone played a key role in the enactment of the Agriculture Act of 2014, often referred to as the Farm Bill. He also helped lead inquiries into the collapse of the futures firms, MF Global and Peregrine Financial, as well as the purchase of Smithfield Foods by China's Shuanghui Group. Throughout his time on the Committee, he worked closely with the U.S. Trade Representative on disputes and pending multilateral negotiations in Europe, the Pacific Region, and the World Trade Organization.

During his more than 15 years in public service, Mr. Cordone also served in the Obama Administration as the Senior Vice President and General Counsel of the Export-Import Bank of the United States and as the General Counsel of the U.S. House of Representatives Committee on Energy and Commerce under then-Chairman Rep. John Dingell (D, MI), where he coordinated all legislative matters under the Committee's broad jurisdiction.

Jonathan began his career practicing law in New York and Connecticut, working on complex transactions involving project finance, leveraged leasing and lending, and earned his B.A. from Mary Washington College in Virginia and his J.D. from the University of Connecticut School of Law. He is a native of Trumbull, Connecticut and currently resides in the District of Columbia.
Lesly Weber McNitt
Chief of Staff, Farm and Foreign Agriculture Service (Political)
202-720-6214, lesly.mcnitt@osec.usda.gov

Lesly Weber McNitt is Chief of Staff of Farm and Foreign Agricultural Services at USDA, the mission area comprised of Risk Management Agency, Farm Service Agency and Foreign Agricultural Service. She previously served as Chief of Staff of the Farm Service Agency (FSA). She joined FSA from Farm Journal Foundation, where she was Director of Government Relations and Program Development. In that role she was responsible for advancing the Foundation’s advocacy initiatives, developing new programs, and building strategic partnerships. Lesly also oversaw the Foundation’s Farm Team program and managed the Farm Journal Forum, the Foundation’s annual policy conference. Prior to joining Farm Journal Foundation, Lesly was a legislative associate with Oldaker Belair & Wittie, LLP, where she managed a diverse portfolio of issues including financial services, federal appropriations, Native American Indian affairs, and education.

Lesly graduated cum laude from The George Washington University’s Elliott School of International Affairs with a B.A. in International Affairs and a concentration in International Politics. She also earned her Master of Professional Studies in Legislative Affairs at The George Washington University’s Graduate School of Political Management, graduating summa cum laude. She lives in Washington, D.C. where she is active in her local community.

Jane Beard Kadish
Deputy Chief of Staff, Farm and Foreign Agriculture Service (Political)
202-720-2797, jane.kadish@osec.usda.gov

Jane Beard Kadish is Deputy Chief of Staff of Farm and Foreign Agricultural Services at USDA, the mission area comprised of Risk Management Agency, Farm Service Agency and Foreign Agricultural Service. Kadish joined USDA after serving a year as Chief of Staff at start-up media company Fusion, where in this role she built operations for the company. Kadish previously worked the 2014 Election Cycle for EMILY’s List, managing the executive office to achieve fundraising objectives. Kadish worked on trade policy for the Senate Finance Committee under the Chairmanship of Senator Max Baucus. During her time on the Senate Finance Committee she contributed in a key role to Committee mark up and bill passage of the 2011 Free Trade Agreements with Colombia, Panama and South Korea. Following this, she worked in former Senator Max Baucus’ personal office and worked on key trade, healthcare and tax reform legislative efforts.

A native of Montana, Kadish graduated from the University of Montana studying International Business.
Phil Karsting
Administrator, Foreign Agriculture Service (Political)
202-720-3935, Phil.karsting@fas.usda.gov

Phil Karsting was appointed administrator of the Foreign Agricultural Service in May 2013. He previously served more than 22 years on Capitol Hill, most recently as chief of staff to Senator Herb Kohl (D-Wis.), then-chairman of the Senate Appropriations Subcommittee on Agriculture, Rural Development and Related Agencies. Phil's prior Capitol Hill assignments included serving as senior analyst on the Democratic staff of the Senate Budget Committee where he handled issues relating to agriculture, rural development, housing, telecommunications, energy and the environment. He also served as legislative assistant to the late Senator Jim Exon (D-Neb.). He served on the Senate Bi-partisan Chiefs of Staff steering committee and in 2013 he led training seminars in Liberia for Liberian congressional staff on behalf of the National Democratic Institute.

Phil began his association with American agriculture working in his family's farm supply business in rural Nebraska. He received a bachelor’s degree in Agricultural Economics from the University of Nebraska-Lincoln. He is also a graduate of the French Culinary Institute in New York City.

Val Dolcini
Administrator, Farm Service Agency (Political)
202-720-6215, val.dolcini@wdc.usda.gov

Val Dolcini was selected to serve as the Administrator for the Farm Service Agency in September 2014. He previously served as State Executive Director of the California Farm Service Agency, a position he was appointed to in 1999 by President Bill Clinton and again in 2009 by President Obama. Dolcini also served as the acting Farm Service Agency Administrator in 2011.

As Administrator, Dolcini is responsible for overseeing the administration of farm commodity and conservation programs, farm loan programs, and certain disaster programs. Dolcini also serves as the executive vice president of the Commodity Credit Corporation.

Dolcini has many years of public and private leadership experience. Prior to joining the Obama Administration, he managed public outreach activities for Accenture LLC, a global consulting firm. In that position, he strategized with business teams about relationship development and consulted on a wide range of political matters.

He previously served in a senior staff position for the Governor and Lieutenant Governor of California, as well as members of the U.S. House of Representatives.

A fifth-generation Californian and a native of Davis, Calif., Dolcini has served on numerous non-profit boards and commissions in his community. He received his bachelor’s degree in
Brandon Willis
Administrator, Risk Management Agency (Political)
202-690-2803, Brandon.willis@rma.usda.gov

Prior to Willis’ appointment as Administrator, RMA in 2013, Willis served as Senior Advisor to Agriculture Secretary Tom Vilsack on Title I Commodity programs, farm legislation matters and disaster assistance. In August 2009 he was appointed as Deputy Administrator of Farm Programs for USDA's Farm Service Agency (FSA).

Prior to his appointment as Deputy Administrator, he was a confidential assistant in USDA’s Office of the Undersecretary for Farm and Foreign Agricultural Services.

Before joining USDA Willis served as the Agriculture Legislative Assistant for U.S. Senator Max Baucus (2006-2009). During this time, he worked on the Food, Conservation, and Energy Act of 2008. In 2005, he worked as a graduate assistant at the National Agricultural Law Center. Willis earned his bachelor's degree in crop and soil science from Utah State University in Logan, Utah, and his law degree from the University of Wyoming in Laramie, Wyo. In 2009, he completed his master's degree in agricultural law from the University of Arkansas. He grew up on a third generation sheep ranch in northern Utah and managed his family's raspberry farm, Bursting Berries.

Overview of Agency Programs and Operations

Farm and Foreign Agricultural Services Overview - The Farm and Foreign Agricultural Services (FFAS) is one of 7 mission areas within the Department of Agriculture. Its major operational responsibilities include administering and providing oversight responsibilities for the development and implementation of critical USDA farm safety-net and farm credit programs. These programs assist America’s farmers and ensure that agriculture continues to provide the foundation for prosperity in rural areas as well as being a critical element of the Nation’s economy. Sixteen million Americans are employed directly in agriculture, or in agriculture related industries. Fourteen percent of all manufacturing jobs are related to food processing and food manufacturing. FFAS also oversees and facilitates international market access and opportunities for U.S. agriculture through various trade programs and high-level government negotiations. In addition, FFAS promotes and provides development assistance in developing countries to support trade and enhanced global food security.

FFAS Mission Statement – FFAS is comprised of the Farm Service Agency (FSA), the Foreign Agricultural Service (FAS) and the Risk Management Agency (RMA). FFAS provides a safety net for farmers and ranchers by providing commodity payments, farm loans, disaster assistance, and crop insurance. Facilitating foreign trade, capacity building and developing new markets
bolsters farm incomes and connects American agriculture to the rest of the world. FFAS also contributes to global food security, conservation and stability into the marketplace. FFAS’s unique footprint includes more than 2100 state and county offices in the US and more than 90 overseas offices.

**FFAS and USDA Strategic Goals** - The FFAS mission area contributes to multiple USDA Strategic Goals. Specifically, *assist rural communities*, the FFAS mission area: (1) supports a strong financial safety net including providing access to credit for farmers and ranchers who are temporarily unable to obtain commercial credit such as beginning farmers and ranchers; and (2) promotes the vitality of rural America by improving access to international markets, providing credit guarantees for U.S. farm exports, and supports industry efforts to develop new markets. In support of *ensuring private working lands are preserved*, the FFAS area: (1) protects watershed health to ensure clean and abundant water; and (2) enhances soil quality to maintain international acceptance of new technologies, and promotes sustainable, productive agricultural systems and trade in developing countries to enhance global food security. In support of the *promotion of agricultural production and biotechnology exports*, the FFAS area: (1) links U.S. agricultural to the world by enhancing export opportunities and global food security through the implementation of sound trade promotion and policies, and (2) addressing food security challenges by building food and market systems that expand trade and economic growth through food assistance programs.

The work of the FFAS mission areas is carried out by its three agencies, the Farm Service Agency (FSA), the Risk Management Agency (RMA), and the Foreign Agricultural Service (FAS). These agencies are responsible for carrying out major legislatively mandated programs in support of USDA and FFAS’s missions and goals supporting American farmers and ranchers.

**Farm Service Agency Major Programs** –

**Agricultural Risk Coverage and Price Loss Coverage**
In 2015, FSA enrolled 1.76 million farms in the Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) programs by conducting an educational campaign. ARC and PLC are a part of the farm safety-net and provide assistance only when there are year-to-year crop revenue and/or commodity price downturns. The ARC and PLC programs have provided over $5.2 billion in financial assistance to producers for the 2014 crop year. USDA estimates an additional $8 billion in financial assistance will provided under the ARC and PLC programs for the 2015 crop year.

**Margin Protection Program for Dairy**
In addition, more than half of all dairy farms in the U.S. – over 23,000 – have enrolled in the Margin Protection Program for Dairy (MPP-Dairy). This voluntary program provides financial assistance to participating farmers when the margin – the difference between the price of milk and feed costs – falls below the coverage level selected by the producer. The MPP-Dairy offers dairy producers catastrophic coverage for an annual $100 administrative fee and various levels of buy-up coverage for an additional premium.
Marketing Assistance Loans and Loan Deficiency Payments

FSA provides producers marketing assistance loans (MALs) and loan deficiency payments (LDPs). MALs are 9-month low-interest loans that provide producers interim financing at harvest time to meet cash flow needs without having to sell their commodities when market prices are typically at harvest-time. This allows the producers some flexibility in determining when it is best to market their crops. LDPs are available to eligible producers when the commodity market price is less than the commodity loan rate, as established by USDA. LDP’s allow the producer to forgo the MALs in order to receive the difference between the loan rate and the market rate for the applicable commodity. The MAL and LDP coupled with ARC/PLC are part of the farm-safety net, and provide producers with needed financial assistance when the commodity market prices are depressed. These programs help to sustain the economic viability in rural America and to ensure the orderly marketing of commodities.

Livestock Disaster Program
The 2014 Farm Bill indefinitely extended the FSA’s livestock disaster programs and the Tree Assistance Program. Since passage of the 2014 Farm Bill, these disaster programs have paid producers over $6 billion dollars to recover from natural disasters, including drought, flood, fire, freeze, tornadoes, pest infestation, and other calamities.

Organic Certification Cost Share Programs

The Organic Certification Cost Share Program (OCCSP) and Agricultural Management Assistance Program (AMA) assist certified organic operations in defraying the costs associated with organic certification. In an effort to enhance the OCCSP delivery and improve direct outreach, USDA decided to transition the program from AMS to FSA. This transition is underway and the Federal Register notice announcing the transfer of program responsibilities is scheduled to be release early, November.

Under both programs, organic operations may receive up to 75 percent of their certification costs, not to exceed $750 per certification scope. The OCCSP is available to organic producers and handlers of crops, livestock and wild crops in all 50 States and several territories. The AMA is available to certified organic producers—only crop and livestock operators—in sixteen states designated by Congress.

Historically, the programs were administered through AMS under grants initiated with State Departments of Agriculture. FSA is continuing this practice in addition to now offering producers and handlers the ability to apply for OCCSP through local FSA county offices. This initiative complements FSA’s work on local foods and specialty crops and its expanding assistance to organic farmers and ranchers.
United States Department of Agriculture
2016 Presidential Transition
Farm and Foreign Agricultural Services Mission Area (FFAS)

Farm Loan Programs

FSA provides access to low-interest loans to farmers and ranchers, including new and beginning, underserved and veteran farmers and ranchers. The demand for farm loans has increased in recent years. The number of direct operating loans has risen from 13,000 to 14,000 in the mid-2000’s, to 22,000 to 24,000 in the last three years. Direct ownership loans have increased as well, from about 3,000 in the mid-2000’s to about 5,500 over the last three years. The change in guaranteed operating and ownership loans has not been as significant but demand for them has been strong as well. FSA’s actual program funding in support of these loans increased from $5.23 billion in FY 2014 to $5.68 billion in FY 2015, with enacted program funding for FY 2016 at $6.4 billion.

Conservation Reserve Program

FSA also provides tools and program support for America’s farmers and ranchers to be good stewards of the land. USDA is experiencing record demand from producers interested in participating in the CRP. The 2016 CRP general and grassland sign-ups were the most selective enrollment periods in CRP’s 30-year history with a record high Environmental Benefits Index cut-off. CRP enrollment is close to 24 million acres and is protecting more than 170,000 stream miles with riparian forest and grass buffers, enough to go around the world 7 times.

Commodity Operations

FSA’s Commodity Operations division purchases and delivers processed commodities under various domestic distribution programs, such as the National School Lunch, Commodity Supplemental Food, Food Distribution on Indian Reservations, and Disaster Assistance Programs. In addition, Commodity Operations purchases and delivers commodities to foreign countries under Titles II and III of Public Law 480, the Food for Progress Program, and Section 416(b) of the Agricultural Act of 1949, through private voluntary agencies, World Food program, and government-to-government transfers.

Biofuel Infrastructure Partnership (BIP)

The one-time Biofuel Infrastructure Partnership (BIP) grants were published and implemented on June 16, 2015, through a NOFA. BIP provided grants to States to expand the ethanol market through infrastructure development, including the installation of blender pumps and tanks.

Farm-to-Fleet

USDA has worked with the United States Navy on a joint initiative, Farm-to-Fleet, since December 2013. It makes biofuel blends part of regular, operational fuel purchases by incorporating the acquisition of biofuel blends into regular Department of Defense domestic solicitations for jet engine and marine diesel fuels.

Bridges to Opportunity (BTO)

BTO enables a holistic and streamlined customer service experience in FSA county offices. Services are expanding to all FSA County Offices by January 2017. BTO supplies staff with a customer relationship management information technology application and customizable
information resource bundles to provide every FSA customer with a meaningful summary of his or her visit, additional resources and referrals to local partners. Many of those resources and referrals span other USDA agencies, such as NRCS, RD, AMS, and RMS, and APHIS, allowing all of USDA to leverage FSA’s strong relationships with its nearly two million customers.

**Supporting the Next Generation of Agriculture**

FSA houses the cross-Departmental collaboration to support new and beginning farmers and ranchers and to support land tenure access. The effort brings together staff from across the USDA to share information and coordinate policies, programs, and services for the next generation of agriculture and the transitioning generation. The new farmer and land tenure coordinators, career FSA employees, lead these collaborations, serving as both a coordinators between agencies and as advisors to Department leaders on the issues. Through this connection, and in partnership with representatives from each new farmer serving entity, USDA is able to work across silos, packaging our programs (so that new customers get a seamless experience of USDA customer service), and supporting a holistic USDA approach to supporting the next generation.

**Acreage and Crop Reporting Streamlining Initiative (ACRSI)**

A joint FSA and Risk Management Agency IT system has been developed to replace duplicative crop reporting of common acreage information by producers to both agencies and their crop insurance provider, saving time and potentially reducing inadvertent data reporting errors.

ACRSI was piloted in the spring of 2015 in 30 counties in Iowa and Illinois. The agencies used lessons learned from the spring pilot to expand statewide reporting in incremental phases to 15 States and all counties in those States in the fall of 2015. For spring crops in 2016, RMA and FSA expanded ACRSI nationwide for 13 crops. Those crops were alfalfa, corn, cotton, Conservation Reserve Program, fallow, grass, oats, peanuts, rice, rye, sorghum, soybeans, and wheat. This captured over 93% of all reported acres.

The 2015 pilots and expansion in 2016, both starting prior to the peak reporting period that occurs annually in mid-July, have been important in providing the agencies and insurance companies with results that are being used in this post-peak reporting period to analyze what worked, what did not, and how to improve the process for producers and all stakeholders going forward. Stakeholder engagement is at the highest level the initiative has seen, which is fostering more effective solutions and progress.

The FSA/RMA Joint Policy Team have implemented data standards and reporting protocols that will ensure an effective data sharing process between FSA, RMA, and insurance companies. RMA and FSA IT systems are currently being enhanced in preparation for the 2016 fall acreage reporting period and data sharing through ACRSI. RMA and FSA will continue to build on lessons learned in preparation for future acreage reporting periods.

ACRSI is a demonstrably important system to USDA. Its use is providing data gathering and reporting efficiencies for producers, insurance companies, and USDA.
**Risk Management Agency Major Programs** – The Federal crop insurance program is a critical component of the farm safety net that protects producers from a wide range of risk caused by natural disasters, as well as the risks of price fluctuations. Currently, about 80 percent of risk protection is provided by “revenue insurance,” which protects against losses due to low yields, low prices, or a combination of low yields and prices.

The crop insurance program is designed to ensure that farmers and ranchers effectively manage their risk through difficult periods, helping to maintain America’s food supply and the sustainability of small, limited resource, socially disadvantage and other traditionally underserved farmers. Since 2009, farmers have collected approximately $63 billion in crop insurance indemnities. For the 2015 crop year, the Federal crop insurance programs provided about $100 billion in risk protection or about $68.7 billion in (normalized) risk protection. Throughout 2015 RMA continued the initiatives set forth by the 2014 Farm Bill, including expansion of Supplemental Coverage Option (SCO) and Stacked Income Protection Plan (STAX), making available the Yield Exclusion Option for producers, and rolling out Whole Farm Revenue Protection, which is available in every county in the U.S. in 2016.

**Organics Price Election**

The Risk Management Agency (RMA) has supported the organic sector through the following changes in crop insurance policies:

- In 2011, for the first time ever, RMA began offering crop insurance for organic producers based on organic market prices. For the 2016 crop year, RMA offered 57 organic price elections. For the 2017 crop year, RMA will offer 73 organic price elections.
- In 2014, RMA eliminated the historical 5% surcharge on organic policy premiums for all crops.
- In 2014, RMA added a new Contract Price Addendum (Contract Price Option) that allows organic producers who receive a contract price for their crop to get a crop insurance guarantee that better reflects the actual value of their crop. In 2016, RMA expanded the Contract Price Option to recognize price incentives for crops in transition to organic certification, providing risk management tools at prices closer to the actual market value of the crops. The CPA is available for 73 different crop types, covering the majority of insurable crops.

As a result of these changes, RMA organic insurance policies increased over 92 percent and insured organic acres increased more than 114 percent between 2008 and 2015. RMA insured 3,555 organic policies on 486,831 acres in 2008; and in 2015, RMA insured 6,833 policies on 1,043,403 acres. This data includes both certified organic and transition to organic.
Whole-Farm Revenue Protection

The WFRP insurance policy, new in 2015, became available in all states and counties nationwide beginning in 2016. This policy allows producers to insure their whole farm revenue with coverage levels of 50 to 85 percent. Although the policy is available for all farms, it was specifically developed for diversified farms that tend to sell to direct, local or regional, and farm-identity preserved markets, such as organic. Organic producers meeting the requirements of the National Organic Program may use their organic prices to value their commodities under this federal crop insurance policy.

Local/Regional Ag Production Support

RMA recognizes the growth of local and regional food systems, and aims to support producers engaged in local and regional markets. We value the collaboration with the Know Your Farmer, Know Your Food (KYF2) team to better serve beginning farmers and ranchers and operators of smaller farms, many of whom get their start in farmers markets, CSAs, and other direct markets in their local communities. We also know that as local and regional food systems mature, the demand for local food is expanding beyond direct markets and into major grocery stores, restaurants, and schools, often through the work of food hubs and other intermediaries.

RMA works with Know Your Farmer, Know Your Food (KYF2) to improve programs for these producers, make sure we are reaching the right audiences. The following achievements and priorities are particularly significant, and will continue to be focus areas for the future:

- Key RMA staff serve on the KYF2 Management Team and Taskforce to coordinate efforts across USDA.
- RMA’s Whole Farm Revenue Protection (WFRP) is tailored for any farm with up to $8.5 million in insured revenue, including farms with specialty or organic commodities (both crops and livestock), or those marketing to local, regional, farm-identity preserved, specialty, or direct markets. WFRP allows producers to insure their organic commodities at organic prices reflective of the market where they sell the products, including local and specialty markets. RMA continues to make updates to the WFRP policy and procedures in response to questions received, in order to help producers, agents, and loss adjusters who use, sell or service WFRP insurance. The number of WFRP policies nearly doubled in 2016 from 2015 to 2,131 policies earning premium and liability also more than doubled to a total of nearly $2.3 billion in 2016. (Numbers as of Sept. 30, 2016)
- Risk Management Education projects encourage the formation of partnerships with public and private organizations to inform farmers about risk management strategies. Topics include food safety, local food marketing and branding, and promotion of the WFRP.
- RMA and KYF2 provide education and outreach to farmers selling in local and regional markets about risk management options to increase usage of WFRP and other relevant programs and strategies
Organic Production Survey - Report To Congress

The Risk Management Agency provides a report to Congress annually in May, pursuant to Section 508(c)(6)(D) of the Federal Crop Insurance Act, as amended by Section 11023 of the Agricultural Act of 2014:

“The Corporation shall submit to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate an annual report on progress made in developing and improving Federal crop insurance for organic crops, including:

i. the numbers and varieties of organic crops insured;
ii. the progress of implementing the price elections required under this subparagraph, including the rate at which additional price elections are adopted for organic crops;
iii. the development of new insurance approaches relevant to organic producers; and
iv. any recommendations the Corporation considers appropriate to improve Federal crop insurance coverage for organic crops.”

This annual report transmits information on the progress made in developing and improving Federal crop insurance for organic crops and plans to continue the Organic Production Survey on an annual or biannual basis and the use of AMS data to expand the number of organic price elections available is prepared by the Product Management Division and sent to Congress. RMA works with AMS on attaining the current pricing information necessary to publish the report.

**Foreign Agriculture Service Major Programs** – FAS administers a variety of programs that are designed to facilitate access to the international markets and thereby help to support a competitive U.S. agricultural system. FAS also carries out activities that promote productive agricultural systems in developing countries and contribute to increased trade and enhanced global food security. Working bilaterally and with international organizations, FAS encourages the development of transparent and science-based regulatory systems that allow for the safe development and use of the agricultural goods derived from new technologies and works to eliminate sanitary and phytosanitary barriers.

**Negotiating Trade Deals**
FAS works with other USDA agencies, the Office of the U.S. Trade Representative, and others in the Federal government to monitor and negotiate new trade agreements and enforce existing trade agreements. The United States has free trade agreements (FTA) with 20 countries around the world that expand export opportunities for U.S. food and agricultural producers. FAS advised on the recently concluded negotiations on the Trans-Pacific Partnership (TPP). This agreement will create new opportunities for trade in a dynamic region where populations and purchasing power are increasing, enhancing the demand for American agricultural exports.
United States Department of Agriculture
2016 Presidential Transition
Farm and Foreign Agricultural Services Mission Area (FFAS)

Organic Equivalency

FAS also supported the creation of five organic equivalency agreements that help both farmers and consumers benefit from international organic markets worth more than $35 billion. These markets include Canada, the European Union, Switzerland, Japan and South Korea.

Market Development Program

FAS’s Market Development Programs include the establishment of partnerships with private sector cooperator organizations, which support the development, maintenance and expansion of commercial export markets for U.S. agricultural commodities and products. In 2015, almost 1,000 U.S. companies and organizations participated in 21 USDA endorsed trade shows in 16 countries. Onsite sales totaled an estimated $421 million and the total value of the agricultural exports resulting from participation in foreign food and agricultural trade shows in 2015 was $1.52 billion

Market Access Program

The Market Access Program (MAP) provides funds to participating organizations to cover a portion of the cost of carrying out overseas marketing and promotional activities, such as consumer promotions. MAP participants include nonprofit agricultural trade organizations, State-regional trade groups, cooperatives and private companies that qualify as small businesses.

Foreign Market Development Program

The Foreign Market Development (FMD) Program, also known as the Cooperator Program, helps create, expand and maintain long-term export markets for U.S. agricultural products. Under the program, FAS partners with U.S. agricultural producers and processors, who are represented by non-profit commodity or trade associations called “cooperators,” to promote U.S. commodities overseas. The FMD program focuses on generic promotion of U.S. commodities, rather than consumer-oriented promotion of branded products. Preference is given to organizations that represent an entire industry or are nationwide in membership and scope.

Quality Samples Program

The Quality Samples Program (QSP) provides funding to assist private entities to furnish samples of U.S. agricultural productions to foreign importers in order to overcome trade and marketing obstacles. The program, which is carried out under the authority of the CCC Charter Act, provides foreign importers with a better understanding and appreciation of the characteristics of U.S. agricultural products.

Export Credit Guarantee Program (GSM-102)

The GSM-102 program provides estimated $5.5 billion in credit guarantees to encourage financing of commercial exports of U.S. agricultural products. By reducing financial risk to lenders, credit guarantees encourage exports to buyers in countries — mainly developing countries — that have sufficient financial strength to have foreign exchange available for scheduled payments.
Facility Guarantee Program
The Facility Guarantee Program (FGP) is designed to boost sales of U.S. agricultural products in countries where demand may be limited due to inadequate storage, processing, handling, or distribution capabilities. The program provides credit guarantees to facilitate the financing of manufactured goods and U.S. services to improve or establish agriculture-related facilities in emerging markets.

Food for Progress Program
The Food for Progress Program helps developing countries and emerging democracies modernize and strengthen their agricultural sectors. U.S. agricultural commodities donated to recipient countries are sold on the local market and the proceeds are used to support agricultural, economic or infrastructure development programs. Food for Progress has two principal objectives: to improve agricultural productivity and to expand trade of agricultural products.

The McGovern – Dole International Program
The McGovern–Dole International Food for Education and Child Nutrition Program helps support education, child development and food security in low-income, food-deficit countries around the globe. The program provides for the donation of U.S. agricultural commodities, as well as financial and technical assistance, to support school feeding and maternal and child nutrition projects. The key objective of the McGovern-Dole Program is to reduce hunger and improve literacy and primary education, especially for girls.

The Norman E. Borlaug International Fellowship Program
The Norman E. Borlaug International Agricultural Science and Technology Fellowship Program promotes food security and economic growth by providing training and collaborative research opportunities to fellows from developing and middle-income countries. Borlaug fellows are generally scientists, researchers or policymakers who are in the early or middle stages of their careers.

The Cochran Fellowship Program
The Cochran Fellowship Program provides short-term training opportunities to agricultural professionals from middle income countries, emerging markets and emerging democracies. Cochran fellows come to the United States, generally for 2-3 weeks, to work with U.S. universities, government agencies and private companies. They receive hands-on training to enhance their technical knowledge and skills in areas related to agricultural trade, agribusiness development, management, policy and marketing.

Mission Area Loan Portfolio Trend FY 2009-2016

Mission Area Loan Program Level Growth FY 2009-2016
FSA Budget and Staffing Highlights:

FSA’s FY2016 enacted funding level of $1.52 billion supports federal and non-federal staffing to administer its discretionary and mandatory programs. In FY2016, FSA’s funding sources include direct appropriations ($1.2 billion), credit reform transfers ($310 million) and reimbursements ($77 million). Of the $1.52 billion appropriated to FSA, approximately 93 percent funds salaries and benefits, rent and IT expenses with remaining funding supporting operating expenses such as supplies, printing, postage, transportation and equipment. While FSA has taken significant steps during the past few years to reduce its operating expenses by streamlining operations through administrative efficiencies, there are still a number of operational expenses that are not controlled by FSA such as mandatory Departmental expenses (Greenbook charges), travel expenses related to compliance visits and county office rent expenses for more than 2,100 USDA County Offices. In FY2017 and FY 2018, FSA anticipates a substantial increase in county office rent expenses due to the renewal of leases that have expired or will expire in FY2017 and FY2018. Most of these leases are expected to have significant increases because they have not had rent adjustments in many years. FSA projects an increase in County Office rent expenses of $5 million in FY2017 and $11.6 million in FY2018 for approximately 700 leases.

RMA Budget and Staffing Highlights:

The RMA Agency budget represents the Salaries and Expenses (S&E) (discretionary funds), which pay for the administrative and operating costs to achieve the RMA mission, goals, and objectives. The budget includes the Federal Crop Insurance Corporation (FCIC) Program (mandatory funds), which include the Premium Subsidy (amount the Federal government is contributing towards the insurance premiums), Delivery Expense (amount to reimburse the Approved Insurance Provider (AIP; company) for Administrative and Operating Expenses (A&O)), Underwriting Gain (amount the FCIC and AIPs share on gains and losses), and Producer Premium (portion of the policies that the producers pay). RMA pays for indemnities or losses on crop insurance from the combination of Producer paid premium and premium subsidy.

RMA employs a workforce of approximately 475 employees. Approximately 23 percent are eligible to retire within the next year. The RMA headquarters is located in Washington, D.C., which houses 19 percent of our workforce. In addition to the headquarters location, RMA has 10 regional offices and 5 regional compliance offices throughout the country. About 81 percent of the RMA total workforce are stationed outside of Washington, DC.

FAS Budget and Staffing Highlights:

FAS employs a total workforce of approximately 1257 employees. Of the permanent career workforce, 23 percent of Civil Service and 35 percent of Foreign Service are eligible to retire through calendar year 2017. FAS headquarters is located in Washington, D.C. which houses 65 percent of the workforce. FAS has 93 overseas offices covering 171 countries to work directly on behalf of our constituents and with foreign entities.
II. Top Issues/Hot Topics

Timeline

➤ January 2017

- **MIDAS Project**
  Per findings from the MITRE Corporation’s independent third-party assessment, the analysis of alternatives for the MIDAS platform will be complete in December 2016 and available for review in January 2017.

- **Report to Congress: International Food Aid Report**
  Required by H. Report 114-205. The Committee directs FSA to make publicly available reports detailing U.S. Commodities purchased for international food aid. The Committee also directs FSA to include the amount, value, destination, and type of commodity shipped by U.S. port of origin. This is an annual report prepared by Commodity Operations.

- **National Food and Agriculture Council (NFAC)**
  On January 1, 2017 FSA will become Chair of NFAC, a position that rotates each year to one of the three members: FSA Administrator, NRCS Chief, and RD Deputy Under Secretary for Operations and Management. The council was established to approve or deny office actions (e.g., closures, consolidations), particularly when multiple agencies occupy the same field office. The council is also a forum to discuss leveraging resources, such as sharing vehicles for outreach visits to customers.

  FSA will recommend to the NRCS and RD members priorities it wants the council to address in 2018. Among the items that FSA intends to recommend is that lead responsibility for StrikeForce not rotate with the NFAC Chair position but be continuously housed in RD. Rotating the lead agency of StrikeForce each year, causes the loss of momentum and continuity among coordinators and leads located in the identified states and counties.

- **Report to Congress: Changes to Cropland Report**
  Required by SEC. 11014 of the Agricultural Act of 2014 (P.L. 113-79). Not later than January 1, 2015, and each January 1 thereafter through January 1, 2018, the Secretary shall submit to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate, a report that describes the cropland acreage in each applicable county and State as of the date of submission of the report; and the change in cropland acreage from the preceding year in each applicable county and State. This is an annual report prepared by Farm Programs.
United States Department of Agriculture
2016 Presidential Transition
Farm and Foreign Agricultural Services Mission Area (FFAS)

➢ February

• Commodity Classic
  This is one of the largest conventions that is farmer-focused and farmer-led. USDA staff, more specifically FSA senior leadership, has served as presenters and to provide significant program updates to a wide variety of commodity groups that attend the Commodity Classic. The convention also provides FSA with an opportunity to meet with multiple commodity groups and their respective leaderships to hear about specific issues, initiatives and challenges in their respective industries.

• USDA Ag Outlook Forum (February 23-24)
  This forum is hosted by USDA’s Office of Chief Economist. Several Agency senior staff attend in support of several agency-wide programs.

• Request for Applications (RFA) Announcement – Risk Management Education

➢ March 2017

• Secretarial Appointments to FSA’s County Committees
  March 1 deadline.

• Report to Congress: Quarterly IT Report and Briefing
  Explanatory Statement. The Secretary is directed to continue briefings for the Committees regarding all IT projects and activities related to farm program delivery. This is a quarterly report due March 30 and June 30 and is prepared by Office of Chief Information Officer, followed-up with a scheduled briefing.

• USDA National Ag Week (March 4 – 10)

➢ April 2017

• Report to Congress: Farm Programs IT Operations Report
  This is an annual report prepared by Office of Chief Information Officer.

• Report to Congress: Quarterly Loan and Grant Program Budget Report
  Required by H. Report 114-205. The Committee directs the Department, through the Office of Budget and Program Analysis, to provide quarterly reports to the Committees on Appropriations of the House of Representatives and the Senate on the status of obligations and funds
availability for the loan and grant programs provided. The Committee further directs that if an estimate of loan activity for any program funded in Titles I and III of this bill indicates that a limitation on authority to make commitments for a fiscal year will be reached before the end of that fiscal year, or in any event whenever 75 per centum of the authority to make commitments has been utilized, the Secretary shall promptly notify the Committees in writing. This is a quarterly report prepared by Farm Loan Programs, or more often as required.

- **Report to Congress: Farm Bill Funding Status Report**
  Required by H. Report 113-468. On October 1, 2014, and every quarter thereafter until the funds are expended; the Committee directs the Secretary to provide a status report on the obligations and outlays and expects that the Committee will be notified if there are any significant deviations from the plan. The Committee reminds the Secretary that funding is not available to hire new full-time equivalent staff at FSA. As such, this funding should not be used for that purpose. (The original plan was sent to the Chair and Ranking Members of the House and Senate Agriculture Appropriation Committees on August 1, 2014.) This is a quarterly report due January 1 and April 1 prepared by Office of the Chief Financial Officer.

- **Publish FRN announcing U.S. WTO quantity safeguard trigger levels**
  - May 2017

- **Report to Congress: Commodity Credit Corporation Report**
  Required by H. Report 114-205. The Committee directs the Secretary to provide a report on November 15 and May 16 on planned uses of funding under the authorities of Section 4 and Section 11 of the Commodity Credit Corporation Charter Act.

- **Report to Congress: Farm Programs IT Plan for Expenditures Report**
  Required by Omnibus Act and Explanatory Statement. (Paraphrased) That not more than 50% of the funding made available under this heading for information technology related to farm program delivery, may be obligated until the Secretary submits to the Committees on Appropriations a plan for expenditure that (1) identifies for each project/investment over $25,000, (2) demonstrates each project/investment and (3) has been reviewed by GAO and approved by the Committees of Appropriations of both Houses of Congress.
June 2017

- **Field Office Leases Redistribution Among Service Center Agencies**
  Complete the transfer of the acquisition and management of 200 leases from FSA to the Natural Resources Conservation Service no later than June 30, thereby completing Phase II of the agreement by the Service Center Agencies to redistribute leases according to the actual office footprint of each agency. A date for the Phase III transfer of the final 200 leases is to be determined. The Phase I transfer of 200 leases is to occur in December 2016.

- **Report to Congress: Quarterly IT Report and Briefing**
  This is a quarterly report due March 30 and June 30 and is prepared by Office of Chief Information Officer.

- **China Strategic and Economic Dialogue (S&ED) (DATE TBD)**
  The China S&ED is a high-level dialogue for the United States and China to discuss a wide range of regional and global strategic and economic issues between both countries.

**Mission Area Issues**

**Risk Management Agency:**

**PREVENTED PLANTING CHANGES**

In November of 2016, RMA made two changes to prevented planting, one of which was in response to a 2013 OIG audit. First, the payment factors for crops were adjusted after a review and stakeholder feedback. The only adjustments made were to rice and corn – factors for all other crops remain unchanged. The factor for rice was adjusted up, while that for corn was lowered. RMA also removed the option for producers to purchase increased levels of prevented planting coverage. Previously, producers could purchase an additional 10 percent coverage; now they can only purchase 5 percent.

**Key Points:**

- The coverage level changes were made after RMA commissioned a study to evaluate the appropriateness of the current prevented planting coverage levels.

- Industry and stakeholders had an opportunity to review the study’s findings and offer input to RMA.

- RMA used that input in its final analysis.
- The first crops reviewed were corn, soybeans, rice, sorghum, cotton, barley, and wheat. Out of these crops, changes to the coverage factors were made for corn (decrease) and rice (increase).

- Additional crops will be reviewed for the following year.

**FSA: COMMODITY CREDIT CORPORATION (CCC) AUDIT**

CCC as a corporation has been audited since the early 1990’s. While the corporation has a long history of clean audits, its audits have never been without challenge due to the complexity of accounting for farm programs, each with unique qualifications and terms. The corporation’s programs change with each new farm bill, and the corporation is challenged to meet the need of providing timely financial assistance to producers so they may finance their operations.

The auditor, KPMG, gave the FY 2015 CCC financial statements a disclaimer. The disclaimer defined ten notice of findings and recommendations to address. The findings are predominantly related to CCC’s ability to justify programmatic balances, including USAID grant balances; and its ability to provide evidential documentation to support financial transactions.

The auditor, KPMG gave the FY 2015 CCC financial statements a disclaimer. To assist with the development of corrective action plans and to prepare for the FY 2016 audit, CCC contracted with consultants specializing in audit readiness. The USDA Office of Chief Financial Officer (OCFO) provided a seasoned Senior Executive Service resource to serve as FSA’s Deputy Chief Financial Officer (CFO). He is focusing his attention primarily on overseeing the CCC FY 2016 audit process. KPMG, who is also conducting the FY 2016 audit, has agreed to add an additional audit partner to assist with conducting the engagement. CCC hired a senior project manager to manage the audit process, including development of processes and procedures to address issues identified in the 2015 audit. The FY 2016 audit opinion is expected in early November 2016.

**INFORMATION TECHNOLOGY**

- MIDAS: In April 2016, an independent third-party assessment of the MIDAS platform was completed by MITRE Corporation. As a result of the assessment of FSA’s use of a single, commercial-off-the-shelf platform, FSA is conducting an analysis of alternatives (AoA) to assess the current solution and to thoughtfully identify and determine if it should move to a viable alternative. As part of this, comprehensive plans to effectively transition between the major customer relationship management components (e.g., Farm Records, Business Partner) that serve as a centralized source for all customer information and consolidate both land and producer information, and the new solution, will have to be defined and executed. The AoA and recommendation to address MITRE Corporation’s
assessment will be complete in December 2016 and available for review in January 2017.

- **Acreage and Crop Reporting Streamlining Initiative ACRSI**: A joint FSA and Risk Management Agency IT system has been developed to replace duplicative crop reporting of common acreage information by producers to both agencies and their crop insurance provider, saving time and potentially reducing inadvertent data reporting errors. Currently, FSA is exploring critical project decisions concerning policy, infrastructure, and system stability in fully-defining enhancements for the spring 2017 reporting period, the heaviest crop period.

ACRSI was piloted in the spring of 2015 in 30 counties in Iowa and Illinois. The agencies used lessons learned from the spring pilot to expand statewide reporting in incremental phases to 15 States and all counties in those States in the fall of 2015. For spring crops in 2016, RMA and FSA expanded ACRSI nationwide for 13 crops. Those crops were alfalfa, corn, cotton, fallow, grass, oats, peanuts, rice, rye, sorghum, soybeans, and wheat. This captured over 93% of all reported acres.

The FSA/RMA Joint Policy Team have implemented data standards and reporting protocols that will ensure an effective data sharing process between FSA, RMA, and insurance companies. RMA and FSA IT systems are currently being enhanced in preparation for the 2016 fall acreage reporting period and data sharing through ACRSI.

- **Bridges to Opportunity (Bridges)**: Bridges, which is expanding to all FSA County Offices by January 2017, is a customer service platform that provides every FSA customer with a required Receipt for Service that gives a meaningful summary of his or her visit, and additional resources and referrals to other USDA agencies and local partners. Leveraging FSA’s relationships with its nearly two million customers, Bridges is working with USDA agencies and non-federal partners to provide farmers and ranchers with information on topics that include organic production, beginning farmer resources, integrated pest management, disaster assistance, conservation practices, agricultural education courses, loans, grants, and other information and financial assistance that can benefit and grow farming and ranching operations.

In FY 2016, FSA reprogrammed $5.6M within Salary and Expenses (S&E) IT Non-Farm Programs Delivery to the USDA Service and Outreach to Agricultural Communities investment (Major IT investment FSA-124) to further expand Bridges. Bridges began as a pilot in October 2014. This reprogramming enabled FSA to renew the existing IT software licenses that expired in July 2016, supporting nationwide expansion to over 10,500 users in all State and FSA County Offices by early 2017. The nationwide expansion results in a significant cost savings on a per user basis due to a bulk discount agreement with the software vendor.

- **Connectivity**: To ensure sufficient bandwidth over the long-term needed to support the changing application and data requirements of FSA programs, County Office staff, and
farmer and rancher customers, USDA’s Client Technology Services (CTS) provided a Service Center Agency (SCA) Telecommunications Modernization plan for FSA, Natural Resources Conservation Service, and Rural Development. The plan provides a long-term strategy for continuous site monitoring and scheduled upgrades to services utilizing higher bandwidth. A procurement using the General Services Administration’s, Network Services 2020 (NS2020) Services Agreement, is expected to be awarded in FY 2017.

Through FY 2015 and FY 2016, the initial phase of the USDA plan to upgrade a total of 1,038 sites from 1.5MB T1 lines to 10 MB Ethernet connections, increasing bandwidth up to 567 percent was implemented. This completed the upgrade of 70% of sites. Site installation costs were funded through the USDA Optimized Computing Environment (OCE) investment. Recurring monthly circuit charges will be funded by the SCA base budget. This OCE investment in VoIP technology allows for the consolidation of communications traffic, thereby resulting in a reduction in the number of voice lines. The reduced voice line costs will significantly offset the increased network costs. After deployment, USDA expects overall telecommunications costs for the SCAs to decrease. CTS will continually monitor sites upgraded during the initial phase of the SCA Telecommunications Modernization initiative to assess network utilization and confirm the upgraded connection is sufficient.

For the sites that were not prioritized in the initial phase due to various factors, such as sites geographically located in areas where upgraded telecommunications infrastructure is not yet commercially available, CTS is working with providers to improve the telecommunications infrastructure and bandwidth through technologies previously unavailable for installation at these sites. Implementation will be done on a rolling schedule, which will enable the SCA’s to continually review the new communication services, and install them in areas with the highest demand.

AGRICULTURE RISK COVERAGE COUNTY (ARC-County) YIELDS

The ARC-County program provides revenue loss coverage at the county-level. ARC-County payments are issued when the actual county crop revenue of a covered commodity is less than the ARC-County guarantee for the covered commodity.

USDA National Agricultural Statistics Service (NASS) surveys the primary growing regions for a crop and publishes yields at a county-level only if there are enough surveys returned. Given the wide swath of counties and number of covered commodities, many counties did not have any or had incomplete sets of county-level published yields. When NASS county-level yields were not available, FSA worked with RMA to aggregate unpublished yield data for crop insurance participants and used this RMA data if there were sufficient results (at least 25% of reported acreage and at least 5 farms). These two sets of county-level yield data only provided about 43,000 yields, but represent an area such that about 90% of the base acres are in counties that had NASS or RMA county-level yields. If the county-level data was not available, NASS district-level data (aggregate data covering a group of counties) was used, with discretion for the state
committee to be able to adjust them based on knowledge of the county relative to the others in the district. If none of these data sets were available, the FSA state committee was delegated responsibility for setting the appropriate yield using whatever sources or expert opinion it could find. The limited data available and lack of county specific data explains why for some less common crops in a state, there may be a group of counties with the same yield (e.g. a district yield) or even the same yield for the entire state in cases where there was not even district level data.

FSA currently uses the following data cascade to determine yields based on the level of available data from producers: (1) NASS county level data, (2) RMA data, (3) FSA State Committee (NASS district level data is provided for guidance).

While FSA has received a handful of internal and external requests to substitute yields based on expert opinion, these have been in relation to yields established using NASS or RMA county-level data. Since the established data cascade does not provide for discretion to change yields when county-level data is available, FSA has not granted these requests.

There are two significant challenges to providing flexibility to override data with expert opinion from the State committee or others. First, if the yields were part of the benchmark years, that would be changing data that was examined by producers when they made their one-time program elections and potentially re-open that decision. Second, in an analogous situation where FSA overrode NASS survey data related to Conservation Reserve Program soil rental rates, the USDA Office of Inspector General found that FSA had acted improperly and the agency had to subsequently revise the rental rates using the data.

CONSERVATION RESERVE PROGRAM (CRP) ENROLLMENT

The most recent general signup period in 2016 was one of the most selective sign-up periods in CRP’s 30-year history, with a record high Environmental Benefits Index cut-off and the lowest-percentage of applications accepted. The high bar means that the per-acre conservation benefits are being maximized and that acres enrolled address multiple conservation priorities simultaneously. A nationwide acreage limit was established for this program in the 2014 Farm Bill, capping the total number of acres that may be enrolled at 24 million for FY2017 and FY2018. At the same time, USDA has experienced a record demand from farmers and ranchers interested in participating in this voluntary program partly due to low commodity prices. The 24 million acre cap has led the agency to batch continuous offers, and pursue a strategy of stacking benefits when possible and prioritizing the most environmentally sensitive land.

As of July 2016, 23.9 million acres were enrolled in CRP, with 1.7 million acres set to expire this fall. Over three million acres have been offered for enrollment this year across the three main categories within CRP, with FSA receiving over 26,000 offers to enroll more than 1.8 million acres during the general enrollment period, and over 4,600 offers to enroll more than one million acres in the new CRP Grasslands program.
United States Department of Agriculture  
2016 Presidential Transition  
Farm and Foreign Agricultural Services Mission Area (FFAS)  

Coming off a record-setting 2015 continuous enrollment of over 860,000 acres, more than 624,000 acres already have been accepted for 2016 in the CRP continuous enrollment, triple the pace of last year. This was the most competitive selection process in the history of the CRP program; FSA will enroll 411,000 acres in general enrollment and 101,000 acres in the new CRP Grasslands program. The continuous CRP signup includes a number of important programs and initiatives:

- Multiple wetland and duck nesting initiatives that help to improve water quality and provide habitat in the Midwest and throughout the U.S.
- Upland bird habitat initiative that gives landowners a way to use a small portion of their land to create a bird habitat while continuing to farm in the Midwest, South, and throughout the U.S.
- Longleaf pine initiative that helps to restore in the Southeast some of the most diverse forest ecosystems in the world by providing habitat for important species while also protecting soil and water quality
- State Acres for Wildlife Enhancement (SAFE) restores vital habitat to meet high-priority State wildlife conservation goals
- Highly Erodible Lands Initiative (HELI) offers a practical solution to create wildlife habitat while protecting cropland that is highly susceptible to erosion (with an erosion index over 20)
- Pollinator Habitat, which enhances honey bee and native pollinator populations throughout the country
- Conservation Reserve Enhancement Program (CREP) targets high-priority conservation concerns identified by a State, whereby federal funds are supplemented with non-federal funds to address those concerns. These partnerships range from agreements to help protect water quality, such as the one that protects the New York City drinking water supply, to those with broader wildlife and wildlife concerns from the Midwest to Hawaii.

PEANUTS

Following passage of the 2014 Farm Bill, market changes—combined with unintended consequences from the new farm bill—encouraged peanut production. These factors included softening prices for many competing crops like cotton, corn and soybeans, but also three elements of the new ARC-PLC program: 1) a separate payment limit for peanuts in addition to other commodities (peanuts has a separate $125,000 payment limit), 2) a generous reference price that resulted in substantial 2014-crop peanut PLC payments, and 3) a requirement that generic base acres be planted to a covered commodity in order to trigger a payment, which encourages peanut planting due to the relatively high reference price.

Data from USDA indicate that peanut production has indeed increased under the 2014 Farm Bill. Peanut planted acres increased 20 percent in 2015, with peanut production estimated at about 3.1 million tons, up significantly from 2014. Production in 2016 is forecast at close to 3.2 million tons.
The large supply of 2015-crop peanuts had initially led USDA to expect significant quantities of peanuts (that were placed as collateral under the Marketing Assistance Loan program) to be forfeited to the Commodity Credit Corporation (CCC) as the loans matured in the summer of 2016.

As of late September, no 2015-crop forfeitures have yet occurred. This is largely due to strong demand—particularly from China—and the resulting strong redemption rate. It is unclear whether China will be a large buyer in future years. USDA expects that with continued strong interest in peanut plantings, 2016-crop forfeitures in the summer of 2017 may again loom as a potential issue.

**SUGAR**

USDA manages the U.S. supply of sugar to maintain prices at or above support levels through domestic marketing allotments, by restricting imports and by selling to bioenergy producers if there is excess sugar in the market. USDA is mandated to operate the program at no cost to the extent practicable. Two major issues have affected the industry in 2016 and may well remain issues in 2017:

- **National Labelling Law and the Genetically Modified Beet Crop**—Virtually all of the U.S. beet crop is genetically modified (GM), and data collected by FSA indicate that the demand for beet sugar has declined relative to cane sugar (which is non-GM). This unprecedented dichotomy in the sugar market between beet and cane sugar has increased the likelihood of FY16 beet sugar loan forfeitures. The new national labelling law, which will not be fully enacted for two years, is expected to curb the movement away from beet sugar, especially by manufacturers using multiple GM inputs in their production lines who will find it too expensive to go 100 percent GM free.

- **Common Market Situation with Mexico**—Under NAFTA, Mexico was allowed unlimited duty-free access to the U.S. sugar market, which hindered USDA’s ability to control sugar supplies and resulted in large FY 2013 forfeitures. Subsequently, the U.S. filed an anti-dumping/countervailing duty (AD/CVD) case against Mexico. To avoid retaliatory tariffs, Mexico and the U.S. government in December 2014 signed two “suspension agreements.” The “AD agreement” sets minimum prices for two types of Mexican sugar (raw, which is of lower grade, and refined, which is suitable for food use) entering the United States. The “CVD agreement” set the maximum quantity Mexico may ship to the U.S. in a fiscal year and further sets the maximum quantity of refined sugar that Mexico can ship. The U.S. sugar industry is seeking to revamp these agreements, largely due to unforeseen changes in the marketplace (see below). Mexico is currently the leading foreign source of U.S. sugar, supplying almost 40 percent of total U.S. sugar imports. Any changes to the agreements will have important ramifications for the U.S. sugar industry.
DISASTER PROGRAMS

FSA administers multiple disaster programs, including the Livestock Forage Disaster Program (LFP)< Livestock Indemnity Program (LIP), the Emergency Assistance for Livestock, Honey Bees, and Farm-raised Fish (ELAP), and the Tree Assistance Program (TAP).

Disaster payments nationwide processed from 2012 to 2016, as of August 31, 2016, for Livestock Forage Program (LFP), LIP, TAP, and ELAP. A total of over $6.2 billion were issued for these programs.

USDA also expanded the Noninsured Crop Disaster Assistance Program (NAP) to include buy-up protection, similar to buy-up provisions offered under crop insurance.

FSA also administers the Emergency Conservation Program, which is available to repair conservation structures.

MARGIN PROTECTION PROGRAM for DAIRY (MPP-DAIRY)

Milk prices continue to run lower than a year ago. However, dairy price projections see an increase throughout the rest of the year; the margin for June is $5.75 per cwt, which is $0.02 per cwt lower than the May margin and $2.40 per cwt lower than June 2015. The June all-milk price increased $0.30 per cwt from May to $14.80 per cwt. Continued increases in milk production and other factors including low world market prices, increased milk supplies and inventories, and slower demand are affecting dairy prices. The trade picture for U.S. dairy producers is not optimistic. Imports were higher and exports lower in 2015 than the previous year and early results in 2016 have led to projections for another year of higher imports and lower exports. Strong increases in European milk production and slower sales into leading importers’ markets, like China, have increased competition in world markets. The strong U.S. dollar has reduced U.S. exports and encouraged U.S. imports of butter and cheese in recent months. That relationship is expected to continue through the rest of 2016. The FSA national office will mail out 2017 annual coverage election reminder postcards to MPP-Dairy program participants. Before the end of the extended annual sign-up period on December 16, 2016, a reminder letter will be mailed to dairy operations that have not enrolled.

All final USDA prices for milk and feed components required to determine the national average margin for May/June 2016 were released on July 29, 2016. Dairy producers who enrolled at the $6 through $8 margin trigger coverage level have received payments totaling approximately $11.2 million in financial assistance as of August, the largest payment since the program began in 2014.

Signup for 2017 coverage began July 1, 2016, and the signup deadline of September 30, 2016, has been extended to December 16, 2016, to encourage program participation and allow more time to make coverage elections. Dairy operations that participated in coverage year 2016 are required to participate in the MPP-Dairy program through 2018 with at least catastrophic level coverage.
FARM LOAN PROGRAMS

Three consecutive years of reduced commodity prices and farm incomes have depleted working capital, contributing to an increased demand for non-real estate credit. In the Kansas City and Chicago Federal Reserve districts, surveys of lenders indicate that demand among farm customers seeking non-real estate credit in 2016 approached levels not experienced since the 1990s. While farms overall have strong balance sheets with low debt-to-asset ratios, a majority of the farm debt is held by farms with over $500,000 in farm sales. These larger farms, which tend to be more indebted, are more likely to face liquidity constraints. Continuing declines in net cash and net farm income and modest declines in farmland values have increased loan renewals and extensions and the demand for short-term operating loans, and also led to some loan repayment problems. While overall credit conditions appear manageable, a continuation of lower farm incomes and further deterioration of farmers’ working capital will likely result increased demand for both direct and guaranteed loans.

The FY2017 budget provides funding for about a $6.7 billion loan level for direct and guaranteed loans for farm ownership, farm operating, conservation, emergency, and other farm loan programs. This is a higher level than the $6.4 billion budget for FY 2016 and $5.6 billion in actual obligations for FY2015. The FY2017 program levels will cost about $81.3 million in budget authority, which is a 17 percent increase above the $69.6 million in budget authority for FY2016. This is due in part to the increase in beginning farmer assistance and stress in select sectors of the agriculture economy. Under the continuing resolution, farm loans will be operating under a percentage of the FY2016 budget and may request an advance on the rest of the fiscal year funds.

ORGANIC CERTIFICATION COST SHARE PROGRAMS

The Organic Certification Cost Share Program (OCCSP) and Agricultural Management Assistance Program (AMA) assist certified organic operations in defraying the costs associated with organic certification. Beginning with FY2017, administration of the programs transfers to FSA from the Agricultural Marketing Service (AMS).

Under both programs, organic operations may receive up to 75 percent of their certification costs, not to exceed $750 per certification scope. The OCCSP is available to organic producers and handlers of crops, livestock and wild crops in all 50 States and several territories. The AMA is available to certified organic producers—only crop and livestock operators—in sixteen states designated by Congress.

Historically, the programs were administered through AMS under grants initiated with State Departments of Agriculture. FSA is continuing this practice in addition to now offering producers and handlers the ability to apply for OCCSP through local FSA county offices. FSA sees this initiative as complementing its work on local foods and specialty crops and broadening
its customer base. Overall, FSA has worked on expanding assistance to organic farmers and ranchers.

The cost share programs have been historically underutilized, with many eligible operations not participating. While the overall amount reimbursed to organic producers and handlers continues to increase each year, dollars remain unspent. By utilizing the FSA State and county office structure, USDA plans to increase awareness of the program through improved outreach, as well as taking advantage of operational efficiencies at the field level.

FSA will provide State Departments of Agriculture the option to continue to administer the program cooperatively, should they so choose. Program enrollment will be offered at the county and State office levels in all 50 States, working closely with any interested State cooperators to coordinate outreach efforts and to ensure proper oversight, particularly to prevent duplicate payments. FSA has demonstrated success in similar cooperative programs, such as the Conservation Reserve Enhancement Program, and it anticipates similar success with the organic certification cost share programs.

**Foreign Agricultural Services**

**CHINA ISSUES SUMMARY**

China is forecast to be our top agricultural export market in 2017, bringing in over $20 billion a year in sales. We are engaged on a number of issues in China, any of which may require senior leadership intervention during the first half of 2017. The China Strategic and Economic Dialogue (S&ED), which will take place in the United States (location TBD) in June 2017, is an appropriate forum to discuss these issues. If earlier engagement is required (which could be the case for beef market access and the China Food Safety Law), the first scheduled opportunity for new USDA leadership would be a bilateral meeting on the sidelines of the January 22 G-20 Agriculture Ministers meeting in Berlin, Germany.

- **Beef Market Access:** Progress has been made on regaining access to the Chinese beef market, but several steps are still required. If discussions continue past the November 2016 Joint Commission on Commerce and Trade (JCCT) meeting, then FAS OA and FFAS engagement with Ministry of Agriculture General Administration of Quality Supervision, Inspection and Quarantine (AQSIQ) will be critical in the first six months of 2017.

- **China Poultry:** If the proposed rule for China’s market access request for poultry is released before the end of 2016, a great deal of public discussion, Hill requests and engagement with industry/media is likely to ensue well into 2017.

- **Poultry/Avian Influenza:** China has refused to engage productively on its ban on all U.S. poultry exports, despite written and verbal requests from Secretary Vilsack, on top of repeated attempts byAPHIS to engage China technically.
Possible intervention by FFAS may be needed in early 2017 if there is no progress towards lifting the band following the November JCCT meeting in WDC

- **Biotech/Approvals and Regulatory Reform:** Continuous engagement by FFAS and applicable staff members will be needed to move China from verbal commitments to actions on biotech reforms, as well as on movement on products in the approval pipeline.

- **China Food Safety Law:** On October 1, 2015, China’s new Food Safety Law went into effect. To enforce the Law, China has drafted and implemented an unprecedented number of new food regulations. The numerous drafts of the Law and additional, newly imposed measures create great uncertainty for U.S. exporters, and new USDA leadership may need to engage with Chinese counterparts if newly enacted regulations negatively impact U.S. exports.

- **Rice Protocol** United States and China have initialed a protocol that would allow U.S. milled rice to be shipped to China, but we are awaiting final signature. Only facilities that APHIS inspects and deems compliant with the protocol would be eligible to ship to China. USDA is pushing to sign the protocol in fall 2016, when there will be multiple opportunities to engage high level Chinese officials.

### WTO LITIGATION

We are involved in several WTO disputes currently. Key cases:

- **Offensive:** China agricultural subsidies, India Avian Influenza (AI), China poultry Anti-Dumping and Countervailing Duty Measures (AD/CVD), Indonesia licensing

- **Defensive:** Country of Origin Labeling (COOL), Argentina beef

- **Brazil:** Operational policies need to be reviewed in light of recently established WTO disciplines and these will be reconciled with older more limiting disciplines related to the Brazil WTO negotiated settlement.

### ARGENTINA LEMONS RULE

An APHIS proposed rule was published on May 10, 2016 with an extended comment period through August 10, 2016 that would allow the importation of fresh lemons from a region in northwest Argentina into the continental U.S. This proposed rule is very sensitive for the U.S. citrus industry. Argentina began a formal WTO dispute over citrus and first
United States Department of Agriculture
2016 Presidential Transition
Farm and Foreign Agricultural Services Mission Area (FFAS)

requested a formation of a WTO panel in December 2012, but so far has preferred to find a technical solution rather than begin litigating the case by making the second request for a panel.

**BIOTECH.** A rapidly evolving U.S. domestic biotechnology regulatory environment has combined with trade barriers in key importers to create many challenges for U.S. exports of products of biotechnology. Initiatives are ongoing to address trade barriers in third-country import markets (e.g., China, EU), improve science-based decision making and policies globally, and ensure market access for emerging technologies.

- **TPP** This high-standard agreement opens markets and will support expansion of U.S. agricultural exports, increase farm income, generate more rural economic activity, and promote job growth. TPP Signatories include Australia, Brunei, Canada, Chile, Japan, Malaysia, Mexico, New Zealand, Peru, Singapore, and Vietnam – these countries represent nearly 40% of global GDP. A U.S. International Trade Commission report showed that the Trans-Pacific Partnership will increase U.S. exports by $57.2 billion annually by 2032 if TPP is passed. A report by the Farm Bureau found $8.5 billion in total additional farm receipts from the implementation of TPP ($5.8 billion for livestock, $2.7 billion for crops), and $4.4 billion in additional net farm income. In April 2016, more than 200 agricultural groups wrote House and Senate leadership citing the economic requesting approval of TPP by Congress this year. Kansas cattle, wheat, corn, sorghum, and soybean, as well as Michigan bean cattle, corn, pork, and soybean groups signed the letter. Recently, the Administration submitted the required draft Statement of Administrative Action. USTR continues work on an implementing bill for submission to Congress.

- **TTIP.** On July 12, 2013, the United States and the European Union began the first round of negotiations in pursuit of a comprehensive, trans-Atlantic free trade agreement. The EU is the world’s largest importer of agricultural products and food. TTIP negotiations are ongoing and in early October the 15th round of negotiations took place in New York.

- **ISRAEL.** The United States and Israel have an Agreement on Certain Aspects of Trade in Agricultural Products (ATAP) that has been extended several times. There are negotiations underway to develop an improved permanent agreement, including to reduce tariffs on U.S. agricultural exports.

- **CUBA.** There is much interest in strengthening ties with Cuba, but there are significant legal constraints on what we can do as a government. Our primary focus for the first half of 2017 is to work with State Department on established a USDA presence in Havana, building on work begun in 2016. If such a position is approved for placement in early 2017 and current legislation is changed to allow the use of
USG market development funds in Cuba, new USDA leadership might want to travel to Cuba in March or April to commemorate the one year anniversary of the 2016 U.S. – Cuba Memorandum of Understanding and highlight bilateral “accomplishments.”

REGIONAL, BILATERAL AND MULTI-LATERAL ENGAGEMENTS IN 2017.

- **G-20.** Germany is leading the G-20 this year and they plan on hosting a meeting of Agriculture Ministers on January 22, 2017. USDA has the lead for the United States in the planning, which can be handled at the staff level. We will need to identify a USDA head of delegation to represent at the meeting. Attendees will depend on the topic put forth by Germany in the Draft Declaration. (NOTE: The G-20 Agriculture Deputies Meeting will take place in December in Germany (location TBD).

- **U.S. – Canada Consultative Committee on Agriculture.** We have a number of technical issues with Canada that are usually discussed in this forum which is required to meet at least once, per year. The next CCA will take place in Washington, sometime between February and May.

- **G-7 Agriculture Ministerial.** This is tentatively scheduled for March – April 2017; the G-7 Ministerial is scheduled for May 26-27, 2017 in Italy.

**CANADA DAIRY.** The U.S. dairy industry has pressed for action on Canada’s dairy policies that restrict U.S. access. We are working to do everything we can to stop new trade restrictive policies from being implemented. If that fails, we are developing a WTO litigation strategy, which might be ready in early 2017.

**MEXICO SUGAR.** U.S. sugar policy is complicated in the best of times, with frequent calls from stakeholders for intervention to increase or reduce imports. The Department of Commerce is currently renegotiating terms of access for Mexico under the suspension agreement, which is adding to the complexity of overall management of the sugar program.

**MEXICO POTATOES.** Market access for U.S. potatoes has been blocked for 14 years, most recently by a series of national legal injunctions filed by Mexico’s potato industry. While gaining access is a priority, the plan for achieving this goal is evolving. USTR and APHIS have been leading on this issue.

**WTO MINISTERIAL.** The WTO will have a Ministerial meeting in November or December, and the United States is already under pressure to reform its agricultural policies. Internal strategic decisions will be made in the first half of 2017 that will shape the U.S. approach to this meeting.
AGRICULTURAL TRADE MISSIONS. ATMs proposed to Asia (ethanol only-November) and Brazil (May) are pending and additional review/analysis is needed to identify any other feasible ATMs for FY 2017.

FACILITY GUARANTEE PROGRAM
A final rule was published September 22, 2016 with request for comments. The deadline for comments is March 21, 2017. Comments need to be evaluated, and if needed, policy and regulatory changes addressed.

EXPORT CREDIT GUARANTEE PROGRAM (GSM) OUTREACH
Office of Trade Programs Credit Operations staff will continue to conduct outreach to new foreign and domestic banks to expand GSM registrations.

MARKET DEVELOPMENT PROGRAM ALLOCATIONS
FY 2017 program applications were submitted in May 2016, were reviewed and funding recommendations made in September. Program funding announcements for FY 2017 Market Access Program (MAP), Foreign Market Development Program (FMD), Emerging Markets Program (EMP), Technical Assistance for Specialty Crop Program (TASC) and Quality Samples Program (QSP) funds, will begin in October 2016, and programs with rolling applications will continue to be allocated through summer 2017.

GLOBAL FOOD SECURITY ACT (GFSA)
Passed on July 20, the Strategy is due to Congress October 1, 2016. USDA has played a major role in the development of the whole-of-government strategy and the indicators for success. USDA needs a lead agency to coordinate and synthesize all of USDA’s programs. FAS plays that role, which at times requires a high-level, political entity.

SUSTAINABLE DEVELOPMENT GOALS (SDGS)
Since the passage of the SDGs in 2015, governments, international organizations, private voluntary organizations and agricultural think tanks are aligning their strategies to fulfill these high level, but loosely defined goals (e.g., “life on earth” and “climate action.”). Many of the goals relate to agriculture, food security or other areas where USDA has jurisdiction, and FAS, as the lead international agency, has to coordinate USDA’s input.

TRADE CAPACITY BUILDING
Alongside the agenda of passing trade laws, FAS is heavily involved in advancing the capacity of countries to meet their international commitments. Acts such as the African Growth and Opportunity Act specifically commit the U.S. government to helping the member countries strengthen their SPS systems.
GAO and OIG Audits

**FAS**

- In its February 6, 2014, audit report on the “Section 632(a) Transfer of Funds from USAID to USDA for Afghanistan” (50601-0002-16), OIG recommended that FAS fully implement a formal monitoring and evaluation process and a grants management structure, and implement the recommendations outlined in a 2010 Acuity consulting firm review. This report can be found on the USDA OIG’s website at [http://www.usda.gov/oig/webdocs/50601-0002-16.pdf](http://www.usda.gov/oig/webdocs/50601-0002-16.pdf).

- In its March 28, 2013, audit report on the “Effectiveness of the Foreign Agricultural Service’s Recent Efforts to Implement Measurable Strategies Aligned to the Department’s Trade Promotion and Policy Goals” (50601-0001-22), OIG found that the measurable goals and objectives included in FAS’s Strategic Plan do not present the whole picture of how FAS’s actions are affecting the global market for American agricultural goods, and that FAS has not updated its Country Strategy Statements, USDA’s Global Market Strategy, or the corresponding performance measures in the Department's Performance and Accountability Report to align with the goals and objectives contained in the FAS Strategic Plan. This report can be found on the USDA OIG’s website at [http://www.usda.gov/oig/webdocs/50601-0001-22.pdf](http://www.usda.gov/oig/webdocs/50601-0001-22.pdf).

**FSA**

- Farm Program Modernization: Farm Service Agency Needs to Demonstrate the Capacity to Manage IT Initiatives

- USDA Farm Programs: Farmers Have Been Eligible for Multiple Programs and Further Efforts Could Help Prevent Duplicative Payments

- International Food Aid: Better Agency Collaboration Needed to Assess and Improve Emergency Food Aid Procurement System

- Farm Programs: Changes Are Needed to Eligibility Requirements for Being Actively Involved in Farming
• Farm Programs: Additional Steps Needed to Help Prevent Payments to Participants Whose Incomes Exceed Limits

• Farm Programs: USDA Needs to Do More to Prevent Improper Payments to Deceased Individuals

• Food Assistance: Briefing on U.S. Department of Agriculture's Food Assistance Procurement Process

• Disaster Assistance: USDA and SBA Could Do More to Help Aquaculture and Nursery Producers

• Farm Service Agency Livestock Forage Program, issued December, 2014.

• Farm Service Agency Noninsured Crop Disaster Assistance Program, issued October 2014.

• Fiscal Year 2012 Farm Service Agency Farm Assistance Program Payments, issued July, 2013.

WHO WE ARE: OUR MISSION AREA

Food, Nutrition and Consumer Services works to harness the Nation’s agricultural abundance to end hunger and improve health in the United States. The Food and Nutrition Service (FNS) administers federal domestic nutrition assistance programs and the Center for Nutrition Policy and Promotion (CNPP) links scientific research to the nutrition needs of consumers through science-based dietary guidance, nutrition policy coordination, and nutrition education.

WHO WE ARE: OUR WORKFORCE

- FNS currently has almost 1,600 employees located in the national office in Alexandria, VA and seven regional offices.
- CNPP has 29 staff located in Alexandria, VA.

WHO WE SERVE: OUR CONSTITUENTS

FNCS provides evidence-based dietary recommendations for all Americans over two. In addition, FNCS programs serve about 1 in 4 Americans who participate in 1 or more of the 15 domestic food and nutrition programs that provide children and needy families better access to food and a more healthful diet.

KEY UPCOMING DECISIONS

- FNS will need to begin the process of implementing two SNAP rules finalized in late 2016: photo EBT and enhanced retailer standards.
- FNCS’ lease for its Headquarters in Alexandria, Va., is set to expire in May 2017. Estimates for either renovation of the current space or for relocation to a new space total about $18 million.

BUDGET HIGHLIGHTS FY 2016

- Total FNCS budget authority is $110b, of which 94% is mandatory.
- SNAP benefits continue to decrease due to over 1m fewer participants in FY 2016. As of 9/1/2016, SNAP benefits are on track to total $2b less than FY 2015.
- CNPP funds are provided through the FNS Nutrition Programs Administration Account (3.29% of the account).

Biographies for career and political staff in key leadership positions  

**Kevin W. Concannon**  
**Under Secretary for Food, Nutrition and Consumer Services**  
202-720-7711, Kevin.Concannon@osec.usda.gov  

Kevin W. Concannon was nominated by President Obama and Secretary Vilsack and confirmed by the U.S. Senate in July 2009 to serve as Under Secretary for Food, Nutrition and Consumer Services (FNCS) in the United States Department of Agriculture (USDA).  

Under Secretary Concannon has had a lengthy and distinguished career in public service. Over the past 25 years, he has served as Director of State Health and Human Services departments in Maine, Oregon, and Iowa. He has led FNCS during the deepest economic recession in 70 years while promoting better access to anti-hunger programs, implementing stronger nutrition science-based meal and food package programs in WIC and child nutrition, supporting improved administration and staffing, and elevating nutrition education and job training through SNAP.  

He has served in a number of national organizations, including serving as President of the American Public Welfare Association, President of the National Association of State Mental Health Program Directors, trustee of the American Public Human Services Association, and a board member of the American Humane Association.  

He has received a number of awards, including the Lifetime Human Services Award from the American Public Human Services Association in 2007, 2012 Catholic Charities USA Keep the Dream Alive Award, 2012 National WIC Association Leadership Award, and 2015 Board Award from the Congressional Hunger Center.  

He is a native of Portland, Maine, and a graduate of Saint Francis Xavier University, Nova Scotia with both Bachelor of Arts and Master of Social Work degrees. He has continued his studies at the University of Southern Maine and the University of Connecticut Graduate School of Social Work. He was awarded a Doctor of Laws Degree *honoris causa* by Saint Francis Xavier University in 2013.  

Concannon has taught graduate courses at the University of Connecticut, Portland State University, Oregon, and the University of Iowa as Adjunct Professor of Social Work.  

**Dr. Katie Wilson**  
**Deputy Under Secretary for Food, Nutrition and Consumer Services**  
202-720-7711, Katie.Wilson@osec.usda.gov  

Deputy Under Secretary Wilson has a passion for child nutrition and has dedicated her career to improving nutrition program access to all children as well as ensuring the offering of quality food throughout those programs. She has spent 23 years as a school nutrition director in three public schools districts in Wisconsin and five years as the Executive Director for the National Food Service Management Institute and assistant professor at the University of Mississippi.
She served as president of the School Nutrition Association in 2008-2009 and has shared her expertise domestically and internationally as a board member, invited speaker, guest lecturer, professor of record, and/or peer reviewer for numerous allied organizations, industries, and colleges and universities in the field of nutrition, child health, and food service management. Dr. Wilson has also served on the LaCrosse, Wisconsin (WI) Habitat for Humanity board.

Deputy Under Secretary Wilson holds a Bachelor’s of Science Degree in Dietetics from the University of WI–Stout, a Master’s Degree in Food Science and Nutrition from the University of WI–Stout, and a Doctoral Degree in Foodservice and Lodging Management from Iowa State. She is also credentialed as a School Nutrition Specialist.

Wilson has received peer-nominated awards throughout her career, these include the 1995 WI School Nutrition Director of the Year Award, 1998 FAME Special Achievement Award, USDA Best Practice Awards, Bulls Eye School Nutrition Marketing Awards, 2010 WI Star Advocate, and the 2014 FAME Friend of Child Nutrition Award.

Audrey Rowe
Administrator for the Food and Nutrition Service (FNS)
703-305-2060, Audrey.Rowe@fns.usda.gov

Audrey Rowe is the Administrator for the Food and Nutrition Service (FNS) at the U.S. Department of Agriculture (USDA) in Washington, D.C. FNS provides children and needy families with better access to food and a more healthful diet through its 15 nutrition assistance programs and nutrition education efforts.

She brings to the Federal government over 20 years of experience in human services policy development, fiscal management, program design, service delivery and marketing with a particular focus on vulnerable populations, low income women, children and youth.

Previously, Rowe served as Deputy Administrator for Special Nutrition Programs at FNS, leading the effort to pass the Healthy, Hunger-Free Kids Act of 2010, the legislative centerpiece of First Lady Michelle Obama’s Let’s Move! initiative to end childhood obesity in a generation.

Rowe has extensive experience working on issues related to FNS programs. Her leadership has included roles as Human Resources Administrator in New Haven, Connecticut, and Social Services Commissioner for the State of Connecticut and the District of Columbia. In addition, she served as Executive Vice President and Chief Operating Officer for the National Urban League.

In private industry, Rowe served as Senior Vice President and Managing Director for the Children and Family Services division for Affiliated Computer Service (ACS), formerly Lockheed Martin IMS. In this capacity, she spearheaded industry leadership in the realms of child support payment processing and enforcement and the electronic dissemination of public assistance benefits, including implementing Electronic Benefit Transfer (EBT) programs in over 20 states. Additionally, Rowe was appointed Senior Vice President for Public Affairs where she
managed the corporation’s government relations, philanthropy and community relations programs.

Rowe is a graduate of Federal City College and was a fellow at the John F. Kennedy School of Government Institute of Politics at Harvard University.

Angela Tagtow, MS, RD, LD
Executive Director, Center for Nutrition Policy and Promotion
703-305-7600, Angela.Tagtow@cnpp.usda.gov

Appointed in July 2014, Angela Tagtow is the Executive Director for the Center for Nutrition Policy and Promotion (CNPP) at the U.S. Department of Agriculture (USDA) in Washington, D.C. CNPP works to improve the health and well-being of Americans by developing and promoting dietary guidance that links scientific research to the nutrition needs of consumers. Specifically, the Center oversees the state-of-the-art systematic nutrition research reviews of the Nutrition Evidence Library, population-based nutrition and economic analyses, the Dietary Guidelines for Americans, the national iconic symbol for healthy eating MyPlate and consumer-based nutrition education resources, and innovative digital tools for consumers. As a registered dietitian, Tagtow brings to the Federal government almost 25 years of experience in food and nutrition policy, public health nutrition, surveillance systems, research, professional and consumer communication, social marketing, training and education.

Tagtow holds a M.S. degree in Family and Consumer Sciences Education from Iowa State University and a B.A. degree in Dietetics and Chemistry from the University of Northern Iowa.

Telora T. Dean
Associate Administrator and Chief Operating Officer
703-305-2062, Telora.Dean@fns.usda.gov

Telora T. Dean is the Associate Administrator and Chief Operating Officer (AA/COO) for USDA’s Food and Nutrition Service (FNS). Dean shares full responsibility with the Agency’s Administrator for the development, design, operation and improvement of the strategies and systems that create and deliver the Agency’s programs and internal/external services through a $100B program and operations portfolio. As the AA/COO, she ensures the proper balance between efficiencies, effectiveness and results and creates maximum value for customers, stakeholders and taxpayers.

Prior to becoming the AA/COO, Dean served as the Deputy Administrator for Management. In that role, she was the executive lead for the Office of Management (OM) and effected a unified operation to deliver outstanding administrative services. She managed the full complement of components comprising FNS’ management operations—Human Resources, Acquisition Management, Logistics and Facilities Management, Information Systems and Employee Engagement Initiatives.
Prior to joining FNS, Dean provided executive leadership to a number of USDA agencies. As the Farm and Foreign Agricultural Service’s Chief Human Capital Officer, she was responsible for the overall administration, coordination and evaluation of human resource functions for three mission area agencies, supporting a customer base of over 16,000 employees nationally and abroad. During her tenure as Rural Development’s Acting Deputy Administrator for Management, Dean was an executive principal in providing direction and oversight to a $628M annual budget and a $38B loan portfolio to support efficient program delivery and services to rural America.

Dean holds a bachelor’s degree from Alabama Agriculture and Mechanical University and a master’s degree from Marymount University. She counts Harvard University, American University and the Brookings Institution as organizations in her accomplished executive toolkit.

**Yvette Jackson**  
Associate Administrator for Regional Operations and Support  
703-305-2064, [Yvette.Jackson@fns.usda.gov](mailto:Yvette.Jackson@fns.usda.gov)

Yvette Jackson is the Associate Administrator for Regional Operations and Support for USDA Food and Nutrition Service (FNS). As Associate Administrator, she is responsible for seven Regional Offices and three offices at FNS Headquarters. The Regional Offices provide oversight of program operations and technical assistance to State and local partners who administer the Agency’s 15 nutrition assistance programs. The Headquarters Offices are responsible for retailer management, coordinating disaster relief during local and national emergencies, and providing oversight of state computer systems implementation. Collectively, Jackson is responsible for about 57% of the Agency’s workforce.

Prior to her appointment as Associate Administrator, Jackson served as the Regional Administrator for the Mid-Atlantic Regional Office of FNS.

Jackson brings over 35 years of experience with Federal and State agencies including the Social Security Administration, where she served as the Deputy Commissioner for Finance, Assessment and Management and the Chief Financial Officer; and the Pennsylvania Department of Public Welfare, where she served in several senior executive positions, including Deputy Secretary for Income Maintenance Programs.

Jackson formerly served as both the FNS Administrator and the Deputy Administrator for the Food Stamp Program, where she was instrumental in preserving the national nutrition safety net during welfare reform. In addition to her extensive public service experience, she was the National Health and Human Services Practice Lead for BearingPoint, a global IT and business consulting firm that provided services to Federal, State and local human service agencies.

She holds a Bachelor of Social Welfare from Temple University and a Master of Social Work from Rutgers University.
Jessica Shahin
Associate Administrator for Supplemental Nutrition Assistance Program
703-305-2022, Jessica.Shahin@fns.usda.gov

Jessica Shahin is the Associate Administrator for Supplemental Nutrition Assistance Program (SNAP) (formerly known as the Food Stamp Program) for USDA’s Food and Nutrition Service (FNS).

Shahin has over 20 years of experience with SNAP at the State and Federal levels. She served on the original Texas Electronic Benefit Transfer Team as Director of Information Management for the Department of Human Services, was Executive Assistant to the Deputy Commissioner for client self-support programs and was later named Director of Interagency Policy for the agency’s Office of Government Relations. In this capacity, she developed an expertise for effective integration of various human service programs in both policy and management.

Beginning in January 2004, Shahin served as Acting Associate Administrator and Deputy Associate Administrator for the Food Stamp Program/SNAP. She became Associate Administrator for SNAP in January 2009.

Shahin received a master’s degree in Social Work from the University of Texas at Austin and taught public policy for several years as an adjunct professor at the school.

Diane M. Kriviski
Deputy Administrator for Supplemental Nutrition and Safety Programs
703-305-2052, Diane.Kriviski@fns.usda.gov

Diane M. Kriviski is the Deputy Administrator for the Supplemental Nutrition and Safety (SNAS) Programs for USDA’s Food and Nutrition Service (FNS). She is responsible for administration of USDA’s food distribution programs including USDA Foods for school lunches, the Food Distribution Program on Indian Reservations, the Commodity Supplemental Food Program, and the Emergency Food Assistance Program. Kriviski is also responsible for USDA’s Supplemental Food Programs Division including the Special Supplemental Nutrition Program for Women, Infants and Children (WIC); WIC and Senior Farmers’ Market Nutrition programs; and the Office of Food Safety. These programs are part of the nutrition safety net that FNS provides to children and needy families through better access to food, a more healthful diet, and nutrition education.

Kriviski has served FNS for over 30 years at all levels of the organization. Early in her career, she worked with various FNS programs while in the Child Nutrition Division and Food Distribution Division as a grant officer, assisting in the creation of the Senior Farmers’ Market Nutrition Program and awarding of the first grants to help implement WIC EBT.

Kriviski has also held key positions in Financial Management, serving as Acting Chief Financial Officer and Budget Officer, as well as Deputy Budget Officer. In that capacity, she provided leadership in the development and submission of the FNS annual fiscal budget for its 15 nutrition
Cindy Long
Deputy Administrator for Child Nutrition Programs
703-305-2054, Cindy.Long@fns.usda.gov

Cindy Long is the Deputy Administrator for Child Nutrition Programs (CN) for USDA’s Food and Nutrition Service. She is responsible for all aspects of Federal administration of the Child Nutrition programs, including the National School Lunch Program, School Breakfast Program, Child and Adult Care Food Program, Summer Food Service Program, and the Fresh Fruit and Vegetable Program. These programs provide over $20B in nutrition assistance to children and families. In this role she has led FNS’ implementation of the Healthy, Hunger-Free Kids Act, the most significant restructuring of these programs in decades and a legislative centerpiece of the Administration’s nutrition initiatives. She has also led a major restructuring of Child Nutrition program staff and resource management.

Long has served FNS in various positions since joining the agency in 1991. Prior to joining the Child Nutrition programs in 2008, she served in the Office of Analysis, Nutrition and Evaluation (now known as OPS) providing leadership to FNS research and analysis efforts in support of all of the domestic nutrition assistance programs. She began her Federal government career in 1988 with the Office of Management and Budget.

Long possesses a MPA in Public Policy and Economics from Princeton University’s Woodrow Wilson School of Public and International Affairs, and a BA in Economics from the University of Notre Dame.

Richard Lucas
Deputy Administrator for Policy Support
703-305-2017, Richard.Lucas@fns.usda.gov

Richard Lucas is the Deputy Administrator for Office of Policy Support (OPS) for USDA’s Food and Nutrition Service (FNS). In that capacity, he is responsible for research and analysis that informs policymaking for, and management of, the Federal nutrition assistance programs. These programs, including the Supplemental Nutrition Assistance Program (SNAP), the school meals programs, and the WIC program, are currently budgeted at over $100 billion annually and serve one in four Americans in the course of a year.

Lucas’s team in OPS includes professionals from a wide range of disciplines, including economists, statisticians, program evaluators, sociologists, and nutritionists. They work closely with policymakers and program officials to find answers to critical questions to make nutrition assistance programs more effective; estimate cost and participation impacts of legislative, budgetary and regulatory changes; evaluate the impacts of programs and program components on
food security, diet quality, and other outcomes; analyze extant data to better target strategies and track performance; and demonstrate and test potential program improvements.

Lucas has worked at FNS since 1994 and holds degrees from Brown University and Stanford University.

Cristina Chiappe
Deputy Administrator for Management
703-305-2030, Cristina.Chiappe@fns.usda.gov

Cristina Chiappe serves as the Deputy Administrator for Management for USDA’s Food and Nutrition Service (FNS). She oversees all aspects of human capital management, acquisition management, operations and facilities, and information management in an agency with an annual budget of $110 billion.

Chiappe came to FNS from USDA’s Rural Development (RD) in January of 2015 as part of a developmental assignment for the Senior Executive Service (SES) Candidate Development Program (CDP) to serve as Director of Human Resources, Deputy Chief Information Officer, Associate Deputy Chief Financial Officer, and as Chief Staff Officer to the Chief Operating Officer. She also served with 23 other Federal executives as the USDA representative on the White House Advisory Council on SES Reform, which resulted in the 2016 Executive Order: “Strengthening the Senior Executive Service.”

At RD, Chiappe served on various leadership roles in operations and management for RD and Departmental Management. As the Chief of Staff in the Rural Housing Service (RHS), she provided direct oversight in the daily operations of an agency with an annual program funding of $26B, an annual administrative budget of $30M, and a Centralized Servicing Center with a loan portfolio of $100B. As the Director of Program Support, she led the centralization of RD’s technical support functions and the centralization of the Single-Family Housing guaranteed loan program which strategically leveraged staff resources and infused $60B of capital into rural America. Additionally, Chiappe has served as Senior Policy Advisor in the Rural Housing Service, Special Assistant to the Assistant Secretary for Civil Rights, and Special Assistant to the Assistant Secretary for Administration.

In addition to the SES CDP, Chiappe has completed the Federal Executive Institute, American University’s Executive Leadership Program and Harvard Law School’s Program on Negotiation for Executives. She holds a B.A. and M.Ed. from the University of Virginia.

David G. Burr
Chief Financial Officer
703-605-3220, David.Burr@fns.usda.gov

David Burr is the Chief Financial Officer (CFO) for USDA’s Food and Nutrition Service (FNS). He was named FNS’ CFO in September of 2011. In this capacity, he is responsible for
United States Department of Agriculture
2016 Presidential Transition
Food, Nutrition and Consumer Services Mission Area (FNCS)

overseeing the administration and ensuring the fiscal integrity of approximately $110B in program grants and $400M in administrative funding.

The majority of Burr’s Federal career has been with FNS. In June 2010, he was the Director of the Program Accountability and Administration Division of the Supplemental Nutrition Assistance Program (SNAP). Prior to assuming this position, for approximately 10 years, he served as FNS’ Budget Director where he coordinated budget formulation and execution, as well as program data administration for all of the domestic nutrition assistance programs. Burr began his career with FNS as an economist, developing program participation and cost forecasts primarily in support of financial management. Before joining FNS, he served as an operation research analyst with the Naval Air Systems Command for four years.

Burr is a graduate of West Virginia University and studied economics at the graduate level at Virginia Polytechnic Institute and State University.

Kimberly Jackson
Chief Information Officer
703-605-4318, Kimberly.Jackson@fns.usda.gov

Kimberly Jackson is the Chief Information Officer (CIO) for USDA’s Food and Nutrition Service (FNS). Jackson manages and executes a $60M infrastructure and operations and maintenance budget with over 62 Federal staff years supporting the FNS vision of ending hunger and improving nutrition in America.

As CIO, Jackson leads forward-thinking and innovative strategic technology planning and operational delivery, providing value to FNS customers and stakeholders through technology services and mission-enabling capabilities. Jackson positions FNS to achieve mission success through delivery of cost effective emerging technologies, and strategic procurement of hardware, software, and solutions.

Prior to becoming CIO, Jackson served as the Chief Technology Officer (CTO) for the Office of Biometric Identity Management (OBIM) in the DHS National Protection and Programs Directorate (NPPD). As CTO, she served as OBIM’s senior IT official working to ensure compliance with Federal policy related to IT systems management, enterprise architecture, and data management. Jackson leveraged emerging technologies to recommend improvements to major enterprise applications, identify tools to optimize IT system performance, and develop and promote collaborative/joint technology solutions to improve services to enhance mission effectiveness.

Jackson is a graduate of the DHS SES Candidate Development Program, a DHS Level III Program Manager, a certified Project Management Professional® and a graduate of the Federal Executive Institute. She holds a Master of Business Administration from the University of Maryland and a Bachelor of Arts from the University of Virginia.
Robin D. Bailey Jr.
Regional Administrator, Southeast Regional Office
404-562-1800, Robin.Bailey@fns.usda.gov

Robin D. Bailey Jr. has over 29 years of faithful service to America in various senior levels in the Department of the Air Force and the U.S. Department of Agriculture. As USDA’s Food and Nutrition Service (FNS) Regional Administrator for the Southeast (SERO), he provides executive direction and leadership while orchestrating the execution of all 15 Federal nutrition programs, which provide annual benefits in excess of $25 billion through cooperating State agencies in Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina and Tennessee.

Bailey most recently served as Deputy Administrator for Management and Information Technology for FNS in the National Office. In this role, he provided executive oversight of Information Technology, Human Resources, Contract Management, Logistics and Facility Services. Prior to FNS, he served as Director of Human Resources Management, U.S. Forest Service, in Albuquerque, New Mexico, where he led over 600 personnel who provided Human Resources Management policy and operational services for approximately 50,000 permanent, temporary and seasonal employees.

Bailey is an Air Force veteran and served as an Air Force Civilian in a wide range of leadership positions, including the Civilian Deputy and Staff Director to the 96th Air Base Wing Commander, Eglin Air Force Base, Fla. In this capacity, he co-led more than 5,000 men and women in providing essential base operating support and services for more than 20,000 personnel, six wings, and 50 associate units at the Department of Defense’s largest installation.

Bailey holds a Master of Arts in Communication from the University of Oklahoma. He was selected as a member of the Senior Executive Service in 2009 and appointed by the Secretary of Agriculture as an Executive Resources Board Member in 2013.

Darlene L. Barnes
Regional Administrator, Mountain Plains Regional Office
303-844-0300, Darlene.Barnes@fns.usda.gov

Darlene Barnes was named Regional Administrator for USDA’s Food and Nutrition Service (FNS) Mountain Plains Region (MPRO) in February 2004, after serving as Deputy Regional Administrator since June 1998.

As Regional Administrator, Barnes oversees administration of the nutrition assistance programs in a 10-state region comprising Colorado, Iowa, Kansas, Missouri, Montana, Nebraska, North Dakota, South Dakota, Utah and Wyoming. Located in these states are 30 tribal organizations that she works with to administer the Federal nutrition assistance programs. Barnes manages a staff of 110 FNS employees and provides leadership, oversight and technical assistance for a budget of over $6.5B annually.
Her USDA career began in 1976 with the Rural Electrification Administration. She then continued with the Department at the National Information Technology Center and the Animal and Plant Health Inspection Service (APHIS). Barnes joined FNS in 1990, in governmental and public affairs at the National Office. Under her leadership, FNS’ Public Affairs staff won the Public Relations Society of America’s 1997 Silver Anvil Award for its Team Nutrition grassroots information campaign.

Barnes studied communications at Northern Virginia Community College, the University of Maryland and Colorado State University. She is a graduate of the Federal Executive Institute’s senior leadership program, “Leadership for a Democratic Society.” She helped sponsor the Excellence in Government Awards program, which recognizes public servants at the Federal, State and local levels.

Barnes is an avid volunteer with nutrition assistance organizations and, in June 2012, received the USDA “Unsung Hero” award from Secretary Tom Vilsack, who characterized the honorees as “excellent representatives of the 100,000 USDA employees.”

She has been a member of Hunger Free Colorado and provided leadership for the first Hunger Summit in Colorado. She is the former chair and current executive committee member of the Colorado Federal Executive Board.

Patricia Dombroski
Regional Administrator, Mid-Atlantic Regional Office
609-259-5025, Patricia.Dombroski@fns.usda.gov

Patricia Dombroski is the Administrator of USDA’s Food and Nutrition Service (FNS) Mid-Atlantic Region (MARO). In that capacity, she provides leadership for 15 domestic nutrition assistance programs in six states, the District of Columbia, Puerto Rico and the Virgin Islands. Benefit and administrative funds for MARO nutrition programs exceed $12 billion and reach close to 30 million people each month.

Prior to her current position, Dombroski served as Deputy Regional Administrator for MARO. Dombroski has had the unique opportunity to direct all of the Agency’s assistance programs throughout her tenure with FNS. She has served as MARO Director of the WIC Program, the Food Stamp Program (now known as the Supplemental Nutrition Assistance Program) and the Special Nutrition Programs. Dombroski also led the agency’s largest field office, managing more than 15,000 food stamp retailers and the Federally-operated Summer Food Service Program in the state of New York.
Tim English
Regional Administrator, Midwest Regional Office
312-353-6663, Tim.English@fns.usda.gov

Tim English is the Regional Administrator of the Midwest Region (MWRO) of USDA’s Food and Nutrition Service (FNS). Under his leadership, MWRO provides oversight of program operations and technical assistance to State and local partners who administer the Agency’s 15 nutrition assistance programs. He oversees the administration of these Federal nutrition assistance programs with nutritional benefits and services valued at over $15 billion in Illinois, Indiana, Michigan, Minnesota, Ohio and Wisconsin. English commits his talents and energies to creating positive change in programs serving our nation’s most vulnerable low income families and elderly.

Prior to his appointment as Regional Administrator, English served as Deputy Regional Administrator from June 2010 to January 2013, providing leadership in program operations. From March 2003-June 2010, he served as MWRO Supplemental Nutrition Assistance Program (SNAP) Director and was responsible for overseeing SNAP operations in the Midwest region.

He is a graduate of Northern Illinois University, as well as a graduate of the American University School of Public Affairs Key Executive Leadership Certificate Program in Washington, D.C.

William E. Ludwig
Regional Administrator, Southwest Regional Office
214-290-9800, Williams.Ludwig@fns.usda.gov

William “Bill” Ludwig is the Regional Administrator of USDA’s Food and Nutrition Service’s (FNS) Southwest Region (SWRO). He oversees 15 Federal nutrition assistance programs in Arkansas, Louisiana, New Mexico, Oklahoma, Texas and 26 tribal organizations with a regional budget of nearly $14 billion.

His mission is to ensure that children throughout the region have access to safe, nutritious and balanced meals. Ludwig is a strong advocate of partnerships, which he believes are critical to accomplishing the region’s mission of reaching the youngest and most vulnerable populations.

During his tenure, Ludwig has built a solid network of more than 300 partner organizations at the Federal, State, Tribal and local levels. These connections have resulted in a greater awareness of FNS’ programs and have generated a variety of innovative ways to provide healthy food to families and children at-risk of hunger.

Ludwig believes in leaning forward and stretching across barriers to help those in need, whether they are in an urban or rural community, through programs such as the WIC/Medical Model, the Community Eligibility Program, the Summer Food Service Program and Mobile Farmers Markets.
Staying connected is important to the business of fighting hunger, so in conjunction with his travel throughout the region, he and his team have developed creative ways to keep their audiences informed through social media, e-newsletters and partner calls.

Ludwig earned his Bachelor of Arts from Louisiana State University and Master’s in Business Administration from Louisiana Tech University.

Jesus Mendoza Jr.
Regional Administrator, Western Regional Office
415-705-1337, Jesus.Mendoza@fns.usda.gov

Jesus Mendoza Jr. serves as the Regional Administrator for USDA’s Food and Nutrition Service (FNS), Western Regional Office (WRO). In this capacity, Mendoza provides leadership, oversight and technical assistance for 15 Federal nutrition assistance programs operating within eight states (Alaska, Arizona, California, Hawaii, Idaho, Nevada, Oregon, and Washington) three territories (American Samoa, Commonwealth of the Northern Mariana Islands, and Guam) and 35 tribal organizations. Mendoza leads a 88 person staff and oversight of a budget exceeding $20 billion.

Mendoza began his career with FNS Western Regional Office in 2002 as a Program Specialist with the Special Nutrition Programs (SNP) and served as SNP Section Chief and Regional Director and Deputy Regional Administrator prior to his current position. Before joining the Agency, Mendoza served as Program Officer for International Planned Parenthood and worked for the World Wildlife Fund, Latin America and Caribbean Region offices. Mendoza also served in the Peace Corps in Ecuador and Morocco and in the U.S. Army.

Mendoza earned a Bachelor’s degree in Political Science from Southwest Texas State University and Master’s degree in International Development Project Management from Clark University in Worcester, Mass.

Kurt Messner
Regional Administrator, Northeast Regional Office
617-565-3670, Kurt.Messner@fns.usda.gov

Kurt Messner is the Regional Administrator for USDA’s Food and Nutrition Service (FNS), Northeast Regional Office (NERO). In this role, he is responsible for the implementation of the Agency’s 15 nutrition assistance programs throughout the Northeast Region, which include the six states of New England and the state of New York. Working in partnership with State and local organizations and providing technical assistance to these partners, NERO oversees the administration of the full range of FNS programs.

Messner began his career at FNS as the Director of Financial Management at NERO in 2007. In that role, he was responsible for fiscal oversight of FNS programs, and administrative and organizational support. Before joining FNS, Messner served as the Regional Director of Operations and the Deputy Regional Director for Housing with the U.S. Department of Housing and Urban Development (HUD) in Boston. Messner was appointed Deputy Regional
Administrator for NERO in May 2013 and served as Acting Regional Administrator beginning in May 2014.

Messner has been nominated for two Excellence in Government Awards from the Greater Boston Federal Executive Board – in 1995 as a member of a team recognized for their work with workforce planning and development, and again in 2001 for Federal Employee of the Year. Messner received a HUD Secretary Representative’s award in 2001 for outstanding achievement and contribution to the Agency’s mission; and in 2006 he received a Massachusetts Governor’s Special Recognition Award for his contributions to the Gulf Relief efforts related to Hurricane Katrina.

Messner holds a B.S. in Business Management and M.B.A. from Regis University. He has also completed the Executive Leadership Program at Harvard University’s Kennedy School of Government.

Overview of Agency Programs and Operations

The Food, Nutrition and Consumer Services (FNCS) works to harness the Nation's agricultural abundance to end hunger and improve health in the United States. Its agencies administer federal domestic nutrition assistance programs and the Center for Nutrition Policy and Promotion, which links scientific research to the nutrition needs of consumers through science-based dietary guidance, nutrition policy coordination, and nutrition education. FNCS achieves this through its two agencies: the Food and Nutrition Service and the Center for Nutrition and Policy Promotion.

The Food and Nutrition Service (FNS) works with partners to provide food and nutrition education to people in need in a way that inspires public confidence and supports American agriculture.

In pursuit of its mission, FNS executes an annual Agency Priorities Plan consisting of multi-year goals and current year objectives that align to our Agency Priorities. FNS uses these objectives as the basis for a corporate priority-setting process that promotes focused and effective management of scarce administrative resources to key initiatives.

FNS’ ongoing responsibilities and performance objectives are captured in USDA’s Strategic Plan 2014-2018. The FNS Agency Priorities Plan (APP) uses USDA’s Strategic Goals 4 and 5 as an organizing structure and consists of multi-year goals and current year objectives that align to the Agency Priorities, support the Department’s Strategic plan, and comply with the Government Performance and Results Modernization Act of 2010 (GPRAMA). The operational foundation for the FNS plan consists of five organizing priorities.

- **Agency Priority 1: Help Americans Eat Smart and Maintain a Healthy Weight**
  FNS works to support and encourage healthful diets through science-based guidance and strong nutrition standards and education.
Areas of focus include: increases in the average Healthy Eating Index; Healthy People 2020 Health Indicators; Healthy eating and healthy weight program measures; Implementation of the Agricultural Act of 2014 and the Healthy, Hunger-Free Kids Act of 2010 (HHFKA) provisions; Implementation of nutrition education and obesity prevention strategies; and communication and promotion strategies that support the overall priorities.

The Center for Nutrition Policy and Promotion (CNPP) works to improve the health and well-being of Americans by developing and promoting dietary guidance that links the best evidence-based scientific research to the nutrition needs of consumers.

CNPP carries out its mission to improve the health of Americans by: serving as the Federal authority on evidence-based food, nutrition and economic analyses that inform policy and programs; translating science into actionable food and nutrition guidance for all Americans; and leading national communication initiatives that apply science-based messages to advance consumers’ dietary and economic knowledge and behaviors. Major projects include the Dietary Guidelines for Americans, MyPlate, SuperTracker, the Healthy Eating Index, and the Nutrition Evidence Library.

• **Agency Priority 2: Preserve Public Trust in FNS Programs**

Reflects USDA’s zero tolerance policy for fraud, waste or abuse in nutrition assistance programs.

Areas of focus include: Compliance with Federal requirements; National School Lunch Program (NSLP) improper payment rate; Supplemental Nutrition Assistance Program (SNAP) trafficking (retailer and client); Child Nutrition (CN)/Women, Infants and Children (WIC) reauthorization; SNAP quality control; Reauthorization of Farm Bill programs; and communications strategies designed to increase public trust.

• **Agency Priority 3: FNS is an Efficient, High Performing and Adaptable Organization**

Efforts to ensure employees are competent, engaged, and challenged to develop and implement innovative solutions to today’s challenges.

Areas of focus include: Employee Engagement; Recruitment and Retention Strategies; Talent Management; USDA’s Blueprint for Stronger Service; Process Improvement; and Office of Information Technology (OIT) Operational Framework.

• **Agency Priority 4: Reduce Food Insecurity by Helping Feed Those in Need**

Emphasizes efforts to keep nutrition programs in reach of vulnerable populations including young people, the elderly, and those with disabilities.

Areas of focus include: Implementation of Farm Bill provisions; Implementation of SNAP Employment and Training Programs; Increases in Summer meals programs participation; Retention of participation of children after age 1 in WIC; Communicating messages
United States Department of Agriculture  
2016 Presidential Transition  
Food, Nutrition and Consumer Services Mission Area (FNCS)

regarding program access; Food Distribution Program on Indian Reservations (FDPIR) administrative funding; Food Safety Training; Farmers’ Market Nutrition Program (FMNP) Participation Barriers; Able-Bodied Adults Without Dependents (ABAWD) Policies; and Community Engagement Strategies.

- **Agency Priority 5: Civil Rights: Ensuring Access, Equality and Respect in FNS Programs and Activities**

  FNS’ commitment to oversight of civil rights laws, policies and directives related to nutrition programs is reflected in this priority.

  Areas of focus include: Compliance Reviews; Voluntary Resolution Agreements; Internal Program Complaint Processing; and Equal Employment Opportunity (EEO) Compliance and Training.

**Supplemental Nutrition Assistance Program**

SNAP offers nutrition assistance to millions of eligible, low-income individuals and families and provides economic benefits to communities. SNAP is the largest program in the domestic hunger safety net. Eligible recipients are provided a monthly allotment of benefits via debit card to use to purchase food at authorized stores. FNS works with state partners, who administer the program at the state and local level based on Federal rules, and the retail community to ensure proper program administration and program integrity. FNS is directly responsible for authorizing retail stores to redeem program benefits and monitoring them to ensure adherence to program requirements. In addition to certifying households for eligibility and issuing benefits, SNAP state agencies deliver nutrition education to participants to help them purchase healthy food on a tight budget. SNAP employment and training services are provided to eligible participants to assist them with building skills for in demand jobs so they can transition to self-sufficiency.

**Child Nutrition Programs**

The Food and Nutrition Service administers several programs that provide healthy food to children. These programs are administered by state agencies, each of these programs helps fight hunger and obesity by reimbursing organizations such as schools, child care centers, and after-school programs for providing healthy meals to children.

- **National School Lunch Program**

  The National School Lunch Program is a federally assisted meal program operating in public and nonprofit private schools and residential child care institutions. It provides nutritionally balanced, low-cost or free lunches to children each school day. The program was established under the National School Lunch Act, signed by President Harry Truman in 1946.
School Breakfast Program (SBP)
SBP provides cash assistance to states to operate nonprofit breakfast programs in schools and residential childcare institutions. The Food and Nutrition Service administers the SBP at the Federal level. State education agencies administer the SBP at the state level, and local school food authorities operate the Program in schools.

Child and Adult Care Food Program (CACFP)
CACFP provides aid to child and adult care institutions and family or group day care homes for the provision of nutritious foods that contribute to the wellness, healthy growth, and development of young children, and the health and wellness of older adults and chronically impaired disabled persons.

Summer Food Service Program
The Summer Food Service Program ensures that low-income children continue to receive nutritious meals when school is not in session.

Fresh Fruit and Vegetable Program (FFVP)
FFVP can be an important tool in our efforts to combat childhood obesity. The Program has been successful in introducing school children to a variety of produce that they otherwise might not have the opportunity to sample. The various partnerships that FNS and state agencies have developed in the public and private sectors, as well as the dedicated work of school administrators, have contributed to the overall success and acceptance of the program. FFVP is consistent with and supports the National Academy of Medicine’s recommendations to provide healthier snack choices in schools.

Special Milk Program
The Special Milk Program provides milk to children in schools and childcare institutions who do not participate in other Federal meal service programs. The program reimburses schools for the milk they serve. Schools in the National School Lunch or School Breakfast Programs may also participate in the Special Milk Program to provide milk to children in half-day pre-kindergarten and kindergarten programs where children do not have access to the school meal programs.

Supplemental Nutrition and Safety Programs
Food Distribution Division (FDD) is responsible for: USDA Foods in the National School Lunch Program, The Emergency Food Assistance Program (TEFAP), and the Food Distribution Program on Indian Reservations (FDPIR), the Commodity Supplemental Food Program (CSFP), and USDA Foods Disaster Assistance.

Commodity Supplemental Food Program (CSFP)
CSFP works to improve the health of low-income elderly persons at least 60 years of age by supplementing their diets with nutritious USDA Foods. Women, infants, and children who were certified and receiving CSFP benefits as of February 6, 2014, can continue to receive assistance until they are no longer eligible under the program rules in effect on
February 6, 2014. Through CSFP, USDA distributes both food and administrative funds to participating states and Indian Tribal Organizations.

- **Food Distribution Program on Indian Reservations (FDPIR)**
  FDPIR is a Federal program that provides USDA foods to low-income households, including the elderly, living on Indian reservations, and to Native American families residing in approved service areas near reservations or in Oklahoma.

- **Nutrition Services Incentive Program (NSIP)**
  The Food and Nutrition Service purchases USDA Foods for distribution through NSIP, a nutrition program for the elderly administered by the Department of Health and Human Service's Administration for Community Living.

- **The Emergency Food Assistance Program (TEFAP)**
  TEFAP supplements the diets of low-income Americans, including elderly people, by providing them with emergency food and nutrition assistance. Under TEFAP, USDA foods are made available by the U.S. Department of Agriculture to states. States provide the food to local agencies that they have selected, usually food banks, which in turn, distribute the food to soup kitchens and food pantries that directly serve the public.

- **Schools/USDA Foods Programs**
  USDA’s Schools/Child Nutrition Programs support American agricultural producers by providing cash reimbursements for meals served in schools, but also by providing nutritious, USDA-purchased food to the programs: National School Lunch Program (NSLP); Child and Adult Care Food Program (CACFP); and the Summer Food Service Program (SFSP).

- **Women, Infants, and Children (WIC)**
  The Special Supplemental Nutrition Program for Women, Infants, and Children - better known as the WIC Program - serves to safeguard the health of low-income pregnant, postpartum and breastfeeding women, infants, & children up to age 5 who are at nutritional risk. WIC provides nutritious foods to supplement diets, information on healthy eating, breastfeeding promotion and support, and referrals to health care.

- **Farmers’ Market Nutrition Program (FMNP)**
  The WIC Farmers’ Market Nutrition Program (FMNP) provides WIC participants with coupons to purchase fresh, unprepared, locally grown fruits and vegetables from local farmers' markets.

- **Senior Farmers’ Market Nutrition Program (SFMNP)**
  The Senior Farmers’ Market Nutrition Program provides low-income seniors with coupons that can be exchanged for eligible foods at farmers’ markets, roadside stands, and community supported agriculture programs.

II. Top Issues/Hot Topics

Timeline

Winter 2017: TBD - Health and Medicine Division Study -- First “short” report is expected to address Part 1 of the study being conducted on the process to update the Dietary Guidelines for Americans

January 2017:

- **Summer Electronic Benefit Transfer (EBT) Project Awards:** Since summer 2011, USDA has supported the Summer Electronic Benefit Transfer for Children (SEBTC) projects, which reach low income families in areas where there are limited numbers of sites eligible to serve summer meals. FNS expects that appropriators will provide over $20 million to continue Summer EBT demonstrations in FY 2017. Decisions will need to be made in January 2017 regarding the states and tribal organizations receiving grants to operate summer EBT projects in summer 2017.

- **National Academy of Medicine (NAM) WIC Food Package Report:** The Healthy, Hunger Free Kids Act of 2010 requires a comprehensive review of the WIC food package at least every ten years to ensure that it conforms to current nutrition science, public health concerns, and cultural eating patterns. In late 2014, FNS contracted with the NAM to convene an expert panel and conduct the next review. The panel’s report could be released as early as January 2017, though it could take several months longer. The report will be highly scrutinized by Congress and other program stakeholders, who will likely be interested to know FNS’ plans to consider regulatory changes in WIC based on the report soon after its release.

- **SNAP Retailer Eligibility Standards Rule:** The final rule changes the standards for participating SNAP retailers and is scheduled to be published by the end of calendar year 2016 with an effective date of one year following publication. A substantial education and technical assistance program for SNAP retailers will be conducted to ensure that authorized retailers are able to comply with the new standards by the effective date. Plans for this effort will need to begin shortly after publication of the final rule, potentially as early as January 2017. Stakeholders may raise concerns about the new standards.

- **SNAP Quality Control, Establishment of a National Quality Control (QC) error rate for FY 2016:** FNS will begin working with states to pull a new sample of FY 2016 cases and complete case reviews to establish a national QC error rate for FY 2016. A change in approach (from a two tier to a one tier review) is being instituted for FY 2016 based on changes that needed to be incorporated in the QC system to assure a sound QC system; there will be no state error rates for FY 2016, only the national error rate. These reviews will require significant state cooperation and Federal access to case documentation and state systems. The 2016 national error rate will be announced in June, 2017.
• **USDA Food Plans** – December Cost of Food Report is released. CNPP publishes monthly updates to the various USDA food plans to reflect changes in the costs of the food packages.

**February 2017:**

• **Child Nutrition (CN) Program Integrity Final Rule:** The Healthy, Hunger-Free Kids Act (HHFKA) of 2010 includes statutory changes to further enhance the integrity of the CN Programs. In March 2016, FNS published a proposed rule to codify these changes as well as several recommendations from recently conducted management evaluations and USDA Office of Inspector General (OIG) audits of state agencies operating CN Programs. Policy decisions will be needed on key issues in February 2017 to finalize drafting and clearance of the rule by June 2017.

• **USDA Food Plans** – January Cost of Food Report is released

**March 2017:**

• **USDA Food Plans** – February Cost of Food Report is released

**April 2017:**

• **FNCS Park Office Center Lease Re-Competition:** The lease for Park Office Center, the location of FNCS’ National Office, in Alexandria, VA expires in May 2017. A General Services Administration (GSA)-led competition to replace that lease is currently underway. Results of that competition are expected to be known in the second quarter of FY 2017. Costs associated with execution of a new lease are estimated to be approximately $17 million. While funding to support those costs is essentially dependent on full year FY 2017 appropriations action, some potential alternative funding options have been identified. No later than April 2017, FNCS will need to assess its financial situation and finalize its funding strategy.

• **USDA Food Plans** – March Cost of Food Report is released

**May 2017:**

• **USDA Food Plans** – April Cost of Food Report is released

• **Announcement of Farm to School Grant Awards:** Each year, USDA awards up to $5 million in competitive grants to assist eligible entities (school districts, state and local agencies, Tribal nations, agricultural producers, and non-profit organizations) in implementing farm to school programs that improve access to local foods in eligible schools. They can support training, operations, planning, purchasing equipment, developing school gardens, developing partnerships, and implementing farm to school programs. Applications for the FY 2017 grants are due in December 2016; announcement of awards is scheduled for May 2017.
June 2017:

- **USDA Food Plans** – May Cost of Food Report is released

Mission Area Issues

**SNAP Quality Control (QC):** To establish a national QC error rate for FY 2016, FNS staff will work with states to pull a new sample of FY 2016 cases and complete case reviews. State agencies must grant Federal reviewers access to the documentation and State systems necessary to complete these case reviews. States must continue to report FY 2016 case results to FNS as an opportunity to review internal procedures to ensure that all state QC reviewers are operating in accordance with program rules and the QC system for FY 2017 is sound. This review will begin in early 2017.

**Child Nutrition Reauthorization (CNR):** Congress may take up and pass CNR during the “lame duck” session at the end of 2016. If it does not, the legislative discussion on this may continue into 2017. However, the programs continue to operate despite the lapse of the legislation.

**Child Nutrition Program Integrity Rule:** The Healthy, Hunger-Free Kids Act (HHFKA) of 2010 includes statutory changes to further enhance the integrity of the Child Nutrition (CN) Programs. In March 2016, FNS published a proposed rule to codify these changes as well as several recommendations from recently conducted management evaluations and USDA Office of Inspector General (OIG) audits of state agencies operating CN Programs. The final rule is scheduled to be published June 2017. Policy decisions will be needed on key issues in February 2017 to finalize drafting and clearance of the rule by this date.

**Farm to School:** Consistent with the Healthy Hunger-Free Kids Act of 2010 and USDA’s Know Your Farmer, Know Your Food Task Force, FNS has improved access to local foods in schools through grants, technical assistance, and research. In addition to maintaining these efforts, FNS is expanding its focus to other programs, and the implementation of new meal standards in the Child and Adult Care Food program in FY17 provides opportunities to highlight local foods program.

**Office of Community Food Systems:** While USDA has been engaged in farm to school efforts for a number of years, the Healthy Hunger-Free Kids Act of 2010 specifically directed the Department to improve access to local foods in schools through grants, technical assistance, and research. The Office of Community Food Systems (OCFS) operates the USDA Farm to School Grant Program (FY17 awards will be made in May 2017), administers and disseminates information from the USDA Farm to School Census, and provides a host of technical assistance and training. OCFS works closely with the Department’s Know Your Farmer, Know Your Food
Task Force to coordinate and collaborate on issues related to local and regional foods and to highlight Farm to School Census data on the KYF2 Compass Map website.

**Summer Meals for Children:** FNS has a long history of working towards increasing the number of children served by summer meals. While planning for this is already underway, these efforts will need to continue during the first part of 2017 to ensure that the summer of 2017 is successful in meeting the needs of children.

**National Academy of Medicine Review of the Process to Develop the Dietary Guidelines for Americans:** For CNPP, the most immediate issue is the study being conducted by the Health and Medicine Division of the National Academy of Medicine. Once the study is complete, USDA, in partnership with HHS, will need to determine how to manage the study findings in the context of initiating the next revision of the Dietary Guidelines for 2020.

**GAO and OIG Audits**

**GAO Audits**

- **WIC Program: Improved Oversight of Income Eligibility Determination Needed** (GAO-13-290)
  - **Date Issued:** March 8, 2013
  - **Hyperlink to audit:** [http://www.gao.gov/assets/660/652480.pdf](http://www.gao.gov/assets/660/652480.pdf)
  - **Audit Objectives:** Audit request made by the House Committee on Education and the Workforce and the Senate Subcommittee on Agriculture, Rural Development, Food and Drug Administration, and Related Agencies. GAO assessed: (1) how do state and local criteria for determining WIC income eligibility vary; (2) to what extent are individuals who would otherwise be ineligible for WIC deemed eligible due to their participation in other programs; and (3) how does USDA assist and monitor state determination of WIC income eligibility.
  - **Audit Summary:** GAO reviewed Federal laws and regulations; analyzed USDA’s national data from 2010, recent survey findings, and monitoring reports; reviewed WIC policy manuals from 10 states chosen to provide population size and geographic diversity; and interviewed Federal, state, and local officials. GAO recommended that USDA develop a timeline for reviewing its monitoring reports to assess national program risks and target assistance. USDA agreed with GAO’s recommendation. FNS staff developed a process to use an automated report to identify areas in need of correction or improvement that were found during WIC Management Evaluations conducted across the country. Using the output report, FNS will assess the frequency of Management Evaluation findings in each policy and program area nationwide and
respond by providing policy clarification, training, or other corrective actions to states. The report went into production on November 1, 2013, and FNS reported that staff will review the reports quarterly.

- Current Status: Closed

- **School Lunch: Implementing Nutrition Changes Was Challenging and Clarification of Oversight Requirements Is Needed (GAO-14-104)**
  - Date Issued: February 27, 2014
  - Audit Objectives: Request made by the House Committee on Education and the Workforce. GAO assessed: (1) lunch participation trends; (2) challenges School Food Authorities’ (SFAs) faced implementing the changes, if any; and (3) USDA’s assistance with and oversight of the changes.
  - Audit Summary: To address these areas, GAO used several methods, including review of Federal laws, regulations, and guidance; analysis of USDA’s lunch participation data; a national survey of state child nutrition program directors; and site visits to eight school districts selected to provide variation in geographic location and certain school district and food service characteristics. To improve program integrity, GAO recommends that USDA clarify the need to document noncompliance issues found during state reviews of SFAs and complete efforts to assess states’ assistance needs related to oversight of financial management. USDA generally agreed with GAO’s recommendations.
  - Current Status: Closed

- **School-Meals Programs: USDA Has Enhanced Controls, but Additional Verification Could Help Ensure Legitimate Program Access (GAO-14-262)**
  - Date Issued: June 16, 2014
  - Audit Objectives: GAO began this work on the initiative of the Comptroller General. GAO assessed: (1) steps taken to help identify and prevent ineligible beneficiaries from receiving benefits in school-meal programs; and (2) what opportunities exist to strengthen USDA’s oversight of the school-meals programs.
  - Audit Summary: GAO reviewed the National School Lunch Program policies, interviewed program officials, and randomly selected a non-generalizable sample that included 25 of 7.7 million approved household applications from 25 of 1,520 school districts in the Dallas, Texas, and Washington, D.C., regions. GAO performed limited eligibility testing using civilian Federal-employee payroll data from 2010 through 2013 due to the unavailability of other data sources containing nonFederal employee income. GAO also conducted interviews with households. Ineligible households were
referred to the Inspector General. GAO recommends that the Secretary of Agriculture develop a pilot program to explore the feasibility of using computer matching to identify households with income that exceeds program-eligibility thresholds for verification, and explore the feasibility of verifying a sample of categorically eligible households.

- **Current Status:** Open

- **School Meal Programs: Implications of Adjusting Income Eligibility Thresholds and Reimbursement Rates by Geographic Differences (GAO-14-557)**
  - **Date Issued:** August 7, 2014
  - **Hyperlink to audit:** [http://www.gao.gov/assets/670/664689.pdf](http://www.gao.gov/assets/670/664689.pdf)
  - **Audit Objectives:** This audit request was from Representative Sam Farr. The objectives were: (1) what are the available data sources that could be used to adjust for cost-of-living differences for household income eligibility and for variations in food, labor, and other costs for USDA school reimbursement rates; and (2) what are the advantages and disadvantages of using such data sources for making adjustments for income eligibility and reimbursement rates.
  - **Audit Summary:** No recommendations included in this report. GAO looked at a variety of methods by which to identify geographic differences in living costs and the potential for using them to adjust: (1) income eligibility thresholds; and (2) reimbursement rates for schools. They also examined the extent to which states and localities can make adjustments for geographic differences in costs by using existing program rules. GAO reviewed relevant laws, regulations, and literature; analyzed available data sources and methods; and interviewed knowledgeable experts.
  - **Current Status:** Closed

- **Supplemental Nutrition Assistance Program (SNAP): Enhanced Detection Tools and Reporting Could Improve Efforts to Combat Recipient Fraud (GAO-14-641)**
  - **Date Issued:** August 21, 2014
  - **Audit Objectives:** This audit request was from Senator Jeff Sessions. The audit objectives were: (1) how has USDA addressed the issues raised in its IG report on SNAP fraud; (2) how does USDA determine SNAP’s payment error rate and to what extent is payment error due to participant fraud; and (3) how many SNAP benefits continue to be vulnerable to trafficking.
  - **Audit Summary:** GAO reviewed: (1) how selected state agencies combat SNAP recipient fraud; (2) the effectiveness of certain state fraud detection tools; and (3) how FNS oversees state anti-fraud efforts. GAO reviewed relevant Federal laws, regulations, guidance, and documents; interviewed officials in 11 states; interviewed
Federal officials; tested fraud detection tools using fiscal year 2012 program data; and monitored websites for potential trafficking online. Although results are not generalizable to all States, the 11 states, selected based on various criteria including the size of their SNAP recipient household population and their payment error rates, served about a third of SNAP recipient households. GAO recommends, among other things, that FNS reassess current financial incentives and detection tools and issue guidance to help States better detect fraud and report on their anti-fraud efforts. FNS is working on the corrective actions resulting from this audit report.

- **Current Status:** Open

  - **Date Issued:** January 12, 2015
  - **Audit Objectives:** GAO did this work in response to a request made by the Chairs of House Committee on Education and the Workforce and the House Subcommittee on Early Childhood, Elementary, and Secondary Education, as well as another member of Congress. The key questions to be addressed by their audit were: 1) how does USDA determine the amount of formula to provide to participating infants; 2) what is known about the extent to which participants sell WIC formula online; and 3) what steps has USDA taken to prevent and address the online sale of WIC formula.
  - **Audit Summary:** GAO recommended that USDA require state agencies to inform WIC participants that selling WIC formula is against program rules and describe in their state plans how they identify attempted sales. GAO also recommended that USDA assess online sales, including techniques states can use to monitor them. USDA agreed with GAO’s recommendations.
  - **Current Status:** One recommendation was closed and two remain open. FNS’ latest update to move toward closure was provided to GAO on July 18, 2016.

  - **Date Issued:** May 18, 2015
  - **Hyperlink to audit:** [http://gao.gov/assets/670/669688.pdf](http://gao.gov/assets/670/669688.pdf)
  - **Audit Objectives:** GAO did this work in response to a request made by the Chairs of House Committee on Education and the Workforce, as well as the Chairs of the subcommittees on Higher Education and Workforce Training; Health, Employment, Labor, and Pensions; Workforce Protections; and Early Childhood, Elementary, and Secondary Education. The key questions to be addressed by their audit were: 1) how do agencies define regulatory guidance and what processes and criteria are used to
determine whether to issue guidance or undertake rulemaking; 2) what similarities and differences exist between the agencies policies, processes, and practices for developing and using regulatory guidance; and 3) how do the agencies ensure that their departmental guidance is current and transparent.

- **Audit Summary:** GAO made recommendations to four departments, and specific to USDA recommended that it strengthen the use of internal controls in guidance production processes and improve online guidance dissemination. USDA generally agreed with this recommendation.
- **Current Status:** Open. However, FNS provided information needed to close the USDA recommendation to GAO on July 22, 2016, and is currently waiting for GAO to update the status of the recommendation on their public website.

**School Nutrition: USDA Has Efforts Underway to Help Address Ongoing Challenges Implementing Changes in Nutrition Standards (GAO-15-656)**

- **Date Issued:** October 14, 2015
- **Audit Objectives:** GAO did this work in response to a request made by the Chair of the Committee on Education and Workforce. The key questions to be addressed by their audit were: 1) what challenges, if any, are the School Food Authorities (SFAs) GAO visited previously for the January 2014 report (GAO-14-104) dealing with currently, and as they continue to implement school lunch changes; 2) what challenges, if any, have these SFAs faced while implementing the changes to the nutrition standards for school breakfasts and the new nutrition standards for competitive foods; and 3) what actions has USDA taken to assist SFAs in implementing the school food requirements, such as helping schools mitigate any challenges related to food cost and waste.
- **Audit Summary:** GAO made no new recommendations to USDA as this was a follow-up to the GAO-14-104 report in which they recommended that USDA clarify the need to document noncompliance issues found during state reviews of SFAs and complete efforts to assess states' assistance needs related to oversight of financial management.
- **Current Status:** Closed

**OIG Audits**

**Analysis of FNS’ Supplemental Nutrition Assistance Program Fraud Prevention and Detection Efforts (27002-0011-13)**

- **Date Issued:** September 28, 2012
Audit Objectives: Initially, OIG’s audit objectives were to determine whether funds were used properly by analyzing SNAP-related databases at Federal and state levels for anomalies and signs of fraud, waste, and abuse; and to compare 10 selected states’ SNAP recipient databases to the Social Security Administration’s Death Master File. Subsequent to the December 2011 House Agriculture Committee’s Subcommittee on Department Operations, Oversight, and Credit’s hearing on SNAP fraud, the audit scope was expanded to include an evaluation of the adequacy of FNS and state tools used to prevent and detect SNAP fraud, and whether the states were using the tools provided.

Audit Summary: OIG concluded that, given the size and complexity of SNAP, the low rate of data anomalies identified was a notable achievement and the States had made significant progress resolving the questioned recipients identified in their matches. OIG also stated that, since SNAP participation has reached record levels, even incremental improvements in fraud detection and prevention can have a meaningful impact on SNAP program integrity. The report contained nine recommendations.

Current Status: This audit will be resolved upon the development of an action plan on next steps for the National Accuracy Clearinghouse (NAC) project. The NAC pilot project report was signed by the Secretary and delivered to Congress on May 10, 2016. FNS is preparing a letter to all States detailing next steps. Estimated completion date – October 31, 2016.

Food and Nutrition Service Financial Statements for Fiscal Year 2012 and 2011 (27401-0002-21)

Date Issued: November 23, 2012

Audit Objectives: To determine whether: (1) the financial statements present fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America, the assets, liabilities, and net position, net cost, changes in net position, and combined budgetary resources; (2) the internal control objectives over financial reporting were met; and (3) the Food and Nutrition Service complied with laws and regulations for those transactions and events that could have a direct and material effect on the comparative financial statements. OIG also determined whether the Management Discussion and Analysis was materially consistent with the information in the comparative financial statements.

Audit Summary: The report contains an unqualified opinion on the financial statements, as well as the results of our assessment of the Food and Nutrition Service’s internal controls over financial reporting and compliance with laws and regulations. FNS’ comparative financial statements for fiscal years 2012 and 2011,
including the accompanying notes, present fairly, in all material respects, the financial position of FNS, as of September 30, 2012, and 2011, and its net costs, changes in net position, and budgetary resources for the years then ended, in conformity with accounting principles generally accepted.

- **Current Status:** Closed

### National School Lunch Program – Food Service Management Company (FSMC) Contracts (27601-0001-23)

- **Date Issued:** January 3, 2013
- **Hyperlink to audit:** [https://www.usda.gov/oig/webdocs/27601-0001-23.pdf](https://www.usda.gov/oig/webdocs/27601-0001-23.pdf)
- **Audit Objectives:** The objectives of the audit were: (1) assess the effectiveness of any controls implemented by FNS and selected state agencies as a result of previous audits; (2) determine whether SFAs that signed fixed-price-per-meal contracts are receiving the full benefit and value of all donated foods provided to FSMCs, and (3) determine whether SFAs that signed cost-reimbursable contracts with FSMCs are receiving all purchase rebates.
- **Audit Summary:** This audit was conducted based on an inquiry from Congresswoman DeLauro. Overall, OIG reported the following: FNS needs to enhance its management oversight and controls of SFAs that contract with FSMCs; FNS Needs to improve its monitoring of SFAs’ oversight for FSMC purchase discounts and rebates; FNS did not ensure full credit was given for USDA-donated foods; and FNS needs to improve reviews of State Agency FSMC contracts.
- **Current Status:** FNS completed all corrective actions that resulted from the 15 recommendations in the audit report. The procurement tool associated with many of the recommendations was released for implementation nationwide in School Year 2016-2017. The request for final action and closure for the remaining open recommendations (1, 2, 7, 8, 11, 12, 13, and 15) was submitted to OCFO for approval on August 15, 2016.

### Vendor Management in the Food and Nutrition Service’s Special Supplemental Nutrition Assistance Program for Women, Infants and Children (WIC) (27601-0038-CH)

- **Date Issued:** March 29, 2013
- **Hyperlink to audit:** [https://www.usda.gov/oig/webdocs/27601-0038-CH.pdf](https://www.usda.gov/oig/webdocs/27601-0038-CH.pdf)
- **Audit Objectives:** The overall objectives of the audit were to evaluate FNS’ implementation of new regulations intended to improve the integrity of vendor management, and to assess the certification of participants as eligible. As part of this, OIG assessed the state agencies’ implementation of vendor compliance
investigations; their accountability, control, and security over food instruments; and how they made determinations of participant eligibility.

- **Audit Summary:** OIG did not identify any material findings associated with participant eligibility. However, OIG reported that FNS needs to strengthen guidance and oversight of state agencies’ vendor monitoring and enforcement activities. FNS does not ensure that all retail vendors disqualified from SNAP are disqualified from WIC. FNS has completed all corrective actions resulting from the nine recommendations in the audit report.

- **Current Status:** Closed

### Overlap and Duplication in the Food and Nutrition Service’s Nutrition Programs (27001-0001-10)

- **Date Issued:** June 13, 2013
- **Hyperlink to audit:** [https://www.usda.gov/oig/webdocs/27001-0001-10.pdf](https://www.usda.gov/oig/webdocs/27001-0001-10.pdf)
- **Audit Objectives:** OIG evaluated the potential for duplication and overlap in the five largest FNS nutrition assistance programs, accounting for 99 percent of FNS’ total program budget related to FYs 2012 through 2006.

- **Audit Summary:** Although this audit did not document a single area of unnecessary overlap or duplication in any of FNS’ programs, OIG recommended that FNS determine and document the requirements for conducting a study and to identify and determine the extent to which overlap and duplication may exist in FNS’ nutritional assistance programs. OIG also recommended that FNS determine whether it had the resources necessary to conduct the assessment of the potential overlap of its nutrition programs or whether additional funding will be necessary to complete the assessment.

- **Current Status:** Closed

### FNS: Controls for Authorizing Supplemental Nutrition Assistance Program Retailers (27601-0001-31)

- **Date Issued:** July 31, 2013
- **Audit Objectives:** This audit was initiated by OIG in April 2012 to evaluate FNS’ controls for authorizing SNAP retailers; specifically to assess FNS controls over the retailer authorization process, and to evaluate the Agency’s actions to strengthen its processes to prevent the authorization of previously disqualified owners.

- **Audit Summary:** This audit report contains 20 recommendations. OIG reports that FNS should comprehensively review its policies and procedures, seek legislative change to retain a portion of retailer penalties; require background checks for retailers; strengthen internal guidance; make improvements to its automated retailer data system; create and strengthen safeguards for high-risk stores; and require more
supervisory reviews. FNS should also review the owners identified to determine if they need to be penalized or disqualified from SNAP.

- **Current Status:** Six of the twenty recommendations remain open, but are in the process of being addressed. Closure of two of the recommendations hinges on the rulemaking process, which pushes the estimated completion date of closure out to October 2017.

- **Food and Nutrition Service Financial Statements for Fiscal Year 2013 – 2012 (27401-0003-21)**
  - **Date Issued:** December 6, 2013
  - **Audit Objectives:** To examine the Food and Nutrition Service’s financial statements for FY 2013 and 2012.
  - **Audit Summary:** The report contains an unqualified opinion on the financial statements, as well as the results of our assessment of the Food and Nutrition Service’s internal controls over financial reporting and compliance with laws and regulations. OIG determined that the agency’s financial statements for the FY 2013 and 2012 present fairly, in all material respects, FNS’ financial position as of September 30, 2013 and 2012, and that they conform with accounting principles generally accepted.
  - **Current Status:** Closed

- **State Agencies’ Food Costs for the Food and Nutrition Service’s Special Supplemental Nutrition Program for Women, Infants and Children (WIC) (27004-0001-22)**
  - **Date Issued:** September 25, 2014
  - **Audit Objectives:** OIG’s goal was to conduct an audit survey of states to evaluate factors that impact the FNS WIC program’s costs, including average food costs and costs per participant. Additionally, OIG wanted to gain an understanding of FNS and State oversight activities in monitoring program costs.
  - **Audit Summary:** OIG found that FNS can strengthen its oversight of state agency cost containment practices and recommended that FNS coordinate with Medicaid. OIG also recommended that FNS should take more effective measures in cost containment policies. The audit report contained six recommendations for FNS. FNS developed a national WIC cost containment strategy that requires state agencies to implement a vendor peer group system, competitive price criteria, and allowable reimbursement levels in a manner that ensures the WIC Program pays authorized vendors competitive prices for supplemental foods. It also requires state agencies to ensure that vendors who derive more than 50 percent of their annual food sales
revenue from WIC food instruments do not cause higher food costs for the program than do other vendors. All of these requirements are codified in program regulations found at 7 CFR 246.12.

- **Current Status:** All recommendations but one are closed. The open recommendation is pending completion of an Economic Research Service (ERS) study. FNS is working with ERS on its update of the 2005 report, Interstate Variation in WIC Food Package Costs: The Role of Food Prices, Caseload Composition, and Cost-Containment Practices. This study, which examines the degree to which food prices, caseloads, and the implementation of various cost containment measures influence state agencies’ food package costs, was delayed and is now estimated to be completed by the Fall of 2017.

- **Food and Nutrition Service Financial Statements for Fiscal Years 2014 and 2013 (OIG 27401-0004-21)**
  - **Date Issued:** November 14, 2014
  - **Audit Objectives:** To determine whether: 1) the comparative financial statements were presented fairly, in all material respects, in accordance with accepted principles; 2) the internal control objectives over financial reporting were met; 3) FNS complied with laws and regulations for transactions and events that could have a direct and material effect to the financial statements; and 4) the information presented in Management’s Discussion and Analysis was materially consistent with the information in the comparative financial statements.
  - **Audit Summary:** The Food and Nutrition Service received an unqualified opinion from the OIG’s audit of the FNS comparative financial statements.
  - **Current Status:** Closed

- **National School Lunch and School Breakfast Program Error Rates (OIG 27601-0001-41)**
  - **Date Issued:** May 5, 2015
  - **Hyperlink to audit:** [https://www.usda.gov/oig/webdocs/27601-0001-41.pdf](https://www.usda.gov/oig/webdocs/27601-0001-41.pdf)
  - **Audit Objectives:** To evaluate the methods FNS used to lower the error rates for NSLP and SBP. OIG sought to determine if FNS, State agencies, and SFAs had adequate controls to: 1) ensure children met the eligibility requirements, and 2) meal claims were supported and accurately reimbursed.
  - **Audit Summary:** OIG recommended that FNS consult with the Office of the General Counsel to determine its regulatory authority to require households to submit income documentation with school meals applications. Based on this determination, FNS should then take the appropriate actions to revise the programs’ documentation.
requirements. Additionally, OIG recommended that FNS should clarify criteria for identifying questionable applications and provide guidance and training for cafeteria fund management.

- **Current Status:** Closed

**SNAP Error Rates (OIG 27601-0002-41)**
- **Date Issued:** September 23, 2015
- **Hyperlink to audit:** [https://www.usda.gov/oig/webdocs/27601-0002-41.pdf](https://www.usda.gov/oig/webdocs/27601-0002-41.pdf)
- **Audit Objectives:** To determine if FNS and States have controls in place to ensure the integrity of SNAP error rate determination.
- **Audit Summary:** OIG recommended that FNS should consider changing quality control (QC) from a two-tier process reliant on state error rates to a one-tier process in which FNS or a third party reviews cases, and establishes a timeline for making this change, if cost beneficial. OIG also recommended that FNS needs to reiterate policies regarding the proper use of error review committees, QC staff’s variable treatment of error cases, and issue guidance to states on appropriate use of private consultants. Lastly, they recommended that FNS should amend and enforce policies to ensure error rates are accurate and determined if they are in compliance with regulations.

- **Current Status:** Open. Management decision agreement reached on all recommendations as of June 30, 2016. Four recommendations are closed and the remaining recommendations are on track to be closed by December 31, 2016.

**Healthy, Hunger-Free Kids Act (HHFKA) of 2010 – Controls Over Food Service Account Revenue (OIG 27601-0001-22)**
- **Date Issued:** September 28, 2015
- **Audit Objectives:** To evaluate the controls that FNS has in place to ensure that SFAs comply with the food service account revenue requirements outlined in Sections 205 and 206 of HHFKA. In addition, OIG sought to evaluate FNS’ compliance with the requirements outlined in Section 307 of that Act regarding indirect food costs.
- **Audit Summary:** OIG recommended that FNS needs to redesign controls to provide reasonable assurance that SFAs comply with the paid lunch equity and non-program food revenue requirements of sections 205 and 206, and that their reports are on time and complete. Additionally, they recommended that FNS needs to supply SFAs with updated guidance concerning indirect costs. Lastly, OIG recommended that FNS needs to establish a date for publishing the annual paid lunch price report.

- **Current Status:** Open. Action request currently being finalized for submission to the Office of the Chief Financial Officer by October 31, 2016.
United States Department of Agriculture
2016 Presidential Transition
Food, Nutrition, and Consumer Services

- **Food and Nutrition Service Financial Statements for Fiscal Years 2015 and 2014 (OIG 27401-0005-21)**
  - **Date Issued:** November 5, 2015
  - **Audit Objectives:** To determine whether: 1) FNS’ comparative financial statements were presented fairly, in all material respects, in accordance with generally accepted accounting principles; 2) FNS met internal control objectives over financial reporting; 3) transactions and events with direct and material effect on the financial statements were compliant with applicable laws and regulations; and 4) the information presented in the Management’s Discussion and Analysis was materially consistent with the information in the comparative financial statements.
  - **Audit Summary:** The Food and Nutrition Service received an unqualified opinion from the OIG’s audit of the FNS comparative financial statements.
  - **Current Status:** Closed

- **SNAP Administrative Costs (OIG 27601-0003-22)**
  - **Date Issued:** September 29, 2016
  - **Hyperlink to audit:** Not yet available
  - **Audit Objectives:** To evaluate FNS’ controls over SNAP administrative costs, with a specific focus on whether states with county-administered programs were effectively and efficiently controlling costs and minimizing variances.
  - **Audit Summary:** Though a final report is pending issuance, it is expected that OIG will recommend the following: 1) that FNS could be more proactive in analyzing and containing variances in SNAP costs-per-case; 2) that FNS regional offices have different procedures for conducting financial reviews and risk assessments; and 3) that weaknesses in state and county financial management controls and a lack of effective FNS oversight led to inaccurate program financial reporting and questioned costs.
  - **Current Status:** Pending publication of final audit report. FNS officials are currently preparing a formal response to OIG’s official draft report that will be included in its entirety as an attachment to OIG’s final report.

- **FNS Controls Over SNAP Benefits for Able-Bodied Adults Without Dependents (ABAWD) (OIG 27601-00032-31)**
  - **Date Issued:** September 29, 2016
  - **Hyperlink to audit:** Not yet available
  - **Audit Objectives:** To determine whether FNS’ oversight of state agency controls is adequate to ensure that only eligible ABAWDs are receiving SNAP benefits.
United States Department of Agriculture
2016 Presidential Transition
Food, Nutrition, and Consumer Services

- **Audit Summary:** Though a final report is pending issuance, it is expected that OIG will recommend the following: 1) FNS conduct a study to identify the most troublesome areas for states and develop best practices for implementing the complex ABAWD provisions; 2) FNS review regulations to verify that the agency is consistently implementing laws regarding SNAP age limits; and 3) FNS ensure that valid, complete, and timely information is included in the Management Evaluation System (MEMSNext Generation).

- **Current Status:** Pending publication of final audit report. FNS officials are currently preparing a formal response to OIG’s official draft report that will be included in its entirety as an attachment to OIG’s final report.
WHAT WE DO: OUR MISSION
The Food Safety and Inspection Service (FSIS) is the public health regulatory Agency within USDA responsible for ensuring that domestic and imported meat, poultry, and processed egg products are safe, secure, wholesome, and accurately labeled. FSIS also enforces the Humane Methods of Slaughter Act (HMSA), which requires that all livestock at federally inspected establishments be handled and slaughtered humanely. In March 2016, FSIS established a new program for federal inspection of certain fish of the order Siluriformes, including catfish, transferring responsibility from the Food and Drug Administration (FDA).

WHO WE ARE: OUR WORKFORCE
- FSIS has nearly 9,300 permanent employees located across the country in nearly 6,400 establishments.
- Ten District Offices
- Three Labs
- 127 Import Establishments at Ports of Entry

WHO WE SERVE: OUR CONSTITUENTS
FSIS holds monthly meetings with consumer and industry stakeholder groups to discuss public health and related policy issues. FSIS partners with Federal agencies to carry out its mission, as well as with 27 state meat and poultry inspection programs that provide inspection to over 1,900 small and very small establishments.

KEY UPCOMING DECISIONS
- Natural Labeling
  - FSIS currently has policy guidance that states criteria for the term “natural”.
  - Over the past ten years, there have been numerous petitions and comments requesting changes and/or clarifications to these guidelines.
  - FSIS is in the process of proposing to amend the Federal meat and poultry products inspection regulations to define the conditions under which the voluntary claim “natural” may be used on the label or in the labeling of meat and poultry products to clarify and resolve these issues.

BUDGET HIGHLIGHTS FY 2016
FSIS overall budget is $1,014,871 and has been relatively consistent with no major changes.
- 80% of budget is for salaries and benefits for nearly 9,300 permanent employees
- FSIS has created efficiencies to cover increased costs and changes in programs.
United States Department of Agriculture  
2016 Presidential Transition  
Food Safety and Inspection Service (FSIS)

I. Organizational Overview

Agency’s Mission/Strategic Plan

FSIS activities contribute to USDA’s FY 2014-2018 Strategic Goal 4, “Ensure that all of America’s children have access to safe, nutritious, and balanced meals.

FSIS recently published the FY 2017-2021 Strategic Plan, which builds on prior successes and reflects emerging issues that FSIS faces in ensuring that the food products we regulate are safe to eat. This plan will guide us going forward and is briefly outlined below. Our Vision and Mission, as well as our Core Values—Accountable, Collaborative, Empowered, and Solutions-Oriented—frame the goals, outcomes, objectives, and measures in this Plan. The FY 2017-2021 Strategic Plan contains 3 goals, 6 outcomes, 15 objectives, and 24 measures.

Following the FY 2017-2021 Strategic Plan are the measures and results FSIS was able to attain under the previous FY 2011-2016 Strategic Plan.

FY 2017-2021 Strategic Plan

Vision: Everyone’s food is safe.

Mission: Protecting the public’s health by ensuring the safety of meat, poultry, and processed egg products.

Goal 1. Our first and primary mission goal, “Prevent Foodborne Illness and Protect Public Health,” directly represents the day-to-day work of a large majority of our employees.

Outcome 1.1 Prevent Contamination
Outcome 1.2 Limit Illness from Regulated Products

Goal 2. Our secondary mission goal, “Modernize Inspection Systems, Policies, and the Use of Scientific Approaches,” represents key methods and approaches we intend to use to enhance how we realize our food safety and public health mission.

Outcome 2.1 Improve Food Safety and Humane Handling Practices through Adoption of Innovative Approaches
Outcome 2.2 Enhance Access to Complete and Accurate Information to Inform Decisions

Goal 3. Our third goal, “Achieve Operational Excellence,” pinpoints key areas where we seek improvement in how we do business to better support achieving our first two goals and our overall mission.

Outcome 3.1 Maintain a Well-Trained and Engaged Workforce
Outcome 3.2 Improve Processes and Services
United States Department of Agriculture
2016 Presidential Transition
Food Safety and Inspection Service (FSIS)

FSIS FY 2011-2016 Strategic Plan

Vision: A trusted public health regulatory agency committed to preventing foodborne illness.

Mission: Protect consumers by ensuring that meat, poultry, and processed egg products are safe, wholesome, and correctly labeled and packaged.

- Contains three Strategic Themes
  1) Prevent Foodborne Illness
  2) Understand and Influence the Farm-to-Table Continuum
  3) Empower People and Strengthen Infrastructure

- Contains eight Goals
  1) Ensure that Food Safety Inspection Aligns with Existing and Emerging Risks
  2) Maximize Domestic and International Compliance with Food Safety Policies
  3) Enhance Public Education and Outreach to Improve Food-Handling Practices
  4) Strengthen Collaboration Among Internal and External Stakeholders
  5) Effectively Use Science to Understand Foodborne Illness and Emerging Trends
  6) Implement Effective Policies to Respond to Existing and Emerging Risks
  7) Empower Employees with Training, Resources, and Tools
  8) Develop, Maintain, and Use Innovative Methodologies, Processes, and Tools

Overview of Agency Programs and Operations

- Food Safety (FS) activities contribute to USDA’s FY 2014-2018 Strategic Goal 4, “Ensure that all of America’s children have access to safe, nutritious, and balanced meals.

- The Food Safety Mission Area has one primary Agency/Program, the Food Safety and Inspection Service (FSIS). FSIS just published its FY 2017-2021 Strategic Plan which builds on prior successes and reflects emerging issues that FS faces in ensuring that the food products we regulate are safe to eat. This plan will guide us going forward and is briefly outlined below. Our Vision and Mission, as well as our Core Values—Accountable, Collaborative, Empowered, and Solutions-Oriented—frame the goals, outcomes, objectives, and measures in this Plan. The FY 2017-2021 Strategic Plan contains 3 goals, 6 outcomes, 15 objectives, and 24 measures. Following the FY 2017-2021 Strategic Plan are the measures and results FSIS was able to attain under the previous FY 2011-2016 Strategic Plan.
Key Mission Delivery Performance Measures

The following are the FSIS FY2011-2016 Corporate Performance Measures and Results.

**FSIS FY 2011-2016 Corporate Performance Measure 1:**
**Percentage of Broiler Plants Passing the Carcass Salmonella Verification Testing**

In 2011, FSIS established a performance standard for *Salmonella* in broiler carcasses. This standard is designed to encourage industry to control for *Salmonella* and reduce the potential for human exposure. Failure to meet this standard serves as a proxy for heightened exposure potential to the public.

| Percent of Broiler Plants Passing the Carcass Salmonella Verification Testing Standard /1/ |
|-----------------------------------------------|---|---|---|---|---|---|---|
| Percent | 89% | 90% | 90% | 92% | 96% | 95% | 95% |

**FSIS FY 2011-2016 Corporate Performance Measure 2:**
**Total Number of Salmonella, Lm, and E.coli O157:H7 Illnesses from Products Regulated by FSIS**

FSIS measures its performance on reducing foodborne illness in terms of total *Salmonella*, *Lm*, and *E. coli* O157:H7 illnesses from all FSIS regulated meat, poultry, and processed egg products. Estimates of total illness from all FSIS-regulated products are based on pathogen-specific case rates from CDC FoodNet data and simple food attribution estimates derived from CDC’s Foodborne Disease Outbreak Surveillance System (FDOSS) database, and are anchored to pathogen-specific illness reduction Healthy People 2020 goals. FSIS uses a simple foods attribution methodology with a rolling 3-year window of outbreak data from the publicly available CDC FDOSS database.

| Total (All) Illness Measure (Salmonella, Lm and E. coli O157:H7) /2/ |
|---------------------------------------------------------------|---|---|---|---|---|---|
| Total Illnesses | 491,353 | 479,621 | 427,171 | 386,265 | 382,123 | 363,547 | 353,139 |
FSIS FY 2011-2016 Corporate Performance Measure 3:
Percent of Establishments with a Functional Food Defense Plan

FSIS began measuring the status of industry’s voluntary adoption of food defense plans through annual surveys of FSIS Inspection Program Personnel (IPP) in 2006. The survey questions determine whether each FSIS-inspected establishment has a functional food defense plan (i.e., the plan is documented; measures are in place to address outside security, inside security, personnel security, and incident response; the plan was tested in the last year; and the establishment reviewed their plan in the past year).

Organization’s History

The Secretary of Agriculture established the Food Safety and Inspection Service (FSIS) on June 17, 1981, pursuant to legislative authority contained in 5 U.S.C. 301 that permits the Secretary to issue regulations governing the United States Department of Agriculture (USDA). The mission of FSIS is to ensure that the Nation’s commercial supply of meat, poultry, and processed egg products is safe, wholesome, and correctly labeled and packaged through inspection and regulation of these products. FSIS is composed of two major inspection programs: (1) Meat and Poultry Inspection and (2) Egg Products Inspection.

1. The Meat and Poultry Inspection Program is authorized by the Federal Meat Inspection Act (FMIA) as amended and the Poultry Products Inspection Act (PPIA). The purpose of the program is to ensure that meat and poultry products are safe, wholesome, and correctly labeled through inspection and regulation of these products so that they are suitable for commercial distribution for human consumption. The FY 2008 Farm bill amended the FMIA to make siluriformes an amenable species and upon approval of the Fish inspection rule in FY 2015, FSIS will begin inspection of siluriformes under the FMIA. FSIS also enforces the Humane Methods of Slaughter Act through the program, which requires that all livestock at Federally-inspected establishments be handled and slaughtered in a humane way. FSIS conducts inspection activities at Federally-inspected meat and poultry establishments; and for State programs, the agency ensures that State meat and poultry inspection programs have standards that are at least equivalent to Federal standards. FSIS also ensures that meat and poultry products imported to the United States are produced under standards equivalent to U.S. inspection standards, and facilitates the certification of regulated products. FSIS’ science-based inspection system, known as the Hazard Analysis and Critical Control Point (HACCP) system, places emphasis on the identification, prevention, and control of foodborne hazards. HACCP requirements include meeting sanitation, facility, and operational standards, and other prerequisite programs to control pathogen contamination and produce safe and unadulterated food.
2. The Egg Products Inspection Program is authorized by the Egg Product Inspection Act (EPIA). The program’s purpose is to ensure that liquid, frozen and dried egg products are safe, wholesome, and correctly labeled through continuous mandatory inspection of egg processing plants that manufacture these products. FSIS also ensures processed egg products imported to the United States are produced under standards equivalent to U.S. inspection standards, and facilitates the certification of exported regulated products.

During 2014, the agency maintained headquarters offices in the Washington D.C. metropolitan area; 10 district offices; the Policy Development Division in Omaha, Nebraska; laboratories at Athens, Georgia, St. Louis, Missouri, and Alameda, California; the Financial Processing Center in Des Moines, Iowa; the Human Resources Field Office in Minneapolis, Minnesota; and a nationwide network of inspection personnel in 6,389 Federally regulated establishments in 50 States, Puerto Rico, Guam, and the Virgin Islands. Included are 350 establishments operating under Talmadge-Aiken Cooperative Agreements. A Talmadge-Aiken plant is a Federal plant with State inspection program personnel operating as Federal inspectors under Federal supervisors. Much of the agency’s work is conducted in cooperation with Federal, State, and municipal agencies, as well as private industry.
Organizational Chart

The Office of Food Safety (OFS) is one of seven mission areas that comprise the Department of Agriculture. OFS includes one agency: the Food Safety and Inspection Service (FSIS). The Office typically consists of one Under Secretary for Food Safety, one or more Deputy Under Secretaries, a Chief of Staff and a Confidential Assistant. Below is the Organizational Chart for the FSIS.
United States Department of Agriculture
2016 Presidential Transition
Food Safety and Inspection Service (FSIS)

Biographies for Career and Political Staff in Key Leadership Positions

Alfred V. Almanza
Deputy Under Secretary and Acting FSIS Administrator
202-720-7025, Al.Almanza@fsis.usda.gov

Alfred V. Almanza was appointed Deputy Under Secretary for Food Safety by the U.S. Department of Agriculture’s (USDA) Secretary Thomas J. Vilsack in September 2014, after having served as Administrator of USDA’s Food Safety and Inspection Service (FSIS) since June 2007. Mr. Almanza will simultaneously serve as Acting Administrator, continuing to lead nearly 9,400 employees in the agency’s mission to protect public health.

In 1978, Mr. Almanza began his FSIS career as a food inspector in a small slaughter plant in Dalhart, Texas. During his 36-year career with FSIS, Mr. Almanza moved up quickly from that entry level position – serving as Labor Management specialist, District Manager of the Agency’s Dallas District Office, and ultimately Administrator of FSIS. His experiences in the field and headquarters have made him extraordinarily qualified to lead the agency.

During his tenure as Administrator, Mr. Almanza focused on modernizing inspection and identifying ways to make the Agency more efficient and effective. He spearheaded the development of the New Poultry Inspection System which redirects FSIS inspection to a more balanced and efficient approach while simultaneously reducing pathogen levels in young poultry slaughter establishments. It is anticipated that the new approach will prevent thousands of illnesses from *Salmonella* and *Campylobacter*. In addition, Mr. Almanza’s regulatory strategies against potentially deadly *E. coli* O157:H7 have significantly reduced illnesses from this pathogen. Under his leadership, FSIS implemented a zero-tolerance policy for six additional strains of *E. coli* that are responsible for human illness. He also led the development of new *Campylobacter* and *Salmonella* performance standards, which hold slaughter establishments accountable for reducing these pathogens in young chickens and turkeys. In 2006 the positive *Salmonella* testing rate was 16%; today it is less than 7%. In 2013, FSIS released the *Salmonella* Action Plan, which outlines the agency’s key steps towards reducing the incidence of *Salmonella* contamination.

Under Mr. Almanza’s leadership, FSIS launched the Public Health Information System (PHIS), a modern repository for all data about public health trends and food safety violations at nearly 6,400 FSIS-regulated plants across the country. Since 2011, PHIS has streamlined data collection and access for the agency.

As part of USDA’s Blueprint for Stronger Service, Mr. Almanza determined that FSIS could streamline resources by reducing the number of district offices from 15 to 10. The district consolidation helped to improve efficiency, consistency, and integration by more evenly distributing the circuits, establishments, and FSIS employees that each district office oversees. Furthermore, Mr. Almanza reorganized headquarters offices and staff to improve organizational efficiency and the ability to better target existing resources.
Mr. Almanza led the development of the FSIS FY 2011-2016 Strategic Plan, which includes results-oriented performance measures. The plan includes 30 distinct, quantifiable performance measures that support eight larger goals. In 2012, he led the development of the internal Annual Performance Plan, which included specific outcomes linked to the Strategic Plan. The plan bridges the FSIS Strategic Plan with Senior Executive Service individual performance standards, and presents three ‘key results’ to be achieved by each Program Area. The transparency provided by this integration of plans makes it possible for each employee to clearly see how his or her work relates to the FSIS mission.

Mr. Almanza is mindful of the more than 8,400 FSIS field employees in his day-to-day tasks. Recognizing that FSIS employees are the agency’s greatest asset, Mr. Almanza works diligently to foster productive relationships. In the most recent FSIS employee survey, top ten results indicate employees like their work, understand how it relates to the agency’s goals, have a sense of accomplishment, and believe in being held accountable.

Brian Ronholm
Deputy Under Secretary for Food Safety [Political]
202-720-0350, Brian.Ronholm@osec.usda.gov

Brian Ronholm was named Acting Under Secretary for Food Safety in December 2013. He oversees the policies and programs of the Food Safety and Inspection Service (FSIS), USDA's public health regulatory agency that ensures that the nation's commercial meat, poultry, and egg products are safe, wholesome, and correctly labeled. He also chairs the U.S. Codex Policy Steering Committee, which provides guidance to U.S. delegations to the Codex Alimentarius Commission.

Mr. Ronholm joined USDA in April 2011 as Deputy Under Secretary for Food Safety. In this position, he was part of a leadership team that implemented significant new policies that have enhanced consumer protection, including: zero tolerance for six strains of pathogenic E. coli in raw beef; a common sense 'test and hold' requirement prohibiting food from entering commerce before critical test results are confirmed; tough new performance standards for Salmonella and the first ever performance standard for Campylobacter in poultry; and improved capabilities for tracing contaminated meat.

Prior to joining USDA, Mr. Ronholm he served as an Agriculture Appropriations associate on the staff of Congresswoman Rosa L. DeLauro, managing a wide range of issues related to the House Appropriations Subcommittee on Agriculture, Rural Development, Food and Drug Administration, and Related Agencies in support of the former chairwoman. Mr. Ronholm was actively involved in many comprehensive legislative efforts to improve food safety and nutrition, including the 2008 Farm Bill, the Child Nutrition Reauthorization bill, and the FDA Food Safety Modernization Act.

He earned a master's degree in political management at The George Washington University and an undergraduate degree in finance from California State University at Hayward.
Carmen Rottenberg  
FSIS Deputy Administrator  
202-692-4207, Carmen.Rottenberg@fsis.usda.gov

Carmen Rottenberg was appointed Deputy Administrator of the Food Safety and Inspection Service (FSIS) at USDA in April 2016. In this position, she plays an integral role in ensuring that FSIS continues to fulfill its core mission to protect public health by keeping harmful meat, poultry, and processed egg products out of commerce and to keep consumers safe from foodborne pathogens.

Ms. Rottenberg has direct oversight of the Agency’s five year Strategic Plan and she oversees the development of the FSIS Annual Performance Plan each year. Prior to becoming Deputy Administrator, Ms. Rottenberg served as the Chief Operating Officer for FSIS. Since joining FSIS in 2007, she has served in various leadership roles in the Agency, including Deputy Director of the Civil Rights Staff and Chief of Staff to the Administrator.

Ms. Rottenberg holds a B.A. in Political Science and Philosophy from Hope College in Holland, MI and a Juris Doctorate degree from American University’s Washington College of Law. Ms. Rottenberg began her Federal government career in the Federal Trade Commission’s Office of General Counsel, and prior to joining FSIS, Ms. Rottenberg was a law clerk at a small law firm in Fairfax, VA.

Jane Doherty  
International Coordination Executive, Office of the Administrator  
202-708-8769, Jane.Doherty@fsis.usda.gov

Jane Doherty was appointed the International Coordination Executive in the Food Safety and Inspection Service (FSIS) at USDA in May 2014. She supports FSIS Strategic Goal 2, to enhance compliance of domestic and foreign-produced products with safety regulations and guidance. Part of that mission includes ensuring that criteria for measuring equivalence of a foreign food safety system will be more closely aligned with existing and emerging domestic food safety regulations and policies.

Ms. Doherty brings a wealth of expertise to FSIS, with over twenty-four years working in international negotiations and government policy involving trade, food safety and environmental policies and issues. Prior to joining the USDA, she was the Director of Sanitary and Phytosanitary Affairs at the Office of the United States Trade Representative (USTR). She acted as the Chief Negotiator for the United States on trade policy affecting food safety, animal and plant life and health issues. Under her leadership, the USTR achieved groundbreaking trade agreements with Canada, the European Union, and Japan related to USDA organic equivalence arrangements, which eliminated trade barriers for organic producers while maintaining USDA’s quality standards.

Ms. Doherty earned a Bachelor of Sciences in International Affairs and a Juris Doctorate from George Washington University.
United States Department of Agriculture  
2016 Presidential Transition  
Food Safety and Inspection Service (FSIS)

Steven A. Fisher  
Chief Financial Officer (CFO)  
202-720-8700, Steven.Fisher@fsis.usda.gov

Steven A. Fisher has served as the Chief Financial Officer (CFO) at USDA’s Food Safety and Inspection Service (FSIS) since June 2014. The Office of the CFO (OCFO) is responsible for supporting food safety, protecting public health, and ensuring food defense requirements through strategic planning, budgeting and ensuring sound financial management practices and strong fiscal stewardship of the resources provided to FSIS by Congress.

As CFO, Mr. Fisher is responsible for providing executive and technical leadership, as well as policy advice, on financial management and accounting operations, systems, and plans; and budget formulation, execution, and budget-performance integration. Mr. Fisher also serves as the agency’s Performance Improvement Officer in support of the Government Performance and Results Act, leading and coordinating the agency’s strategic planning, and performance monitoring and reporting activities.

Mr. Fisher has over 20 years of experience in the financial management and strategic planning arena. Just before joining FSIS, he directed critical support functions as the Acting Deputy Executive Director and CFO of the Federal Trade Commission (FTC). As the CFO for FTC he led that agency in attaining 6 consecutive nationally recognized accountability awards (Certificate of Excellence in Accounting Reporting). Prior to his roles at FTC, Mr. Fisher has held several executive positions within the Department of Defense (DoD), including serving as the Director of the Business Integration Office, Office of the Secretary, where he helped lead the Department’s efforts to modernize its legacy business systems by implementing major Enterprise Resource Planning (ERP) systems.

Mr. Fisher has been an active Certified Public Accountant for 23 years and is also a Certified Government Financial Manager and a Certified Fraud Examiner. He earned his Master’s degree in Information Systems from the University of Maryland, and a Bachelor’s degree in Business Administration from Loyola University in Baltimore, Maryland.

Janet B. Stevens, PMP  
Chief Information Officer (CIO)  
202-205-9950, Janet.Stevens@fsis.usda.gov

Janet B. Stevens, PMP, has served as the Chief Information Officer (CIO) at USDA’s Food Safety and Inspection Service (FSIS) since April 2007. The Office of the CIO is responsible for supporting food safety, protecting public health, and ensuring food defense requirements through the development, implementation and protection of secure information systems, data and infrastructure.

Ms. Stevens oversees innovative and award-winning technical work associated with the deployment of cyber security systems for FSIS. She has also led several USDA eGovernment initiatives. She participated in the development of Federal recommendations for public web sites.
as part of OMB’s Interagency Committee on Government Information Web Content Standards Working Group as well as the Federal Digital Government Strategy.

Ms. Stevens is a proponent of social media and other innovative methods of communication and data as avenues to improve outreach efforts with other departments and stakeholders, both within and outside of FSIS, as well as to improve data streams for the analysis of information available on the internet. She is dedicated to providing the best customer service possible, for internal FSIS employees and external stakeholders. She ensures that all FSIS employees have the IT tools necessary to fulfill the mission of protecting public health.

As CIO, Ms. Stevens leads the FSIS efforts in protecting the integrity of data and information. In 2012, Ms. Stevens received the U.S. Government Information Security Leadership Award for leadership of FSIS accomplishments in cyber security process and policy improvements.

Previously, Ms. Stevens was the Director of the FSIS Web Services Staff from 2004 to 2006 and was the Director of the Management Controls Technology Staff from 2006 until April 2007. She began her career at USDA in 1991 as a writer/editor for the Economic Management Service (now part of the Economic Research Service). In 1998, she became the web manager for the Risk Management Agency (RMA). At RMA, she also served as the acting Public Affairs Director. Ms. Stevens is a graduate of George Mason University, where she earned a Bachelor of Arts in English with a concentration in Communications in 1991.

Terri Nintemann  
Assistant Administrator, Office of Data Integration and Food Protection (ODIFP)  
202-690-6486, Terri.Nintemann@fsis.usda.gov

Ms. Terri Nintemann was appointed as Assistant Administrator of the Office of Data Integration and Food Protection (ODIFP) in the Food Safety and Inspection Service (FSIS) in June 2011, having served as Acting Assistant Administrator since September 2010. Ms. Nintemann leads the collection, analysis, and integration of Agency data across program areas. She also oversees the development and implementation of procedures to prepare for, respond to, and recover from food emergencies. Additionally, she is responsible for oversight of the agency’s food defense activities.

Under her leadership, FSIS has taken steps to increase data availability and transparency. She led the development of annual sampling plans, started for Fiscal Year 2012, which provide a comprehensive summary of the agency’s sampling activities. Prior to the annual sampling plans, she led an agency wide effort to document the history of FSIS sampling programs, which was released in 2011. Her office has also re-implemented the public health regulations decision criterion, one of the key criteria to use inspection findings to inform agency decision making. Under Ms. Nintemann’s leadership, ODIFP also led a broad review of the agency’s microbiological sampling programs and initiated efforts to better design those programs to estimate prevalence. Finally, she has led the agency’s reporting through Public Health Information System with reports now available for Federal, state and industry users. She serves as the lead for FSIS Strategic Goal 4: Strengthen Collaboration among Internal and External Stakeholders to Prevent Foodborne Illness.
Ms. Nintemann is the chair of the FSIS Enterprise Steering Board, which leads Agency reviews of or implementation of new initiatives that impact multiple program areas. She is also a tri-lead, along with two other executives, of the FSIS Data Coordination Committee, which coordinates Agency data activities and provides feedback on data analysis within FSIS. Ms. Nintemann is the FSIS representative to the USDA Security Council, charged with improving coordination of security activities—physical and information—within the Department, and she also represents FSIS on the Federal Border Interagency Executive Council, which is focused on interagency collaboration regarding imports. Additionally, she serves on the Secretary’s Executive Resources Board as a FSIS mission area representative.

A lifelong agricultural enthusiast and Minnesota native, Ms. Nintemann joined FSIS in 2003 as the Deputy Assistant Administrator of the Office of Public Affairs, Education, and Outreach. In 2006, she was named Assistant Administrator of the office, now known as the Office of Public Affairs and Consumer Education. Prior to joining USDA, Ms. Nintemann was a professional staff member and legislative director for the Senate Committee on Agriculture, Nutrition, and Forestry from 1992 to 2003. She served as a legislative director for Congressman Dave Camp from 1991 to 1992. From 1986 to 1991 she was a staff member for Senator Rudy Boschwitz. Ms. Nintemann’s passion for public service is rooted in her participation in FFA and 4-H as a young adult. She graduated from the University of Minnesota in 1986 with a Bachelor of Science degree in Animal Science and a minor in Ag Economics.

William “Bill” Smith
Assistant Administrator (AA), Office of Field Operations (OFO)
202-720-8803, William.Smith@fsis.usda.gov

Mr. William C. “Bill” Smith was named the Assistant Administrator for the Office of Field Operations (OFO) in the Food Safety and Inspection Service (FSIS) at USDA in July of 2014. He previously served as AA for OFO and is now beginning his second assignment leading this program area. In this role, he is responsible for ensuring that food safety inspection aligns with existing and emerging risks to minimize existing and emerging food safety hazards. He also oversees animal welfare activities conducted every day by nearly 7,800 employees in nearly 6,400 meat, poultry, and processed egg, and import facilities.

The Assistant Administrator for OFO focuses on consistent and standardized application of food safety policies by the field employees in the 10 district offices under his purview and places a particular emphasis on providing field inspectors with adequate training so that they can correctly interpret the laws that they are charged with implementing.

Prior to his current role in OFO, Mr. Smith was the Assistant Administrator for the Office of Investigation, Enforcement and Audit (OIEA) where he managed the Agency’s investigation and enforcement resources, State and foreign audit programs, and litigation functions to protect public health and respond to food safety and food defense issues associated with the handling, sale, and distribution of meat, poultry, and processed egg products in-commerce. His staff of 156 investigators worked to ensure compliance at over 150,000 facilities in commerce.
Mr. Smith has 38 years of experience in inspection and enforcement of food safety and other consumer protections, from working as an in-plant inspector to positions in FSIS headquarters. He managed the launch of the Hazard Analysis and Critical Control Point (HACCP) program in the late 1990s. The rule clarified the respective roles of government and industry in food safety efforts. The HACCP program has been a critical factor in the overall decline of bacterial foodborne illnesses since 1996.

Mr. Smith graduated from Kansas State University in 1974 with a degree in Biological Science.

**Michael Watts**  
**Assistant Administrator, Office of Outreach, Employee Education and Training (OOEET)**  
202-205-0194, Michael.Watts@fsis.usda.gov

Michael Watts joined the U.S. Department of Agriculture in May 2003 and has been a Food Safety and Inspection Service (FSIS) Assistant Administrator for the Office of Outreach, Employee Education and Training (OOEET) since October 2012. His current role complements a career spent cultivating his expertise in civil rights, diversity management and training development and delivery. As Assistant Administrator of OOEET, his mission is to provide executive leadership and oversight for training and developing the FSIS workforce. Mr. Watts is responsible for ensuring that employees have the critical skills and training they need to support the Agency mission and to be successful. In addition, he focuses on identifying and reducing skill gaps in the workforce to ensure that the Agency has a talented cadre of professionals who are prepared to protect the American public from foodborne illnesses.

From May 2007 to October 2012, Mr. Watts led civil rights initiatives in the Department from two roles within the Office of the Assistant Secretary for Civil Rights. He held the positions of Civil Rights Director for the Department and Director of the Office of Compliance, Policy, Training and Cultural Transformation.

Before joining USDA, Mr. Watts was the State of Minnesota’s Assistant Commissioner of Diversity and Equal Opportunity, an executive position in the Department of Employee Relations, a cabinet-level office that reported to the Governor. Mr. Watts began his career in the military, where he developed a solid foundation of experience in training management. After leaving the military and completing law school, he worked as Equal Employment Opportunity Manager for the Department of Veterans Affairs – Birmingham VA Medical Center in Birmingham, Alabama.

Mr. Watts has a keen interest in mediation and dispute resolution, which led him to earn his Juris Doctorate at the Cumberland School of Law at Samford University in Birmingham, Alabama. Watts received his Masters’ Degree at Webster University in St. Louis, Missouri in Administration of Justice and Human Relations. He is a graduate of the University of Alabama, where he earned a Bachelor’s degree in Political Science and Criminal Justice. He is also a graduate of the US Army Command and General Staff College, the Marine Corps Command and Staff College, and the Harvard Kennedy School of Government Senior Managers in Government Course.
Carol Blake  
Assistant Administrator, Office of Public Affairs and Consumer Education (OPACE)  
202-720-3884, Carol.Blake@fsis.usda.gov

Carol Blake was appointed as the Assistant Administrator for the Office of Public Affairs and Consumer Education (OPACE) in the Food Safety and Inspection Service (FSIS) in November of 2011. As the leader for OPACE, Ms. Blake manages efforts to ensure that all segments of the farm-to-table chain receive valuable food safety information. Her extensive communications experience with FSIS and USDA provides a solid foundation to lead OPACE initiatives.

As Assistant Administrator of OPACE, Ms. Blake oversees the communication of public health messages to consumers and develops strategies to gain appropriate attention from news and other media outlets. During her time with USDA, she has seen a wide range of technology advancements that have helped raise the profile of FSIS in the ever-evolving world of 21st century communications. Under her leadership, FSIS has modernized its website into a mobile friendly public health tool for consumers and led innovative outreach using social media. In her current role, she leads efforts that directly link to FSIS’ strategic goal to increase the number of consumers who follow safe food handling practices through education and awareness campaigns. She ensures that the public can receive critical food safety information through a variety of social media, leads the Agency in its development of apps and consumer tools, and pursues partnerships with government and non-government organizations to obtain consumer data that ultimately shape additional consumer education opportunities. Ms. Blake is committed to being fiscally responsible in her quest to advance consumer education and awareness.

In August 2008, Ms. Blake was named the Director of OPACE's Congressional and Public Affairs Office. Since joining FSIS in 1999, she held positions that include press officer, public affairs specialist, and deputy director for correspondence and FOIA. Prior to joining FSIS, Ms. Blake handled media and communication initiatives for the Agricultural Marketing Service and USDA's Office of Communications.

Though Ms. Blake didn’t set out determined for a career at USDA, she feels a strong connection with the Department, as her grandfather was the head of what is now USDA’s Office of Budget and Program Analysis. Ms. Blake’s earliest formal experience at USDA entailed working as a clerk with the Forest Service during college breaks. She graduated from Randolph-Macon College with a degree in English.

Peter Bridgeman  
Acting Assistant Administrator, Office of Management (OM)  
202-720-4425, Peter.Bridgeman@fsis.usda.gov

Peter Bridgeman was recently appointed as the Acting Assistant Administrator of the Food Safety and Inspection Service’s (FSIS) Office of Management (OM). In this position, he leads OM in improving the overall management and effectiveness of FSIS programs by providing a full range of administrative and support services, to include: Human Resources Management
and Operations, Employee and Labor Relations, Environmental Safety, Health and Wellness, 
Procurement, Property, Fleet, Security and Records Management, Printing, Graphics, 
Distribution, and Copier Management Services, and Organizational “Green” Initiative.

Mr. Bridgeman has extensive leadership experience with FSIS, having previously served in 
executive leadership positions within the Office of Investigation, Enforcement and Audits and 
the Office of the Chief Financial Officer. Additionally, he has held leadership positions with the 
Office of Public Health Science and the Office of Field Operations during his 31 year career with 
FSIS.

A native of Pittsburgh, PA, Mr. Bridgeman served for four years in the U.S. Navy, successfully 
completing the Naval Nuclear Power School program, where he studied Nuclear Physics and 
Reactor Principles. Pete also studied at Rutgers University and Edison State College in New 
Jersey, where he majored in Business Administration and minored in Journalism.

Carl A. Mayes 
Assistant Administrator, Office of Investigation, Enforcement and Audit (OIEA) 
202-720-0294, Carl.Mayes@fsis.usda.gov

Mr. Carl A. Mayes was appointed Assistant Administrator (AA) for the Office of Investigation, 
Enforcement and Audit (OIEA) in the Food Safety and Inspection Service (FSIS) at USDA in 
February 2015. He leads the Agency’s surveillance and investigation activities for incidents of 
foodborne illness outbreaks, recalls, natural disasters and intentional contamination. Mr. Mayes 
also oversees state and foreign audit programs and enforcement and litigation functions. 
Mr. Mayes joined FSIS in August 2009 and was named the Deputy, Chief Information Officer 
for the Office of the Chief Information Officer (OCIO) in 2012. As OCIO’s Deputy Chief 
Information Officer he was responsible for implementing OCIO’s technology plan for 
modernizing the Agency’s applications and infrastructure. In October 2014, he was appointed to 
serve as OIEA’s Acting Assistant Administrator.

Prior to joining FSIS, Mr. Mayes was with the Defense Intelligence Agency (DIA) where he 
served as the Mission Application Division Chief for Counterintelligence (CI) and Human 
Intelligence (HUMINT) software applications overseeing the daily operations of over 200 
personnel. Mr. Mayes entered Federal service in 2006 with the Counterintelligence Field 
Activity (CIFA) where he worked closely within the United States Intelligence Community (I.C.) 
with such agencies as the Air Force Office of Special Investigations (AF OSI), Naval Criminal 
Investigative Service (NCIS), the U.S. Army Intelligence and Security Command (INSCOM) 
and other I.C. members to further U.S. national objectives.

Previously, Mr. Mayes spent 21 years in the United States Air Force (USAF) where he served as 
the Deputy Inspector General for the 480th Intelligence Wing (IW) at Langley Air Force Base 
(LAFB). While serving as USAF’s Deputy Inspector General he managed Fraud, Waste & 
Abuse complaints and audits, as well as compliance and quality assurance inspections for units 
actively involved in wartime and contingency operations worldwide. Before moving into this 
position, Mr. Mayes was the Squadron Superintendent for the 27th Intelligence Support
Squadron at LAFB, where he ensured personnel were trained and available to meet the organization’s mission of processing near-real-time intelligence, and disseminating Intelligence, Surveillance and Reconnaissance information worldwide. During his time with the USAF, Mr. Mayes also served as the Chief of Database Services, 82nd Computer Support Squadron, LAFB, where he led a team managing and maintaining a multi-million dollar U.S. State Department payroll system. Mr. Mayes was stationed at different bases stateside and overseas during his time with USAF and spent his first 12 years with the Security Forces performing law enforcement and security duties.

Mr. Mayes graduated from Georgia College & State University in Milledgeville, Georgia with a Masters of Business Administration and received a Masters of Management Information Systems from the University of Illinois at Springfield. He holds a dual Bachelor of Science degree in Computer Information Systems/Management and Accounting/Management from Park University, Parkville, MO.

Dr. David Goldman
Assistant Administrator, Office of Public Health Science (OPHS)
202-720-2644, David.Goldman@fsis.usda.gov

Dr. David Goldman was appointed in November 2004 as Assistant Administrator for the Office of Public Health Science (OPHS) at the Food Safety and Inspection Service (FSIS) and serves as the Acting Chief Medical Officer for the Department. He was formerly Director of the Human Health Sciences Division at FSIS, joining the agency in 2002. He is a family practice and preventive medicine/public health physician, and a member of the Commissioned Corps of the U.S. Public Health Service (USPHS).

Dr. Goldman oversees the OPHS, which provides expert scientific analysis, advice, and recommendations on all matters involving public health and science that are of concern to FSIS. During his time in OPHS, Dr. Goldman has led the creation and implementation of a comprehensive scientific agenda that focuses on the Agency’s most significant needs, including updating the National Residue Program, analyzing environmental contaminants, developing a plan to meet the Healthy People 2020 goals for Salmonella illness reduction, and communicating scientific measures to mitigate the risk of Listeria contamination at retail. He is the Agency’s point person during foodborne illness outbreaks, collaborating and coordinating with other public health leaders throughout government to support a swift and effective response. The FSIS labs are also under his purview.

Among his other duties, Dr. Goldman is a co-lead for USDA’s participation in the One Health initiative, a worldwide strategy for expanding interdisciplinary collaborations and communications in all aspects of diseases for humans, animals and the environment. One Health seeks to advance health care for the 21st century and beyond by accelerating biomedical research discoveries, enhancing public health efficacy, and expeditiously expanding the scientific knowledge base for zoonoses.
In August of 2013, the USPHS named Dr. Goldman as its new Chief Professional Officer for the medical category. In this capacity, Dr. Goldman serves as the primary point of contact between the Office of the Surgeon General and the 800+ physicians in the PHS. Since 2005, Dr. Goldman has served as the Surgeon General’s Policy Advisory Committee representative for USDA to represent any needs of FSIS to HHS with respect to 22 officers detailed here.

Dr. Goldman spent 10 years in the US Army Medical Corps in both family practice and preventive medicine. He then spent 3 ½ years at the Virginia Department of Health, first as a District Health Director, then briefly as the Deputy State Epidemiologist, before joining the Public Health Service. He is board-certified in both Family Medicine and General Preventive Medicine/Public Health and continues to see patients 1 day per month at a free clinic in Virginia. He received his Bachelor of Arts from the University of Virginia in 1979, a Doctor of Medicine degree from the University of Virginia in 1988, and his Master of Public Health in Epidemiology from the University of Washington in 1996.

**Dan Engeljohn, PhD**  
**Assistant Administrator, Office of Policy and Program Development**  
202-205-0495, Daniel.Engeljohn@fsis.usda.gov

Dan Engeljohn, PhD has been with the U.S. Department of Agriculture since 1979 and was named Assistant Administrator for the Office of Policy and Program Development (OPPD) in the Food Safety and Inspection Service (FSIS) at USDA in July of 2014. In this position, he leads the development of Agency policies and the development and publication of numerous FSIS policy documents, including regulations, instructions to the field, and guidance to industry.

Dr. Engeljohn directs staff that conducts economic analyses for regulations and Agency policy; reviews and approves labels for meat, poultry and egg products; and reviews and approves the use of new technologies and ingredients in meat, poultry, and egg products. His responsibilities also include development of Agency policy and instructions to the field concerning import and export of meat, poultry, and egg products.

Prior to his current position, he served as Assistant Administrator for the Office of Field Operations and was responsible for ensuring that the risk management policies for food safety and animal welfare were effectively conducted by nearly 7,800 employees in nearly 6,400 meat, poultry, and processed egg, and import facilities. Dr. Engeljohn also previously served as the Assistant Administrator for the OPPD. In his 26 years with OPPD, he developed food safety policies and procedures to ensure that FSIS fulfills its mission. In his 34 years of experience as a government regulator of the food industry, Dr. Engeljohn has served as a scientific spokesperson on food safety strategies, including food irradiation and pathogen control procedures.

Dr. Engeljohn earned a PhD in Nutrition, at Howard University, Washington, DC, specializing in Human Experimental Nutrition, and has taught an introductory nutrition course at the university for 17 years. He received his Bachelor’s and Masters’ degrees at the University of Illinois, Champaign-Urbana.

- Food Safety and Inspection Service employs a workforce of over 9,700 employees of which the following are full-time and part-time
  - Full-time: 9,341 employees
  - Part-time/Other: 518 employees
  Among these people are our Frontline workforce that works in approximately 6,389 federally regulated establishments, 3 FSIS laboratories and 127 import establishments at ports of entry.
- FSIS employs 354 Other than permanent, and 150 Temporary and Indefinite workers to fill in for employees in their absence.
- Of our total workforce, 35% are eligible to retire within the next year.
- 6,620 members of our workforce are Bargaining Unit Employees.
- Our headquarters is located in Washington, D.C. which houses 7% of our workforce.
- FSIS has 10 District offices, 3 Labs and 4 Regional offices.
- Approximately 90% of our Employees are Frontline workers who work directly on the Food Safety Mission by verifying that the processing of meat, poultry, and liquid egg products comply with statutory requirements. The remaining employees provide vital mission critical support service roles in ensuring the safety of America’s food supply and public health.
II. Policies and Regulations

Statutory Authorities

FSIS is responsible for administering the Federal Meat Inspection Act (FMIA) (21 U.S.C. 601-695), the Poultry Production Inspection Act (PPIA) (21 U.S.C. 451-470), the Egg Products Inspection Act (EPIA) (21 U.S.C. 1031-1056), the Humane Methods of Slaughter Act of 1978 (HMSA) (7 U.S.C. 1901 – 1906), and select sections of the Agricultural Marketing Act of 1946 (AMA) (7 U.S.C. 1622 and 1624). The FMIA and the PPIA ensure meat and poultry products distributed in commerce for human consumption are safe, wholesome, and correctly labeled through inspection and regulation of these products. Under the EPIA, FSIS ensures that liquid, frozen, and dried egg products distributed in commerce for human consumption are safe, wholesome, and correctly labeled. The HMSA requires that the handling and slaughtering of livestock be carried out only by humane methods. FSIS also operates a voluntary fee-for-service inspection program for exotic animals, rabbits, and non-amenable poultry, along with several other voluntary services, under the AMA.

Important Policies and Regulations

FSIS publishes on average four final rules per year and three proposed rules per year. Approximately 50% of FSIS regulations are designated significant or economically significant by the Office of Information and Regulatory Affairs.

Policies Finalized within the Last Year

- Descriptive Designation for Needle- or Blade-Tenderized (Mechanically Tenderized) Beef Products (Final Rule Published May 18, 2015; Effective Date: May 17, 2016)
- Eligibility of Lithuania to Export Meat and Meat Products to the United States (Final Rule Published August 31, 2015; Effective Date: October 30, 2015)
- Mandatory Inspection of Fish of the Order Siluriformes and Products Derived from Such Fish (Final Rule Published December 2, 2015)
- Records to be Kept by Official Establishments and Retail Stores that Grind Raw Beef Products (Final Rule Published December 21, 2015; Compliance Date: October 1, 2016)
- New Performance Standards for Salmonella and Campylobacter in Not-Ready-to-Eat Comminuted Chicken and Turkey Products and Raw Chicken Parts and Changes to Related Agency Verification Procedures: Response to Comments and Announcement of Implementation Schedule (Notice Published February 11, 2016)
- Classes of Poultry (Final Rule Published April 13, 2016; Effective Date: January 1, 2018)
United States Department of Agriculture
2016 Presidential Transition
Food Safety and Inspection Service (FSIS)

- Electronic Export Application and Certification Charge; Flexibility in the Requirements for Export Inspection Marks, Devices, and Certificates; Egg Products Export Certification (Final Rule Published June 29, 2016; Effective Date: August 29, 2016; Applicability Date for certain provisions: June 29, 2017)

- Eligibility of Namibia to Export Meat Products to the United States (Final Rule Published July 13, 2016; Effective Date: September 12, 2016)

- Requirements for the Disposition of Non-Ambulatory Disabled Veal Calves (Final Rule Published July 18, 2016; Effective Date: September 16, 2016)

- Statements That Bioengineered or Genetically Modified (GM) Ingredients or Animal Feed Were Not Used in the Production of Meat, Poultry, or Egg Products (Notice and Guidance Document Published August 24, 2016; Comment Period Ends October 24, 2016)

Proposed Rules Issued within the Last Year

- Elimination of Trichinae Control Regulations and Consolidation of Thermally Processed, Commercially Sterile Regulations (Proposed Rule Published March 28, 2016)

- Eligibility of Honduras to Export Poultry Products to the United States (Proposed Rule Published April 13, 2016)

- Eligibility of the Republic of Poland to Export Poultry Products to the United States (Proposed Rule Published April 20, 2016)

Rules at OMB

- Revision of the Nutrition Facts Panels for Meat and Poultry Products and Updating Certain Reference Amounts Customarily Consumed (Currently in OMB Clearance)
Overview of the Policy/Regulation Review Process

FSIS issues policies and regulations to lower the incidence of pathogens that cause foodborne illness and limit the occurrence of outbreaks in our regulated products. Millions of Americans and consumers around the world depend on the work of FSIS to keep them safe. As a public health agency, FSIS uses science to achieve the statutory mission laid out for us by Congress. Science drives our policy, which drives our inspection that ensures that we are prepared to address existing and new food safety threats.

FSIS prevents foodborne illness by:

- Issuing instructions to its personnel performing food safety inspection activities at more than 6,000 establishments nationwide through FSIS Directives and Notices, and ensuring that inspection aligns with existing and emerging risks;

- Maximizing international compliance with food safety policies by issuing regulations that address foreign countries’ equivalence to the U.S. inspection system;

- Issuing regulations to address the causes of outbreaks and improve traceback procedures when there is an outbreak;

- Issuing regulations and policies to address new and evolving risks by using science to understand foodborne illness and emerging trends; and

- Issuing regulations to modernize inspection systems.

FSIS also issues policies and regulations to advance other important goals, including:

- Ensuring that animals are handled humanely at slaughter; and

- Ensuring that regulated products are properly packaged and labeled so consumers have access to important information about the product.

Finally, FSIS issues policies and regulations when legislation requires it or when FSIS grants a petition for rulemaking (e.g., from a stakeholder, consumer group, or individual).

III. Congressional Relations and Issues

Overview
The following issues have been issues of importance to Congress and/or issues that have been the subject of a high volume of congressional correspondence and inquiries.

• Catfish/Equivalency:

As mandated in the 2008 and 2014 farm bills, the U.S. Department of Agriculture’s (USDA) Food Safety and Inspection Service (FSIS) completed and published the final rule “Mandatory Inspection of Fish of the Order Siluriformes and Products Derived from Such Fish” (80 FR 75590), which applies to all fish in the order of Siluriformes and products derived from such fish, on December 2, 2015. The final rule became effective on March 1, 2016, and includes an 18-month transition period that ends on September 1, 2017. FSIS will fully enforce the regulatory requirements described in the final rule on September 1, 2017.

The 18-month transition period also applies to imported Siluriformes fish and fish products. Shipments of imported products are being selected for reinspection, and therefore sampling, based on specific targeting criteria including past compliance history provided by FDA. Sample analyses include: speciation, residues (pesticide, drugs, and dyes) and Salmonella. A complete list of contaminants can be found at: http://www.fsis.usda.gov/wps/portal/fsis/topics/science/laboratories-and-procedures/guidebooks-and-methods/chemistry-laboratory-guidebook. When any imported or domestic Siluriformes products fail testing requirements, FSIS has taken action, including rejecting shipments and issuing a recall.

In May 2016, the Senate passed a resolution of disapproval of the FSIS Siluriformes Inspection rule. The resolution is currently awaiting House action. Should the resolution be enacted, jurisdiction of Siluriformes inspection will revert back to FDA.

• Oversight Issues:

The Food Safety and Inspection Service, as the Agency responsible for ensuring that the nation's commercial supply of meat, poultry, and egg products is safe, wholesome, and correctly labeled and packaged, frequently interacts with plants and related businesses in the course of taking regulatory actions. For slaughter plants and processing facilities, this can mean taking regulatory control actions, withholding the marks of inspection, and or suspension actions as defined under Rules of Practice. Throughout any course of regulatory action being taken by FSIS, the affected plant or business can work with FSIS frontline supervisors, the District Office, or the Small Plant Help Desk in order to take the steps necessary to regain compliance. In some cases, if an individual or plant does not agree with FSIS procedure or protocol for a specific action, they will contact their federal representatives who are then in contact with FSIS.
• Small Plant Access:

The ability of small plants to connect with and form relationships with federal regulating entities has been discussed and/or questioned in recent congressional hearings. FSIS strongly encourages that plant or business management to reach out to the District Office, the local Front Line Supervisor, or the Small Plant Help Desk in order to take the steps necessary to understand and comply with the FSIS regulations. It is a high priority of FSIS to ensure that smaller plants and processing facilities are given every opportunity to qualify for the FSIS Grant of Inspection.

• Labeling:

FSIS is the Agency responsible for ensuring the truthful and accurate labeling of the nation's commercial supply of meat, poultry, and egg products. In the course of managing this task, FSIS develops and provides labeling guidance, policies, and administers programs to protect consumers from misbranded and economically adulterated meat, poultry, and egg products. The FSIS Labeling Staff in the Office of Policy and Program Development (OPPD) works to ensure that all labels are truthful and not misleading. Congress is increasingly paying attention to these issues given the rise in consumer attention to genetically engineered products, organic products, and the use of certain terms and raising claims on labels, such ‘natural’, ‘grass fed,’ free range,’ and ‘humanely raised’. In addition, FSIS reviews and approves all labels for packaging, which can gain congressional attention if the individual or producer applying for the label wants particular attention paid to his/her product.

• Horse Slaughter:

In 2007, the U.S. Court of Appeals, Fifth Circuit ruling effectively closed any U.S. plants slaughtering horses for human food consumption. The FY 2008, FY 2009, and FY 2010 appropriations acts prohibit the use of funds to pay the salaries or expenses of personnel to inspect horses under the Federal Meat Inspection Act (FMIA) and the Humane Methods of Slaughter Act (HMSA). This prohibition was first passed in the 2006 appropriations act and was automatically renewed via the 2007 continuing resolution. Similar to previous funding bills, FSIS is barred under the FY 2016 Consolidated Appropriations Act from spending funds to perform ante-mortem inspection of horses at slaughter intended for human consumption. Under the funding ban contained in the fiscal year 2016 omnibus appropriations legislation, FSIS is also not permitted to operate a fee for service program for the inspection of horses for human consumption. State inspection programs would likewise be barred from using Federal funds to perform ante-mortem inspection, which likely would effectively mean that States also could not institute ante-mortem inspection of equines intended for human consumption. No horse slaughter establishment can operate legally without the presence of FSIS inspection program personnel. The FMIA requires inspection of amenable species intended for human consumption, including horses. Meat from amenable species that have not been inspected cannot be shipped or sold for human consumption. There is no equivalency process for the inspection of horse meat slaughtered for human
consumption, since the inspection is not allowed under current law; therefore imports of horse meat for human consumption is not permissible.

IV. Internal and External Stakeholders

Important relationships with other Federal Departments or organizations:

- U.S. Department of Agriculture (USDA)
  - Animal and Plant Health Inspection Service (APHIS)
  - Grain Inspection, Packer, and Stockyards Administration (GIPSA)
  - Office of Budget and Program Analysis (OBPA)
  - Agricultural Research Service (ARS)
  - National Agricultural Statistics Service (NASS)
  - Office of the General Counsel (OGC)
  - Agricultural Marketing Service (AMS)
  - Foreign Agricultural Service (FAS)
  - Office of the Chief Economist (OCE)
  - Office of the Chief Information Officer (OCIO)
  - Food and Nutrition Service (FNS)
  - National Institute of Food and Agriculture (NIFA)
- Centers for Disease Control and Prevention (CDC)
- Food and Drug Administration (FDA)
- Customs and Border Protection (CBP)
- U.S. Trade Representative (USTR)
- Foreign Governments
- State Departments of Health
- State Departments of Agriculture
- Government Accountability Office (GAO)
- Office of Management and Budget (OMB)
- Occupational Safety and Health Administration (OSHA)
- Department of Homeland Security (DHS)

Stakeholder Group Overview

- Academia and Academic Professional Organizations (AAPOs)
- American Academy of Family Physicians
- American Veterinary Medical Association (AVMA)
- Consumer Interest Groups
- Council to Improve Foodborne Outbreak Response (CIFOR)
- FSIS-inspected establishments/industry representatives
- National Advisory Committee on Meat and Poultry Inspection (NACMPI)
- National Advisory Committee on Microbiological Criteria for Foods (NACMCF)
- National Joint Council (NJC) of Food Inspection Locals, American Federation of Government Employees (AFGE)
- Partnership for Food Safety Education
- State Departments of Health officials
State Meat and Poultry Inspection Directors and Inspection Personnel (for 27 state cooperative MPI programs)

Recent Engagements with Stakeholder Groups

- FSIS holds monthly consumer and stakeholder group meetings.
- Beginning quarterly meetings with humane handling stakeholders.
- FSIS holds meetings with small and very small slaughter processing establishments.
- All recent stakeholder and consumer meetings can be found: http://www.fsis.usda.gov/wps/portal/fsis/newsroom/meetings/officials-calendar-of-meetings/officials-calendar-of-meetings

V. Top Issues

Hot Topics

Implementation of Mandatory Inspection of Siluriformes
Provisions of the 2008 and 2014 Farm Bills amended the Federal Meat Inspection Act, mandating FSIS inspection of Siluriformes fish. On December 2, 2015, FSIS published a final rule requiring inspection of fish of the Order Siluriformes and products derived from such fish. The final rule became effective on March 1, 2017, switching oversight of these products from the Food and Drug Administration to FSIS. FSIS will continue to implement the mandatory inspection of fish of the order Siluriformes and products derived from such fish. FSIS is currently in the 18-month transitional period (transition to complete implementation) where it is exercising broad enforcement discretion. On September 1, 2017, FSIS will begin fully enforcing the regulatory requirements. As stated in the final rule, if a foreign country would like to remain eligible to export Siluriformes fish and fish products to the U.S. on and after September 1, 2017, it must make a written request to initiate the equivalence process and provide a complete equivalence packet.

Sampling Programs and Pathogen Reduction Performance Standards
Salmonella bacteria are among the most frequent causes of foodborne illness. These bacteria can reside in the intestinal tract of food animals. Salmonella contamination of raw products occurs during slaughter operations, as well as during the live-animal rearing process (e.g., on-farm contamination can coat the exterior of the animal and remain attached to the skin). Currently, events that cause contamination of raw carcasses cannot be eliminated through the commercial production and slaughter practices employed in the United States. Contamination can be minimized, however, with the use of proper sanitary dressing procedures and by the application of antimicrobial interventions during slaughter and thereafter during fabrication of the carcasses. FSIS uses the pathogen reduction performance standards to ensure that eligible establishments are consistently controlling or reducing harmful bacteria on raw meat and poultry products. In February 2016, FSIS announced new performance standards for Salmonella and Campylobacter in not ready-to-eat comminuted chicken and turkey products and raw chicken parts and changes to FSIS’s verification sampling program. FSIS is considering developing a new Salmonella performance standard for ground beef product.

FSIS also maintains many Shiga toxin-producing Escherichia coli (STEC) sampling projects for domestic establishments, imported products, and raw ground beef in retail. FSIS is considering beginning analyzing raw ground beef, raw ground beef components, and bench (purchased) trimmings for non-O157 STEC.

China Equivalency
The People’s Republic of China (PRC) is currently eligible to export processed poultry products to the United States if the products are derived from poultry slaughtered in the United States or in other countries eligible to slaughter and export poultry to the United States. The PRC is seeking an equivalence determination from FSIS to be able to export to the United States poultry...
products from birds slaughtered in the PRC. FSIS has reviewed the PRC’s laws, regulations, and poultry slaughter inspection system as implemented. Upon final determination of China’s equivalence with the recently implemented Modernization of Poultry Slaughter Inspection Final Rule, FSIS will move forward with the rulemaking process to propose to list China as eligible to export to the U.S. poultry product derived from poultry slaughtered in China. Should a rule become final, slaughtered poultry, or parts or other products thereof, processed in certified PRC establishments, would be eligible for export to the United States.

Local and Regional Food Systems
FSIS recognizes the growth of local and regional food systems, and aims to support producers engaged in local and regional markets. We value the collaboration with the Know Your Farmer, Know Your Food (KYF2) team to better serve new and beginning farmers and ranchers, many of whom get their start in farmers markets, Community Supported Agriculture, and other direct markets in their local communities. We also know that as local and regional food systems mature, the demand for local food is expanding beyond direct markets and into major grocery stores, restaurants, and schools, often through the work of food hubs and other intermediaries. Most recently, FSIS has partnered with KYF2 partners, including the Food and Nutrition Service (FNS) and Rural Development (RD), to develop clear, simple guidance documents on local meat, poultry, and eggs for school buyers, food hubs, and farmers markets. We look forward to continuing work with Know Your Farmer, Know Your Food (KYF2) to improve programs for these producers, make sure we are reaching the right audiences, and offer a more cohesive, service-oriented “One USDA” to our customers.

FSIS Priorities for Local and Regional Food Systems:

• Host “New Plant 101” webinar geared towards potential new processors with limited regulatory knowledge. The webinar will outline the basics of FSIS regulations to help remove technical barriers to new plant start-up.
• Coordinate with KYF2 on additional outreach opportunities to local food community and continue to engage with other USDA agencies to maintain awareness of other USDA programs that could provide assistance or opportunities to meat/poultry processors.
• Continue current efforts (events, website, etc.) to promote Small Plant Help Desk and assist local meat and poultry stakeholders.

Use of the Voluntary Claim “Natural” on Labeling of Meat and Poultry Products
FSIS currently has policy guidance that states the criteria for when “natural” may be used in the labeling of meat and poultry products. However, there has been much controversy over which products qualify to be labeled as “natural.” FSIS was petitioned by Hormel in 2006 to initiate rulemaking to codify the definition of the voluntary claim “natural” and clarify the circumstances under which the claim may be used in the labeling of meat and poultry products. In 2006, FSIS also received over 12,000 comments in response to a public meeting and a Federal Register Notice on the “natural” claim. In 2009, FSIS received over 7,500 comments in response to an advanced notice of proposed rulemaking asking for comments on the seven major issues raised in the 2006 proceedings. In 2014, Consumer Reports’ Food Safety and Sustainability Center and various other consumer and animal welfare advocacy organizations petitioned FSIS to issue an
interpretive rule to prohibit use of the claim “natural” in the labeling of meat and poultry products. The Agency will seek to clarify and resolve issues surrounding use of the “natural” claim in the labeling of meat and poultry products.

Declare Antibiotic-Resistant (ABR) Strains of Salmonella Adulterants
The Center for Science in the Public Interest petitioned FSIS in 2014 requesting that FSIS issue an interpretive rule to declare ABR strains of Salmonella Hadar, Salmonella Heidelberg, Salmonella Newport, and Salmonella Typhimurium to be adulterants in all raw meat and raw poultry products. There is much media and public interest in ABR pathogens. A few members of Congress are also interested.

Genetically Modified Organism (“GMO”) Labeling
FSIS will evaluate all labels with GMO or non-GMO claims. Examples of acceptable negative claims related to the nonuse of GMO feed or ingredients for single-ingredient products include, “Pasture raised beef fed a vegetarian diet with no bioengineered ingredients,” “Chicken raised on a diet containing no genetically engineered ingredients,” or “Derived from beef fed no GMO feed.” Examples of acceptable non-GMO claims for multi-ingredient products include, “Contains No GMO ingredients,” “No genetically modified ingredients,” “Ingredients used are not bioengineered,” and “No genetically engineered ingredients through the use of modern biotechnology.” FSIS recently published guidelines for establishments that wish to use these types of claims on the labeling of meat, poultry and egg products. Because FSIS does not have the ability to independently verify negative claims for ingredients or feed, FSIS has required establishments that make these claims to comply with standards established by a third-party certifying organization. FSIS currently requires that the third-party certifying organization’s standards be publicly available on a web site and the label or labeling disclose the web site address of the third-party certifying organization. For products that qualify for an “organic” claim under the NOP, establishments are not required to provide FSIS with additional documentation for approval of negative claims. FSIS is also collaborating with AMS on the use of these claims with respect to the recently enacted Public Law 114-216 instructing AMS to publish regulations that will provide criteria for mandatory labeling of GMO containing ingredients.

FSIS and AMS Labeling Coordination
Both FSIS and Agricultural Marketing Service (AMS) have a role in the labeling of meat and poultry products. FSIS is responsible for reviewing all labeling claims made on these products and ensuring that they are truthful and not misleading. Through the Process Verified Program, AMS works with companies on a voluntary basis to verify certain marketing claims. Stakeholder interest in marketing claims, such as grass fed, humanely raised and natural, has increased in recent years and USDA has been criticized when AMS and FSIS have not been perfectly aligned on the meaning of certain claims. In response to stakeholder feedback and in an effort to ensure improved coordination between the agencies, FSIS and AMS are working together on standard operating procedures to ensure coordination and collaboration on labeling issues (for example, AMS consultation on a standard’s validity, and new labeling policies and regulations that would affect both agencies). In addition, FSIS is working with AMS to develop a plan to post the standards for labeling claims in an online “reading room,” in order to increase transparency and
reduce consumer confusion. Finally, the agencies are working together to determine the scope of potential umbrella rulemaking that would include a number of marketing claims, as well as stronger verification requirements.

Timeline

January 2017, the Agency is expecting to:
- Participate as a co-sponsor of the Partnership for Food Safety Education conference, which seeks to communicate and share how to change consumer behavior through education.

February 2017, the Agency is expecting to:
- Issue a proposed rule to define the conditions under which the voluntary claim “natural” may be used on the label or in the labeling of meat and poultry products.
- Issue a final rule to amend the Federal meat inspection regulations to eliminate the requirements for both ready-to-eat (RTE) and not-ready-to-eat (NTRE) pork and pork products to be treated to destroy trichina (Trichinella spiralis) because the regulations are inconsistent with the Hazard Analysis and Critical Control Point (HACCP) regulations, and these prescriptive regulations are no longer necessary. This final rule would also consolidate the regulations on thermally processed, commercially sterile meat and poultry products (i.e., canned food products containing meat and poultry).

March 2017, the Agency is expecting to:
- Work with Department of Defense to develop a Memorandum of Understanding (MOU) to formalize and strengthen collaboration on food safety and food defense issues in the U.S. and abroad.

April 2017, the Agency is expecting to:
- Issue a final rule to amend the poultry products inspection regulations to list Honduras as eligible to export poultry products to the United States.
- Issue a final rule to amend the poultry products inspection regulations to list Poland as eligible to export poultry products to the United States.
- Issue notice to the union of intent to bargain the Agency Labor Management Agreement.

May 2017, the Agency is expecting to:
- Issue a proposed rule to amend its labeling regulations to establish criteria for when meat products derived from calves can be called “veal.”
United States Department of Agriculture
2016 Presidential Transition
Food Safety and Inspection Service (FSIS)

- Continue the multi-year multi-agency (CDC, FDA, ARS, FSIS) initiative to enhance the level of detail when characterizing individual pathogen strains by conducting whole genome sequencing (WGS). The result will be improved speed and efficiency in the analysis and reporting of regulatory results which will allow for a higher level of accuracy when identifying and preventing foodborne illnesses and containing outbreaks.

July 2017, the Agency is expecting to:
- Implement an electronic export application and certification system, which will be a component of the Agency’s Public Health Information System (PHIS).

WHO WE ARE: OUR MISSION AREA

The mission of the Marketing and Regulatory Programs (MRP) is to facilitate and expand the domestic and international marketing of U.S. agricultural products, to help protect the agricultural sector from plant and animal health threats, and to ensure humane care and treatment of regulated animals. MRP agencies are active participants in setting national and international standards. MRP is composed of the Agricultural Marketing Service, the Animal and Plant Health Inspection Service, and the Grain Inspection, Packers, and Stockyards Administration.

WHO WE ARE: OUR WORKFORCE

- AMS – 2,074 permanent employees
- APHIS – 5,771 permanent employees, and 2,838 temporary employees
- GIPSA – 643 permanent employees

WHO WE SERVE: OUR CONSTITUENTS

MRP programs provide the basic infrastructure to improve agricultural market competitiveness for the overall benefit of consumers and producers of American agriculture. MRP efforts also ensure agricultural exports remains high – fiscal year 2015 was the third-highest year on record with $139.7 billion in farm exports.

KEY UPCOMING DECISIONS

- Establishment of a mandatory national bioengineered food disclosure standard; a study on consumer access to electronic disclosures must also be completed within one year.
- Whether APHIS should finalize new regulations under the Horse Protection Act to provide additional protections against soring?
- Whether APHIS should approve imports of Argentine lemons and EU apples/pears?
- Whether to proceed and how with a comprehensive revision of APHIS’ biotechnology regulations in light of scientific advances since they were established in 1987? How do we address diverse stakeholder interests in regulation of biotechnology?

BUDGET HIGHLIGHTS FY 2016

- AMS – total budget authority of $2.75 billion of which $723.7 million is non-federal marketing order assessments.
- APHIS – total budget authority of $1.36 billion. 15 percent is generated through Agricultural Quarantine Inspection User Fees.
- GIPSA – total budget authority of $98.0 million. 56 percent is generated through Inspection & Weighing Mandatory User Fees.
I. Organizational Overview

Organizational Chart

In addition, the Office of the Under Secretary includes one political position serving as Confidential Assistant to the Under Secretary. The office also includes two administrative support positions which are Program Analyst and Staff Assistant.

The MRP Mission Area, at full staff, composed of at minimum 7 full-time employees, with office space to support an additional 2 employees as needed (ie, as detailees to assist in special projects). Political appointments include: Under Secretary; Two Deputy Under Secretaries; Chief of Staff; and Confidential Assistant.

In addition to political appointees, there are two front-office career staff, with the titles of Program Analyst and Staff Assistant. In addition, MRP may bring in detailees from the agencies to assist in special priority projects.
Biographies for career staff in key leadership positions

Kevin Shea
APHIS Administrator
202-799-7000, Kevin.A.Shea@aphis.usda.gov

Kevin Shea was appointed Administrator of the U.S. Department of Agriculture's Animal and Plant Health Inspection Service (APHIS) on June 18, 2013, after serving as Acting Administrator since June 2012. As Administrator, Mr. Shea carries out the agency's broad mission of protecting and promoting American agriculture, regulating genetically engineered organisms, administering the Animal Welfare Act and carrying out wildlife damage management activities. In addition to his regular duties, Mr. Shea serves on the Secretary's Executive Resources Board and the Secretary's Management Council.

Before becoming Administrator, Mr. Shea served as Associate Administrator since September 2004, ensuring the smooth functioning of the Agency and championing APHIS' unprecedented business process improvement efforts. Starting in 2000, Mr. Shea served as Deputy Administrator for Policy and Program Development, providing leadership for the overall planning and direction of policies, programs and activities at APHIS, as well as being responsible for the Agency's budget, regulation development and environmental compliance programs. From 1992 to 2000 he served as APHIS' Director of Budget and Accounting. Earlier in his career he worked as a budget analyst, Chief of the Program Analysis Branch, and Chief of the Policy Analysis and Development Staff. He also spent one year practicing law in the litigation department of Frank, Bernstein, Conaway and Goldman in Baltimore, MD. Mr. Shea graduated from DeMatha Catholic High School in Hyattsville, MD and the University of Maryland in College Park. He earned a law degree, summa cum laude, from the University of Baltimore School of Law.

A native Washingtonian, Mr. Shea now resides in Crofton, MD.

Elvis Cordova
Acting Under Secretary for Marketing and Regulatory Programs
202-720-0395, Elvis.Cordova@osec.usda.gov

Mr. Cordova is the Deputy Under Secretary for the Marketing and Regulatory Programs Mission Area at the U.S. Department of Agriculture where he helps to oversee the Agricultural Marketing Service, the Animal and Plant Health Inspection Service, and the Grain Inspection, Packers and Stockyards Administration. He previously served as the Chief of Staff for the Research, Education & Economics Mission Area at USDA where he helped to oversee the Agricultural Research Service, the Economic Research Service, the National Agricultural Statistical Service, and the National Institute of Food and Agriculture.
Before joining USDA, he served as a Presidential Management Fellow at the Farm Credit Administration and the U.S. Department of Energy where he worked on issues encompassing alternative energy, economic development, financial services, and international & public affairs. Mr. Cordova has also held the position of Vice President of Public Relations at Tzolkin Media Inc., a D.C. based start-up company that developed online entertainment content for the Latino youth market. Prior to joining Tzolkin Media, he was the Director for Latin American programs at the Self Reliance Foundation where he managed the organization's civil society building projects, which focused on teaching social media technology to journalists and radio producers throughout Latin America. Before relocating to Washington D.C., he lived in Argentina and Brazil where he conducted research on economic and trade development. During his time in New York City, he worked at the United Nations as a consultant where he researched state capacity building strategies aimed at enhancing trade development in emerging markets. He also worked as a management planning analyst for the New York City Department of Parks and Recreation. Mr. Cordova began his career as a financial analyst at the Harvard Management Company in Boston, Massachusetts.

Mr. Cordova, a recipient of the Woodrow Wilson Graduate Fellowship, holds a Master's Degree in Public Administration from the Wagner Graduate School of Public Service at New York University and a Bachelor's Degree in Criminal Justice from Northeastern University. He also holds various professional and academic certificates from Georgetown University, Harvard University, University of California at Berkeley, Universidad de Sevilla in Spain, Universidad de Buenos Aires in Argentina, Ecole Nationale des Travaux Publics de l'Etat in France, and Pontificia Universidade Catolica in Brazil. His languages include Spanish, Portuguese, and French. Mr. Cordova recently served as a member of the Executive Board of the Washington D.C. Chapter of the National Society of Hispanic MBAs.

Ben Thomas
Deputy Under Secretary for Marketing and Regulatory Programs
202-260-8322, Ben.Thomas@osec.usda.gov

Ben Thomas is the Deputy Under Secretary for the Marketing and Regulatory Programs Mission Area at the U.S. Department of Agriculture where he helps oversee the Agricultural Marketing Service, the Animal and Plant Health Inspection Service, and the Grain Inspection, Packers and Stockyards Administration. Most recently, he served as the Chief of Staff for the Farm and Foreign Agricultural Services Mission Area, which encompasses the Farm Service Agency, Foreign Agricultural Service, and Risk Management Agency. In that role, he oversaw the department's international activities and worked to implement provisions of the 2014 Farm Bill.

Prior to joining USDA, Ben served as Legislative Assistant and Counsel to two Members of the Senate Agriculture Committee, helping write the 2014 Farm Bill. He also provided counsel on trade, telecommunications, nutrition, the environment, rural development, and more. Prior to his Senate experience, Ben served in various policy positions at the Farm Service Agency and Risk Management Agency, and as a Law Clerk to the Chairman of the Federal Trade Commission.

Ben graduated from Austin College in Sherman, Texas with a Bachelor of Arts degree. He
received his Juris Doctor from Washington University in St. Louis, Missouri, and his LL.M in Agricultural and Food Law from the University of Arkansas in Fayetteville.

Ben was raised on a cotton and peanut farm near Morton, Texas, where his family still farms.

David Howard  
Chief of Staff and Acting Deputy Under Secretary for Marketing and Regulatory Programs  
202-720-5759, David.howard@osec.usda.gov

David Howard is the Chief of Staff and is also serving as Acting Deputy Under Secretary for the Marketing and Regulatory Programs Mission Area (MRP) at the U.S. Department of Agriculture, where he helps oversee the Agricultural Marketing Service, the Animal and Plant Health Inspection Service, and the Grain Inspection, Packers and Stockyards Administration. David also serves as the main conduit between the MRP mission area and the Office of the Secretary, including the Office of Congressional Relations and the Office of Communications. Before joining MRP, David covered the Rural Development and Natural Resources and Environment portfolios in the Department’s Office of Congressional Relations.

Prior to joining USDA, David worked for Senator Tom Harkin from 2007 – 2013 in various roles. David received a B.A. in political science from the University of Northern Iowa in 2007. He hails from the small town of Marble Rock, Iowa.

Elanor Starmer, AMS Administrator  
202-720-5115, elanor.starmer@ams.usda.gov

Ms. Elanor Starmer is USDA’s AMS Administrator. Ms. Starmer joined USDA in 2011, first to support the Deputy Secretary and then as a Senior Advisor to Secretary Tom Vilsack. She also served as the National Coordinator and Advisor for Local and Regional Food Systems at USDA. In this role, she guided Department-wide efforts to strengthen local and regional food systems.
and lead the Know Your Farmer, Know Your Food initiative. She acted as liaison to U.S. Food and Drug Administration on the Food Safety Modernization Act (FSMA) and developed Department-wide strategy to support industry on FSMA implementation.

Prior to joining USDA in 2011, Elanor worked on agriculture, food and development policy issues for over a decade with nonprofits in Washington, DC, Minnesota, and California. She also consulted with the Organization of American States’ agriculture policy arm in El Salvador. Originally from a small farming community in New Hampshire, Ms. Starmer has an MS in Agriculture Science and Policy from Tufts University’s Friedman School; an MA in Development Economics from the Fletcher School of Law and Diplomacy; and a BA from Brown University.

Larry Mitchell
GIPSA Administrator
202-720-0219, Larry.Mitchell@usda.gov

Larry Mitchell was appointed Administrator of the United States Department of Agriculture (USDA), Grain Inspection, Packers and Stockyards Administration (GIPSA) on June 3, 2012. He is responsible for a variety of programs that facilitate the marketing of livestock, poultry, meat, cereals, oilseeds, and related agricultural products, and to promote fair and competitive trading practices for the overall benefit of consumers and American agriculture. GIPSA’s programs directly and significantly impact two key sectors of American agriculture - the livestock and grain markets. The markets serviced by GIPSA represent a total economic value of approximately $170 billion annually with exports contributing over $28.7 billion to the U.S. economy.

Before joining GIPSA, Mr. Mitchell served as the Associate Director of the Office of Advocacy and Outreach at USDA and previously served as Deputy Administrator for Farm Programs of the Farm Service Agency (FSA) of USDA and Deputy Vice President at Commodity Credit Corporation in the 1990s.

In the interim, Mr. Mitchell served in the private and nonprofit sectors as President of K Street Research, Inc. and as Chief Executive Officer of the American Corn Growers Association. Prior to serving at USDA in the 1990s, Mitchell held the position of Vice President of Government Relations for the National Farmers Union in Washington, D.C., Director of Federal and State Relation for the American Agriculture Movement, Editor of the AAM Reporter and as an independent consultant and writer on American farm issues. Before coming to Washington in 1989, Mr. Mitchell was a grain and cotton farmer in Texas. Mr. Mitchell earned a Bachelor’s degree from Tarleton State University in Plant and Soil Science.

Overview of Agency Programs and Operations

The economic vitality and quality of life in rural America and the U.S. economy at large depends on a competitive, efficient, and productive agricultural system. U.S. agricultural producers are not simply farmers and ranchers; they are often small business owners trying to survive and support their families and rural communities in a challenging global, technologically advanced,
and competitive business environment. In an era of market consolidation and intense competition, these producers rely on fair and open access to markets and control over their decisions to thrive. Agricultural producers also need to safeguard animal and plant resources against the introduction of foreign agricultural pests and diseases.

The mission of the Marketing and Regulatory Programs (MRP) is to facilitate and expand the domestic and international marketing of U.S. agricultural products, to help protect the agricultural sector from plant and animal health threats, and to ensure humane care and treatment of regulated animals. Because these programs provide the basic infrastructure to improve agricultural market competitiveness for the overall benefit of consumers and producers of American agriculture, this mission area contributes to all of USDA’s Strategic Goals. As a result of many efforts within MRP and other mission areas, the U.S. achieved $139.7 billion in farm exports in fiscal year 2015, the third-best year on record. Notably, the Animal and Plant Health Inspection Service (APHIS) continued efforts to eliminate trade barriers and ensure that trade decisions are based on science. The grain inspection and weighing work of the Grain Inspection, Packers and Stockyards Administration (GIPSA) and the work of the Agricultural Marketing Service (AMS) also contributed to the high level of exports seen in fiscal year 2015. As a direct result of the work of the MRP agencies and their sister agencies, USDA resolved more than 150 trade-related issues involving U.S. agricultural exports valued at $2.4 billion.

Through GIPSA, MRP also conducts oversight activities to protect livestock, meat, and poultry producers from unfair competition and unfair business practices, and partners with the Department of Justice to help prevent anti-competitive behaviors for regulated entities in the livestock, meat, and poultry industries. In addition, MRP assists producers in management and domestic marketing by providing market trend analysis and business and marketing tools through the work of the AMS. MRP also helps increase the competitiveness of the agricultural sector by working to protect the Nation’s agriculture from pests and diseases, thereby increasing the efficiency of production.

MRP’s efforts over the years have made a lasting impact on markets important to small and mid-sized producers. Through the National Organic Program, AMS has provided critical support needed to help fuel double-digit growth in the organic consumer market. In 2015, the retail market for organic products was valued at $43.3 billion by the Organic Trade Association and continues to grow. AMS has worked to expand market access for organic farms and businesses. Today, the industry encompasses a record 22,818 certified organic businesses.

**Agriculture Marketing Service (AMS)**

**Quality Grading and Inspections.**

USDA quality grade marks are usually seen on beef, lamb, chicken, turkey, butter, and eggs. For many other products, such as fresh and processed fruits and vegetables, the grade mark isn’t always visible on the retail product. In these commodities, the grading service is used by wholesalers, and the final retail packaging may not include the grade mark. However, quality grades are widely used—even if they are not prominently displayed—as a "language" among
traders. They make business transactions easier whether they are local or made over long distances.

Consumers, as well as those involved in the marketing of agricultural products, benefit from the greater efficiency permitted by the availability and application of grade standards. AMS currently grades cotton, fresh fruits and vegetables, processed fruits and vegetables, poultry, eggs, livestock and meat, dairy products, and tobacco.

**Auditing and Accreditation**

AMS provides audit and accreditation programs based on International Organization for Standardization (ISO) Standards and/or Hazard Analysis and Critical Control Point (HACCP) Principles and Guidelines. These programs provide producers and suppliers of agricultural products the opportunity to assure customers of their ability to provide consistent quality products or services. AMS verifies their documented programs through independent, third-party audits. AMS audit and accreditation programs are voluntary and paid through hourly user-fees.

AMS is recognized nationally and internationally as a competent and reliable provider of audit and accreditation services. AMS utilizes the International Organization for Standardization (ISO) 19011:2011 guidelines for quality and/or environmental management systems auditing as the format to evaluate program documentation, to ensure consistent auditing practices, and to promote international recognition of audit results.

**Organic Certification and Accreditation**

- **Organic Certification** allows a farm or processing facility to sell, label, and represent their products as organic. Any organic operation in violation of the USDA organic regulations is subject to enforcement actions, which can include financial penalties or suspension/revocation of their organic certificate.
- **Organic Accreditation** authorizes private, foreign, or State entities to certify farms or processing facilities. Certifying agents are accredited by the USDA and are located throughout the United States and around the world. Certifying agents are responsible for ensuring that the USDA organic products meet or exceed all organic standards.

**Local Food Research & Development**

- **Farmers Markets and Direct-to-Consumer Marketing**: conducts regular data collection and analysis of farmers market operations and other direct-to-consumer marketing outlets (Community Supported Agriculture, food hubs, on-farm markets) to help market managers, planners, and researchers better understand the impact of these outlets on food access and local economic development, and help the public easily find sources of fresh, local food.
- **Food Value Chains and Food Hubs**: studies “food value chains”, an innovative business model in which agricultural producers, processors, buyers, and other supply chain members form collaborative, transparent partnerships that intentionally attempt to combine financial success with social benefit. “Food hubs”, a subset of these innovative enterprises, work to
ramp up the availability of local food in wholesale marketing channels by offering affordable aggregation, distribution and marketing services to small and mid-sized producers

- **Wholesale Markets and Facility Design:** provides targeted site assessment and design services for food market planners, managers and community stakeholders to improve the efficiency of permanent food market facilities.

- **USDA Farmers Market:** The Department’s own “living laboratory” for farmers market operations, the farmers market at USDA headquarters has been running strong for 17 years and counting on a seasonal basis, and currently operates throughout the year in both outdoor and indoor locations. Posted here are schedules of upcoming market days and special programs/events for USDA headquarters along with materials that provide transferable lessons about market management, layout and organizational self-assessment for use by farmers market stakeholders across the country.

- **AMS Grant Programs:** AMS administers four grant programs to help farmers and ranchers market the food they produce, including programs that further farmers markets, specialty crops such as fruit and vegetables, local food marketing, and cost-share programs to help farmers become organic.

**Know Your Farmer, Know Your Food Initiative**

The Know Your Farmer, Know Your Food (KYF2) initiative is a USDA-wide initiative (not an appropriated program) to strengthen local and regional food systems and strengthen the critical connection between farmers and consumers. The initiative facilitates cross-cutting efforts at USDA that seek to use existing USDA programs to break down structural barriers that have inhibited local food systems from thriving.

**Import/Export Certificates**

**Imports**

- **Specialty Crops:** The AMS Specialty Crops Program administers Marketing Orders and Section 8e Import regulations that apply quality standards to certain perishable fruits and vegetables entering the United States. These standards ensure that consumers have access to high-quality products and ensure that the American produce industry and imports are competing on a level playing field.

- **Shell Eggs:** Additionally, AMS routinely inspects egg imports for compliance with U.S. quality standards, including storage and transportation temperature requirements.

**Exports**

AMS certification and verification programs support American exporters by ensuring that products meet specific export requirements for countries around the world, including in the European Union, Asia, and South America.
To further facilitate domestic and international movement of U.S. agricultural products, AMS works to develop centralized electronic trade document solutions, including the Electronic Document Exchange (eTDE) System and the International Trade Data System (ITDS). These electronic systems give authorized product owners, buyers, carriers, brokers, and government port agents access to critical information around the clock and around the world--making the certification and verification process even faster and easier.

**Lab Testing & Approval**

AMS provides lab testing and approval services to facilitate domestic and international marketing of food and agricultural commodities.

- **Lab Testing:** AMS’ National Science Laboratories (NSL) is a fee-for-service lab network utilized by both industry and government. Through laboratories located in Gastonia, NC; Blakely and Dawson, GA; and Winter Haven, FL, NSL provides chemical, microbiological, and bio-molecular analyses on food and agricultural commodities. NSL provides testing service for AMS commodity programs, other USDA agencies, Federal and State agencies, US Military, research institutions, and private sector food and agricultural industries.

- **Lab Approval:** AMS approves, or accredits, labs to perform testing services in support of domestic and international trade. At the request of industry, other Federal agencies, or foreign governments, AMS develops and administers laboratory approval programs to verify that the analysis of food and agricultural products meet country or customer-specified requirements.

**Market Research & Analysis**

AMS has a long history of providing tools and services that help create opportunities for American farmers and businesses. One of the tools we provide—free of charge—is in-depth market information and analysis.

Price, volume, values, weather impacts, supply, and demand—the market and all of the economic factors surrounding it can be complex to track and understand. From the smallest farmer to the largest grocery store chain, all of American agriculture is impacted by the trends and prices within the marketplace. Having the right information at the right time is key to achieving success.

**Grants & Opportunities**

The U.S. Department of Agriculture’s (USDA) Agricultural Marketing Service (AMS) works to improve domestic and international opportunities for U.S. growers and producers. AMS works with State and local agricultural departments to provide support to rural America and the Nation’s agricultural sector.
AMS funding supports a variety of programs, including organic certification cost-share programs and efforts to expand farmers markets and other local food sources. This funding is one of the ways that USDA invests in the future of rural America and the nation’s agricultural sector.

- **The Farmers Market and Local Food Promotion Program**

Farmers Market and Local Food Promotion Program grants are available annually to support local and regional food systems through two competitive programs: the Farmers Market Promotion Program (FMPP) and the Local Food Promotion Program (LFPP). FMPP grants fund farmer-to-consumer direct marketing projects such as farmers markets, community-supported agriculture programs, roadside stands, and agritourism.

LFPP grants fund local and regional food business enterprises that serve as intermediaries to process, distribute, aggregate, and store locally or regionally produced food products. Projects also provide technical assistance and outreach, including planning grants for local food businesses.

- **Federal State Marketing Improvement Program**

FSMIP provides matching grant funds to conduct applied research projects that explore new market opportunities for U.S. food and agricultural products and improve the efficiency and performance of the U.S. agricultural marketing system.

These grants are awarded on a competitive basis to State departments of agriculture, forestry, natural resources, or energy, as well as other State agencies such as experiment stations, universities, and colleges.

- **Sheep Production and Marketing Grant Program**

The Sheep Production and Marketing Grant Program is designed to strengthen and enhance the production and marketing of sheep and sheep products in the United States. The program will create new opportunities by improving infrastructure, developing business and resources, and supporting innovative approaches to address long-term needs. Projects will be funded through the National Sheep Industry Improvement Center.

- **Specialty Crop Block Grant Program**

The SCBGP focuses on projects that enhance the competitiveness of specialty crops, including fruits, vegetables, tree nuts, cut flowers, and other horticulture products. Projects cover issues from food safety to business planning. The block grants are designed to increase the long-term success of producers and broaden the market for specialty crops.

Many of the projects help market locally grown foods and help increase opportunities for specialty crop farmers. SCBGP also offers funds to States to support research and marketing projects that help increase crop yields and to conduct research to mitigate the crop damage.
Transportation Research & Analysis

Our Transportation Services Division (TSD) serves as the definitive source for economic analysis of agricultural transportation from farm to market. TSD experts support domestic and international agribusinesses by providing market reports, economic analysis, transportation disruption reports, technical assistance, and outreach to various industry stakeholders.

Tracking developments in truck, rail, barge, and ocean transportation, TSD provides information and analysis on the four major modes of moving food from farm to table, port to market.

Plant Variety Protection

The Plant Variety Protection Office (PVPO) provides intellectual property protection to breeders of new varieties of seeds and tubers. Implementing the Plant Variety Protection Act (PVPA), we examine new applications and grant certificates that protect varieties for 20 years (25 years for vines and trees). Our certificates are recognized worldwide and allow faster filing of foreign PVP applications. Certificate owners have exclusive rights to market and sell their varieties, manage the use of their varieties by other breeders, and enjoy legal protection of their work.

Research & Promotion

Research & Promotion (R&P) programs, authorized by Congress, are requested, funded, and driven by industry. The programs establish a framework to pool resources to develop new markets, strengthen existing markets, and conduct important research and promotion activities. AMS provides oversight, ensuring fiscal responsibility, program efficiency, and fair treatment of participating stakeholders. AMS oversees more than 20 research and promotion boards that empower farmers, ranchers, and agricultural businesses.

Pesticide Data Program

The Pesticide Data Program (PDP) is a national pesticide residue monitoring program and produces the most comprehensive pesticide residue database in the U.S. PDP administers the sampling, testing, and reporting of pesticide residues on agricultural commodities in the U.S. food supply, with an emphasis on those commodities highly consumed by infants and children. The program is implemented through cooperation with State agriculture departments and other Federal agencies.

Cooperation with Cuba

USDA entered into a Memorandum of Understanding with the Republic of Cuba, in which the Ministry of Agriculture calls for cooperation on mutually determined activities in the fields of agriculture. AMS’ role with respect to the MOU is to conduct technical exchanges with subject matter experts regarding production, post-harvest handling, and certification processes.
USDA announced that it will allow the 22 industry-funded research and promotion programs and 18 specialty crop marketing organizations with research authorities to conduct authorized research and information exchange activities with Cuba. Authorized activities are limited to information exchanges with Cuban government and industry officials and to health, science, nutrition, and limited consumer-oriented research. Promotional and advertising campaigns or materials are prohibited. USDA’s oversight role includes review of all activities and travel related to Cuba to ensure consistency with USDA policy and all other federal statutes and regulations. All requests are vetted through AMS’s Office of General Counsel and the USDA Deputy Counsel, before being referred to the FAS, as necessary.

**Beginning Farmers**

AMS also participates in the cross Department Agency Priority Goal for New and Beginning Farmers. Through outreach, education, and added data collection, AMS aims to support 10 percent of the projects funded by the Farmers Market Promotion Program (FMPP) and Local Food Promotion Program (LFPP) to benefit beginning farmers and ranchers. Both of these programs have a statutory priority to support projects that benefit communities that (1) are located in areas of concentrated poverty with limited access to fresh locally or regionally grown foods; and (2) have not received benefits from the Program in the recent past. Taking these priorities into consideration, AMS also promotes outreach and education for projects that benefit beginning farmers and ranchers as a part of their overall mission. Data on beginning farmers and ranchers in such projects has not been gathered in previous years, but beginning with FY 15 grant awards, AMS will receive voluntary information from its awardees regarding project beneficiaries. In FY 2014 FMPP awarded 183 projects for $14 million; and LFPP awarded 191 projects for $12 million. Using the number of projects awarded in FY 14 and amount of funds available for FY 15 ($13 million), AMS estimates the following for projects that benefit beginning farmers and ranchers:

<table>
<thead>
<tr>
<th>Year</th>

**Animal and Plant Health Inspection Service (APHIS)**

The Animal and Plant Health Inspection Service (APHIS) was reestablished by the Secretary of Agriculture on March 14, 1977, pursuant to authority contained in 5 U.S.C. 301 and Reorganization Plan No. 2 of 1953 (5 U.S.C. app.). APHIS was established to conduct regulatory and control programs to protect and improve animal and plant health for the benefit of
agriculture and the environment. In cooperation with State governments, industry stakeholders, and other Federal agencies, APHIS works to prevent the entry and establishment of foreign animal and plant pests. APHIS also regulates certain genetically engineered organisms and works to support healthy international agricultural trade and exports of U.S. agricultural products. In addition, the agency enforces regulations to ensure the humane treatment of certain animals and carries out research and operational activities to reduce crop and livestock depredation caused by birds, rodents, and predators.

**Biotechnology Regulatory Services**

Biotechnology regulatory officials are responsible for regulating the importation, movement, and field release of genetically engineered plants and certain other genetically engineered organisms that may pose a risk to plant health.

Biotechnology regulations are designed to ensure that genetically engineered organisms, such as herbicide-tolerant or drought-resistant crops, are as safe for agriculture and the environment as traditionally bred crop varieties. In regulating biotechnology, APHIS works in concert with the Environmental Protection Agency and the Food and Drug Administration, agencies that also play important roles in protecting agriculture, a safe food supply, and the environment. APHIS’ involvement begins when a person or organization wishes to import, move across a State line, or field-test a genetically engineered plant. These activities are subject to the Agency’s permitting and notification system.

**Plant Protection and Quarantine**

Plant protection officials are responsible for programs to control or eradicate damaging foreign plant pests and diseases. These programs are carried out in cooperation with the States involved, other Federal agencies, farmers, and private organizations. Pest control programs use a single tool or a combination of pest control techniques, both chemical and nonchemical, which are both effective and safe. Plant protection officials develop Federal regulations and policies that prohibit or restrict the entry into the United States of foreign pests and plants, plant products, and other materials that may harbor pests, diseases, or noxious weeds. They also manage programs for overseas preclearance—agricultural inspection—of commodities, passengers, and U.S. military activities. These efforts help protect the health and value of U.S. agricultural production and natural resources.

**Veterinary Services**

Animal health officials are responsible for programs to protect and improve the health, quality, and marketability of U.S. animals and animal products. The programs are carried out through cooperative links with States, foreign governments, livestock producers, and other Federal agencies.

APHIS officials conduct exclusion and quarantine activities for animal pests and diseases, carry out eradication and control programs for certain diseases, provide laboratory diagnostic services, and conduct animal health monitoring and surveillance. They also certify as to the health status of animals and animal products being exported to other countries and respond to animal disease incursions or epidemics that threaten the health status of U.S. livestock and poultry. Because
human health is closely linked to veterinary health, APHIS animal health officials cooperate with other agencies and organizations to effectively manage the intersection between wildlife, veterinary, and human health issues. APHIS also administers a Federal law intended to ensure that all veterinary biological products used in the diagnosis, prevention, and treatment of animal disease are safe, pure, potent, and effective.

**Animal Care**

APHIS administers the Animal Welfare Act, which establishes standards for the humane care and handling of certain warm-blooded animals bought, sold, and transported in commerce and used or intended for use as pets at the wholesale level or used or intended for use in exhibitions or for research purposes. The agency also enforces the Horse Protection Act of 1970, which prohibits the soring of horses at shows and sales.

**International Services**

APHIS activities in the international arena include conducting cooperative plant and animal pest and disease control, eradication, and surveillance programs in foreign countries. These programs provide a first line of defense for the United States against threats such as screwworm Mediterranean fruit fly, and other exotic pests and diseases. APHIS also provides international representation concerning sanitary and phytosanitary technical trade issues and conducts capacity building activities to help develop the animal and plant health competencies and infrastructure of international counterparts.

**Wildlife Services**

Wildlife services officials provide assistance, upon request, to States, counties, local communities, and agricultural producer groups to reduce crop and livestock depredations caused by birds, rodents, and predators. Using methods and techniques that are biologically sound, environmentally acceptable, and economically feasible, they educate and advise farmers and ranchers on proper uses of control methods and techniques; suppress serious nuisances and threats to public health and safety caused by birds, rodents, and other wildlife in urban and rural communities; and work with airport managers to reduce risks of bird strikes. Wildlife services officials also assist in the recovery of endangered and threatened species and monitor wildlife across the country for diseases to help protect animal and human health. In addition, they conduct research into predator-prey relationships, new control methods such as wildlife contraception, and more efficient and safe uses of existing methods such as toxicants, repellants and attractants, biological controls, scare devices, and habitat alteration.

**Grain Inspection, Packers and Stockyards Administration (GIPSA)**

**Federal Grain Inspection Service**

Across America, U.S. grain, rice, and other commodities flow from farm to elevator to destinations around the world. GIPSA’s Federal Grain Inspection Service (FGIS) helps move our Nation’s harvest into the marketplace by providing farmers, handlers, processors, exporters, and international buyers with sampling, inspection, process verification, weighing and stowage
examination services that accurately and consistently describe the quality and quantity of the commodities being bought and sold.

**Packers and Stockyards Program**

The Agency’s Packers and Stockyards Program (P&SP) promotes fair business practices and competitive environments to market livestock, meat, and poultry. Through its oversight activities under the Packers and Stockyards (P&S) Act, including monitoring programs, reviews, and investigations, P&SP fosters fair competition, and provides payment protection. It also guards against deceptive and fraudulent trade practices that affect the movement and price of meat animals and their products. P&SP’s work protects consumers and members of the livestock, meat, and poultry industries. P&SP’s major enforcement areas are payment protection, unfair, deceptive, and fraudulent practices, and competition

APHIS Discretionary Funding

The FY 2011 Full-Year Continuing Resolution removed $27 million from APHIS’ appropriation related to approximately 45 Congressionally directed projects. Without funding, APHIS permanently discontinued many of the specific projects.

Congress provided $20 million in 2-year funding through a general provision in the FY 2014 appropriation for the Multi-Agency Coordination (MAC) Group for Huanglongbing (HLB), or citrus greening. HLB is a devastating disease that threatens U.S. citrus production, valued at $3.1 billion in 2013. Congress provided an additional $5.5 million in the FY 2016 appropriation for the HLB MAC that is available until the end of FY 2017.

The Plant Protection Act and the Animal Health Protection Act grant the Secretary of Agriculture authority to transfer funds to APHIS for use in controlling outbreaks of insects, plant diseases, and animal and poultry diseases. Although the Secretary is authorized to transfer funds from any USDA agency or corporation, the funds are typically transferred from the Commodity Credit Corporation (CCC). Each year, APHIS’ appropriation also emphasizes this authority. In FY 2015, APHIS received approximately $1 billion in emergency funds transferred from the CCC to address the largest animal outbreak in history – that of notifiable avian influenza.

Also, in FY 2015 the Department decentralized its General Services Administration (GSA) rent account. The appropriated budget included a new line item totaling $42.5 million to cover APHIS’ portion of this account.

APHIS’ Mandatory Funding

Congress originally created a program in the 2008 Farm Bill to prevent the introduction or spread of plant pests and diseases that threaten U.S. agriculture and the environment. There was a significant funding increase for this purpose between FY 2009 and FY 2010. The House and Senate Agriculture Committees renewed their support for the program in the 2014 Farm Bill, making the program permanent and expanding funding.

APHIS’ Supplemental Funding

APHIS received a transfer from the Department of Health and Human Services’ Centers for Disease Control and Prevention to extend surveillance and diagnostic capabilities associated with influenza viruses in domestic swine in response to the Novel H1N1 2009 Virus outbreak. APHIS’ efforts assisted in determining whether the novel H1N1 virus influenza or other strains of interest are present in the U.S. swine population.

APHIS

Regulatory Actions
A regulation is a legally binding rule developed by an agency. For that reason, rulemaking is a thorough, time consuming, and often complicated process that provides opportunity for the public to provide input on regulations before they are finalized. The process is governed by the Administrative Procedures Act and several Executive Orders. Rulemaking can take from several months to several years. Factors affecting the timeline include the complexity of the issues involved; the availability of data needed for economic, risk, or environmental analyses; the extent of public participation in the rulemaking, and the number and nature of comments received; the priority of the rulemaking relative to other Agency rulemakings under development at the same time; and whether the rule requires review by the Office of Management and Budget. Some also require consultations with State and local government, and Indian Tribes.

From January through June 2017, APHIS will continue the rulemaking process for the proposed regulatory actions listed below whose comment periods closed and for which we published no final regulatory decision prior to the end of fiscal year (FY) 2016. APHIS will update its rulemaking priorities following any published update to the Current Unified Agenda of Regulatory and Deregulatory Actions, including:

- the proposed rule for amending the horse protection regulations (published 7/26/16; comments due 10/26/16);
- the proposed rule for the importation of live sheep, goats, and certain other non-bovine ruminants, and products derived from sheep and goats, with regard to transmissible spongiform encephalopathies such as bovine spongiform encephalopathy (BSE) and scrapie (published 7/8/16; comments due 9/16/16);
the proposed rule to update our National Environmental Policy Act regulations
(published 7/20/16; comments due 10/19/16);
the proposed rule for establishing de minimis exemptions from the Animal Welfare Act (published 8/4/16; comments due 11/2/16);
the proposed rule for the importation of lemons from Argentina (published 5/10/16; comments due 8/10/16);
the proposed rule for marine mammals (published 2/3/16; comments due 5/4/16)
the proposed rule for the select agents program (published 1/19/16; comments due 3/21/16);
the proposed rule for brucellosis and tuberculosis (TB) (published 12/16/15; comments due 5/16/16);
the proposed rule to establish performance standards for importation and interstate movement of fruits and vegetables (Q56 expansion) (published 9/9/14; comments due 11/10/14; comment period reopened 12/04/14; comments due 1/09/15; comment period reopened 2/06/15; comments due 3/10/15);
the proposed rule for scrapie (published 9/10/15; comments due 11/9/15; comment period reopened 11/16/15; comments due 12/09/2015)
the proposed rule for the forfeiture regulations (published 5/21/2013; comments due 7/22/13); and,
the interim rule to specify conditions for payment of indemnity claims for highly pathogenic avian influenza (HPAI) (published and effective 2/9/16; comments due 4/11/16).

(See Important Policies and Regulations for additional information about many of these proposed rules.)

APHIS will also continue to address petitions to deregulate genetically engineered plants, including:

• a petition from Scotts and Monsanto to deregulate creeping bentgrass genetically engineered for resistance to the herbicide glyphosate (notice published 1/08/2016; comments due 3/8/16; notice of environmental impact statement published 9/30/2016; comments due 11/14/16).
• a petition from ArborGen Inc. to deregulate freeze tolerant eucalyptus lines designated 427 and 435, which have been genetically engineered to be more tolerant of cold conditions (notice published 2/27/2013; comments due 4/29/2013; draft environmental impact statement and Endangered Species Act findings submitted to the Department of the Interior, Fish and Wildlife Service 4/2015).

January 2017

Pet Bird Home Quarantine Business Process Improvement (BPI)
In January 2017, APHIS expects to move into phase 2 of its Pet Bird Home Quarantine BPI, which will focus on increasing the effectiveness of the process for bringing certain pet birds into
the United States and permitting them to be quarantined at home rather than a Federal quarantine facility. This change will allow APHIS to improve communication with importers before and after the birds arrive in the United States and improve the Agency’s oversight of the birds from pre-export through import, quarantine, and release. In FY 2017, APHIS plans to share data regarding the improvements with stakeholders.

New APHIS Inspection Facility in Eagle Pass, TX
APHIS inspects cattle entering the United States from Mexico at several locations along the United States-Mexico border to ensure they are free of specific diseases and pests that could harm domestic livestock and impact trade. The current APHIS livestock inspection facility in Eagle Pass, TX, is not suitable for long-term use for several reasons, including concern for employee safety due to violence in the region. APHIS is working to lease/build new space in Eagle Pass while maintaining operations in the current space. The lease is anticipated to be in place by the end of 2016 with construction beginning in early 2017 and a goal for occupancy by the end of FY 2017. Industry is very interested in, and has been asking questions about, the new facility. APHIS anticipates moving facilities will have only minimal operational impact to stakeholders.

Expansion of the Systems Approach Program for the Export of Hass Avocado from Mexico into the United States
APHIS, in collaboration with its Mexican counterpart, SENASICA, and avocado industry representatives, will sign an operational work plan that includes measures for the inclusion of avocado-producing areas in Mexico into the avocado import program. This program facilitates the safe importation of this commodity into the United States.

Announce Projects Approved for Funding Through Farm Bill Section 10007
APHIS plans to announce the projects that will receive $62.5 million in overall funding in 2017 through the Farm Bill’s Section 10007. Section 10007 funding is split between two programs: the Plant Pest and Disease Management and Disaster Prevention Program, and the National Clean Plant Network (NCPN). Of the overall funding distributed, at least $5 million will go to NCPN. APHIS – with input from stakeholders – chooses projects that are best aligned with the Agency’s specific goals for preventing the introduction or spread of plant pests and diseases that threaten U.S. agriculture and the environment. A variety of entities, including State departments of agriculture, academic partners, non-profit organizations, and other Federal agencies carry out these 10007 projects.

Broad Offsetting Collection Activities (Audit # 100332)
The U.S. Government Accountability Office (GAO) is reviewing the different types of collection authorities that regulatory agencies use and how those agencies balance autonomy and Congressional oversight. The tentative due date for the report is January 31, 2017.

Safety of Imported Beef from Countries with Foot-and-Mouth Disease (Audit #100294)
GAO is reviewing USDA’s processes to ensure that beef from foreign sources is disease-free and safe for import into the United States. This includes a review of how USDA determines the potential risk to U.S agriculture from beef imported from countries with a recent history of foot-and-mouth disease, the methods USDA uses to verify animal health data received from foreign
agricultural authorities seeking approval to export beef to the United States, and how USDA decides what specific conditions foreign entities should meet before their beef products may be imported. The tentative due date for the report is January 31, 2017.

**February 2017**

**Certification of a Second Irradiation Facility in Vietnam for the Treatment of Commodities Intended for Export to the United States**
APHIS, in partnership with the Vietnam National Plant Protection Organization, will finalize the certification process to approve a second irradiation facility in Hanoi, Vietnam. Under the purview of a preclearance program, local producers will be able to treat their fruit closer to growing areas and expedite the export inspection and certification process of commodities to be shipped to the United States.

**March 2017**

**Completion of Recommendations from Reviews of Fast-Track Action Committee on Select Agent Regulations (FTAC-SAR) and Federal Experts Security Advisory Panel (FESAP)**
APHIS and the Centers for Disease Control and Prevention (CDC) manage the Federal Select Agent Program (FSAP). The program oversees the possession, use and transfer of biological select agents and toxins that have the potential to pose a severe threat to public, animal or plant health or to animal or plant products. FSAP is leading implementation for 19 recommendations stemming from White House-driven reviews of the FTAC-SAR and FESAP. APHIS expects to complete any remaining recommendations by early 2017.

**Implementation of an Offshore Certification Program for the Importation of Ornamental Cuttings into the United States**
APHIS has partnered with the U.S. greenhouse industry to develop a voluntary certification program for overseas (i.e., offshore) facilities that produce ornamental cuttings to be exported to the United States. This means that APHIS will audit and certify the offshore facilities to produce the cuttings. This will standardize facility operating procedures, streamline inspections, and provide APHIS with additional safeguards against the entry of plant pests and pathogens on ornamental cuttings. APHIS and industry will pilot this program in fiscal year 2017, beginning as early as March if agreeable to industry, using the plant inspection stations in Atlanta, Georgia and Miami, Florida.

**Highly Pathogenic Avian Influenza (Audit # 100668)**
USDA’s Office of the Inspector General is reviewing any threats the highly pathogenic avian influenza virus may pose to public health, agriculture, or the economy in the United States; steps the Federal Government is taking to address these threats; and what gaps remain for addressing any future threats. The tentative due date for the report is March 31, 2017.
April 2017

Implementation of Suspension and Debarment Tools in the U.S. Department of Agriculture
USDA’s Office of the Inspector General is reviewing USDA’s controls to ensure agencies initiate and refer USDA program violators for Suspension and Debarment actions. The tentative due date for the report is April 30, 2017.

May 2017

N/A

June 2017

Publication: Results of Infectious Salmon Anemia Virus (ISAV) Surveillance
The APHIS aquaculture program supports producers, promotes good farming practices, and monitors for disease in aquaculture. In 2012, in response to unofficial ISAV findings in British Columbia, APHIS, multiple State and Federal agencies, and Tribal entities launched a surveillance program to detect if ISAV is present in wild and farm-raised salmon in the Pacific Northwest. Infectious salmon anemia is a serious viral disease that affects farmed Atlantic salmon in several areas of the world, and its presence in British Columbia would have raised concerns about the potential impact to wild fish populations and commercial aquaculture in Alaska and Washington. The surveillance effort concluded in FY 2016 with 4,000 animals sampled and tested and no evidence of the virus found. APHIS and its collaborative partners plan to publish the surveillance findings by June 2017.

Wild Bird Surveillance for Highly Pathogenic Avian Influenza (HPAI)
APHIS coordinates the U.S. interagency surveillance efforts for HPAI in wild birds. The goals of this effort are to maximize our ability to detect avian influenza viruses in wild waterfowl in the United States, detect virus spread to new areas, provide a flexible surveillance framework to monitor wild dabbling duck populations for influenza reassortants and introductions of new viruses, and estimate the prevalence of new influenzas once detected. Between July 2016 and June 2017, APHIS and its State and Federal partners will collect about 30,000 samples from migratory waterfowl in 47 States and test them for HPAI. Progress on this sampling effort will be posted weekly on the APHIS avian influenza web page.

GIPSA

Packers and Stockyards Program
Assuming that the Farmer Fair Practices Rules are published in the Federal Register in November or December 2016, with a 60-day comment period, the new administration will have to first determine whether to extend the comment period. That is anticipated before mid-February, 2017. Once the comment period closes, the program will have to review comments and decide how to proceed on the proposed rules
The President recently signed P.L. 114-237, which amended the Packers and Stockyards Act to define market agency to include livestock sales conducted online through video or other electronic methods and to allow packers, market agencies, and dealers to pay for livestock by wire, electronic fund transfer, or any other method determined appropriate. The new administration will need to review existing regulations and decide how to proceed with rules to implement the amendments to the Packers and Stockyards Act.

Federal Grain Inspection Service
No key decisions or program actions are anticipated in the first six months of the new administration, through June 30, 2017.

Mission Area Issues

AMS

Labeling of Bioengineered Food
On July 29, 2016, President Obama signed into a law a mandatory national bioengineered food disclosure standard (Public Law 114-216). AMS is the USDA Agency responsible for implementing the labeling requirements. AMS has published the new law on its website and provided an opportunity for the public to provide comments and ask questions on the new law via phone and email. The new law requires AMS to conduct a study identifying technical challenges for consumers to access an electronic or digital disclosure. On September 1, AMS published a Request for Information seeking input from vendors and general stakeholders on the study design, which closed on September 15. On September 14, AMS Administrator Starmer delivered to all AMS Deputy Administrators a policy memorandum affirming the new law’s consistency with the National Organic Program (NOP) and ensuring that rulemaking on the new law will not impact the NOP.

Next Steps: AMS is using the comments received on the RFI to develop the solicitation for vendor proposals for the study on the electronic or digital disclosure. However, posting of the solicitation is contingent on funding. AMS is continuing to analyze the requirements of the law, establish funding for staffing and study requirements, determine potential interactions with existing AMS programs, and work within the regulatory process to publish an advanced notice of public rulemaking in the Federal Register.

U.S. District Court Decision on Resolute Forest Products, Inc.
On April 15, 2015, Resolute Forest Products filed a motion for summary judgment claiming that the Softwood Lumber Research and Promotion Order is unconstitutional. USDA has been involved in ongoing deliberation since the initial filing. On May 17, 2016, the U.S. District Court found that USDA’s Softwood Lumber Order was unlawful as promulgated. At a June 1, 2016, hearing held to discuss remedies, the court ordered: (1) USDA and the Softwood Lumber Board are prohibited from collecting further assessments from Resolute under the current Order; (2) USDA and the Board must maintain a balance of funds of not less than $1.1 million under the
current Order; and, (3) USDA and Department of Justice (DOJ) shall file a brief supporting
USDA’s position that the $1.1 million is assessments paid by Resolute should not be refunded in
its entirety. A brief developed by AMS and DOJ for the court was filed on June 30, 2016.
Resolute filed its response on July 20, 2016; USDA/DOJ’s reply was filed by the extended due
date of August 24, 2016. Subsequent to the briefs being filed, the judge ordered the parties to
submit briefs on issues regarding sovereign immunity and the authority of USDA to require the
Board to refund assessments to Resolute. The deadlines for USDA and Resolute to submit their
briefs are October 18, 2016 and November 1, 2016, respectively. On June 30, 2016, AMS
posted external Q&As about the case per the industry’s request.

AMS published a notice on July 20, 2016, notifying industry that a continuance referendum
originally scheduled for August 20 will not be held. On July 13, 2016, AMS met with the Office
of the Chief Economist (OCE) to discuss analyses necessary for upcoming rulemaking on the de
minimis provisions of the order. On August 30, 2016, an interim rule was published in the
Federal Register revising the time frame for the continuance referenda under the Softwood
Lumber Order. The rule revises the time frame from 5 years (2016) to no later than 7 years
(2018). Comments are due by October 31, 2016. On September 1, 2016, Resolute filed a notice
of supplemental authority to emphasize its previous arguments about the order in the context of
USDA’s August 2016 interim rule. On September 14, 2016, AMS and DOJ decided to file a
response to Resolute’s notice of supplemental authority. Our response will clarify the status of
the rulemaking and any subsequent referenda on the order.

R-CALF USA v. USDA/Vilsack
On May 2, 2016, R-CALF USA filed suit in Federal District Court in Montana against Secretary
Vilsack arguing that the Beef Checkoff Program should be promoting only U.S. beef. The
complaint argues that the Checkoff Program denies R-CALF USA members in Montana their
First Amendment rights since they are required to pay into the Montana chapter of the Checkoff
program without a say in the marketing strategy. AMS will soon issue a rule regarding the
redirection of beef Checkoff funds so producers have the option of directing their full assessment
under the Beef Checkoff go entirely to the National Board. According to R-CALF’s legal
challenge, the activities of the National Board are considered constitutionally sound by the
Supreme Court, while the activities of the State Beef Councils are not. Thus, by giving
producers the option to direct their monies to the National Board, R-CALF’s purported violations
of First Amendment rights should be addressed.

On June 7, AMS asked if the Montana Beef Council would comply if a producer requested that
they redirect assessments to the Cattlemen’s Beef Board. The Montana Beef Council responded
that any redirection request, accompanied by appropriate and timely documentation, would be
considered independently and that all state and Federal laws would be considered when making
board decisions. The redirection rule was published on July 15, 2016, with a 60-day comment
period that closed on September 13, 2016. USDA filed a motion to dismiss the case on August 4,
2016. On August 24, 2016, R-CALF responded to the motion to dismiss. On September 12,
2016, R-CALF also filed a motion for a temporary restraining order (TRO) to prevent USDA
from allowing the Montana Beef Council from retaining half of the assessments. On 9/28/16,
USDA filed opposition to the TRO and reply in support of its summary judgment motion. On
September 20, 2016, the Court issued an Order for a hearing to take place on October 25, 2016, at 2 p.m. regarding USDA’s Motion to Dismiss and Plaintiffs Motions to Summary Judgement and their Motion for a Temporary Restraining Order.

**American Egg Board**

The Chief Executive Officer of Hampton Creek, Inc., San Francisco, CA (Hampton Creek) complained that the American Egg Board (AEB) exceeded its mandate by funding a campaign to halt the growth of Hampton Creek. An internal AMS review of the allegations has been completed and was released publicly on October 7, 2016.

**The USDA Farmers Market**

Located on the corner of 12th and Independence Avenue, SW, the USDA Farmers Market is the Department's own "living laboratory" for farmers’ market operations across the country. The market supports the local economy, increases marketing opportunities for farmers and small businesses, provides access to an assortment of local and regionally sourced products, and increases access to healthy, affordable food in the District of Columbia's Ward 2. In its 21st year of operation, the USDA Farmers Market has experienced tremendous growth and has become a “go to” destination for federal employees and Washington, DC, visitors on Fridays during the spring and summer.

The daytime market hosts approximately 30 produce, prepared food, and cut flower vendors, and the nighttime market hosts approximately 24 vendors. The farmers market upholds the principles of “sourcing locally.” For prepared food vendors to participate in the market, they must demonstrate that the foods they are preparing are using ingredients sourced from local producers. It also conducts a weekly fruit and vegetable education program where shoppers can attend short 10-minute classes and get a "VegUcation" - learning how to pick, prepare and store a particular fruit or vegetable that is in season in the United States.

**Additional Pending Issues**

**Peoples Republic of China Government Officials to Visit U.S. Beef Production**

China Ministry of Agriculture officials conducted an assessment of the U.S. beef industry from September 11-19, 2016, to determine whether boxed beef products can be traceable to the ranch of origin. FAS, AMS, FSIS, and APHIS accompanied the delegation during the assessment. The opening meeting in Denver, CO, included the USDA agencies and various members of industry. The group continued to Nebraska to review two cow/calf ranch operations, one feedlot, and two slaughter facilities. Industry demonstrated its ability to trace the boxed beef to cattle arriving from slaughter, and the cattle to ranch of origin, through AMS' program for source and age verification, which would eventually be a part of an Export Verification, developed for China. The delegation then traveled to the State of Washington, where APHIS briefed the delegation on how the single incidence of BSE in December 2003 was handled to ensure that BSE is still a negligible risk in the United States according to OIE standards.
On September 22, 2016, China officially lifted its 13-year ban on U.S. beef.

**Notice Seeking Comments on U.S. Standards for Grades of Catfish and Catfish Products**

On July 14, 2016, AMS published a Notice in the Federal Register seeking comments, data, research, and other information to help the Agency carry out the 2014 Farm Bill mandate to establish a voluntary fee-based grading program for catfish and catfish products. AMS is coordinating with the Department of Commerce’s National Marine Fisheries Service (NMFS), which has a program for quality evaluation of product, grading, and certification of fish (including catfish), shellfish, and fish products. We received four comments during the comment period, which ended on September 12, 2016. AMS will conduct two workshops to share information with stakeholders and gain more input to assist in developing grade standards and establishing a USDA grading program for catfish.

**Petition to Revise U.S. Beef Standards to Allow Alternate Means of Age Determination in Carcass Beef**

On April 13, 2016, AMS received a petition from several industry stakeholders asking the Agency to make changes to allow for dentition as a means of age determination and eligibility for carcass grading. AMS published a Notice in the Federal Register on August 24, 2016, seeking public comments on the changes proposed in the petition. Comments were due by October 24, 2016. Based on an analysis of the comments received, AMS will decide whether to proceed with specific changes to the standards.

**Japan to Audit U.S. Beef Production**

Japan government officials have set a tentative date of November 7-18, 2016, to visit the United States to audit U.S. beef producers exporting to Japan. Japan is awaiting additional questionnaires from beef producers, and evaluating responses from AMS on the JBS Souderton issue before audit sites are selected and the trip is finalized.

- **JBS Souderton Suspended from Export Verification Programs** - In April 2016, AMS suspended and delisted JBS Souderton from the Export Verification (EV) program because of issues related to the shipment of non-conforming beef products to Korea through Chicago Meat Authority. AMS completed “for cause” audits at all JBS facilities in late May, and subsequent corrective actions and required training in July. AMS provided a summary of the audit findings to Japan in late July and continues to address Japan’s questions about the findings and corrective actions. On August 22, AMS provided info to Japan regarding mislabeled packages from JBS Souderton, which shipped to Japan but did not enter commerce. Japan notified importing companies that it suspended imports of product from JBS Souderton. FAS will keep AMS apprised of any developments.

**Development of Industry Standard Definition for “Cage-Free” Eggs**

On September 21, 2016, Secretary Vilsack hosted a meeting with key representatives of the grocery and food retail sectors and the U.S. shell egg industry to discuss strategies for meeting the 2026 deadline established by volume food buyers for transitioning to cage-free supplies. All
parties agreed that the starting point was for industry to develop a standard definition of the term “cage-free.” The United Egg Producers (UEP) is leading the effort; AMS offered to play a support role and facilitate discussions.

A meeting is tentatively planned for October 27, 2016, in Washington, DC, at which interested egg producers and members of the food retailing sectors will begin developing an agreed-upon definition. Once that definition is developed, UEP and the group will then engage consumer and animal rights organizations.

**Cornucopia Institute v. USDA/Secretary Vilsack**
On April 19, the Cornucopia Institute filed a complaint with the U.S. District Court for the Western District of Wisconsin on behalf of two organic producers. The complaint charges that USDA violated the Organic Foods Production Act (OFPA) in appointing members to the NOSB who did not meet OFPA qualifications. AMS continues to provide OGC and DOJ with information to support the case as requested.

**National Organic Program Freedom of Information Act (FOIA) Lawsuits**
The Cornucopia Institute filed eight lawsuits over AMS handling of FOIA requests related to National Organic Program records. AMS continues to coordinate with General Law on case-specific actions, and NOP has awarded a contract to support expanding FOIA needs.

**Process Verified Program (PVP)**
LPS provided independent verification and transparency to issues of increasing importance to consumers by partnering with industry to develop several groundbreaking consumer marketing programs. These include a non-GE/GMO USDA Process Verified Program (PVP) for consumer-facing products and the McDonald’s Responsible Antibiotic Use PVP for chicken, which launched publicly during the Summer Olympics, 5 months earlier than originally planned; the School Food Focus (SFF) Certified Responsible Antibiotic Use PVP for chicken; and a non-GE/GMO USDA Process Verified Program (PVP) for grain. In total, PVPs verify antibiotic-related claims for nearly 15 percent of the U.S. broiler industry, with an additional 12 percent committed by the end of the calendar year. LPS relaunched the PVP after completing all action items related to the OIG audit of the PVP, developing consistent procedures to maintain public and customer confidence in AMS third-party verification services. LPS and AMS Public Affairs developed a comprehensive communications plan to inform customers of the program changes through publishing three PVP blogs and an infographic, updating PVP Web site information, reformatting the PVP listing to highlight process points, partnering with external stakeholders to highlight the PVP in practice, and rolling out PVP updates on the GovDelivery platform.

**Transition of Layer Industry to “Cage-Free” Eggs**
On September 21, 2016, the Secretary of Agriculture and AMS hosted a meeting with leaders in the retail, manufacturing, and foodservice sectors and U.S. egg producers to discuss the challenges in transitioning egg production from conventional caged systems to “cage-free.” The meeting provided USDA an opportunity to show support for the industry and commit its assistance in addressing several of the major hurdles ahead.
United States Department of Agriculture
2016 Presidential Transition
Marketing and Regulatory Programs (MRP)

A major outcome of the meeting was that all the participants agreed that a clear and commonly accepted definition for “cage-free” was necessary for all parties to have confidence in moving forward. Participants agreed that efforts to develop a common definition should be led by industry, with support from AMS. The participants also agreed that animal rights and consumer groups should be involved in future discussions, with as much direct communication between these organizations and the industry and food sector as possible. The next meeting has been scheduled for November 30, 2016, and will be convened by the United Egg Producers.

Center for Food Safety, et al. v. Vilsack, et al/Green Waste: A second complaint, filed on April 14, 2015, relates to Guidance Document – NOP 5016 (Allowance of Green Waste in Organic Production Systems). On June 20, 2016, the U.S. District Court Judge for the Northern District of California ruled that NOP 5016 must be vacated by August 22, 2016. AMS did so, withdrawing NOP 5016 on August 22 as directed. A Notice to Trade was sent on August 18 to update the organic community. AMS is currently drafting a proposed rule to replace the guidance with a regulatory rule change, with the opportunity for public comment. The work plan was designated as significant by OMB on August 31. On September 19, 2016, USDA and the plaintiffs executed a settlement agreement for legal fees authorized under the Equal Access to Justice Act.

Livestock Mandatory Reporting (LMR) Study
The Agriculture Reauthorizations Act of 2015 specified that USDA complete, by March 1, 2018, a study through AMS and the Office of the Chief Economist, and in consultation with the livestock and meat industry, to analyze current livestock marketing practices; identify future legislative or regulatory recommendations; analyze price and supply information reporting services of USDA related to cattle, swine, and lamb; and, address any other issues that the Secretary considers appropriate. AMS commissioned a baseline “as is” study of the livestock and meat industry and LMR, which was completed August 2016, to help inform this comprehensive review. To gather feedback from industry stakeholders, AMS will bring members of the industry together in a series of structured stakeholder meetings to openly discuss the marketing methods and current challenges with reporting livestock and meat markets to reach consensus on what each commodity area would like changed in the next reauthorization of LMR. All meetings will be facilitated by the Federal Mediation and Conciliation Service (FMCS). The goal of these meetings is to reach consensus on what each commodity area would like changed in the next reauthorization of LMR. This industry consensus report will provide information for Congress to consider to facilitate an orderly reauthorization of LMR in 2020. The first stakeholder meeting will be held on November 15-16, 2016, in Washington, DC.

Humane Society of the United States vs. Vilsack
In September 2012, the Humane Society of the United States (HSUS) filed suit in the Federal District Court of the District of Columbia against the Secretary of Agriculture under the Administrative Procedure Act (APA) challenging the approval of the National Pork Board’s (Board) purchase of four trademarks including the “Pork, The Other White Meat” (PTOWM) slogan from the National Pork Producers Council (NPPC). On August 14, 2015, HSUS won its appeal for standing. The case is still pending with each party submitting records to the Court. The decision will be based upon the administrative records filed on June 29, 2016. On August
24, 2016, USDA filed additional materials to supplement USDA’s administrative record that was originally filed with the court on June 29, 2016.

**USDA Certified Transitional Program**
AMS is reviewing the Organic Trade Association’s Transitional Certification standard, which was submitted on May 20. The standard would allow AMS to approve Accredited Certifying Agents to verify processes and practices used by producers during the 3-year transition period required by the National Organic Program regulations when moving from conventional to organic production. On September 27, AMS met with OTA to outline the issues, primarily with the label. AMS continues to work with OGC.

**Global Food Safety Initiative**
In recent years, international entities, such as the Global Food Safety Initiative (GFSI), have worked to build equivalence and convergence among the various effective food safety management systems in an effort to eliminate redundancy in the audit process for buyers and producers, and to improve the operational efficiency of the food safety certification sector. Major U.S. corporations, namely Walmart, McDonald’s, Cargill, Kroger and Wegmans, sit on the GFSI Board of Directors.

AMS is working closely with GFSI to obtain equivalency under the new GFSI Standard Equivalency Process for Government Entities. This accreditation will allow AMS’ audit program to serve as a single, accredited certification body that can meet buyers’ multiple requirements for audits.

**Pesticide Data Program--Glyphosate**
Glyphosate is an herbicide used to control weeds used in soybeans, corn, cotton, wheat, pasture/hay, orchards/grapes, and fruit and vegetables. In the past, the Pesticide Data Program (PDP), a national pesticide residue monitoring program that produces the most comprehensive pesticide residue database in the U.S., did not routinely test glyphosate because it was not widely used on many of the fruit and vegetables and other products tested and requires a specialized method of analysis. PDP is implemented through cooperation with State agriculture departments and other Federal agencies and selections for testing are made based on EPA’s data needs.

Glyphosate has been a popular topic in agricultural/consumer news. Currently, FDA is testing corn and soybean grains for glyphosate residues. The FDA glyphosate residues testing will provide results to help determine if EPA needs additional data. When FDA results become available, USDA will consult with EPA to ensure we continue to provide quality data to meet EPA’s data needs.
Overarching Issues

1. Increasing Exports

Issue: The years 2011-2015 were the best for agricultural exports in U.S. history. However, many countries maintain barriers to U.S. agricultural exports related to animal and plant health concerns (sanitary and phytosanitary, or SPS, issues). Many of these barriers are not justified by science and impede U.S. agricultural export growth.

Public Policy Reason for APHIS Involvement: APHIS experts work with foreign counterparts to negotiate science-based import and export requirements, eliminate unjustified SPS barriers to trade, and advocate on behalf of U.S. agriculture in international forums such as the World Trade Organization, the World Organisation for Animal Health, and the International Plant Protection Convention. APHIS also helps exporters whose products have been detained in foreign ports. In addition, APHIS supports the free flow of exports by certifying that U.S. agricultural products meet importing countries' entry requirements.

APHIS’ Statutory/Regulatory Scope: In accordance with the Animal Health Protection Act, the Plant Protection Act, and related regulations, APHIS regulates the export of live animals and facilitates the export of animal products, plants, and plant products. APHIS supports these exports through its Veterinary Services (VS), Plant Protection and Quarantine (PPQ), International Services (IS), and Biotechnology Regulatory Services programs. Serving as the United States’ veterinary medical and plant protection authorities, respectively, VS and PPQ negotiate conditions for U.S. exports (with support from IS) and develop risk mitigations necessary to prevent the spread of pests and diseases.

Items in Controversy: [b] (5) Deliberative Process Privilege

Industry, Consumer, and Congressional Interest: In addition to relying on APHIS to resolve immediate trade issues involving exports, a wide range of exporters—including poultry, beef, and specialty crop producers—have asked APHIS to help expand their access to markets abroad. Congress requested reports on the status of foreign market access requests submitted by U.S. producers, companies, and others in the fiscal year (FY) 2016 Appropriations Act and FY 2017 House Appropriations Bill. As of October, the report in response to the FY 2016 Appropriations Act is in USDA clearance.
Executive Branch Position to Date: APHIS was a party to negotiations with 11 other Pacific Rim nations for the Trans-Pacific Partnership, concluded earlier this year. It is currently involved in negotiations for the Trans-Atlantic Trade and Investment Partnership with the EU. APHIS also holds annual meetings with representatives of major export sectors to determine issues of concern and how APHIS can assist. In FY 2015, APHIS resolved 171 trade-related issues valued at $2.5 billion; it also successfully obtained the release of 293 individual shipments valued at more than $25 million.

APHIS received increased funding in the last two appropriations acts ($2 million in FY 2015 and $1 million in FY 2016) to support resolution of issues affecting U.S. exports. The Agency is using this funding to support exports by, among other things, training and assigning more personnel to key positions domestically or in emerging markets, which have the largest potential growth for U.S. exporters but also present difficulties caused by technical and regulatory issues. APHIS is also using this funding to provide greater oversight of how growers and packers are implementing the export requirements of foreign countries, to ensure export products may enter foreign markets safely and efficiently.

APHIS has long worked to streamline the export process through continual advancements in its Web-based Phytosanitary Certificate Issuance and Tracking system, which handles all phases of the phytosanitary certificate application and issuance process. In response to an Executive Order to streamline the import and export process for America’s businesses, APHIS is also coordinating with other Federal agencies to implement the International Trade Data System. This system will allow businesses to electronically submit data required by U.S. Customs and Border Protection and partner government agencies to import or export cargo through a single “window.”

Potential Alternative Approaches: (b) (5) Deliberative Process Privilege

2. Border Security

Issue: Beginning in 2010, violence in Mexico at or near the U.S. border—mostly due to drug trafficking organizations—reached levels that required APHIS to periodically modify or suspend operations in some areas to ensure employee safety. APHIS takes these actions in concert with the U.S. Department of State (DOS), which has authority to determine whether U.S. Government (USG) personnel can operate in Mexico.

The violence tends to be transitory and operational actions APHIS takes are usually short-term, though there are exceptions. One involves APHIS’ movement of cattle inspection facilities from Mexico to four locations on the U.S. side of the border in Texas (Pharr, Del Rio, Eagle Pass, and Laredo). Border issues have also affected APHIS’ long-term pest and disease reduction-efforts with Mexico on bovine tuberculosis (TB), fruit fly, and cotton pest suppression programs, among
others. With respect to TB, security concerns have reduced APHIS’ ability to evaluate the TB program status of cattle coming from certain areas of Mexico. As a result, APHIS is unable to consider changing U.S. entry requirements for those cattle if the disease prevalence has changed—e.g., strengthening or reducing import restrictions as appropriate.

APHIS has nearly 600 employees along the U.S. border with Mexico working in a variety of programs to safeguard U.S. agriculture and to facilitate trade. Nearly half are Foreign Service national employees of APHIS who live and work in Mexico; the rest are U.S. residents whose work frequently requires them to cross into Mexico. DOS has prohibited USG personnel from working in areas of Mexico due to gun battles, executions, kidnappings, and carjackings. At times, APHIS employees have witnessed these activities, been directly threatened, and, on one occasion, robbed and carjacked.

**Public Policy Reason for APHIS Involvement:** APHIS’ work in Mexico helps facilitate trade and ensures that products exported from Mexico to the United States do not pose a disease or pest risk to U.S. agriculture.

**APHIS’ Statutory/Regulatory Scope:** APHIS’ programmatic activities in Mexico are carried out under the authority of the Animal Health Protection Act and the Plant Protection Act. However, DOS has ultimate authority over USG personnel in Mexico. APHIS security staff work with DOS’ Regional Security Officers and—as appropriate—the Department of Homeland Security (DHS) to assess security situations prior to a DOS determination.

**Items in Controversy:**

---

**Industry, Consumer, and Congressional Interest:** APHIS’ work in Mexico benefits agricultural importers and exporters in the United States who do business with counterparts in Mexico. Programmatic work in Mexico also helps safeguard U.S. citrus production in southern Texas, and much of Mexican fruit fly eradication efforts are undertaken in coordination with Mexico’s Secretary of Agriculture, Livestock Rural Development, Fisheries, and Food. Trapping for Mexican fruit flies along the northern Tamaulipas border is severely limited due to security issues. The citrus industry is concerned that if violence were to disrupt APHIS’ use of aerial release and sterile insect technique efforts to suppress fruit flies in Northern Mexico on a long-term basis, citrus production in south Texas could be impacted. In another case, the United States temporarily halted the import of Mexican avocados, when security concerns prevented APHIS from conducting inspections and certifying facilities to ensure the avocados met U.S. import requirements.

Several Congressional representatives have inquired about APHIS modifications or suspensions of activities along the border when they have impacted members of their districts, particularly in Texas. House Committee staff have informally inquired about border security issues in recent
years and their impact on some APHIS programs, especially the cotton pests programs. The House included language in the fiscal year 2016 appropriation directing APHIS to work with the U.S. cotton industry to develop a plan of action to protect the United States from boll weevil re-infestation. While APHIS is working with Mexican counterparts on the final stage of eradicating the cotton pest, security issues have affected this work because APHIS counterparts in Mexico cannot perform program activities such as conducting trapping and cotton treatment.

**Executive Branch Position to Date:** Employee safety and security is paramount and APHIS’ top priority. APHIS has developed strategies for ensuring a secure working environment for its employees, while protecting plant and animal health and allowing for safe trade. APHIS will continue to pursue such strategies as needed and will continue to work with DOS and DHS on evaluating potentially unsafe situations.

**Potential Alternative Approaches:** [b] (5) Deliberative Process Privilege

---

**Animal Care**

1. **Horse Protection Act (HPA)**

**Issue:** The HPA, passed by Congress in 1970 and enforced by APHIS, prohibits the showing, sale, auction, exhibition, or transport of sored horses. The HPA has dual purposes: eliminating the inhumane practice of soring and restoring fair competition within the walking horse industry. Soring is a cruel and inhumane practice that aims to accentuate a horse’s gait through the application of chemicals, mechanical agents, or training methods. Soring is primarily used in the training of Tennessee Walking Horses, racking horses and related breeds to gain an advantage for persons showing sored horses.

Currently, the horse industry trains and oversees horse show inspectors. A 2010 report from the Office of the Inspector General (OIG) found that this industry-led inspection process creates a conflict of interest that allows the inhumane practice of soring to continue. APHIS veterinary medical officers conduct unannounced inspections at roughly 18 percent of horse shows annually to evaluate industry-hired inspectors and to visually and physically inspect horses to determine compliance with the HPA. OIG found that, for the shows they reviewed, industry-hired inspectors issued 49 percent of their total violations at the six percent of shows APHIS officials also attended, indicating inconsistent application of the HPA. In July 2016, APHIS published a proposed rule (Docket No. APHIS-2011-0009) that would bring responsibility for training and licensing horse show inspectors directly under the control of APHIS, and implement prohibitions on equipment correlated to the presence of soring.

**Public Policy Reason for APHIS Involvement:** Eliminating the practice of soring is one of the original missions of the Agency and remains a top priority.
APHIS’ Statutory/Regulatory Scope: 1976 amendments to the HPA authorized the appointment of “qualified persons” to detect soreness in horses and led to the establishment of the Designated Qualified Person (DQP) program. The DQP program allows horse show management to obtain services from a DQP—who is licensed by a Horse Industry Organization—to detect horses that are sored. The HPA also authorizes APHIS to issue rules and regulations it deems necessary to carry out the provisions of the Act.

Items in Controversy: APHIS has faced legal challenges and Congressional questions about the consistency of APHIS inspections at HPA-covered events to detect soreness in horses, and the process for disqualifying horses from competition based on inspection findings. This issue has proven contentious enough to, in some cases, result in personal threats to Agency officials by horse show participants.

Industry, Consumer, and Congressional Interest: Several Representatives and Senators, along with members of the performance horse segment of the industry that continue to use pads and action devices during horse shows, exhibitions, sales, and auctions, oppose the proposed rule. Several other Representatives and Senators, together with the American Veterinary Medical Association, the American Association of Equine Practitioners, and the animal protection community, support the proposed changes.

Executive Branch Position to Date: The Administration published the proposed rule to bring responsibility for training and licensing horse show inspectors directly under the control of APHIS, and eliminate the use of stacked pads and chains and other “action devices,” as well as foreign substances. The proposed rule aligns with OIG’s recommendations that APHIS play a larger role in training and overseeing horse protection inspectors. APHIS extended the comment period on the proposed rule 30 days to October 26, 2016.

Potential Alternative Approaches: [b] (5) Deliberative Process Privilege

2. Inspection of Agricultural Research Service’s Research Facilities

Issue: In January 2015, the New York Times published a lengthy investigative piece alleging significant animal welfare violations at the U.S. Meat Animal Research Center (MARC), a U.S. Department of Agriculture (USDA) Agricultural Research Service (ARS) facility in Nebraska that works to improve livestock health and production.

In response to the article’s allegations, the Secretary directed ARS and APHIS to implement a plan to ensure that APHIS inspects ARS facilities that use animals for agriculture or production research. Additionally, the U.S. House of Representatives placed a directive in the fiscal year (FY) 2016 omnibus appropriation, instructing ARS to enter into an agreement with APHIS. Under the terms of the agreement, APHIS would conduct animal welfare inspections—as it does
for non-governmental entities regulated under the Animal Welfare Act (AWA)—at ARS facilities that use animals in agriculture or production research to ensure compliance with the AWA.

The AWA sets standards for the humane care and treatment of most warm-blooded animals exhibited to the public, bred for commercial sale, used in medical research, or transported commercially. Regulated facilities must provide their animals with, among other things, adequate housing, sanitation, nutrition, water, and veterinary care. Because the AWA generally exempts agriculture research from regulatory oversight, when evaluating ARS’ compliance with the AWA, APHIS will rely on both the AWA regulations and standards as well as the standards of care for farm animals used in research, as set forth in the Federation of Animal Science Societies’ Guide for the Care and Use of Agricultural Animals in Agricultural Research and Teaching (commonly referred to as the Ag Guide).

The House directive further stipulated that more than $57 million of ARS’ appropriation would not be obligated until the Secretary certified to Congress that ARS had updated its animal care policies and all ARS animal research facilities had established fully functioning Institutional Animal Care and Use Committees (IACUC). In compliance with the directive, APHIS and ARS signed a memorandum of understanding under which APHIS would conduct animal welfare inspections at ARS facilities and make the results of those inspections publically available on its website.

In August 2015, APHIS inspectors initiated pre-compliance site visits at ARS facilities to evaluate the welfare of animals at each facility and work with ARS officials on building an effective inspection program that will ensure the facilities are in full compliance with the AWA. The pre-compliance visits were completed in early October 2016. Based on ARS’ progress in meeting AWA requirements at its research facilities, the House appropriations committee released ARS’ remaining appropriation in the summer of 2016. Starting in November 2016, APHIS officials will begin conducting unannounced animal welfare inspections at 37 ARS locations engaged in agricultural research activities.

Public Policy Reason for APHIS Involvement: As the agency charged with enforcement of the AWA, APHIS was asked to fulfill Congress’s directive to oversee certain aspects of animal welfare at ARS research facilities.

APHIS’ Statutory/Regulatory Scope: APHIS is authorized under the AWA to conduct unannounced inspections of research facilities that use certain animal species. However, facilities that use only livestock or poultry for research to improve livestock health and production are exempt from AWA regulation. Prior to the House’s directive, all Federal Government research facilities were also exempt from registering with APHIS, as each agency has the responsibility to ensure that any of its facilities that conduct research on AWA-protected animals remain in compliance with the AWA. Federal animal research facilities have long been required to have animal oversight committees similar in composition and function to the IACUCs required at other research facilities.
Items in Controversy: The New York Times article alleged that a significant number of serious animal abuses were occurring at the MARC. Prior to the House directive, no Federal animal research facility was ever required to register with APHIS, although APHIS offers courtesy registration and inspections to Federal facilities upon request.

Industry, Consumer, and Congressional Interest: The New York Times article spurred other media to pick up the story, triggering concern about the alleged animal abuses at the MARC facility. The House Appropriations Committee, especially its Democratic staff, has expressed strong interest in the issue. At a February 2015 House Agriculture Committee hearing, Representative Brad Ashford (D-NE) asked the Secretary for an update on actions taken. In addition to requiring ARS to work with APHIS on the inspection process, the 2016 omnibus appropriations bill included language requiring ARS to share inspection reports with the Committee. Senator Corey Booker (D-NJ) and Representative Earl Blumenauer (D-OR) introduced companion bills in February 2015 that would amend the AWA to require inspections at Federal research facilities that conduct livestock research. However, the legislation did not advance.

Executive Branch Position to Date: APHIS and ARS have complied with the House of Representatives’ directives. During its inspections of ARS facilities, APHIS evaluates compliance based on AWA and Ag Guide standards. The IACUC at each ARS facility has the responsibility to closely monitor the care and treatment of animals and ensure that research protocols are properly carried out and documented. If, during an inspection, APHIS identifies a direct noncompliance (one currently having a serious or severe adverse effect on the health and well-being of the animal) with the AWA or Ag Guide, the facility’s IACUC will suspend the research activity until corrective action has been taken, and then report that action to APHIS.

3. Animal Welfare Act

Issue: APHIS administers the Animal Welfare Act (AWA) and its associated regulations, which set standards for the humane care and treatment of most warm-blooded animals exhibited to the public, bred for commercial sale, used in medical research, or transported commercially. Facilities using regulated animals for these purposes must provide their animals with, among other things, adequate housing, sanitation, nutrition, water, and veterinary care. The AWA also prohibits most animal fighting ventures. Every year, APHIS conducts roughly 10,000 unannounced inspections of facilities licensed or registered under the AWA, ensuring the health and welfare of more than 2 million animals. Sanctions for alleged violations of the AWA and its implementing regulations include license suspensions and revocations, civil penalties, cease and desist orders, and misdemeanor criminal penalties (for alleged violations of statutory provisions). APHIS operates a Center for Animal Welfare that provides training to employees and stakeholders and serves as the USDA national science and technology resource in support of the AWA. APHIS received $28 million from Congress in fiscal year (FY) 2015 and $28.4 million in FY 2016 for AWA-related activities.
Public Policy Reason for APHIS Involvement: Congress directed the Secretary of Agriculture to enforce the provisions of the Animal Welfare Act. APHIS’ extensive animal health capabilities and regulatory experience position it particularly well to oversee certain aspects of animal welfare.

APHIS’ Statutory/Regulatory Scope: The AWA does not cover all animals used in all activities. Farm animals used for food or fiber (fur, hide, etc.), coldblooded species (amphibians and reptiles), horses not used for research, fish, invertebrates (crustaceans, insects, etc.), or rats of the genus Rattus and mice of the genus Mus bred for use in research are not covered. Birds are covered under the AWA but we have not yet established specific regulatory standards for them.

Items in Controversy: APHIS has faced intense scrutiny and legal challenges from AWA licensees, animal protection groups, and concerned citizens, as well as Congressional inquiries, about its inspection activities at regulated facilities and sanctions levied for AWA violations. Certain issues—such as the welfare of elephants and big cats in circuses and zoos, dogs sold by breeders and dealers, orcas in exhibition, and primates used in laboratory research—are focal points for public attention and attract local and national press coverage.

Industry, Consumer, and Congressional Interest: APHIS receives a large volume of inquiries expressing concerns about the welfare of regulated animals. Although most industry partners work closely with APHIS to ensure they meet AWA standards, certain breeders and exhibitors consistently remain out of compliance with AWA standards; we have sanctioned them. Spurred by constituent and interest-group activism, Congressional offices regularly contact APHIS about its AWA-related activities. Some believe that APHIS is too intrusive or unfair in enforcement matters while others argue that APHIS does too little.

Executive Branch Position to Date: APHIS has undertaken significant actions in the past several years in response to Office of the Inspector General audits, congressional interest, and concerns from the general public, as well as internally generated initiatives. In 2013, APHIS finalized a rule amending the AWA to require dealers selling animals sight unseen over the Internet to be licensed. As with many animal welfare issues, this action generated intense congressional and public interest both for and against the rule. The following year, the Agency finalized a rule required by the 2008 Farm Bill to prohibit imports of most dogs into the United States for resale, research, or veterinary treatment unless the dogs are vaccinated, healthy, and at least 6 months old. In response to provisions in the FY 2016 Consolidated Appropriations Act, APHIS also stopped issuing or renewing AWA licenses for Class B “random” dealers selling animals from various sources, some believed to be illegitimate. In early 2016, the Agency published for public comment a proposed rule amending the AWA to further support the humane handling, care and treatment of marine mammals such as orcas in captivity; the comments are under review. APHIS also issued a policy promoting humane handling of newborn and infant exotic cats, such as tigers and lions, which risked illness and even death as a result of direct contact with the public, and held three public listening sessions on broader issues involving the handling of dangerous animals. In addition, APHIS has published a proposed “de minimis” rule authorized by the 2014 Farm Bill exempting certain businesses that are small or infrequently
exhibit certain animals—as well as owners of household pets that are exhibited occasionally and meet other criteria—from AWA license/oversight requirements. Public comments are due in early November 2016. Beginning that month, APHIS will perform regular inspections of animals at 37 USDA Agricultural Research Service research facilities to ensure AWA compliance.

To ensure fair and effective AWA enforcement, APHIS regularly reviews its internal processes, including its civil penalty guidelines, and reaches out to licensees and registrants to enhance their understanding of their obligations under the AWA. Further, although the AWA does not apply to privately owned pets, APHIS supports pets during emergencies. After Hurricane Katrina (2005), APHIS created an Emergency Programs division to work with the Federal Emergency Management Agency, States, and others to safeguard public safety and animal welfare by supporting collaborative capacity building in animal emergency management. Examples demonstrating the effectiveness of this effort include the Colorado airlift of over 800 animals accompanying owners evacuated from flood zones (2013) and recent Louisiana flooding (2016) where pets/animals were evacuated with their owners from flooded areas and sheltered.

Potential Alternative Approaches:  

4. Public Contact with Dangerous Animals

Issue: APHIS is considering revising the Animal Welfare Act (AWA) regulations governing handling and public contact of dangerous animals. APHIS’ main focus is ensuring the welfare of animals while striving to develop and enact the most appropriate measures to protect animals from any potential harm that can result from being handled by humans. Some members of the public, animal interest groups and the regulated community have strong and divergent views on the subject.

Public Policy Reason for APHIS Involvement: Congress directed the Secretary of Agriculture to enforce the provisions of the Animal Welfare Act. APHIS’ extensive animal health capabilities and regulatory experience position it particularly well to oversee certain aspects of animal welfare.

APHIS’ Statutory/Regulatory Scope: The Animal Welfare Act and its associated regulations require the enforcement by USDA (APHIS) of federally established standards of care and treatment for certain warm-blooded animals bred for commercial sale, used in research, transported commercially or exhibited to the public. This docket applies to the latter category.
**Items in Controversy:** APHIS receives many public complaints related to the handling of animals, including handling resulting in injuries to animals and the public. During follow-up inspections, APHIS often documents evidence of noncompliance with AWA handling regulations.

**Industry, Consumer, and Congressional Interest:** More than 70 AWA-licensed exhibitors allow public contact with dangerous animals. APHIS has issued internal and external guidance interpreting the handling regulations, particularly as they relate to the handling of large felids (big cats). On average, APHIS initiates 45 investigations each year related to the handling of animals, including cases that resulted in significant injuries to, and the deaths of, animals and members of the public. Within the past decade, approximately 74 percent of those cases involved exhibitors of animals.

**Executive Branch Position to Date:** When APHIS promulgated current handling regulations, APHIS stated “exhibitors do not have the right to allow contact between public and dangerous animals,” but the regulatory text itself is less clear on this point. In 2000, APHIS published a handling policy in the Federal Register for public comment, and, in 2004, withdrew this policy from consideration noting “any clarification of the regulations should take place through rulemaking.” Thereafter, in 2007, a licensed exhibitor sued APHIS in Federal District Court alleging APHIS’ interpretation of the handling regulations to restrict contact between juvenile and adult large felids (big cats) and the public was arbitrary and capricious. Although the District Court found APHIS’ interpretation of the regulations was not unreasonable (and the Fourth Circuit Court of Appeals affirmed this decision), APHIS is repeatedly challenged during both inspections and administrative enforcement proceedings regarding this interpretation, and exhibitors often seek to circumvent the handling regulations.

On August 5, 2013, APHIS published in the Federal Register for comment a petition filed by the Humane Society of the United States on behalf of a broader coalition of stakeholders to prohibit public contact with big cats, bears, and nonhuman primates. The published petition (Docket No. APHIS-2012-0107) received more than 15,000 public comments. Officials reviewed all comments and found overall support for the basis of the petition. As a result, APHIS published a notice on June 24, 2016, reopening the comment period for the petition to explore the possibility of revising the Animal Welfare Act (AWA) regulations governing handling of and public contact with dangerous animals. APHIS also hosted a series of listening sessions that allowed participants to provide oral comments and hear responses on handling regulations. Archived audio recordings and written transcripts of these sessions can be found at: https://www.aphis.usda.gov/aphis/ourfocus/animalwelfare/handling-dangerous-animals-feedback-page. APHIS officials are carefully reviewing the more than 6,000 comments they received on or prior to the August 31, 2016, closing of the reopened comment period, and they will evaluate and address all feedback before proceeding with any decisionmaking on this matter.

Additionally, on April 4, 2016, APHIS notified all affected USDA license holders of their regulatory responsibilities under the AWA to ensure that newborn and infant nondomestic cats 28 days of age or younger are provided preventive and responsive veterinary care and adequate housing and nutrition, and to ensure that these animals are handled safely and protected from
harm. Licensees must handle these animals in a manner that does not expose them to any form of public contact, including public feeding and handling. The guidance document is located at https://www.aphis.usda.gov/publications/animal_welfare/2016/tech-neonatal-nondomestic-cats.pdf.

Potential Alternative Approaches: [b] (5) Deliberative Process Privilege

Biotechnology Regulatory Services

1. Proposed 340 Regulations

Issue: USDA uses science-based regulatory systems to allow for the safe development, use, and trade of products derived from new agricultural technologies. USDA continues to regulate the importation, interstate movement, and field-testing of newly developed genetically engineered (GE) organisms that qualify as “regulated articles” to ensure they do not pose a threat to plant health before they can be commercialized. These science-based evaluations facilitate the safe introduction of new agricultural production options and enhance public and international confidence in these products. As a part of this effort, the Animal and Plant Health Inspection Service (APHIS) will publish a proposed rule to revise its regulations regarding the regulation of GE organisms.

Public Policy Reason for APHIS Involvement: APHIS’ mission is to protect plants from plant pests and noxious weeds, and is conducted under the authority of the PPA. There’s a critical need to make the current regulations more relevant in light of significant scientific advances and the risk assessment experience gained over the years. APHIS plans to better align its regulations with its statutory authority, align its regulatory oversight with risks to plant health, and ensure its regulatory program is more consistent with the current status of the science of genetic engineering.

APHIS’ Statutory/Regulatory Scope: When current biotechnology regulations were codified in 1987, the PPA had not yet been passed and the existing regulations were written pursuant to the Federal Plant Pest Act of 1957. The Plant Protection Act of 2000 gives APHIS authority to regulate organisms that are plant pests, noxious weeds, or both, and pose a risk to plant health. Amongst other changes, the proposed revisions will more closely align our regulations with the PPA to allow APHIS to regulate GE organisms that may pose a plant pest or noxious weed risk.

Items in Controversy: In March 2015, USDA withdrew a 2008 proposed rule to change the regulations. The 2008 proposed revisions were extensive and included significant changes to the scope of the regulations and the mechanics of APHIS’ regulatory oversight. APHIS received more than 88,300 comments on the 2008 proposed rule, indicating the proposed scope and many of the provisions of the rule were unclear, needed additional rigor, were far-reaching and overly restrictive. APHIS received concerns regarding what future criteria might be used to determine what organisms would fall under APHIS regulatory jurisdiction. Concerns regarding oversight
of crops that produce pharmaceutical and industrial compounds and increased regulatory burden are just a few examples of the complex issues raised by commenters. Therefore, APHIS withdrew the 2008 proposed rule and sought additional input from stakeholders.

In 2015, following the withdrawal of the 2008 proposed rule, APHIS reached out to the public for input with a series of webinars and through a public comment period to start a fresh dialogue with stakeholders on future proposed rulemaking. We received more than 220,000 comments. After considering those comments, on February 5, 2015, APHIS published a Notice of Intent (NOI) to prepare a programmatic environmental impact statement (EIS), as required for any significant rule change. The Agency is thoroughly considering all public input submitted during the 75-day public comment period on the NOI as we develop the draft programmatic EIS and the new proposed rule.

The goal of the proposed regulation is to consider a broader range of potential harms, prevent potential gaps in oversight, improve clarity and transparency of risk assessments, and regulate by specifically identifying and including all GE organisms that may pose plant pest or noxious weed risks. Although APHIS will be conducting initial reviews of certain types of GE organisms that are not now subject to review, overall the proposed rule will lead to substantial regulatory relief that fosters innovation through a more efficient, risk-based system. APHIS will stay within the statutory authority of the PPA, and the public will have ample opportunity to comment on the proposed rule and the draft programmatic EIS. Based on the comments already received on the NOI, APHIS has modified the alternatives considered in its draft programmatic EIS.

Revising the current regulations will help ensure the appropriate oversight by the regulatory system and increase transparency, while continuing to provide a framework that fosters innovation to address some of society’s most pressing challenges.

**Industry, Consumer, and Congressional Interest:** Biotechnology itself is a controversial subject, with strong convictions both from those who oppose it and those who support it. Industry organizations currently regulated by APHIS are generally supportive of the concept of revising the regulations to reflect scientific advances and to better align regulation with risk. Some special interest groups/NGOs oppose genetic engineering in general and tend to resist any change they perceive as resulting in less regulation. Congressman Aderholt (R-AL) of the House Agriculture Appropriations Subcommittee has historically been interested in APHIS’ biotechnology and regulatory efforts.

**Executive Branch Position to Date:** APHIS has been communicating about a new rule throughout the Executive Branch for nearly two years, and has strong support from the Executive Office of the President, as well as our Coordinated Framework partners in Health and Human Services’ Food and Drug Administration and the Environmental Protection Agency, and from other USDA agencies. In September 2016, APHIS sent the proposed rule to the Office of Management and Budget for its review as part of the formal rulemaking process. When that review process is complete, APHIS intends to publish the proposed rule for public comment.
2. Coordinated Framework

**Issue:** The White House Office of Science and Technology Policy (OSTP) is leading a process to modernize the Federal regulatory system for products of biotechnology. This is to ensure that Federal regulatory agencies with jurisdiction over biotechnology products keep pace with rapidly changing science, without creating barriers to future innovation and competitiveness. The Executive Office of the President released two documents on September 16, 2016 as part of that effort.

**Public Policy Reason for APHIS Involvement:** The Coordinated Framework for the Regulation of Biotechnology (CF) describes the comprehensive Federal regulatory policy for ensuring the safety of biotechnology products and is comprised of the regulatory authorities and review efforts of the Food and Drug Administration (FDA), the Environmental Protection Agency (EPA), and the USDA. Advances in science and technology have dramatically altered the biotechnology landscape, enabling the development of products not envisioned when the CF was published. In addition, the complexity of the array of regulations and guidance documents developed by the three primary Federal agencies can make it difficult for the public to understand how the safety of biotechnology products is evaluated. Navigating the regulatory process for these products can be challenging, especially for small companies.

**APHIS’ Statutory/Regulatory Scope:** USDA’s authority to regulate genetically engineered (GE) plants falls under the Plant Protection Act (PPA). Under the PPA, APHIS regulates certain GE organisms that may be plant pests and pose a risk to plant health. The update of the CF is especially timely for USDA as it considers options for revising its regulations for the field-testing and development of new GE organisms. APHIS plans to better align its regulations with its statutory authority, better align its regulatory oversight with risks to plant health, and ensure its regulatory program is more consistent with the evolving science of genetic engineering. These activities support the goals of the OSTP in its effort to modernize the Federal regulatory system for products of biotechnologies.

**Items in Controversy:** The current regulatory system for the products of biotechnology effectively protects health and the environment. However, in some cases, unnecessary costs and burdens associated with regulatory uncertainty about agency jurisdiction, and lack of predictability of timeframes for review, for example, have grown. Updating the CF and laying the foundation for future updates is intended to help ensure the appropriate oversight by the regulatory system and increase transparency, while continuing to provide a framework for advancing innovation to address some of society’s most pressing challenges.

**Industry, Consumer, and Congressional Interest:** Biotechnology itself is a controversial subject, with strong convictions both from those who oppose it, and those who support it.
Chairman Aderholt (R-AL) of the House Agriculture Appropriations Subcommittee has historically been interested in APHIS’ biotechnology and regulatory efforts.

**Executive Branch Position to Date:** APHIS, FDA, and EPA have been working closely with the Executive Office of the President (EOP) to modernize the CF.

On July 2, 2015, the EOP directed FDA, EPA, and USDA to update the CF by clarifying current roles and responsibilities, to develop a long-term strategy to ensure that the Federal biotechnology regulatory system is prepared for the future products of biotechnology, and to commission an expert analysis of the future landscape of biotechnology products to support these efforts. For the last 14 months, these agencies have analyzed Federal regulation of biotechnology products, reviewed more than 900 comments submitted in response to a Request for Information, and conducted three public meetings in different regions of the country, with presentations, case studies, and break-out “listening sessions.”

EOP released two products of this effort: the *Update to the Coordinated Framework for the Regulation of Biotechnology*, and the *National Strategy for Modernizing the Regulatory System for Biotechnology Products*.

The *Update to the Coordinated Framework for the Regulation of Biotechnology* offers the public a complete picture of the regulatory structure that provides oversight for the products of modern biotechnology, and present clarifying information about agency roles, responsibilities, and coordination. On September 22, 2016, the OSTP published a notice in the Federal Register asking for public comments on the proposed update to the CF. Comments will be accepted through November 1.

The *National Strategy for Modernizing the Regulatory System for Biotechnology Products* sets forth a 5-year vision for ensuring that the Federal regulatory system is equipped to assess efficiently the risks, if any, associated with future products of biotechnology while supporting innovation, protecting health and the environment, maintaining public confidence in the regulatory process, increasing transparency and predictability, and reducing unnecessary costs and burdens.

FDA, EPA, and USDA have also commissioned a report by the National Academies of Sciences, Engineering, and Medicine, titled “*Future Biotechnology Products and Opportunities to Enhance Capabilities of the Biotechnology Regulatory System.*” The report is expected to be released at the end of 2016 and will be used by the agencies to: 1) gain a better understanding of future products and how they fit within the U.S. regulatory system; 2) consider any necessary updates to scientific assessments; 3) consider any necessary updates to regulatory processes or procedures; and 4) enhance communication with stakeholders.

3. **Significant Biotechnology Issues**

**Issue:** The Federal government has been regulating genetically engineered (GE) organisms since 1987. As part of the regulatory process, APHIS ensures that developers, growers, and
others take important steps to prevent unauthorized releases of GE organisms. However, there remain several significant issues, including the coexistence of GE crops with non-GE and organic crops, herbicide resistant weeds, the labeling of GE products and new and emerging technologies used to modify plant genes that require further consideration by both APHIS and other Federal agencies.

Public Policy Reason for APHIS Involvement: The biotechnology industry—valued worldwide at $280 billion—creates products that can improve medical care and increase agricultural production. While American farmers and consumers can benefit from the products, it is important to ensure that they do not pose a risk to America’s agricultural and natural resources. APHIS works to ensure new GE crops will not pose plant health risks when released into the environment.

APHIS’ Statutory/Regulatory Scope: The Plant Protection Act gives APHIS authority to regulate certain GE organisms that might pose a risk to plant health. APHIS regulates the introduction—meaning the importation, interstate movement, and field-testing—of certain organisms derived through biotechnology that may pose a plant pest risk.

Items in Controversy:

- **Coexistence:** USDA’s policy has been to support all forms of agriculture, including GE, non-GE and organic, and to strengthen coexistence among these agricultural production systems. In order to maintain the integrity of differentiated markets, farmers employ a variety of practices to prevent the accidental comingling of GE crops with other crops. When comingling does happen, some stakeholders have the strong opinion that the companies who patent, promote, and profit from GE products should be responsible for covering the losses associated with the impacted crops and for taking measures to prevent this from occurring in the future. Currently, there is no compensation mechanism for farmers impacted by unintended presence of GE in non-GE production. USDA is working with an Advisory Council (AC21) to identify measures that can promote and strengthen coexistence. These include:
  - Engaging stakeholders and seeking public input on how to foster communication and collaboration to strengthen coexistence.
  - Funding or conducting research relevant to crop stewardship and gene flow risk mitigation under USDA’s Biotechnology Risk Assessment Grants program.
  - Development of an approach for examining seed purity of holdings in the USDA/Agriculture Research Service National Plant Germplasm System.

- **Herbicide Resistant Weeds:** The Environmental Protection Agency (EPA) is currently the only Federal agency with authority to implement weed resistance management through the Federal Insecticide, Fungicide, and Rodenticide Act. APHIS’ role in this effort is to promote the use of best management practices during GE field trials, especially for field trials of herbicide resistant crops. APHIS is collaborating USDA’s Natural Resources Conservation Service, the Office of Pest
Management Policy, the EPA, and the Weed Science Society of America to better understand impediments to the adoption of weed management strategies and to identify ways to encourage producers to adopt diverse tactics for weed management, including herbicide control.

- **Labeling:** APHIS has no direct role in the labeling of GE products. The Food and Drug Administration has issued labeling guidance for companies who wish to voluntarily label their products, and several food companies are doing so. Additionally, States have considered laws to mandate labeling for food products. In July 2016, Congress passed a disclosure law that requires most food packages to carry a text label, symbol or electronic code to indicate whether the food contains biotech material. The President signed the bill on August 1, 2016; this law preempts any state laws. The authority provided by the July 2016 law was delegated to the Agricultural Marketing Service.

- **Gene Editing Technology:** Several methods of gene editing (Zinc Fingers, TALENs and CRISPRs) are now being used to modify crops. For example, in 2015, APHIS responded to two inquiries regarding the need for regulation for products developed with CRISPRs. For both products, a white button mushroom developed by Penn State, and waxy corn developed by DuPont Pioneer, the only change to the plant genome was a deletion. APHIS determined that neither product falls under APHIS regulations because no genetic material from plant pests was inserted into the final genomes. APHIS also concluded that neither plant presents a risk to plant health as weeds. However, APHIS regulates GE plants produced using genome editing techniques if plant pest DNA is inserted in the final product or otherwise poses a risk to plant health.

**Industry, Consumer, and Congressional Interest:** There are a wide variety of viewpoints on these issues - some stakeholders believe that GE products are too dangerous and need more regulation (or should be banned), while others believe that APHIS should expedite the deregulation of products. Consumers are very supportive of product labeling. In 2015, Congressman Bishop (D-GA) asked about coexistence, and Congresswoman Pingree (D-ME) asked about “superweeds” as part of the House Agriculture Appropriations hearing. Congresswoman Pingree also states that consumers want to know what is in their food (labeling) and growers do not want their crops contaminated.

**Executive Branch Position to Date:** APHIS supports all forms of agriculture. We hear the concerns of all types of farmers and where able, are providing dedicated resources to address public concerns.
International Services

1. Engagement with Cuba

Issue: The decision to extend diplomatic relations to Cuba has already led to greater movement of people; ultimately, it may also entail increased U.S. agricultural exports and the lifting of the current U.S. embargo on Cuban imports. Given decades of limited contact, however, relatively little is known about the current state of Cuban agriculture, including its plant and animal pests and diseases. On the first official USDA visit to Cuba since 1961, focused on strengthening bilateral agricultural engagement, Secretary Vilsack recommended that Cuba complete detailed pest risk analyses to start the decisionmaking process for exports when the embargo is lifted. If trade restrictions are lifted and the United States allows imports from Cuba, domestic producers may be concerned about the introduction of potentially harmful plant and animal pests and diseases under APHIS’ purview, including screwworm and classical swine fever—both eradicated in the United States—and possibly fruit flies and other threats.

Public Policy Reason for APHIS Involvement: APHIS safeguards U.S. agricultural and natural resources against the entry, establishment, and spread of significant pests and diseases, while facilitating the safe and fair trade of agricultural products.

APHIS’ Statutory/Regulatory Scope: In accordance with the Plant Protection Act and the Animal Health Protection Act, APHIS safeguards U.S. agriculture from potentially harmful plant and animal pests and diseases that may be present in Cuba.

Items in Controversy: APHIS’ Cuban counterparts wish to begin exporting agricultural products to the United States. Similarly, many U.S. agricultural industries and States are interested in opening or expanding markets for U.S. products— particularly rice, wheat, soybeans, pork, poultry, and corn—to Cuba.

Industry, Consumer, and Congressional Interest: In 2015, the United States exported $148 million worth of agricultural products to Cuba. U.S. poultry and soybean producers account for a large share of these exports and have a vested interest in expanded trade relations. Other industry groups, including the American Farm Bureau Federation, the American Feed Industry Association, the International Dairy Foods Association, the National Farmers Union, and the U.S. Grains Council have also expressed significant interest in a more open Cuban market. During the November 2015 USDA visit to Havana, Secretary Vilsack was accompanied by APHIS Administrator Kevin Shea, U.S. Senator Jeff Merkley (D-Oregon), and U.S. Representatives Terri Sewell (D-Alabama), Suzan DelBene (D-Washington), and Kurt Schrader (D-Oregon).

Executive Branch Position to Date: For many years, APHIS has sought to stay current on potential Cuban agricultural risks through its offices in Puerto Rico, the Dominican Republic, Haiti, and Trinidad and Tobago. APHIS has also participated in regional initiatives such as CaribVET and the Caribbean Plant Health Directors Forum, which facilitates information exchange between APHIS and Cuban regulatory counterparts. APHIS has supported U.S.
exporters through such successful actions as working with Cuban counterparts to lift bans on U.S. poultry imports related to highly pathogenic avian influenza and ensuring Cuban recognition of the United States as a country at negligible risk for bovine spongiform encephalopathy.

Along with the signing of a Memorandum of Understanding establishing bilateral cooperation in the U.S. and Cuban agricultural and forestry sectors, APHIS has been involved in workplan negotiations to develop relationships with Cuban animal and plant health counterparts and address risks from established pests and diseases in Cuba. APHIS recently sent an employee on detail to Cuba to facilitate information exchanges between APHIS plant and animal health experts and their Cuban counterparts.

Potential Alternative Approaches:

**Plant Protection and Quarantine**

1. **Argentine Lemon Imports**

**Issue:** Argentina has requested that APHIS amend its regulations to allow the importation of lemons from the northwest region of that country into the United States. APHIS approved market access for Argentine lemons in 2000, but in October 2001 the U.S. citrus industry filed a lawsuit opposing this decision and APHIS stopped importations.

In 2013, Argentina requested consultations with the United States through the World Trade Organization (WTO) regarding market access for Argentine lemons. In response, in April 2014 APHIS completed a pest risk analysis, and in June 2015 conducted a site visit. In May 2016 APHIS used this information to publish a proposed rule (Docket No. APHIS-2014-0092-0001) that would allow the importation of lemons from Northwest Argentina under a systems approach. The systems approach would require a series of safeguards to effectively mitigate pest risk.

In September 2016, after an extended comment period that ended on August 10, 2016, APHIS conducted another site visit during peak growing season to verify that Argentina had implemented the proposed mitigation measures. The Agency then shared its findings with industry and other stakeholders that its site visit confirmed that Argentina has a system of safeguards in place to mitigate any pest risk. If the Office of Management and Budget (OMB) designates the rule not significant, APHIS intends to publish a final rule by December 2016. If it is deemed significant, publication would likely be 3 to 4 months later.
Public Policy Reason for APHIS Involvement: APHIS safeguards U.S. agriculture and natural resources against the entry, establishment, and spread of significant pests, while facilitating the safe and fair trade of agricultural products.

APHIS’ Statutory/Regulatory Scope: APHIS regulates the importation of fruits and under the Plant Protection Act and our regulations in “Subpart—Fruits and Vegetables” (7 CFR 319.56-1 through 319.56-74).

Items in Controversy: Argentina began consultations through the WTO and, if the rule is not finalized, would likely proceed with the dispute. If this rule is finalized, the U.S. citrus industry may again attempt to block imports through legal action, as it did 2001.

Industry, Consumer, and Congressional Interest: There is both support for and opposition to the rule. There is congressional support from representatives of States with large ports who believe there would be an economic benefit to granting market access. Industry and legislators from citrus-growing States strongly oppose the rule. Congresswoman Rosa DeLaura (D-CT) also expressed concerns that the United States would make regulatory concessions due to WTO involvement.

Executive Branch Position to Date: APHIS has determined the systems approach will mitigate pest risk; the current administration believes the rule is necessary to strengthen the trade relationship with Argentina and avoid issues with the WTO.

Potential Alternative Approaches: (b) (5) Deliberative Process Privilege

2. European Union (EU) Apple and Pear Imports

Issue: The EU requested that APHIS amend its regulations to replace the current preclearance program with a systems approach for the importation of apples and pears from certain member countries: Belgium, Germany, France, Italy, Poland, Portugal, Spain, and the Netherlands. Under the current preclearance program, we require producers in the exporting countries to contribute to a trust fund to cover the cost of APHIS inspection in the exporting country, as well as any risk mitigation measures. The systems approach, which combines a series of risk mitigation measures, would eliminate this preclearance inspection protocol and rely on individual countries’ National Plant Protection Organization to ensure that producers carry out required risk mitigation activities in fields and packing houses. APHIS plans to conduct an annual audit of the systems approach and works with the Department of Homeland Security’s Customs and Border Protection to carry out inspections of arriving apple shipments to ensure compliance with the U.S. import requirements.

In 2015, APHIS published a risk management document that outlined risk mitigation measures necessary to address previously identified pest risks. These measures are essentially the same as
those used in the current preclearance program. APHIS published a proposed rule (Docket No. APHIS-2015-0073-0001) in January, 2016 reflecting the change to a systems approach.

**Public Policy Reason for APHIS Involvement:** APHIS safeguards U.S. agriculture and natural resources against the entry, establishment, and spread of significant pests, while facilitating the safe and fair trade of agricultural products.

**APHIS’ Statutory/Regulatory Scope:** APHIS regulates the importation of fruits and under the Plant Protection Act and our regulations in “Subpart—Fruits and Vegetables” (7 CFR 319.56-1 through 319.56-74).

**Items in Controversy:** Poland was a late addition to the list of countries seeking market access. However, unlike the other countries on the list, APHIS has not completed a separate pest risk assessment for Poland because that country’s pests were previously identified and analyzed in published materials.

**Industry, Consumer, and Congressional Interest:** Industry and some legislators have expressed concern about pest risk generally and specifically with regard to Poland. In March 2012, the EU banned the import of U.S. apples based on their reduced tolerance level for a chemical used by U.S. producers to mitigate disease risk. U.S. stakeholders are concerned about the resulting trade imbalance.

**Executive Branch Position to Date:** APHIS determined the systems approach will mitigate the risk of pest introductions and that imports would not pose a threat of pest introduction. APHIS is proceeding with decision making at this time.

**Potential Alternative Approaches:**

3. **Potatoes to Mexico**

**Issue:** The U.S. potato industry has long wanted market access for U.S. fresh, table-stock potatoes to all of Mexico, but efforts toward this goal have met a series of ongoing roadblocks. In 2003, APHIS and Mexico’s Ministry of Agriculture, Livestock, Rural Development, Fish, and Food (SAGARPA) signed an operational work plan that allowed immediate access for U.S. fresh, table-stock potatoes to Mexican markets within a 26-kilometer border zone. Provisions in the work plan also anticipated that expansion of market access for U.S. table-stock potatoes to all of Mexico would be phased in over time. Exports of U.S. seed potatoes for planting were excluded from this agreement.

In the spring of 2014, APHIS published a new regulation to authorize Mexico to export fresh table-stock potatoes to the United States, and SAGARPA issued new regulations allowing the long-awaited access for U.S. table-stock potatoes to all States in Mexico. APHIS and
SAGARPA then signed new work plans to harmonize the two countries’ mutual trade in potatoes. Beginning on May 19, 2014, U.S. exporters shipped about 15.5 million pounds of product into Mexico’s expanded markets. However, after just a few weeks of expanded access, a Mexican court issued an injunction suspending SAGARPA’s new potato regulations in response to a series of lawsuits filed by the National Confederation of Potato Producers. Under the injunction, U.S. potato exporters were allowed continued access to the original 26-kilometer border area. Mexican exporters to date have not shipped any fresh potatoes to the United States.

On May 26, 2016, SAGARPA officially cancelled its 2014 regulation, and on June 6, 2016 provided APHIS with a new work plan for comment, which both APHIS and U.S. industry considered to be too restrictive. APHIS provided its comments to SAGARAPA on June 10, 2016. On July 15, 2016, Mexican President Peña Nieto issued a presidential order authorizing the market expansion for U.S. fresh table-stock potatoes to all Mexico as a temporary measure until SAGARPA could publish new regulations for the import of U.S. table-stock potatoes. However, on July 20, a Mexican court issued yet another injunction that suspended President Nieto’s executive order.

U.S. industry representatives have estimated that U.S. table-stock potato exports could increase from the approximately $40 million worth of fresh potatoes currently exported to the 26-kilometer border zone to $150 million or more if U.S. exporters had market access to all of Mexico for table-stock potatoes.

**Public Policy Reason for APHIS Involvement:** APHIS safeguards U.S. agriculture and natural resources against the entry, establishment, and spread of significant pests, while facilitating the safe and fair trade of agricultural products.

**APHIS’ Statutory/Regulatory Scope:** Under the Plant Protection Act, APHIS has authority to establish import regulations to safeguard U.S. agriculture. As the recognized National Plant Protection Organization for the United States, APHIS is authorized to represent overall U.S. agricultural interests in bilateral trade negotiations concerning the import and export of agricultural commodities. As a signatory of the International Plant Protection Convention (IPPC), APHIS plays a key leadership role in protecting the world’s plant resources from pests and diseases. APHIS’ membership in the IPPC fosters international relationships on behalf of our stakeholders to support new market access, market expansion, and market retention for U.S. exports.

**Items in Controversy:** The plaintiffs representing Mexico’s potato producers claim that imported U.S. table-stock potatoes, although labeled for consumption only, would put Mexico’s agriculture at risk from as many as 60 quarantine pests and diseases because the potatoes could be diverted for agricultural production in Mexico. One of the bilaterally agreed-upon phytosanitary mitigations in the 2014 work plan required U.S. potato shipments to be pretreated with an anti-sprouting solution that would minimize any risk of the potatoes being diverted for agricultural purposes. Under the IPPC to which both the United States and Mexico are signatories, the intended use of a commodity must be taken into account when establishing any phytosanitary restrictions on a commodity.
Industry, Consumer, and Congressional Interest: The U.S. potato industry supports the Federal Government’s efforts to press at all levels for a resolution that would allow full access to Mexico’s fresh potato market. APHIS has not received any Congressional inquiries on this issue since 2011.

Executive Branch Position to Date: Although the Office of the U.S. Trade Representative has closely monitored this situation, the resolution of this matter remains within Mexico’s court system.

Potential Alternative Approaches: [b] (5) Deliberative Process Privilege

4. Fruit Flies/Sterile Fruit Fly Facilities

Issue: U.S. agriculture is at risk from exotic fruit flies that could enter the United States across our southern border as well as through infested host plants, fruits, and vegetables that unintentionally or illegally enter the country. Southern Texas faces a continuous threat from introductions of Mexican fruit fly (Mexfly), and Florida and California experience frequent introductions of Mediterranean fruit fly (Medfly) and Oriental fruit fly (OFF). Medfly, OFF, Malaysian fruit fly, and melon fly are established in Hawaii and continually threaten the mainland. Because the larvae of these exotic species can feed on more than 400 host plants and render fruit inedible, they are among the most destructive pests of fruits and vegetables around the world. The establishment of any of these species within the continental United States would cause significant economic losses from the damage to host commodities, the costs associated with implementing control measures, and the loss of export markets.

To prevent the introduction and establishment of exotic fruit flies, APHIS employs a proven strategy involving surveillance trapping, quarantine restrictions, port of entry inspections, and mating disruption using sterile insect technique. Use of the sterile insect technique (SIT) has remained a key component of its cooperative exotic fruit fly control programs for over 30 years. SIT involves the mass-rearing of sterilized exotic fruit flies. When released, sterile male fruit flies mate with wild females, which disrupts natural breeding and the production of progeny because the female’s eggs remain unfertilized. Through continuous releases, this form of mating disruption significantly reduces wild fly populations and aids eradication.

USDA maintains cooperative programs with the governments of Mexico, Guatemala, and Belize, which employ SIT and other mitigation strategies to diminish the populations of exotic fruit flies in those countries. These cooperative efforts reduce destruction of fruit, improve local food production, and decrease the pest risk to the United States.
APHIS also operates domestic SIT facilities in California, Florida, and Texas. The California and Florida facilities currently receive sterile Medfly pupae from the facility in Guatemala, and the Texas facility receives some supplemental Mexfly pupae from Guatemala. The domestic facilities rear and release hundreds of millions of sterile Mexflies and sterile male Medflies each week for ongoing preventive release efforts and domestic outbreak eradication campaigns against these two pests. However, APHIS and State cooperative fruit-fly program managers have completed comprehensive evaluations of all of the domestic SIT facilities and determined that these facilities were all beyond their useful lifespan, have inefficiencies that lead to production losses, and—in some cases—pose health and safety concerns for workers. New domestic facilities would also allow for a significant increase in the quantities of sterile Medflies and Mexflies produced, which could enable the United States to become self-sustaining in sterile fruit-fly production and provide a reserve capacity for mitigating any future outbreaks required to protect U.S. agricultural resources. Because the landowners of the Florida facility have opted not to renew the lease that will expire in 2017, work to replace that facility has already begun.

**Public Policy Reason for APHIS Involvement:** APHIS’ efforts, in cooperation with State officials and industry stakeholders, to prevent exotic fruit flies from becoming established in the United States directly protect approximately $5 billion in citrus and tree fruit production.

Although one of the long-term goals of APHIS’ Fruit Fly Exclusion and Detection Program is to eradicate Medfly throughout Guatemala, the more realistic aim—given current resources and available technology—is to prevent Medfly’s northward movement into Mexico and the United States.

**APHIS’ Statutory/Regulatory Scope:** The Plant Protection Act authorizes APHIS to take action against plant pests that cause damage to agricultural assets, to prevent such pests from entering and establishing in the United States, and to cooperate with other countries in taking such actions.

**Items in Controversy:** Due to violence and security issues in areas surrounding the northern border of Mexico, Mexfly surveillance and SIT preventive-release activities in these regions have significantly decreased and in some cases stopped. This has significantly increased the Mexfly threat to Texas. Because all of the domestic SIT facilities in Florida, Texas, and California are in a serious state of physical decline and need to be replaced, APHIS will need additional funding to replace all of those facilities and ensure production of sufficient quantities of sterile fruit flies to protect vulnerable agricultural areas of the United States.

**Industry, Consumer, and Congressional Interest:** Susceptible producers in the South and Southwest, and in the citrus industry in particular, strongly support APHIS’ safeguarding efforts and fruit fly eradication campaigns. Industry, most notably Texas Citrus, has asked Congressman Vela (D-TX) and others to seek Congressional funding for upgrades to SIT facilities that produce and release sterile fruit flies in Florida, California, and Texas. Congressman Rooney (R-FL) has questioned APHIS’ capacity to produce sufficient quantities of sterile Mexfly.

**Executive Branch Position to Date:** APHIS’ total appropriation for its domestic and international exotic fruit fly eradication and control efforts totaled $59.6 million in fiscal year 2016. Through this funding, APHIS maintains a cooperative, nationwide trapping and surveillance program, which serves as an early warning system for pest introductions. In addition, USDA continues to prioritize cooperative programs with foreign governments. APHIS’ efforts also include mounting domestic quarantine eradication campaigns in response to exotic fruit fly introductions. During the past two years, unprecedented numbers of exotic fruit fly introductions have occurred in Florida, Texas, and California. All Medfly and OFF infestations in the mainland United States have now been eradicated, but five of the eight Mexfly quarantines established in southern Texas during the year remain in place.

The House Appropriations Committee included $30 million for APHIS in the FY 2017 Agriculture Appropriations.

**Potential Alternative Approaches:**

5. **Citrus Health Programs**

**Issue:** The presence in the United States of exotic citrus diseases, especially citrus canker and Huanglongbing (HLB, aka citrus greening)—which is spread by the Asian citrus psyllid (ACP)—hampers the ability of commercial citrus industries to produce, harvest, process, domestically move, and internationally export healthy fruit and clean plant stock. APHIS supports citrus health-related activities through its Citrus Health Response Program (CHRP) and its leadership in USDA’s HLB-Multiagency Coordination (MAC) Group.

APHIS has established Federal quarantines for citrus canker, HLB, and ACP in parallel with quarantines already imposed at the State level.

- The entire State of Florida, as well as portions of Louisiana and Texas, are quarantined for citrus canker.
- The entire States of Florida and Georgia, as well as portions of Louisiana, Texas, and California, are quarantined for HLB. All of Guam, Puerto Rico, the U.S. Virgin Islands, and the Northern Mariana Islands are also quarantined for HLB. The biology of HLB does not lend itself to early detection or eradication.
- The entire States of Florida, Georgia, Alabama, Mississippi, Louisiana, Arizona, and Texas, as well as portions of South Carolina, Nevada, and California, are quarantined for ACP. All of Guam, the Northern Mariana Islands, and American Samoa are also quarantined for ACP.
Public Policy Reason for APHIS Involvement: The United States ranks third overall in citrus production globally, and the packinghouse-door value of U.S. citrus production in 2015 was more than $3 billion. In addition, approximately 100,000 U.S. jobs are generated from the harvesting, packing, processing, transportation, and retail sale of fresh and processed citrus fruit and citrus nursery stock production.

APHIS’ Statutory/Regulatory Scope: Section 412(a) of the Plant Protection Act of June 20, 2000, as amended, 7 U.S.C. 7701, provides APHIS with broad authority to prohibit or restrict the movement in interstate commerce of any plant, plant part, article, or means of conveyance if necessary to prevent the introduction or dissemination of a plant pest, including citrus pests/diseases.

Items in Controversy: Although tree removal is the best way to stop the spread of HLB and citrus canker, there has been some resistance to removing trees, especially from residential citrus owners. Additionally, trees infected by HLB can take years to develop symptoms, further fostering opposition to tree removal. Industry is pushing for early detection technologies, but regulatory applicability of these technologies has not been established. There has also been some resistance to spray programs to control ACP populations. Each citrus-producing State—in particular Florida and California—has different priorities, diverse approaches to disease management, and wants a larger share of CHRP funding.

Industry, Consumer, and Congressional Interest: The citrus industry is a strong supporter of CHRP. Congressman Rooney (R-FL) represents a citrus-growing district and submitted questions for the record about the proposed decrease in Federal cost-share for CHRP during budget hearings. In July 2016, Congressman Denham (R-CA) inquired about funding sources to help California combat HLB. Congress provided $20 million in 2-year funding for FY 2014/15 to help establish the HLB MAC Group, and provided an additional $5.5 million in two-year funding for its continuation in FY 2016/17.

Executive Branch Position to Date: Secretary Vilsack established the HLB-MAC in December 2013 as a means to coordinate the response of Federal, State, and industry in order to reduce the impact of HLB on the U.S. citrus industry. The HLB-MAC’s mission is to provide producers with the practical tools and solutions they need in the near-term to allow them to remain economically viable until longer-term solutions are developed. The HLB-MAC’s priority projects include field-testing antimicrobials and mitigations such as thermotherapy, establishing model groves, and enhancing biological controls for ACP.

CHRP’s mission is to compile best practices to sustain the U.S. citrus industry, maintain grower's continued access to export markets, and safeguard citrus-growing States against a variety of citrus diseases and pests. CHRP provides guidelines for nursery stock product compliance and fruit inspection, treatment, and certification, and funds operational activities, such as surveillance and monitoring, packing house inspections, and release of biocontrol agents to suppress ACP.
6. **Agricultural Quarantine Inspection (AQI) User Fees**

**Issue:** In October 2015, APHIS published a final rule in the *Federal Register* to update the AQI user fee rates. The Agency had two goals: 1) ensuring that collections for each fee type covers the costs associated with that fee and did not over-charge or under-charge by fee type and 2) increasing overall revenue to cover program costs adequately and maintain a reasonable reserve. APHIS lowered two of the existing fees (international airline passengers and commercial rail cars) and raised four fees (commercial aircraft, commercial vessels, and trucks—for both individual crossings and decals). Additionally, APHIS added new fees for international cruise ship passengers and for monitoring treatments of imported commodities such as fruits and vegetables. [See table below for a comparison of old and new fees.]

**Public Policy Reason for APHIS Involvement:** Through the AQI program, APHIS and the Department of Homeland Security’s Customs and Border Protection (CBP) safeguard U.S. agricultural and natural resources from the introduction of invasive pests and diseases associated with the movement of people and goods around the world. APHIS collects user fees for AQI services conducted at ports of entry in connection with the arrival of imports, means of conveyance, and passenger baggage. These services are designed to prevent the entry of foreign pests and diseases that could harm U.S. agricultural or natural resources. APHIS had last updated AQI user fees in December 2004. Since then, there has been an 82 percent increase in the value of imported goods, a 42 percent increase in international passengers, and CBP has added hundreds of inspectors and invested in X-ray machines and other technology, as well as canine teams. Prior to the 2015 revisions, AQI user fee collections had not kept pace with the costs of the program. CBP’s personnel costs in particular had increased significantly since the last time the fees were updated due to grade increases in journey-man level inspector positions and increases in the number of inspection personnel.

**APHIS’ Statutory/Regulatory Scope:** The Food, Agriculture, Conservation, and Trade (FACT) Act of 1990 authorized USDA to implement user fees to cover AQI costs associated with international arrivals. APHIS continues to receive appropriated funds for AQI inspections of passenger baggage and cargo traveling from Hawaii and Puerto Rico to the mainland United States to prevent pest and disease introductions from these locations. Following the establishment of DHS in 2003 (based on the Homeland Security Act of 2002), the inspection function at ports of entry (with the exception of inspections of imported plants) transferred to CBP. DHS also has appropriated funds to cover inspections of pedestrians and bus passengers entering the United States, among other things. APHIS continues to collect AQI user fees and transfers a portion of the AQI collections to CBP to cover that Agency’s costs. APHIS continues to assess risks associated with imports, set import regulations and inspection policies, inspect imported plant shipments, train CBP agricultural specialists and detector dog teams, monitor fumigations and other treatments of imported commodities, and provide the scientific support
necessary for the program, among other things. This account is subject to the sequestration of mandatory funds each year.

**Items in Controversy:** The industries affected by the increased fees as well as those affected by the newly implemented fees have objected to the new rates. The Air Transit Association filed a lawsuit on May 13, 2016, objecting to the new rate for commercial aircraft, which increased from $70.75 to $225.00. The complaint alleges that APHIS’ final rule updating the AQI fees does not comply with several provisions of the FACT Act, which requires that the fees associated with each fee type cover the costs of services for that fee type and not cross-subsidize inspection activities for other classes of fee payers. It states that APHIS did not provide adequate information demonstrating the $225 fee was necessary to cover costs of inspecting aircraft and states that the commercial aircraft fee itself is not authorized by the FACT Act, among other items. With assistance from APHIS, the U.S. Department of Justice filed an answer to the complaint and filed the administrative record. Plaintiffs’ motion for summary judgment is due in March, 2017.

The bulk of the collections under the new rates began mid-year in FY 2016, and APHIS is still evaluating collection levels under the new fees. We anticipate FY 2016 collections will total approximately $675 million. While this reflects a substantial increase from the previous year, the initial projection was approximately $727 million. APHIS will continue to evaluate AQI collections and determine whether they are adequate to maintain the program. [See table below showing AQI collections and spending.]

**Industry, Consumer, and Congressional Interest:** While agricultural stakeholder groups support the AQI program, AQI fee payers—particularly the airline and commercial trucking industries—objected to the new rates. When APHIS published the proposed rule, members of Congress requested and APHIS agreed that the public comment period be extended by 60 days.

**Executive Branch Position to Date:** When developing the new rates, APHIS contracted with an independent firm to review the AQI user fee schedule to determine what adjustments were needed to ensure fees are commensurate with the cost of the AQI program. The company conducted an extensive analysis, and—based on its recommendation—APHIS implemented activity based costing models to help track costs related to the various fee types. APHIS conducted significant outreach to affected industries, including holding six stakeholder engagements throughout the process of developing a proposed rule. APHIS carefully considered the public comments on the proposed rule and the feedback received through the various stakeholder meetings, calls, and webinars, and made several adjustments in the final rule in response to information provided by stakeholders. One of the changes involves phasing in a new fee—treatment monitoring services—over 5 years and lowering the full fee from the proposed $375 rate (which included costs built in for overtime pay for employees) to $237 (however, reimbursable overtime would be charged for services provided outside of normal business hours).
7. **Farm Bill Section 10007**

**Issue:** APHIS is charged with implementing Section 10007 of the 2014 Farm Bill (Agricultural Act of 2014) to prevent the introduction or spread of plant pests and diseases that threaten U.S. agriculture and the environment. Section 10007 contains the Plant Pest and Disease Management and Disaster Prevention program with projects organized around six goal areas: enhancing plant pest/disease analysis and survey; targeting domestic inspection activities at vulnerable points in the safeguarding continuum; increasing identification capacity and enhancing and strengthening pest detection technology; safeguarding nursery production; conducting outreach and education; and enhancing mitigation and rapid response capabilities. It also contains the National Clean Plant Network (NCPN) with a focus on supporting clean plant center networking, diagnostics, therapeutics, and foundation plantings. Through these programs, APHIS provides funding to a variety of entities, including State departments of agriculture, academic partners, non-profit organizations, and other Federal agencies. APHIS accepted suggestions for FY 2017 projects for the Plant Pest and Disease Management and Disaster Prevention Program from July 11, 2016, through August 19, 2016. A panel of USDA, State, and
industry representatives are evaluating these projects on specific goal areas that represent critical needs and opportunities to strengthen, prevent, detect, and mitigate invasive pests and diseases. APHIS is accepting suggestions for the National Clean Plant Network from August 17, 2016, through October 26, 2016.

Public Policy Reason for APHIS Involvement: APHIS safeguards U.S. plant health against introductions of foreign pests and diseases through a variety of exclusion, early detection, and mitigation programs. The Farm Bill program enhances APHIS’ efforts to detect new plant pests and diseases and provides a source of funds for rapid response to small-scale outbreaks of plant pests and diseases. Through the NCPN, the program also provides sources of disease-free, high-value nursery stock to growers, enabling them to import desirable varieties of items such as grapevines, stone fruit trees, and berries (among others) from other countries without posing disease risks to existing agricultural production. The program also produces clean materials from domestic stock. APHIS continually evaluates pest and disease threats to U.S. agriculture and engages in regular communication with stakeholders and government partners, providing the Agency with knowledge of the most pressing plant health issues.

APHIS’ Statutory/Regulatory Scope: Section 10007 of the 2014 Farm Bill combined two programs previously authorized in the 2008 Farm Bill – formerly Sections 10201 for the Plant Pest and Disease Management and Disaster Prevention Program and Section 10202 for the NCPN. The 2014 Farm Bill provided permanent authorization for the annual transfer of funds from USDA’s Commodity Credit Corporation at the rate of $62.5 million in FY 2014 through FY 2017, and $75 million in FY 2018 and beyond. At least $5 million must go towards NCPN. This account is subject to the sequestration of mandatory funds each year. In FY 2017, $58.187 million will be available after sequestration is applied.

Items in Controversy: As required by the Farm Bill, APHIS seeks input from the National Plant Board, State departments of agriculture, and land grant universities to develop overall goals for the program and review project suggestions. APHIS has also consulted the Specialty Crop Farm Bill Alliance, industry organizations, other Federal Agencies, and non-governmental stakeholders to develop goals and review annual spending plans. Each year, APHIS receives more project suggestions than it can fund, and cooperators sometimes raise concerns when a specific project does not receive funding.

Industry, Consumer, and Congressional Interest: The program has broad support from APHIS stakeholders and Congress, including the Agriculture Committees and the Appropriations Committees.

Executive Branch Position to Date: Since 2009, APHIS has funded more than 2,200 projects in 50 States and 2 U.S. territories, supporting a variety of stakeholders, including Federal, State, academic, Tribal, and private entities. In FY 2016, APHIS provided Plant Pest and Disease Management and Disaster Prevention funding to 50 States plus Guam and Puerto Rico to implement 412 projects suggested by universities, States, Federal agencies, nongovernmental organizations, non-profits and Tribal organizations. For NCPN, APHIS supported 22 suggestions in 17 States that focus on providing high-quality propagative plant material for fruit
trees, grapes, hops, berries, citrus, roses and sweet potatoes that is free of targeted plant pathogens and pests.

Major projects funded by the 2014 Farm Bill include eradication of exotic fruit fly outbreaks, nationwide surveys of honey bee pests and diseases, support of canine detector teams in California and Florida, and response to the giant African snail in Florida, among many others.

APHIS has also used portions of PPDM funding to initiate emergency programs for emerging and high-priority pests impacting agricultural resources, such as the giant African snail in Florida, the European grapevine moth in California, and the coconut rhinoceros beetle in Hawaii.

Potential Alternative Approaches: [b] (5) Deliberative Process Privilege

Veterinary Services

1. **Highly Pathogenic Avian Influenza (HPAI)**

   **Issue:** The 2014-2015 outbreak of highly pathogenic avian influenza (HPAI) was the worst animal disease outbreak in U.S. history, affecting commercial premises, backyard flocks, captive birds, and wild birds in 21 States and costing USDA more than $1 billion. Nearly 50 million commercial birds (7.5 million turkeys and 42.1 million egg-layer and pullet chickens) were depopulated or died from the disease. The outbreak involved several H5 Eurasian-origin strains of the virus that caused substantial mortality. While these strains were not transmitted to people, there is always a chance that HPAI can mutate and become infectious to humans. The longer the virus circulates, the greater the chance this can happen.

   APHIS coordinated the Federal and State response to the outbreak—which included cleaning and disinfection, environmental sampling, and restocking of affected facilities—in addition to enhancing wild bird surveillance efforts. Although APHIS’ response was swift and comprehensive, one of the biggest lessons learned was that the Agency’s capacity to effectively address large animal health events has eroded over the years. Current funding for animal health activities is below levels that were available to APHIS 10 years ago. For fiscal year 2017, APHIS requested an additional $30 million to improve its readiness for responding to animal health emergencies. APHIS would use that funding to rebuild its workforce and optimize its emergency readiness and response capabilities.

   **Public Policy Reason for APHIS Involvement:** The American public and industry expect the Federal Government to lead efforts to protect U.S. agriculture and natural resources from threats posed by exotic animal and plant pests and diseases. APHIS partners with States and industry to preview costly animal diseases outbreaks and protect U.S. poultry and livestock.
Further HPAI-related losses to the U.S. poultry industry could be catastrophic and cause billions of dollars in damage to allied industries as well as to the local and national economy. Poultry and poultry product shortages and price increases could result for consumers.

**APHIS’ Statutory/Regulatory Scope:** The Animal Health Protection Act, 7 United States Code 8301 et seq., authorizes the Secretary of Agriculture to, among other things, detect, control, or eradicate any disease or pest of livestock. This authority has been delegated to APHIS.

**Items in Controversy:** During the 2014-2015 HPAI outbreak, APHIS used indemnity calculators (i.e., formulas) to determine the fair market value of birds that were destroyed as part of the disease response. Egg layer and turkey producers raised concerns about these formulas. While APHIS is working to finalize proposed changes in response to some of these concerns, the changes likely will not fully satisfy those producer organizations that have proposed alternative formulas, including formulas that compensate owners for downtime. APHIS’ position has been that paying for downtime losses essentially provides a safety net to producers that insurance, not indemnity payments, should provide.

**Industry, Consumer, and Congressional Interest:** As a result of the outbreak, the poultry and turkey industries incurred roughly $1 billion and $530 million dollars respectively in direct losses. Egg layer and turkey producers did not believe APHIS’ indemnity payments adequately covered the losses their industries incurred and as a result, asked for changes to APHIS’ indemnity calculators. Local economies and allied industries in some particularly hard-hit areas such as Minnesota and Iowa also suffered substantial losses, and the overall economy-wide losses were estimated at $3.3 billion (including losses due to international trade impacts). Additionally, egg supplies decreased and costs rose for consumers. Public health agencies and animal advocacy organizations also have a considerable stake in this issue, given the possible human health implications of HPAI and animal welfare concerns involved.

The U.S. Senate Agriculture, Nutrition, and Forestry Committee held a hearing on the impact of the HPAI outbreak on the poultry sector in July 2015. Congressional representatives, particularly those representing affected districts, have contacted USDA about logistical aspects of the response, producer indemnification and APHIS’ calculators, and vaccine development and use.

**Executive Branch Position to Date:** The Administration made over $1 billion available to address the 2015-2016 HPAI outbreak, and the FY 2017 President’s budget request included an increase of $30.338 million to improve APHIS’ readiness for responding to animal health emergencies, in part based on lessons learned during the HPAI outbreak. APHIS has taken steps to prepare for future cases, including improving wild bird surveillance to enable early detection; improving capabilities to rapidly detect HPAI in domestic poultry and depopulate affected flocks within 24 hours; and, streamlining the indemnification process so that producers can be compensated fairly and return to production quickly. APHIS also has conducted planning meetings with industry to promote improved biosecurity practices and design a biosecurity auditing system to ensure that these practices are followed.
In February 2016, APHIS published an interim rule that, among other things, provided a formula to allow indemnity payments to be split between poultry and egg owners and their contracted growers. Such a system was already in place for low pathogenicity AI. The interim rule also required owners and contract growers to provide a statement certifying that a biosecurity plan was in place at the time HPAI was detected in order to receive indemnity. Although APHIS’ epidemiological investigations concluded there was not enough evidence to pinpoint a specific pathway or pathways for the spread of the virus, comprehensive and stringent biosecurity practices are crucial to reducing the risk of HPAI infection from wild birds, equipment, and clothing.

APHIS also implemented a new indemnity calculator for egg layers following robust internal discussions about what factors should inform appropriate indemnity amounts for these birds. The new calculator took effect on October 1, 2016, and will be used for any future indemnity payments. It was not applied retroactively.

One of the challenges in determining fair market value for laying hens is the lack of an active market price. Generally, these birds are owned by one company throughout their lifecycle, and few bird prices are publicly available because laying hens are rarely sold at auction. The previous layer calculator estimated the value of the birds at the time of depopulation. When proposing a new calculator, APHIS added to that estimate a percentage of farm earnings that would have resulted from the lost egg production. APHIS also proposed putting a “floor” in place to ensure producers would never lose money on the production cost of their birds, even when economic circumstances would have created a loss.

USDA’s Office of the Chief Economist then recommended—and APHIS implemented—changes that made the calculator more reflective of a fair-market transaction. For example, the new calculator no longer has a “floor” in place, which means it is possible under some circumstances that indemnity payments may not fully cover a producer’s production costs. The new calculator also determines fair market value based on net farm income ratio (the amount of net income generated per dollar of production cost). While the new calculator addresses concerns raised by producers and is not expected to change indemnity payments dramatically, future indemnity rates could be higher or lower than the rates under the previous calculator.

Currently, USDA has not approved using vaccine as part of an HPAI response because that would likely lead many export markets to ban all U.S. poultry. But APHIS is obtaining a reliable supply of vaccine should outbreaks occur that cannot be controlled through the typical depopulation approach, a decision that would be made only in conjunction with industry and State partners. APHIS has issued requests for proposals for vaccine manufacturers to supply a variety of Eurasian-origin, H5 vaccines.

Potential Alternative Approaches: (b) (5) Deliberative Process Privilege
2. **Brucellosis and Bovine Tuberculosis (TB) Program**

**Issue:** On December 16, 2015, APHIS published a proposed rule in the Federal Register to update its brucellosis and bovine TB program regulations. Under the proposed rule, APHIS would, among other things, move from categorizing the disease statuses of entire States—or large regions within States—to establishing standards that States and Tribal Nations would meet for disease surveillance, epidemiological investigations, and affected herd management. By using program compliance rather than disease prevalence—which is already extremely low—to determine statuses, States and Tribes will no longer run the risk of status downgrades and statewide restrictions and testing requirements if sporadic cases appear. Rather, they can focus their disease control efforts on specifically designated herds or areas. APHIS officials are carefully reviewing all issues raised in the comments received and considering the need for changes to the proposed provisions.

*Funding Requests To Depopulate TB-Affected Herds in Texas and Michigan:* To address TB-affected herds, APHIS routinely uses one of two strategies: depopulating an entire herd and paying indemnity, or a test-and-remove approach, where regular testing with removal of reactor animals continues while the herd is under quarantine until it is determined with a high degree of confidence that the herd is TB-free. When determining a strategy, APHIS considers a scientific model to determine the probability of removing infection, as well as the size of the herds, potential indemnity costs compared to funds available, and State and owner preferences.

In fiscal year (FY) 2015, the Secretary transferred $17.89 million in emergency funding from the Commodity Credit Corporation for TB eradication efforts in Texas and Michigan. In FY 2016, the Secretary approved an additional transfer of $23.90 million to depopulate an additional dairy herd in Texas and address additional TB findings throughout the United States.  The Office of Management and Budget (OMB)
Public Policy Reason for APHIS Involvement: APHIS partners with States and industry to prevent and manage costly animal diseases outbreaks and protect U.S. poultry and livestock.

APHIS’ Statutory/Regulatory Scope: Under the Animal Health Protection Act, APHIS works to protect U.S. agriculture from livestock pests and diseases.

Items in Controversy: Although APHIS developed the regulations collaboratively with States, Tribes, and industry, stakeholders raised concerns during the comment period about the perceived burden on the States to define their plans to prevent and mitigate disease occurrences. Also, the Senate Appropriations Committee included a directive for APHIS to report to Congress on the amount of State and Federal funding needed to implement the rule prior to finalizing it.

Industry, Consumer, and Congressional Interest: Several legislators expressed concerns that testing requirements outlined in the proposed rule would harm deer and elk farmers. The National Assembly of State Animal Health Officials (NASAHO) would like to consult with APHIS before we publish the final rule to discuss how the Agency intends to address the comments received. Some State officials who provided separate feedback from the NASAHO comments stated opposition or requested consultation with APHIS.

Executive Branch Position to Date: APHIS believes that the proposed regulatory changes will allow the brucellosis and bovine TB programs to be most effective at protecting animal health. Regarding its emergency funding request, APHIS believes that depopulating the TB-affected herd in Texas will enable the Agency to eradicate the current outbreaks and to prevent disease spread. APHIS will conduct stakeholder outreach and discussion regarding potential future cost sharing for indemnity regulations.

Potential Alternative Approaches: [b] (5) Deliberative Process Privilege

3. **Foot-and-Mouth Disease (FMD) Vaccine**

**Issue:** There has not been an outbreak of FMD, a devastating, highly contagious viral livestock disease, in the United States since 1929. Although APHIS has comprehensive, overlapping safeguards in place to protect against FMD and is prepared to swiftly respond should an outbreak occur, vaccine would be critical to effective control or eradication should the outbreak be widespread. Current inventory in the North American FMD vaccine bank is 2.5 million doses per strain of the 10 FMD strains of greatest risk to North America. This amount is insufficient to address a medium or large-scale outbreak. APHIS estimates that we would need a minimum of
approximately 25 million vaccine doses for each of the 10 FMD strains of greatest concern to provide the optimum level of protection. This would cost approximately $130 million. APHIS’ current appropriations for FMD preparedness total $1.4 million.

The U.S. stockpile of FMD vaccine is currently housed at the Plum Island Animal Disease Center (PIADC) in New York and is managed cooperatively with Canada and Mexico. Currently, all FMD vaccine is acquired from foreign manufacturers because the live FMD virus cannot be maintained on the U.S. mainland by law. However, USDA’s Agricultural Research Service (ARS)—working at PIADC—has developed novel vaccine platforms that do not require traditional live FMD virus production techniques. These novel vaccine techniques are not yet commercially available, and it likely will be years before they can be used.

FMD is endemic in much of the world and remains a major threat to U.S. agriculture. While not a public health or food safety issue, FMD is highly infectious in all cloven-hoofed animals—including cattle, sheep, goats, and swine—and can spread rapidly and widely. Its presence in the United States, if unchecked, could cause billions of dollars in damage to animal agriculture industries, producers, and local economies through lost export markets; cause product shortages and price increases for consumers; and threaten the security of the U.S. food supply.

**Public Policy Reason for APHIS Involvement:** Only a Federal agency would have the interstate authorities and access to resources necessary to respond to a significant FMD outbreak. APHIS partners with States and industry to preview costly animal diseases outbreaks and protect U.S. poultry and livestock.

**APHIS’ Statutory/Regulatory Scope:** The Animal Health Protection Act authorizes the Secretary of Agriculture to, among other things, detect, control, or eradicate any disease or pest of livestock. This authority has been delegated to APHIS.

**Items in Controversy:** Federal-industry cost sharing is one possible solution APHIS has discussed with industry to help fill the vaccine gap. However, the cattle and swine industries, citing Homeland Security Presidential Security Directive Number 9, “Defense of United States Agriculture and Food”, believe that filling the gap is a matter of food security and is solely a Federal responsibility. Although sufficient quantities of vaccine would be valuable, APHIS’ import requirements reduce the threat of FMD dramatically, and surveillance systems would expedite detection of the disease.

**Industry, Consumer, and Congressional Interest:** The U.S. livestock sector has expressed concern that an FMD outbreak in the United States could cause severe economic ramifications for local economies and communities, as well as associated businesses (e.g., trucking and livestock markets). Some industry representatives believe vaccine use could minimize disruptions by reducing animal movement restrictions and the number of animals that would need to be depopulated as part of an emergency response effort. The House Agriculture Livestock Subcommittee held an FMD vaccine hearing in February 2016.

**Executive Branch Position to Date:** APHIS is committed to safeguarding U.S. agriculture
against an FMD incursion and is prepared to respond swiftly in the event of an outbreak, using vaccine as resources permit. APHIS has joined Australia, Canada, Mexico, and New Zealand in signing an arrangement to share their limited amounts of FMD vaccines in the event of an outbreak. APHIS will continue working with industry to identify ways to close the vaccine gap.

Potential Alternative Approaches: [b] (5) Deliberative Process Privilege

Issue: Since 2004, the U.S. Department of Homeland Security (DHS) and USDA have worked closely to fulfill the Homeland Security Presidential Directive 9 mandate for the agencies to plan to establish safe, secure, state-of-the-art agriculture biocontainment laboratories that research and develop diagnostic capabilities for foreign animal and zoonotic diseases (those that can pass between animals and humans). The NBAF—a $1.25 billion next-generation biocontainment facility under construction in Manhattan, Kansas—is the result of DHS’ and USDA’s planning efforts. The NBAF will replace existing, aging biocontainment laboratories located at the Plum Island Animal Disease Center (PIADC) in Orient Point, New York. DHS plans for the NBAF to be fully operational in 2023 with registration of select agents (i.e., bio-agents that have the potential to pose a severe threat to public, animal, or plant health, or to animal or plant products) by December 2022.

Public Policy Reason for APHIS Involvement: APHIS is charged with safeguarding the health of U.S. livestock by rapidly detecting and responding to any accidental or intentional introduction of a foreign animal disease. Foreign animal diseases, such as highly infectious foot-and-mouth disease (FMD), have the potential to inflict billions of dollars in livestock and trade losses and threaten the U.S. food supply. The NBAF will provide USDA scientists with larger and more technologically sophisticated laboratory facilities, including biosafety level (BSL)-4 biocontainment capacity, which will exceed PIADC’s BSL-3 laboratory capacity. With BSL-4 capacity, USDA scientists will be able to conduct diagnostics, and research and develop countermeasures for high-consequence zoonotic diseases of livestock such as those caused by Ebola virus, Hendra virus, and Nipah virus, which are potentially lethal to both humans and animals.

APHIS’ Statutory/Regulatory Scope: USDA was in charge of all operations at the Plum Island facility from 1954 until June 2003, when operational responsibility transferred from USDA to DHS, in accordance with the Homeland Security Act of 2002. APHIS’ Foreign Animal Disease Diagnostic Laboratory, located at Plum Island, continues to provide the capabilities, including training, for early detection and diagnosis of an accidental or intentional introduction of a foreign animal disease. APHIS’ laboratory personnel also work closely with
USDA’s Agricultural Research Service (ARS) to develop diagnostic methods and test vaccines to protect U.S. agriculture from foreign animal disease. The APHIS laboratory is the custodian of the North American FMD Vaccine Bank.

Under the Public Health, Security, and Bioterrorism Preparedness and Response Act of 2002, USDA has the authority to regulate the use, possession, and transfer of certain biological agents and toxins, including the FMD virus. The Food, Conservation, and Energy Act of 2008 directs the Secretary of Agriculture to issue a permit to the Secretary of Homeland Security to transfer live FMD virus to a single research facility that is a successor to the Plum Island facility, provided that the facility meets all of USDA’s regulatory requirements under the Federal Select Agent Program. NBAF is the successor facility.

Items of Controversy: Although there is a broad consensus among industry and policymakers that the NBAF is necessary to protect U.S. livestock from high-consequence foreign pathogens, there has been some concern about the Kansas location due to its proximity to a large cattle population and the potential for tornados.

Industry, Consumer, and Congressional Interest: The Senate Appropriations Committee report on the FY 2017 Agriculture Appropriations Bill encourages DHS and USDA to work together on a plan for the future operation of NBAF, including consideration of the appropriate agency to manage the facility. DHS Senate Appropriations includes the same language. The Senate has included $4 million for USDA ($3 million for APHIS and $1 million for ARS) for workforce development for NBAF. The House passed H.R. 1887, which would delay the required sale of PIADC while the Government Accountability Office studies possible uses for the island. The bill has been sent to the Senate for consideration. DHS released its 180-page report to Congress on the sale of Plum Island in July 2016. USDA has no concerns with the bill as long as there is no lapse between departure from PIADC and full operation of NBAF. USDA and DHS continue to plan for the transition from PIADC to NBAF. Kansas State University holds an industry meeting on an annual basis to share ideas, recommendations, needs, and collaboration possibilities to help develop the framework necessary for NBAF to protect the Nation’s animal health and food supply. Kansas committed a total of $307 million toward the construction of NBAF.

Executive Branch Position to Date: USDA officials have signed a memorandum of understanding with DHS and Kansas that affirms the mutual desire to broaden cooperative bio/agro defense activities, interactions, and collaborations. USDA is preparing budgets for the development of the USDA workforce at NBAF and for transition activities. USDA continues to participate in DHS-organized working groups to coordinate transition planning.

Potential Alternative Approaches: (b) (5) Deliberative Process Privilege
5. **Antimicrobial Resistance (AMR)**

**Issue:** AMR is a global issue affecting public and animal health. There is growing concern that bacteria that cause disease in people and animals are developing more resistance to the antibiotics used for treatment. The issue has become more urgent with the occurrence of bacterial isolates resistant to existing antimicrobial drugs, the decreasing availability of effective antimicrobial drugs and absence of new ones in the pharmaceutical pipeline, and the lack of incentives and funding for research into alternatives. In fiscal year 2014, APHIS worked with agencies across the Federal Government to develop a National Strategy for Combating Antibiotic-Resistant Bacteria. This document covers a broad array of potential government efforts to address AMR in human and animal health and was the forerunner to the National Action Plan for AMR released in 2015. In December 2014, USDA released its own AMR Action Plan. Under the plan, APHIS and other USDA agencies are using an integrated, One Health approach for surveillance and monitoring, research and development, and education and outreach.

For its part, APHIS is determining patterns, purposes, and impacts of antibiotic use in food animals and monitoring antibiotic drug susceptibilities of bacterial organisms in food-producing animals and associated products and production environments. APHIS is also identifying management practices, antibiotic alternatives, and other mitigations that may help to reduce AMR in bacteria in food-producing animals and their production environments, and to improve stewardship and judicious use of existing antimicrobials.

**Public Policy Reason for APHIS Involvement:** APHIS and other USDA agencies are uniquely positioned to contribute to the body of scientific knowledge about AMR, specifically about the role of antimicrobial use in livestock, given their in-depth knowledge of the management practices and technologies associated with animal health, welfare, productivity, and food safety.

The Food and Drug Administration (FDA) is the primary regulatory agency for antibiotic use in animals. However, USDA and FDA work together closely to identify and mitigate emerging threats to America’s food supply. APHIS is charged with safeguarding U.S. animal health. As part of its mission, the Agency operates the National Animal Health Monitoring System (NAHMS), which collects data on farm management and animal health practices, as well as on the prevalence and economic importance of livestock diseases and associated risk factors. FDA relies on the science-based information that APHIS and other USDA agencies generate about antibiotic drug use, AMR patterns, and livestock and poultry management practices to inform its policy and regulatory decisions. FDA also taps into USDA’s extensive network of collaborative relationships with producers and industry organizations as part of its outreach.

**APHIS’ Statutory/Regulatory Scope:** Under the Animal Health Protection Act, APHIS works to detect, control, or eradicate any disease or pest of livestock.

**Items in Controversy:** Some believe that the use of antimicrobial drugs in agriculture is one of the primary drivers for the emergence and spread of AMR in bacteria. Current understanding of
the factors that contribute to levels of AMR in various settings and the specific role of antimicrobial use in agriculture in the selection for AMR in bacteria is incomplete.

Industry, Consumer, and Congressional Interest: Several legislators, the American Veterinary Medical Association, industry groups, and public health interest organizations have expressed concerns about the emergence and spread of antibiotic-resistant bacteria and inquired about Federal agencies’ plans to address antibiotic use in animal agriculture.

Executive Branch Position to Date: The President’s FY 2017 budget request included an increase of $10 million to provide on-farm surveillance, measure antimicrobial drug use by livestock and poultry producers, and develop education and outreach materials to promote the judicious use of antimicrobials.

Potential Alternative Approaches: (b) (5) Deliberative Process Privilege

Wildlife Services

1. Predator Damage Management

Issue: APHIS (through its Wildlife Services program) resolves human/wildlife conflicts and protects agriculture, human health and safety, personal property, and natural resources from wildlife damage and wildlife-borne diseases in the United States. As part of this effort, APHIS protects livestock from predators, including wolves, grizzly bears and black vultures.

Public Policy Reason for APHIS Involvement: The North American Model for Wildlife Conservation has stated that wildlife should be managed in trust for the people by government agencies based on science. APHIS is charged with protecting agriculture, human health and safety, property, and natural resources from disease and damage caused by wildlife. Livestock losses attributed to predators cost producers more than $137 million annually, according to the most recent surveys by National Agriculture Statistics Service. In FY 2015, APHIS provided assistance in dealing with damage caused by predators to producers in the western United States with livestock valued at more than $2.5 billion.

APHIS’ Statutory/Regulatory Scope: The Animal Damage Control Act of 1931, as amended, gives APHIS broad authority to conduct activities “in the control of nuisance mammals and birds
and those mammal and bird species that are reservoirs of zoonotic diseases.” The statute allows APHIS to conduct cooperative programs with funding from State, local, or private entities.

**Items in Controversy:** Animal advocacy groups oppose the Agency’s use of lethal control in managing wildlife conflicts. A recently published research paper out of the University of Wisconsin is questioning the long-term efficacy of lethal predator control and receiving interest; other researchers disagree with these findings. Wolf populations and movements are closely monitored by animal advocacy organizations.

**Industry, Consumer, and Congressional Interest:** Livestock industries strongly support APHIS’ predatory control work, and livestock producers share in the costs of the activities they request. Congress is generally supportive of APHIS’ wildlife management efforts; the House included report language in the appropriation directing APHIS to prioritize and document the process that allows USDA to help States and local livestock producers manage wolves. Representatives from Minnesota have encouraged funding for APHIS’ wolf work. However, many animal advocacy groups decry any lethal control activities APHIS conducts.

**Executive Branch Position to Date:** APHIS prevents and reduces livestock predation through education, technical assistance to producers, and management programs. APHIS plays a major role in the management of wolves and grizzly bears in the United States. APHIS personnel work with State wildlife agencies, the U.S. Fish and Wildlife Service (FWS) and Tribal Nations to conduct wolf damage management programs, and provided additional services to capture and mark wolves and grizzly bears for research and population monitoring. In cooperation with State and Federal wildlife agencies, APHIS removes depredating wolves to resolve conflicts. Most of this work is cooperatively funded with appropriated money as well as funding from State or local sources.

To avoid or reduce predation, APHIS provides technical advice (education and educational materials) to producers on preventative measures, which are then implemented by producers themselves. In FY 2016, APHIS conducted 29 Predator Management Workshops to educate more than 1,000 producers on these methods, such as the use of guard dogs.

In FY 2015, APHIS responded to more than 1,000 incidents of reported wolf depredations on livestock or other resources, and removed 385 wolves (one of which was unintentionally removed). Approximately 44 percent of the requests for assistance were from the Great Lakes Region where wolves remain listed as endangered in Michigan and Wisconsin and threatened in Minnesota. Depending on the legal status of the wolf (delisted, threatened, endangered), the primary management authority (FWS or State Department of Wildlife) varies from State to State. Except where wolves are listed as endangered, the appropriate management authority provides APHIS with authorization to control wolves that prey on domestic animals or pose a risk to human safety. Where endangered, wolves can only be controlled when there is a direct risk to human safety.

APHIS also conducts research on alternative approaches. For example, the reintroduction of the gray wolf to the Northern Rockies marks a tremendous success for conservationists, but also
resulted in increased conflicts with livestock producers. Many western ranchers use livestock protection dogs to deter predation by coyotes, but some commonly used species of dogs are not effective against wolves and grizzly bears, which sometimes kill these traditional breeds. APHIS scientists initiated a series of studies to evaluate three larger breeds of dogs that Europeans have successfully used to deter livestock predation by wolves.

In the last 30 years, populations of black vultures have increased in both abundance and range, due to the highly adaptive nature of the bird. Black vultures, which prey on livestock, are protected by the Migratory Bird Treaty; removing birds, nests or eggs, requires a permit from FWS. In FY 2015, APHIS conducted direct control work in 18 States, removing 4,239 black vultures and dispersing an additional 49,755. APHIS’ direct control work for black vultures is 100 percent funded by cooperators.

**Potential Alternative Approaches:**

2. **Feral Swine**

**Issue:** Feral swine have quickly established themselves throughout the nation, increasing from 1 million animals in 17 States to about 5 million animals in 38 States in the last 20 years, making them one of the fastest growing invasive species in the United States. In FY 2014, APHIS implemented a national, cooperative cost-share program to slow – and eventually stop – the leading edges of population spread; eliminate swine populations where possible; and control swine numbers to achieve acceptable levels in other States.

**Public Policy Reason for APHIS Involvement:** The total cost of feral swine damage in the United States is $1.5 billion annually; recently collected data currently under review may estimate the total at $2 to $2.5 billion. Invasive swine damage crops, residential property, and sensitive ecosystems. They potentially can spread livestock and zoonotic diseases (classical swine fever, swine brucellosis, pseudorabies, swine influenza and porcine reproductive and respiratory syndrome, among others). APHIS is charged with protecting agriculture, human health and safety, property, and natural resources from disease and damage caused by wildlife.

**APHIS’ Statutory/Regulatory Scope:** Executive Order 13112, signed in 1999, directs Federal agencies to “detect and respond rapidly to and control populations of (invasive) species…, and monitor invasive species populations…” The Animal Damage Control Act of 1931, as amended, gives APHIS broad authority to conduct activities “in the control of nuisance mammals and birds and those mammal and bird species that are reservoirs of zoonotic diseases.” The statute allows APHIS to conduct cooperative programs with funding from State, local, or private entities.
Items in Controversy: Some private entities consider the removal of feral swine to compete with local businesses and recreational hunting. Some animal interest groups are opposed to any lethal control measures.

Industry, Consumer, and Congressional Interest: The pork industry strongly supports efforts to minimize the contact of feral swine with domestic livestock populations. In 2015, Chairman Aderholt (R - AL), of the House Agriculture Appropriations Subcommittee inquired about the success of the program to date. Additionally in 2015, Rep. Mike Conaway (R-TX), Chairman of the House Agriculture Committee visited a feral swine field operation in Texas to see the tools and techniques APHIS and its partners use.

Executive Branch Position to Date: Congress authorized a new program in 2014, and has since appropriated $20 million annually for this nationwide program. In FY 2015, APHIS had operational programs in 41 States and two territories in cooperation with State agencies, and had received permission from landowners to conduct feral swine activities on 127 million acres. In FY 2016, access to conduct activities on property increased to 152 million acres.

In FY 2015, APHIS and partners successfully eliminated feral swine from four States - Washington, Idaho, New York, and Maryland. In FY 2016, APHIS and partners successfully eliminated feral swine from an additional two States - New Jersey and Wisconsin. These States will continue to be monitored for two additional years to ensure successful elimination. Feral swine populations are still low enough that elimination is considered possible in 19 States. In the other 16 States, efforts have been focused on suppressing feral swine populations and minimizing damage to resources.

APHIS’ National Wildlife Research Center evaluated a toxicant and delivery system and is pursuing the registration of this toxicant with the Environmental Protection Agency. APHIS also researched a feral swine DNA detection process that would enable the agency to detect the presence of feral swine in an area and quickly remove them.

Every State has different laws and a different natural environment; the APHIS strategy is to provide funding and other resources to State programs and support them at a National level while allowing flexibility to manage operational activities at a local level. Task forces developed State-level management control plans that outline management goals and objectives, ranging from elimination of feral swine populations to management of individual populations.

APHIS has also initiated collaborative efforts with Mexico and Canada to monitor feral swine along the borders.

Potential Alternative Approaches: (b) (5) Deliberative Process Privilege
3. **Aquaculture Predation**

**Issue:** APHIS resolves human/wildlife conflicts and protects agriculture, human health and safety, personal property, and natural resources from wildlife damage and wildlife-borne diseases in the United States.

**Public Policy Reason for APHIS Involvement:** Aquaculture is an important industry in the United States; however, wildlife depredation, especially by fish-eating birds, is significantly impacting production. Annual fish production in the United States is valued at $1.4 billion. The aquaculture industry incurs approximately $25 million in costs associated with bird damage and damage prevention. Nearly 70 percent of catfish producers reported some losses to wildlife.

**APHIS’ Statutory/Regulatory Scope:** The Animal Damage Control Act of 1931, as amended, gives APHIS broad authority to conduct activities “in the control of nuisance mammals and birds and those mammal and bird species that are reservoirs of zoonotic diseases.” The statute allows APHIS to conduct cooperative programs with funding from State, local, or private entities. APHIS also partners with the U.S. Fish and Wildlife Service (FWS) to address conflicts arising from birds covered under the Migratory Bird Treaty Act. Upon request, APHIS works with aquaculture producers to obtain a depredation permit from the FWS to remove birds such as cormorants from production areas.

**Items in Controversy:** Some States have raised concern regarding the loss of Congressional directive funding for aquaculture depredation. Animal advocacy groups have filed lawsuits challenging FWS’s National Environmental Policy Act processes that authorize the Agency’s use of lethal methods to address cormorants. The group claimed that FWS did not provide transparency in their actions, and did not adequately address cumulative effects on cormorant populations. In May, 2016, a judge vacated two major depredation orders, one related to aquaculture protection. FWS declined to appeal the judge’s decision, and is re-evaluating a path forward.

**Industry, Consumer, and Congressional Interest:** The aquaculture industry is strongly supportive of our bird damage prevention efforts. In 2015, in response to the Secretary’s Appropriations Hearing, APHIS was asked to respond regarding the future of funding to address cormorant control activities to protect natural resources in the Lake Champlain region. Since the removal of the Congressionally directed funding (approximately $94,000 annually) in 2012, the State of Vermont has expressed the difficulty in finding funding to address cormorant control.

**Executive Branch Position to Date:** In FY 2015, APHIS provided assistance to baitfish and crawfish producers, catfish farmers, fish hatcheries, sport fish producers for pond stocking, and tropical fish producers in 13 States under a special depredation order for aquaculture. APHIS also conducted double-crested cormorant damage management in 36 States in FY 2015. And on a year-round basis, APHIS provides operational and technical assistance to aquaculture producers, specifically on roost management of double-crested cormorant, harassment of fish-eating birds on catfish facilities, and helping farmers with the FWS depredation permit process.
Upon the May 2016 court decision ordering FWS to vacate its aquaculture depredation orders, APHIS suspended all lethal cormorant removal work. APHIS is consulting with FWS to determine next steps. In the meantime, APHIS will continue to conduct night roost harassment techniques to disperse birds from roosting near aquaculture ponds. APHIS will continue to provide technical assistance (education on the use of non-lethal management techniques) to impacted cooperators.

APHIS’ National Wildlife Research Center’s field station in Starkville, Mississippi, is developing methods to reduce the impacts of fish-eating birds on aquaculture stocks. Current research is gathering information about the abundance, distribution, and foraging behavior of fish-eating birds, the economic impacts associated with their foraging activities, and the diseases they transmit at aquaculture facilities. This information will help develop new techniques for reducing damage.

Funding for aquaculture damage management has been FY 2015: $388,000; FY 2016: $759,000; FY 2017: $759,000 (estimate).

Potential Alternative Approaches:  [b] (5) Deliberative Process Privilege

GIPSA

Farmer Fair Practices Rules
Since passage of the Consolidated and Further Continuing Appropriations Act, 2012, USDA had been precluded from working on certain proposed regulatory provisions related to the Packers and Stockyards Act (Act). These proposed regulations included provisions to clarify that it is not necessary to find harm to competition in order to find that a packer, swine contractor, or live poultry dealer has engaged in an unfair, unjustly discriminatory, or deceptive practice or device or has given an undue or unreasonable preference or advantage.

The Consolidated Appropriations Act, 2016 does not include the prohibition. USDA intends to issue an interim final rule to clarify that it is not necessary to establish harm to competition in order to prove that a packer, swine contractor, or live poultry dealer has engaged in an unfair or unjustly discriminatory practice. USDA intends to propose regulations to establish the kinds of conduct or action that would be considered unfair under the Act without a showing of harm to competition. USDA also intends to propose a regulation to establish criteria for live poultry dealers who use a poultry grower ranking system to determine the amount of compensation poultry growers receive.
Other Packers and Stockyards Program Regulations
Congress recently passed legislation to clarify that online or video livestock auctions that handle the proceeds of the sale are subject to the Packers and Stockyards Act and to authorize electronic payments by packers, livestock market agencies, and livestock dealers. GIPSA will review current regulations to determine what changes are necessary to make the regulations consistent with the amendments to the Packers and Stockyards Act.

GIPSA has also identified regulations that are out of date and should either be updated or eliminated. These regulatory changes are less critical than the Farmer Fair Practices rules and the regulatory changes that are necessary to address the statutory changes.

Reevaluating the Budget Obligation Limitation on Inspection and Weighing Fees Collected Under the United States Grain Standards Act
Currently, the annual appropriations act includes a budget obligation limitation on fees collected from inspection and weighing services which allows the Grain Inspection, Packers and Stockyards Administration (GIPSA) to operate its Federal Grain Inspection Service’s official inspection and weighing program. This program provides both mandatory and voluntary services, including a variety of inspection, weighing, and related services on grains, pulses, oilseeds, and processed and graded commodities. These services extend to both domestic and international markets, with services being mandatory for exports. These mandatory services include official weighing of the majority of grain exported from the United States and of intercompany barge grain received at export port locations; official inspection of the majority of grain exported from the United States; and testing of all corn exported from the United States for aflatoxin prior to shipment, unless the contract stipulates testing is not required.

In FY 2014, GIPSA experienced a dramatic increased demand for export inspection services in direct response to an increase of more than 35 percent in grain exports. In FY 2015 grain exports were higher than the record in FY 2014 and are anticipated to continue to increase through FY 2017. Demand for inspection services will increase with a continued increase in export volumes because of the statutory requirement to inspect and weigh export grain. To meet the increased demand for services, grain exporters and handlers are opening new export facilities that require around the clock service by GIPSA, thus increasing GIPSA’s costs. Additionally, GIPSA’s cost for installing inspection laboratories at these new facilities is approximately $200,000 each. In order to support mandatory official inspection and official weighing services along with the voluntary domestic services, and continue to meet the demand of the domestic and foreign grain and related commodity markets, the limitation on official inspection and official weighing services expenses that is currently in place needs to be eliminated.

GIPSA has executed various cost containment initiatives to limit obligations while meeting increased demand for services. GIPSA has limited supply and equipment purchases and changed hiring practices to optimize cost-efficient use of intermittent, part-time, and full-time employees to minimize overtime. Beginning in calendar year 2017, GIPSA will annually adjust its export inspection fees based on a rolling 5-year average of the volume of grain exports so that it
maintains an operating reserve of between three to six months, ensuring a direct link between the user fees and the volume of grain exports.

**GIPSA**

GIPSA does not have any significant reports from the last four years issued by external groups.
WHO WE ARE: Natural Resources and Environment (NRE)

The Office of the Under Secretary of Agriculture for Natural Resources and Environment promotes the conservation and sustainable use of natural resources on the Nation's private working lands, and sustains production of clean air and water, recreational opportunities, wildlife habitat and other goods and services that the public demands of the National Forests and Grasslands. The Under Secretary is responsible for the day-to-day operations of the United States Forest Service (FS) and Natural Resources Conservation Service (NRCS), and serves as the principal advisor to the Secretary of Agriculture on policy to promote the conservation, restoration and sustainable use of the Nation's natural resources.

WHO WE ARE: OUR WORKFORCE

- FS includes over 28,000 full time employees and NRCS over 10,000.
- 10,000 – 12,000 temporary employees are hired annually by FS (May – Sept.)
- Offices and research stations distributed throughout the 50 states, the Pacific Islands and Caribbean

KEY UPCOMING DECISIONS

Regional Conservation Partnership Program: Early 2017 decisions on program focus for the fourth funding round for this partner-driven stewardship program, which will invest over $200 million in 2018.

Fire Suppression Budget and Forest Management Reform:

A number of alternative proposals have been put forward during the 114th Congress to address the chronic problem of budgeting for wildland fire and its attendant impacts to non-fire programs at the Forest Service. Most also include provisions to accelerate the pace and scale of forest restoration. Further push for legislative solutions or implementation will require the immediate attention of the next Administration.

WHO WE SERVE: OUR CONSTITUENTS

NRE agencies work with state and tribal natural resource managers and working farm, forest and ranchland owners across the country to help them achieve their stewardship goals. FS works with diverse groups who rely upon the nation’s forests and grasslands for recreation, community economic development, clean air and water and wildlife habitat.

BUDGET HIGHLIGHTS FY 2016

NRCS 2016 budget authority was nearly $4.5 billion, of which roughly 77 percent was mandatory and 23 percent discretionary. NRCS has seen relative consistency in budget authority over the past several years.

FS budget authority in FY 2016 was $6.38 billion ($5.68B – discretionary; $704M in mandatory). 56% of discretionary authority is attributed to Fire. This is up from 16% in 1995.

I. Organizational Overview

Organizational Chart

USDA Natural Resources and Environment

Under Secretary

Deputy Under Secretary (Natural Resources Conservation Service)

Chief of the Natural Resources Conservation Service

Deputy Under Secretary (Forest Service)

Chief of the Forest Service*

Special Assistant

Senior Advisor

Confidential Assistant

Chief of Staff

In addition, the office of the Under Secretary includes two detailed positions from NRCS and Forest Service who serve as staff assistants to the Deputy Under Secretaries. The office also includes three executive assistants and one administrative support position.

Lastly, the office provides leadership for the Department on behalf of the Secretary in his role as Chair of the Council. The RESTORE Executive Director reports to the Council.

* Denotes non-political career SES position
Biographies for career and political staff in key leadership positions

Robert Bonnie  
Under Secretary for Natural Resources and Environment  
202-720-7173, Robert.bonnie@osec.usda.gov

Robert Bonnie is Under Secretary for Natural Resources and Environment at the US Department of Agriculture, a post he has held since August, 2013. In that role, he oversees the work of the US Forest Service (FS) and Natural Resources Conservation Service (NRCS). He also works with the Secretary, other USDA agencies, and other federal partners on climate change policy. Bonnie joined USDA in 2009 as a Senior Advisor to Secretary of Agriculture Tom Vilsack for environment and climate change. Prior to that, he was vice president for land conservation for the Environmental Defense Fund. He grew up on a farm in Kentucky and now lives in Virginia.

Ann Mills  
Deputy Under Secretary for Natural Resources and Environment (NRCS)  
202-720-7173, Ann.mills@osec.usda.gov

As Deputy Under Secretary for Natural Resources and Environment, Ann C. Mills has responsibility for the Natural Resources Conservation Service (NRCS), the federal agency with primary responsibility for working with private landowners to conserve, maintain and improve their natural resources. America's farms, ranches and forests provide 87% of the surface supply of drinking water in America. USDA programs play a significant role in protecting the nation's supply of clean abundant water.

Mills brings to this position 20 years of policy and management experience with government and nonprofit conservation advocacy. Most recently, as a senior executive at American Rivers, Mills led the implementation of programs to develop sustainable solutions for flood and drought mitigation and water quality improvement across the country including urban and rural watersheds in Northern California's Sierras and Bay Delta; the Columbia, Missouri and Mississippi river basins; the Great Lakes; and the Chesapeake Bay. Mills also served as a senior staff person for Senate Democratic Leader Tom Daschle, chief of staff to California Lt. Governor Leo McCarthy and legislative assistant to then-Congressman Richard Durbin and Congressman James McClure Clarke. She holds a Master’s Degree from the Lyndon B. Johnson School of Public Affairs at The University of Texas at Austin, and a BA in Political Science from Tufts University.
Leslie Jones
Deputy Under Secretary for Natural Resources and Environment (FS)
202-720-7173, Leslie.jones@osec.usda.gov

Leslie Jones has worked in conservation for more than two decades. As Deputy Under Secretary for Natural Resources and Environment, she has responsibility for the Forest Service, the federal agency with responsibility for 193 million acres of National Forest System lands. The Forest Service also provides financial and technical assistance through its State and Private Forestry programs to States, municipalities and a host of community partners across all landscapes. She also served as Chief of Staff to the Under Secretary and Senior Advisor. Prior to joining the Obama Administration she was General Counsel for The Wilderness Society, served in leadership positions in the New England land trust community, and worked as an attorney for the Vermont Attorney General. She holds a Juris Doctor and Masters of Environmental Law from Vermont Law School and a BA in Human Ecology from College of the Atlantic. She grew up on both coasts, in California and Maine, and now lives in Virginia.

Patrick Holmes
Chief of Staff to the Under Secretary for Natural Resources and Environment
202-720-7173, Patrick.holmes@osec.usda.gov

Patrick Holmes serves as Chief of Staff to the Under Secretary for Natural Resources and Environment at USDA. In his current role, Patrick provides coordination, communication, management and counsel for the Office of the Under Secretary and supports execution of a diverse suite of priorities facing the Department, including climate and energy, conservation finance, public-private partnerships, and forest restoration. Prior to joining the Obama Administration at USDA, Patrick has worked for the Colorado Conservation Trust, the Sonoran Institute, the Yale Center for Business and Environment and the State of the Rockies Project. He is a graduate of the Yale School of Forestry and Environmental Studies and Colorado College, a past fellow of the Kinship Conservation Institute and a Wyss Scholar.

Meryl Harrell
Senior Advisor to the Under Secretary for Natural Resources and Environment
202-720-7173, Meryl.Harrell@osec.usda.gov

Meryl Harrell serves as Senior Advisor to the Under Secretary for Natural Resources and Environment at USDA. In her current role, Meryl is responsible for policy issues related to the Forest Service, including recreational access and economic activity, land management planning, job training opportunities for youth and veterans, and other natural resource management issues. She previously served as Chief of Staff to the Under Secretary and as a Special Assistant to the Under Secretary. Prior to joining USDA in 2009, she worked for the Obama campaign in Wisconsin and on the Transition, and has worked on public lands policy at The Wilderness Society. Meryl received her J.D. from the Yale Law School and an A.B. in geosciences and environmental studies from Princeton University. She is also an alum of the Teton Science School, where her love of rocks turned into a passion for public lands. Meryl enjoys camping and hiking.
Justin Ehrenwerth
Executive Director of the Gulf Coast Ecosystem Restoration Council [Career]
justin.ehrenwerth@restorethegulf.gov

Justin R. Ehrenwerth serves as Executive Director of the Gulf Coast Ecosystem Restoration Council (Council). Created by the RESTORE Act of 2012 and comprised of the Governors of the five Gulf Coast States and Secretaries from six federal agencies, the Council is responsible for restoring and protecting the natural resources, ecosystems, fisheries, marine and wildlife habitats, beaches, coastal wetlands and economy of the Gulf Coast. Prior to joining the Council, Ehrenwerth served as Chief of Staff to the Deputy Secretary of Commerce. Previously, Ehrenwerth served as Assistant Counsel to the President in the White House Counsel’s Office where he was a member of the Oversight and Litigation group representing the White House in Congressional investigations and advising Federal agencies on oversight matters. During the first two years of the Obama administration, Ehrenwerth served in the Department of Commerce’s Office of General Counsel.

Ehrenwerth has held leadership positions on a number of national and statewide political campaigns including the Obama for America and Kerry-Edwards campaigns. He has been active in the non-profit sector having worked at the University of Pittsburgh Institute of Politics and the Northern California Grantmakers. He also served as a Marshall-Brennan Constitutional Literacy Teaching Fellow as well as a Coro Fellow in Public Affairs. Ehrenwerth currently serves on the Board of the Coro Center for Civic Leadership.

Ehrenwerth is a summa cum laude graduate of Colby College and holds an MA in Philosophy, Politics and Economics from the University of Oxford and a J.D. from the University of Pennsylvania Law School.

Overview of Agency Programs and Operations

The Office of the Under Secretary of Agriculture for Natural Resources and Environment promotes the conservation and sustainable use of natural resources on the Nation's private working lands, and sustains production of clean air and water, recreational opportunities, wildlife habitat and other goods and services that the public demands of the National Forests and Grasslands. The Under Secretary is responsible for the day-to-day operations of the United States Forest Service and Natural Resources Conservation Service and serves as the principal advisor to the Secretary of Agriculture on policy to promote the conservation, restoration and sustainable use of the Nation's natural resources, often in coordination with other USDA agencies and offices. In addition, the Office of the Under Secretary provides leadership and counsel to the Secretary in his role as Chair of the Gulf Coast Ecosystem Restoration Council. In response to the Deepwater Horizon spill, in July 2012 the Resources and Ecosystems Sustainability, Tourist Opportunities, and Revived Economies of the Gulf Coast States Act (RESTORE Act) established the Gulf Coast Ecosystem Restoration Council (Council). The Council is responsible for helping to restore the ecosystems and economies of the Gulf Coast region by developing and overseeing implementation of a Comprehensive Plan and prioritizing projects to receive funding from
appropriate BP settlement funds. Finally, the Office provides political leadership for the Department on a host of conservation, climate change, public lands, and natural resource initiatives led by offices of the White House.

**Forest Service – Overview**

**Mission and Responsibilities:** The mission of the Forest Service is to sustain the health, diversity, and productivity of the Nation’s forests and grasslands to meet the needs of present and future generations. The Forest Service manages 193 million acres in 44 States and territories—154 national forests, 20 national grasslands, and one prairie comprising 30 percent of all federally owned lands. The agency also provides financial and technical assistance through its State and Private Forestry programs to States, municipalities and a host of community partners across all landscapes, including 426 million acres of private forest land, 69 million acres of State forest land, 19 million acres of Tribal forests, and 130 million acres of urban and community forests. The Forest Service is comprised of nine Regional Offices, where regional foresters serve as the senior executive leaders coordinating activities between national forests and grasslands (overseen by forest supervisors), monitoring activities on those lands to ensure quality operations, providing guidance for forest plans, and allocating budgets to the forests.

The Forest Service is one of the largest forestry research organizations in the world, with seven research stations, two Technology and Development Centers, 80 Experimental Forests, a Forest Products Laboratory, and a Geospatial Service and Technology Center that support scientific advances in resource management. Through its International Programs office, the agency works with more than 80 countries worldwide to support sustainable management and protection of forests, providing assistance and sharing best practices. The State and Private Forestry (S&PF) organization of the Forest Service reaches across the boundaries of National Forests to States, Tribes, communities and non-industrial private landowners. S&PF is the federal leader in providing technical and financial assistance to landowners and resource managers to help sustain the nation’s forests and protect communities from wildland fires.

Various activities on Forest Service lands contribute more than $36 billion to America’s economy each year supporting nearly 450,000 jobs. The Forest Service is the preeminent federal wildfire fighting agency, providing the lion’s share of the personnel and assets needed to protect communities and resources from the threats of increasingly catastrophic wildfire events. Of note, Forest Service receives its discretionary appropriations through Title III of the regular Interior, Environment, and Related Agencies appropriations bill. In some years, the FS has received additional discretionary monies through supplemental appropriations bills

**Program and Initiative Highlights:**

**Accelerating Forest Restoration on National Forests**
In 2012, the Forest Service issued a strategy aimed at [Increasing the Pace of Restoration and Job Creation on Our National Forests](#). The health of our forest ecosystems, watersheds, and forest dependent communities is in jeopardy amid increased threats of wildfire, drought, development,
insects and disease. Restoration offers an antidote, building resilience for forests and communities alike. The Forest Service restoration strategy emphasizes collaboration, and endeavors to move beyond the conflicts which have characterized forest policy in the past and toward a shared vision that allows environmentalists, forest industry, local communities, and other stakeholders to work collaboratively toward healthier forests and watersheds, safer communities and more vibrant local economies. The foundation of the strategy is the Forest Planning Rule, published in 2012, which sets guidelines for adaptive land management plans for our National Forest System. The Agency’s goal is to ensure an adaptive land management planning process that is inclusive, efficient, collaborative and science-based to promote healthy, resilient, diverse and productive National Forests and Grasslands.

A key component of the restoration strategy is the Collaborative Forest Landscape Restoration Program (CFLRP). In the five years since the initial CFLRP projects began, the program has improved more than 1.33 million acres for wildlife habitat; treated more than 1.45 million acres to reduce the risk of catastrophic fire; treated more than 84,500 acres of land to achieve healthier condition through timber sales; and contributed to generating an average of 4,360 jobs per year. Moreover, CFLRP projects attracted new partners and built community relationships, leveraging more than $76.1 million in matching funds. A CFLRP five year progress report is available [here](#).

Other strategies include:

- Improving the efficiency of restoration project planning under the National Environmental Policy Act (NEPA) through larger, landscape-scale approaches, partnerships with collaboratives, and the use of a host of adaptive and streamlined tools;
- Expanding markets for forest products, including biomass energy and green building materials such as cross-laminated timber that support forest restoration, create local economic opportunity, and reduce environmental impacts (see the [U.S. Tall Wood Building Prize Competition](#));
- Implementing new provisions of the 2014 Farm Bill such as the Good Neighbor Authority, which authorizes federal agencies to enter into cooperative agreements or contracts with state foresters to conduct restoration projects on federal forestland when similar and complementary restoration services are being performed on adjacent state or private lands; and
- Launching a new Joint Chiefs’ Landscape Restoration Program--- a partnership between Forest Service and the Natural Resource Conservation Service to design and implement treatments where private and public lands meet, and where restoration objectives cross ownership boundaries.

A [2015 accomplishments report](#) details these and other major efforts of the Forest Service to accelerate the pace and scale of forest restoration. The agency has also led collaborative initiatives building partnerships with other USDA agencies, corporations, utilities, industry and conservation groups to further advance restoration goals. Examples include:

- Through the Wood to Energy Initiative, Forest Service has partnered with the Rural Business Cooperative Service, Rural Utilities Service, Farm Service Agency, others at USDA and relevant industry trade-associations to support
United States Department of Agriculture  
2016 Presidential Transition  
Natural Resources and Environment Mission Area (NRE)

over 240 wood energy projects since 2009, and advance mutual goals for coordination and communications.

- Working with Coca-Cola North America, the Forest Service has forged a partnership to restore and protect damaged watersheds on national forests restoring over one billion liters of water in areas important to Coke’s bottling facilities. The partners have committed to double that outcome through 2018.

- Across the West, partnerships with water utilities and municipalities to reduce the risk of catastrophic wildfire to municipal water supplies have brought together new partners to invest in the Forest Service’s restoration objectives. For instance Denver Water entered into 5-year partnership bringing over $18 million in outside investment and the City of Flagstaff passed a voter approved bond initiative to invest $10 million to protect the city’s water system. A recent report from the World Resources Institute highlights these and related partnerships.

Budgeting and Responding to the Increase of Wildfire

Our forest and grassland resources are at risk due to uncharacteristically severe wildfires, severe outbreaks of insects and disease, drought and invasive species, all exacerbated by a changing climate. Many states have recently experienced the largest and/or most destructive fires in their history. Fire seasons are longer, 78-days longer since 1970 on average. Decades of fire suppression have led to increases of fuels in many forest types across the country. The area affected by an epidemic of mountain pine beetle in the West has reached 32 million acres on the national forests alone. California is facing a particularly critical situation as a result of five year drought and related stressors. Surveys estimate that 66 million trees died from 2010 to October 2015 in California, with millions more dying over the course of the next several seasons. Finally, the increase of homes in the wildland urban interface—the area where forests and communities meet—is making wildfire suppression more complex, more dangerous for firefighters, and more expensive.

The Forest Service has the most experienced, well trained, and effective wildland fighting force in the world, which it coordinates alongside other state and federal firefighting forces. Through the nation’s largest wildfire fighting workforce and aviation and equipment fleet, the Forest Service uses risk management approaches to facilitate and promote wildland firefighter safety while protecting lives, homes and property from wildfire threats. In an average year, the Forest Service responds to over 50,000 wildfires burning nearly 6 million acres. At the peak of the 2015 season, a record setting year in which 10 million acres burned from 68,151 wildland fires, over 150 helicopters, 30 fixed-wing air tankers and 32,000 personnel were deployed—most of these resources were contributed by the Forest Service.

Working with the U.S. Department of the Interior and the wildland fire community, the Forest Service developed a long-term National Cohesive Wildland Fire Management Strategy with three primary components: (1) restoring and maintaining resilient landscapes; (2) developing fire-adapted communities; and (3) responding to wildfire safely, effectively, and efficiently.
Comprehensive fire budget reform is necessary to meet the funding needs of all forest service programs and to ensure the agency can continue to support all three components of the National Cohesive Strategy.

The impact of the rising cost of suppression on the Forest Service’s budget is detailed in a 2014 Report on the state by state impacts of fire transfer, and a 2015 Forest Service Report: Rising Firefighting Costs Raises Alarms. Presently the Administration is engaged in dialogue with congressional authorizers, appropriators and key champions to pursue a comprehensive solution to the Agency’s fire budget challenges. As part of a potential solution, dialogue is also occurring around a series of proposed forest management reforms aimed at increasing the pace and scale of restoration.

Because wildfire knows no jurisdictional bounds, the Forest Service’s State and Private Forestry programs are an integral component of our state, local and tribal partnerships. Rural firefighting resources are often the first line of defense in meeting expanded protection needs for wildland-urban interface fires. They provide nearly 80% of initial attack on wildland fires in the United States. The Forest Service has a variety of programs to help State and rural firefighters enhance their departments with equipment, training and communications, including the Federal Excess Personal Property (FEPP) program and the Volunteer Fire Assistance Program (VFA). The Forest Service also works with communities to focus on advance planning that can protect them from the risk of wildland fire, for example, helping them become fire adapted communities through the development of Community Wildfire Protection Plans (CWPPs) and the Firewise program. CWPPs help communities address wildfire response, community preparedness, and structure protection. Through CWPPs, communities can influence how and where federal agencies prioritize the reduction of hazardous fuels. The Firewise program is a multi-agency effort to help homeowners, community leaders, planners, and developers work together to protect people, property, and natural resources from the risk of wildland fire—before a fire approaches. The Firewise program emphasizes wildfire readiness and responsible community design, including fire-resistant building materials and landscaping.

Improving Recreation Access and Economic Opportunity
Outdoor experiences are a critical way the American public connects with the Forest Service, with more than 160 million visits to National Forests and Grasslands annually. The outdoor recreation economy supports 6.1 million direct jobs, $80 billion in federal, state and local tax revenue and $646 billion in spending each year. America’s vast system of public forests and grasslands provides opportunities for over 165 million visitors each year to recreate and support local economies through tourism. These recreational uses support approximately 200,000 full and part time jobs and contribute over $13 billion to local communities each year ranging from hiking group, to off-highway vehicle users to four season ski resorts. Forest Service recreation special use permits provide organized access for service providers who take groups of people to national forests and grasslands to experience outdoor recreation, while allowing the Forest Service to manage visitor volume in specific locations and protect resources. In 2016, the agency began taking steps to improve access such as:

- Streamlining the process to receive or renew a recreation special use permit, making it simpler and faster through the use of existing agency authorities;
Increasing staff capacity and the consistency of the permit process across the country by developing new standardized training programs and exploring new staffing strategies;

- Encouraging managers to take greater advantage of allowable waivers when a special use permit is not required, for example, where a proposed use would have only nominal impact on lands, resources, and programs or operations; and

- Investing in technology to improve business tools and data that support recreation special uses, including developing an electronic permit application process.

Additionally, Forest Service has partnered with USDA Rural Development’s Community Economic Development (CED) Division and NIFA to jointly educate each other’s field-based contacts on how they can leverage each other in supporting rural communities in using recreation as an economic driver. FS’ partnership with CED has resulted in the development of a Recreational Economy Resource Guide – a common tool that agencies can use to train staff and have a unified material to market available resources to the public around the recreational economy.

**Engaging New and Underrepresented Stewards**

Our Nation’s forests and grasslands, community green spaces, and urban forests all play a critical role in fostering healthy and sustainable communities, and offer opportunities for all Americans to connect with the outdoors. Through volunteer, employment, and diverse partnership strategies, the Forest Service is engaging a new generation of stewards while safeguarding important values derived from the nation’s forests. Examples include:

- Through the 21st Century Conservation Service Corps (21CSC), the Forest Service works with over 190 partners to provide job training and employment opportunities for thousands of young Americans and veterans to protect and restore our natural and cultural resources. Since 2014, we supported more than 10,000 jobs and training opportunities each year through 21CSC. Programs like 21CSC serve to engage new populations in the benefits of public lands, and help to create the next generation of thoughtful and engaged conservationists.

- The nation’s American Indian and Alaska Native people retain histories, values, and spiritual underpinnings that are inextricably intertwined with America’s forests; especially with the national forests. Many of these cultural and physical connections predate establishment of the United States and the National Forest System. Through more than 100 meetings with tribal members and other outreach, a set of recommendations were reached to enhance consultation, protection, respectful interpretation and appropriate access to culturally significant lands and resources known as Sacred Sites. A new final rule ensures that federally recognized Indian tribes have access to forest products for traditional and cultural purposes.

- In partnership with state forestry agencies, the Forest Service helps over 7,000 communities plan, manage, and grow urban forests through the Urban and Community Forestry Program and the National Urban and Community Forestry Advisory Council’s Ten Year Action Plan. Well-maintained urban forests can help
provide a host of benefits such as mitigating climate and extreme weather impacts, enhancing public health, improving water quality by reducing storm water runoff, and enhancing community livability.

- In the U.S. South, through partners such as the U.S. Endowment for Forestry and Communities, the Federation of Southern Cooperatives, the Forest Service and NRCS are providing forestry, land tenure and technical services to help prevent the loss of African-American owned forests and helping to resolve heirs’ property problems across three states – Alabama, North Carolina and South Carolina.
- The Forest Service operates 27 Job Corps Civilian Conservation Centers in coordination with the Department of Labor, which offer educational and vocational training to about 5,000 economically disadvantaged youth (see hot issues section for additional background regarding outstanding budget and closure issues with the program).

**New tools and Research for a Changing Climate**

The Forest Service has been the leading Federal agency in developing the tools, programs and policies to advance climate adaptation planning. Recently, the agency collaborated with the U.S. Global Change Research Program to publish a report on accomplishments by federal agencies in adapting to climate change. To date, one-third of national forest units have completed, or are in the process of completing, climate change vulnerability assessments and an adaptation strategy.

Adaptation planning is founded on partnerships between Forest Service research stations and national forest resource managers in collaboration with other federal and state agencies, tribes, and local stakeholders. The USDA Climate Hubs were established in February of 2014 to deliver science-based knowledge, practical information and program support to farmers, ranchers, forest landowners, and resource managers to support climate-informed decision-making in light of the increased risks and vulnerabilities associated with a changing climate. An online and interactive Adaptation Workbook, offers a structured process to consider the potential effects of climate change on forest ecosystems and design forest management and conservation actions that can help prepare for changing conditions. The process is completely flexible to accommodate a wide variety of geographic locations, scales, forest types, and management goals.

Our forests – national forests as well as private and other public forests – provide an important ecosystem service in the form of carbon sequestration – the uptake and storage of carbon in forests and wood products. This service is becoming more valuable as the impacts of greenhouse gas emissions are becoming more fully understood and experienced. The Forest Service has always led efforts to practice, develop, and demonstrate sound and sustainable management of forest-based resources; the management of forest carbon is no exception. The Forest Service has developed regional carbon assessment reports to help forest managers and the public understand how much carbon is stored in forest ecosystems and harvested wood products.

Alongside NRCS, Forest Service is a key contributor to the Department’s Building Blocks for Climate Smart Agriculture and Forestry Initiative—an effort to leverage existing programs to
support conservation practices and technologies that reduce emissions, increase carbon storage and help build resilience, while also creating new economic opportunities in Rural America. Through efforts to enhance reforestation in the aftermath of wildfire, improve soil health, improve nutrient management, grow markets for long-lived wood products, partner with livestock producers, support urban forestry and others, USDA has created a framework for climate action for farmers, ranchers and forest landowners that is compatible with their stewardship and economic goals. Many of these technologies and practices are already in high demand by producers, industry and relevant associations.

**Natural Resources Conservation Service (NRCS) – Overview**

*Mission and Responsibilities:* NRCS improves the health of our Nation’s natural resources while sustaining and enhancing the productivity of American agriculture. Seventy-percent of the nation’s land is privately owned and tended to. NRCS’ expert staff work with partners to create voluntary, incentive-based solutions that help the Nation’s farmers, ranchers and forest landowners evaluate and deploy options to enhance their stewardship within the context of their business operations. NRCS's natural resources conservation programs help people reduce soil erosion, enhance water supplies, improve water quality, increase wildlife habitat, and reduce damages caused by floods and other natural disasters.

Voluntary conservation works, providing predictability and certainty for producers and improving environmental outcomes. Example initiatives include:

- Through [Working Lands for Wildlife](#) (WLFW), NRCS works with conservation partners and private landowners to restore populations of declining wildlife species, to provide regulatory certainty and to strengthen and sustain rural economies. Private lands are essential for providing habitat for nearly two-thirds of all species listed as threatened or endangered under the Endangered Species Act (ESA). Assistance is available to producers through Farm Bill conservation programs who want to make conservation improvements to their land, which not only benefits the species and habitat but also helps them strengthen their operations by lowering input costs and improving efficiency and yields. WLFW also gives peace of mind to participating producers. As long as they maintain the conservation practices and systems that benefit the targeted species, they can continue their farming, ranching and forest operations and remain compliant with the ESA regulatory responsibilities for up to 30 years. In part because of these voluntary efforts, the U.S. Fish and Wildlife Service has either delisted or taken off the candidate list six species since September 2014 – determining that these populations were now healthy enough that they did not warrant Federal protections under the Endangered Species Act (ESA).

- Through the [Mississippi River Basin Healthy Watersheds Initiative](#) (MRBI), NRCS has invested significantly in high-priority water quality projects and delivered on the ground benefits. For example, as a result of MRBI conservation efforts, Arkansas was able to remove two stream segments from the State’s Clean Water Act 303(d) impairment designation. In 2014, Oklahoma removed nine more streams from its 303(d) list as a result of Farm Bill tools and worked with partners,
farmers, ranchers and other landowners. Oklahoma now ranks second in the nation for EPA-recognized water quality success stories.

- Through the WaterSmart-EQIP partnership under the National Drought Resilience Partnership, NRCS and the Bureau of Reclamation have partnered to help water districts and producers on private working lands better conserve water resources, improve water and energy efficiency, and provide a strengthened federal response to ongoing and potential drought across 13 states in the West. Through the partnership, NRCS supports on-farm water delivery system improvements that complement irrigation system infrastructure improvements made by the Bureau of Reclamation.

- Since 2010, NRCS has been working through the StrikeForce for Rural Growth and Opportunity initiative to assist farmers and ranchers in communities that face persistent poverty. NRCS and other USDA agencies are focusing assistance and outreach in over 770 counties, parishes, boroughs, and census areas, and Indian reservations in 20 states to jump start collaboration and investment in these communities.

- Through the Sentinel Landscapes partnership NRCS and partners aim to accomplish three critical goals: preserve agricultural lands, assist with military readiness, and restore and protect wildlife habitat. In this unique collaboration, the U.S. Department of Agriculture, Department of Defense, and Department of the Interior work with state, local, and private partners to preserve and restore natural lands important to the nation’s defense mission. The basic premise is to preserve and restore habitat around the military base to ensure at-risk species can survive, while also improving military readiness by ensuring training activities can proceed unimpeded.

- Since 2009, targeted agricultural conservation investments of nearly $1 billion are putting the agricultural community on its way toward meeting or exceeding key goals for cleaner water and a healthier ecosystem in the Chesapeake Bay. USDA has a goal of helping to install conservation practices on 4 million acres of farmland in these priority areas by 2025. NRCS and its conservation partners have worked with farmers to install practices on 1.6 million acres in priority areas since 2010 — about 41 percent of the 2025 goal.

A key element of NRCS’ conservation approach comes through technical assistance to landowners to develop a voluntary conservation plan. Voluntary conservation plans can be developed for a farm, ranch, private non-industrial forestry operation, or shellfish or aquaculture operation. The plans:

- Inventory and assess the condition of natural resources on/around an operation;
- Contain valuable information about the land and the operation like maps, soil type, and native plants and animal species that may be present; and
- Discuss alternatives for meeting landowner objectives and natural resource needs.

NRCS plans give operators one tool that may be helpful in weighing tradeoffs and accessing financial incentives. NRCS’ major financial incentive programs are the Environmental Quality Incentives Program (EQIP) and the Conservation Stewardship Program (CSP) and the
Agricultural Management Assistance Program (AMA). NRCS also offers easement programs to eligible landowners to conserve working agricultural lands, wetlands, grasslands and forestlands.

Deploying Partnerships and Leveraging Resources
The Regional Conservation Partnership Program (RCPP), launched in 2015, brings a radically different approach to investing in natural resource conservation and empowers local communities to work with multiple partners, farmers and ranchers to design and invest in regional solutions that work best for them. As this video details, with participating partners investing along with USDA, our $1.2 billion investment in RCPP over the five-year Farm Bill is expected to leverage an additional $1.2 billion from partners for a total of $2.4 billion for innovative conservation work. RCPP puts partners in the driver seat, and lets them draw from NRCS suite of conservation programs to create change, examples include:

- The Tri-State Western Lake Erie Basin Phosphorous Reduction Initiative. A recent algal bloom crisis left 400,000 residents in the Toledo, Ohio area without water to drink, bathe or cook. The coalition brings together more than 40 partnering organizations from Michigan, Ohio and Indiana to reduce phosphorus runoff into Lake Erie, targeting funding to the streams and rivers that have the largest impact on water quality in the lake.

- A coalition of partners led by the Illinois Corn Growers and the University of Illinois was awarded a $5.3 million RCPP agreement for implementation of the Precision Conservation Management (PCM) effort to help farmers reduce nutrient loss from their fields by adapting precision technology, data and farm business management principles to the nutrient loss and conservation. PCM is a service program that combines farm business and financial practices with precision technology and data management to help farmers better integrate and manage conservation on their farms. It will provide analysis, technical assistance, financial assistance and data assessment to help reduce complexity and manage risks associated with the nutrient loss efforts. PCM combines $9.86 million in private matching contributions.

- In Colorado, the state’s Energy Office was awarded 1.1 million in RCPP funds to support energy efficiency improvements, matched by 1.3 million from the Colorado Energy Office (CEO). Funds will help finance energy and water saving projects identified through CEO's Colorado Dairy and Irrigation Efficiency Program. Over the two-year grant period, the efficiency improvements are expected to achieve over 5,250 MWh of electricity savings and 524,000 gallons of water savings annually, and will provide additional environmental benefits to Colorado's agricultural producers.

Measuring Results, Stewarding Public Resources and Streamlining Conservation Delivery
Measuring the results of conservation and the hard work of farmers is essential to demonstrating meaningful impact. The Conservation Effects Assessment Project (CEAP) is an NRCS-led multi-agency effort to quantify the environmental effects of conservation practices and develop the science base for managing the agricultural landscape. CEAP embodies a model of shared leadership, leveraging funding and expertise of more than 60 Federal and State agencies,
universities, and non-profit organizations to guide USDA conservation policy and program development and help farmers and ranchers make more informed decisions for their land. NRCS’ Science and Technology

As NRCS improves the way it measures the impacts of programs, the agency is also pursuing new ways to better reach producers, enable high-quality, science based planning, and streamline business processes for the agency and producers alike. Conservation Client Gateway is a secure online web application that gives landowners and land managers, operating as individuals, the ability to track their payments, report completed practices, request conservation assistance, and electronically sign documents anytime, anywhere. Conservation Client Gateway provides users the flexibility to determine when they want to engage with NRCS online and when they prefer in-person conservation planning assistance. Client gateway is part of a broader effort to put more boots on the ground, improve service to producers and create new efficiencies.

As more funds are delivered for conservation, robust accounting and documentation procedures must be in place to manage public funds responsibly. Over the past several years, NRCS has made significant improvements such as enhancing the agency’s internal controls over financial resources, reducing potential information technology security risks, and strengthening the reporting of its financial obligations. Specifically, NRCS implemented system enhancements to preclude improper payments resulting in NRCS meeting its improper payment rate target for the first time in FY2016. Additionally, improvements to the annual internal control review process, and robust testing and validation has led to early identification and remediation of potential weaknesses.

Prior to 2016, NRCS did not have the capacity to perform multiple concurrent vulnerability assessments (source code and running application scans) with existing hardware. Not only was the goal to implement a modern scanning platform that services the growing NRCS IT portfolio, but to provide vulnerability assessment services across the USDA. In order to achieve these objectives the Information Technology (IT) Security Division designed and constructed a private cloud of state of the art vulnerability assessment tools from IBM, HP and other commercial vendors. The IT Security Division collaborated with National Information Technology Center (NITC) and Agriculture Security Operations Center (ASOC) to operationalize the Enterprise Vulnerability Assessment (EVA) virtual scanning platform. EVA version 1.0 provides the NRCS with the capability to perform up to 352 scans at once.

External Auditors identified findings of non-compliance with Federal Information Security Management Act (FISMA) audit log requirements on the Web-based Total Cost Accounting System (WebTCAS) and Protracts/FundManager applications. To resolve these findings the IT Security Division designed an agency-wide application logging and management solution which captures auditable events that exceed FISMA requirements. The IT Security Division formed a working group comprised of NRCS Application Project Teams, NRCS Production Support Operations (PSO) and NITC to implement the Application Audit Logging Solution (AALS) on WebTCAS and Protracts/FundManager. With the implementation of AALS the audit findings against WebTCAS and Protracts/FundManager were closed.
Independent auditors found that NRCS has made continued improvement in financial reporting processes and controls and financial management for information technology systems, ensuring that the infrastructure is robust and data safeguarded.

Fostering Conservation Innovation
Through NRCS’ Conservation Innovation Grant (CIG) program, USDA is investing in projects that promote creativity and problem-solving in conservation. Since 2009, 368 CIGs have been awarded to support conservation approaches and technologies that develop new technologies and investments in natural resource conservation and help farmers and ranchers make their operations more resilient. Through CIG, NRCS has pioneered initiatives in emerging environmental markets for greenhouse gas and water quality credits among others. The agency supports the coalition on Agricultural Greenhouse Gases (C-AGG), the National Network for Water Quality Trading—facilitated by the Willamette Partnership, and the Conservation Finance Practitioners Roundtable led by the Conservation Finance Network (a program of the Conservation Fund)—three networks that bring together experts and grant recipients to advance lessons learned and scale new innovations in conservation. Example efforts include:

- In North Dakota’s Prairie Pothole region, a CIG helped develop the methodology needed to quantify, and create a market for, carbon stored in grasslands. Thanks to USDA’s support, in partnership with Ducks Unlimited, The Climate Trust and the Bonneville Environmental foundation, in 2014 Chevrolet purchased almost 40,000 tons of greenhouse gasses from ranchers to partially offset the company’s carbon emissions.

- In Oregon, the Freshwater Trust worked with Willamette Partnership and a number of other organizations, agencies and regulators to develop the standards, calculation methodologies, verification procedures, and state policies necessary to allow for the trading of credits for water temperature in Oregon. Through the project, the city of Medford, OR worked with farmers, ranchers and other private landowners to plant shade trees to cool the Rogue River in order to meet its regulatory compliance requirements for cooling wastewater and protecting salmon habitat.

- In the city of Peoria, Illinois, Fresh Coast Capital is piloting an innovative approach to financing green infrastructure through impact investing in agroforestry and vegetable farming. The project will serve as a model for expansion with privately funded impact investment capital throughout Peoria and into 40 or more cities facing both land vacancy and stormwater compliance challenges.

- In partnership with major food companies, agricultural investors, and conservation-minded farmers, the Xerces Society is developing a first-of-its-kind certification program that incentivizes the large-scale adoption of pollinator conservation through a marketing-driven platform. This program, known as Bee Better Farming, will leverage scalable investments from the private sector to develop clearly defined pollinator conservation metrics that will be rewarded with a formally recognized certification.
The Nature Conservancy is developing impact investment blueprints for Gulf of Mexico restoration that outline how public funding can be used to attract private investment funds to conservation, greatly expanding the impact of various Deepwater Horizon settlement funds. The blueprints will be combined with a pipeline of specific deal opportunities to provide place-based examples of how private investment can complement settlement funds and support voluntary working lands conservation and restoration.

**Gulf Ecosystem Restoration Council (RESTORE) – Overview**

Spurred by the Deepwater Horizon oil spill, the RESTORE Act was signed into law by President Obama on July 6, 2012. The Act calls for a regional approach to restoring the long-term health of the valuable natural ecosystems and economy of the Gulf Coast region. The RESTORE Act dedicates 80 percent of civil and administrative penalties paid under the Clean Water Act, after the date of enactment, by responsible parties in connection with the Deepwater Horizon oil spill to the Gulf Coast Restoration Trust Fund (Trust Fund) for ecosystem restoration, economic recovery, and tourism promotion in the Gulf Coast region. This effort is in addition to the restoration of natural resources injured by the spill that is being accomplished through a separate Natural Resource Damage Assessment (NRDA) under the Oil Pollution Act. A third and related Gulf restoration effort is being administered by the National Fish and Wildlife Foundation (NFWF) using funds from the settlement of criminal charges against BP and Transocean Deepwater, Inc.

In addition to creating the Trust Fund, the RESTORE Act established the Council. The Council is currently chaired by the Secretary of the U.S. Department of Agriculture (USDA) and includes the Governors of the States of Alabama, Florida, Louisiana, Mississippi and Texas, and the Secretaries of the U.S. Departments of Army, Commerce, Homeland Security and the Interior, and the Administrator of the U.S. Environmental Protection Agency. The Council has oversight of the expenditure of 60 percent of the funds made available from the Trust Fund. The Chair is selected by the states and appointed by the President. Commerce was the Chair from 2012-2015. USDA became Chair this year. There is no defined term for the Chair.

Following publication of an Initial Plan completed in 2013, Council members collaborated to develop an initial funded priorities list of projects using a process that emphasized public input, transparency, and coordination with other restoration programs. Each proposal underwent a rigorous science review by three external experts from both inside and outside the Gulf region to assess whether the project utilized best available science.

The Council’s Initial Comprehensive Plan outlined a process to guide the development, evaluation and selection of Council-Selected Restoration Component activities to ensure consistency with the Priority Criteria set forth in the RESTORE Act as well as the Council’s goals and objectives. Through a new comprehensive plan, expected to be finalized in December of 2016, the Council has reaffirmed and retained key elements of this process while supplementing it
United States Department of Agriculture  
2016 Presidential Transition  
Natural Resources and Environment Mission Area (NRE)

with guidance based on lessons learned over its first three years of operation. The draft Comprehensive Plan Update is intended to improve Council decisions by:

- Reinforcing the Council’s goals and objectives;
- Setting forth an initial Ten-Year Funding Strategy
- Establishing the Council’s vision for Gulf restoration;
- Increasing collaboration among Council members and partner restoration programs;
- Providing for advancement of large-scale projects and programs;
- Refining the process for ensuring that the Council’s decisions are informed by the best available science; and
- Improving the efficiency, effectiveness and transparency of Council actions.

The Council has a staff of approximately 20 professionals, overseen by Executive Director Justin Ehrenwerth who reports to the Council as a whole. USDA provides administrative support for the council staff, who are career civil servants.

There are two important issues for the Restore Council which an incoming Administration will need to address. First, in October, OMB and CEQ issued a federal memorandum on permitting and environmental review of large scale Gulf restoration projects. It will be important to implement the policies outlined in the memo by encouraging greater coordination and collaboration amongst federal agencies to speed restoration. Second, the new Comprehensive Plan calls for a series of public meetings to begin developing restoration projects for the next round of funding. Those meetings will begin in 2017 and will require input from the Council Chair.

### 2016 Presidential Transition

#### Natural Resources and Environment Mission Area (NRE)

### II. Top Issues/Hot Topics

#### Timeline

See below

#### Mission Area Issues

| Wildfire Suppression Budget Fix and Forest Management Provisions | More than 150 bipartisan Congressional members have voiced strong support to remedy the Forest Service’s growing budget dilemma resulting from the skyrocketing costs for fire suppression, which now consume more than 56 percent of the agency’s budget. This trend, resulting from hotter, more severe wildfires and longer fire seasons, erodes the agency’s ability to meet its mission in other critical programs like forest restoration, recreation and services to the public. If this trend continues, it is projected that fire suppression will consume more than 70 percent of the agency’s budget by 2020. The agency has already experienced a 40 percent drop in workforce while needs for increased restoration to foster forest ecological resilience are rising rapidly. Several pieces of draft legislation have been introduced. Pending the outcome of this Congress, work will be needed to implement reform or seek additional congressional action. | January-June 2017 |
| Farm Bill Revision | The 2014 Farm Bill expires in September 2018, but Congress will hold hearings and begin the work of rewriting the next Farm Bill early in 2017. Significant attention will be paid to implementation of the 2014 Farm Bill Forest Service authorities and whether to amend or expand existing (or create new) authorities to assist the Forest Service in accomplishing their missions. The 2014 Farm Bill significantly expanded the tools that will support the ability of the Forest Service to accomplish restoration work on the ground. Among the tools include permanent authorization for stewardship contracting and the Good Neighbor Authority. In addition, the 2014 Farm Bill provided the Forest Service with an increased ability to address insect and disease infestations. For NRCS, anticipated topics of interest in the new Farm Bill may include but are not limited to the Regional Conservation Partnership Program (RCPP), Conservation Stewardship Program (CSP) reinvention, Chesapeake Bay restoration efforts, and conservation compliance activities. This is likely to be a difficult reauthorization | Ongoing |

19
process, with tight funding levels and multiple priorities across the various Farm Bill titles. In the reauthorization of the farm bill in 2014, the committees were challenged to reduce overall spending by $23 billion while making responsible farm bill investments. The conservation title alone was reduced by $6 billion, resulting in funding cuts for every program.

<thead>
<tr>
<th>Mineral Withdrawals</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Forest Service continues to advance mineral withdrawal applications and processes in several locations throughout the National Forest System. A mineral withdrawal refers to prohibited actions for a specified parcel of land for a defined period of time, usually 3, 5, or 20 years. Withdrawal action prohibits all mining activities under the 1872 Law, except actions that have been authorized under an approved Plan of Operations on mining claims with prior valid existing rights. The Forest Service works in conjunction with the Department of the Interior and Bureau of Land Management to process withdrawals as the authority for mineral withdrawals rest with the Secretary of Interior. There have been several pieces of legislation in the 114th Congress relating to mineral withdrawal on National Forest System lands.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Northwest Forest Plan</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Northwest Forest Plan (NWFP) was an amendment to multiple forest plans on Forest Service and BLM managed public lands in western Washington, Oregon and northern California. The NWFP is widely perceived to be a regional plan requiring change with a high level of consistency. These forest plans are over 20 years old, and per the National Forest Management Act, are in need of plan revision. The issue is how to revise individual National Forest plans in this broader landscape context, especially since the BLM is currently revising its plans for its O&amp;C lands in the region. The NWFP has a substantial record of broad scale monitoring and science. The latest monitoring results (20 year NWFP monitoring report) have revealed issues related to managing wildfire, reduced populations of the endangered northern spotted owls, and timber harvest levels below projections of the NWFP. A science synthesis intended to provide a scientific framework for making changes to plans in the Northwest is in its final</td>

<tbody>
<tr>
<td>stages, and is expected to be released in November 2016. This work will be formally peer reviewed by the Ecological Society of America and is considered to be a highly influential science assessment by the White House Office of Management and Budget. There is active consideration to develop a bioregional assessment to determine what actions to take in the future.</td>
<td></td>
</tr>
<tr>
<td>EPA and Biomass Energy</td>
<td>EPA has not resolved longstanding regulatory and permitting issues associated with CO2 emissions from biogenic sources. Short-rotation agricultural feedstocks and forest biomass feedstocks offer potential opportunities to displace fossil fuel consumption and support energy independence and economic development goals. In the case of forests, markets for wood products can also be important to provide incentives for maintaining working forests from conversion to other uses and for supporting forest restoration costs across all forest landownerships. Uncertainty in EPA’s treatment of biogenic carbon under the stationary sources permitting program and the Clean Power Plan, has created disincentives for investment in bioenergy solutions. This issue is polarizing and of great interest to a number of industry and environmental stakeholders. USDA research, economists and forest inventory and analysis programs can be helpful to assess the impacts of bioenergy policy decisions. EPA continues work through the Science Advisory Board to take input on this topic. EPA is also working to finalize a biogenic accounting framework that would assist states in making permitting decisions regarding different bioenergy projects or programs.</td>
</tr>
<tr>
<td>Rosemont Mine (Arizona)</td>
<td>Rosemont Copper Mine is a proposed open pit copper mine with mixed ownership, including 3,670 acres of NFS lands on the Coronado National Forest. The proposed mine is currently undergoing a permitting review process under the direction of the Forest Service and the US Army Corps of Engineers. T&amp;E species, air quality, surface water quality, and groundwater impacts are all issues. Supplemental Information Reports were completed in response to official objections. The Coronado National Forest reviewed the US Fish and Wildlife Service’s final Biological Opinion based on the Forest’s submittal of a Supplemental Biological Assessment. The FS Record of Decision for the project is awaiting signature but is on hold until the Army Corps of Engineers signs the ROD for issuance of the 404 Clean Water Act permit. FS cannot authorize a locatable operation until it is compliant with Clean Water Act.</td>

<thead>
<tr>
<th>Job Corps Program Budget and Closures</th>
<th>The Forest Service operates 27 Job Corps Civilian Conservation Centers, which offer educational and vocational training to about 5,000 economically disadvantaged youth. Forest Service centers have operated since 1964 through an interagency agreement with Department of Labor (DOL), which manages the overall Job Corps program and other centers. Working with DOL, we are in the process of closing the Ouachita Job Corps Center in Arkansas, and have been implementing performance improvement measures across the Forest Service system. Over the past 5 years, DOL has consistently reduced the budget it provides to the Forest Service to run Job Corps Civilian Conservation Centers, including reducing FS center allocations at greater percentages than the system overall. Every year for the past few years, USDA has had to negotiate with DOL to reduce the degree of their cuts to prevent workforce impacts like RIFs. At the same time, Forest Service has been working to address two closures, implement performance improvements across the system, be responsive to new DOL system-wide safety measures, and manage a federal workforce. The program also delivers service to the National Forest System-- for example, FS fire management officers are now at every center training students in fire response, and more than 1,000 Job Corps students deployed to support fire prevention and response efforts across the country in 2015. This year, DOL’s initial budget allocation was for a budget of $151.8M – a reduction of more than $3.5M from the previous PY budget of $155.5M. USDA appealed and requested an increase of $4.7M above DOL’s initial allocation for a budget of $156.5M, including to address DOL concerns such as the need to fill 150 critical staff vacancies, including for safety and security, counseling, trades and residential living. DOL has in the past charged that USDA centers are more expensive to run. Last summer, DOL audited the FS Job Corps budget and found that, in fact, on a per capita basis, USDA centers are at the lower end of the scale in terms of per student cost. Forest Service Centers often carry higher human capital expenditures including different salary and benefits packages for our workforce as opposed to some of the contracted centers managed by</th>

<tr>
<td>Building Blocks for Climate Smart Agriculture and Forestry</td>
<td>Both NRCS and Forest Service are playing leadership roles in a strategy to advance conservation practices and technologies that reduce greenhouse gas emissions and increase carbon storage in trees and soils as part of the U.S. Commitment to reduce emissions by 26-28% over 2005 levels by 2025. Through a series of voluntary and incentive-based programs, USDA and its partners plan to reduce greenhouse gas emissions and increase carbon sequestration by 120 million metric tons of carbon dioxide equivalent by 2025. The strategy is called the Building Blocks for Climate Smart Agriculture and Forestry. Through efforts to enhance reforestation in the aftermath of wildfire, improve soil health, improve nutrient management, grow markets for long-lived wood products, partner with livestock producers and others, USDA has created a framework for climate action for farmers, ranchers and forest landowners that is compatible with their stewardship and economic goals. Many of these technologies and practices are already in high demand by producers, industry and relevant associations. Efforts to increase and measure practice adoption in partnership with USDA’s Climate Change Program Office will be required to sustain a voluntary approach to climate solutions for agriculture and forestry and to meet our international commitments.</td>
<td>Ongoing</td>
</tr>
<tr>
<td>National Drought Resilience Partnership (NDRP)</td>
<td>Significant drought is impacting three regions of the US: California and other western states have been in drought for going on 5 years; and more recently, Northeastern states from Maine to New Jersey; and Southeastern states including parts of Georgia, Tennessee, Alabama and Mississippi. Long-term forecasts suggest more frequent and intense droughts. Led by NRE, multiple USDA agencies have mobilized to support long-term drought strategies on public and working lands. USDA has also emerged as a leader among federal agencies, serving as the permanent co-chair and the administrative home for the National Drought Resilience Partnership, a 13-federal agency partnership established by the President in March of 2016 through a Presidential Memorandum, tasked working collaboratively across the federal government to support state and local strategies long term drought resilience strategies. We are responsible for managing the NDRP. The Under Secretary serves as Co-Chair of the NDRP Principals Committee and the Deputy Under Secretary for Conservation co-chairs the NDRP Steering Committee. NRE’s Confidential Assistant serves as the Executive Secretariat, managing day-to-day activities. The NDRP Steering Committee is required to report progress to the Principals Committee and the White House Council on Climate Preparedness and Resilience in March of 2017. The most recent NDRP progress report can be found on the USDA website.</td>
<td>Ongoing</td>
</tr>
<tr>
<td>Deepwater Horizon Settlement Funds – RESTORE and NRDA</td>
<td>USDA is the Chair of the Gulf Coast Ecosystem Restoration Council (RESTORE), The Office of the Under Secretary staffs the Secretary in his role as chair. USDA is also a member of the Natural Resource Damages Assessment (NRDA) Trustee Council, which is responsible for planning and carrying out restoration projects to address the injury that occurred as a result of the Deepwater Horizon oil spill disaster that began on April 20, 2010. The Deputy Under Secretary for Conservation has been serving as the Secretary’s designee on the NRDA Trustee Council, which is providing general oversight of seven Trustee Implementation Groups that are developing restoration projects and plans to accomplish the significant work needed for the Gulf. Development of these projects is guided by the programmatic restoration plan finalized in 2016 as part of the legal settlement with BP for up to $8.8 billion, a subset of the historic settlement of $20 billion that also provided funds to the RESTORE Council. The development of these plans is ongoing and initial rounds of restoration payments will begin to be disbursed beginning in the Spring of 2017. The USDA - NRCS,</td>

#### 2016 Presidential Transition

Natural Resources and Environment Mission Area (NRE)

| Forest Service Recreation Modernization Effort | Gulf Coast Ecosystem Restoration Team (GCERT) based in Madison, Mississippi, is staffing USDA’s engagement on NRDA and RESTORE, with oversight from the Under Secretary’s office. | Ongoing |

Forest Service recreation special use permits provide organized access for service providers who take groups of people to national forests and grasslands to experience outdoor recreation, while allowing the Forest Service to manage visitor volume in specific locations and protect resources. In September 2016, the agency began taking steps to improve access such as:

- Streamlining the process to receive or renew a recreation special use permit, making it simpler and faster through the use of existing agency authorities;
- Increasing staff capacity and the consistency of the permit process across the country by developing new standardized training programs and exploring new staffing strategies;
- Encouraging managers to take greater advantage of allowable waivers when a special use permit is not required, for example, where a proposed use would have only nominal impact on lands, resources, and programs or operations; and
- Investing in technology to improve business tools and data that support recreation special uses, including developing an electronic permit application process.

Implementation of these and other improvements to support recreation access will be an ongoing need.

### GAO and OIG Audits

| Office of Inspector General’s 2017 Audit of Forest Service Efforts to Improve Quality of Work Environment | In spring 2017, the Forest Service expects the Office of Inspector General to conduct an audit of the agency’s efforts to improve the work environment. Since 2012, the Forest Service has progressed significantly to improve the quality of its work environment for all employees. Agency leaders have placed specific focus on the Pacific Southwest Region, the largest unit in the Forest Service which employs a workforce of 6000, which also hosts the largest firefighting workforce. The agency paid serious attention to complaints from women firefighters who have alleged discrimination and harassment in the agency. Six women filed a putative class complaint; it hasn’t been certified, however. In four years the agency has undertaken a number of aggressive actions to address allegations— | Spring 2017 |
including investigating every allegation and taking appropriate disciplinary actions. The agency has also made significant investments to improve the workplace. Specifically, the agency revamped the Employees Relations organization and increased the number of Employee Relations professionals who assist agency leaders in investigating, assessing and addressing employee misconduct; the Forest Service contracted a 3rd party to conduct a climate assessment of the work environment in the Pacific Southwest Region to address employee concerns for harassment and discrimination. A comprehensive action strategy resulted from that assessment; the agency has also instituted civil rights, harassment and antidiscrimination training for agency leaders, supervisors and employee relations professionals; the agency invested in a telephone hotline for employees to report allegations of harassment and discrimination. The Forest Service redesigned the Civil Rights Organization for more effective and consistent program delivery. In addition, the agency invested in new data systems to monitor and address workplace trends in the agency’s field units. In August 2016, The Forest Service finalized and began implementing a new Anti-harassment Policy, which raises a standard conduct and makes clear a zero tolerance of any form of harassment, including bullying; it imposes a standard for all employees to immediately report any form of harassment and institutes protocols to protect victims and hold accountable those responsible for harassment. It is one of the strictest policies in USDA.

### Highly Erodible Land and Wetland Conservation Compliance

Eligibility for most USDA financial assistance programs is contingent on a program participant’s compliance with the highly erodible land (HELC) and wetland (WC) conservation compliance provisions, as required under the Food Security Act of 1985. In the 2014 Farm Act, Congress re-linked crop insurance subsidies to conservation compliance, which triggered these requirements for an additional segment of agriculture. The new requirements were implemented smoothly, without much push back. However, some conservation groups are positioning to re-start the discussion for further strengthening compliance requirements. Farm groups already have voiced concerns, which could tee this up for the Farm Bill reauthorization in 2017.

A recent audit report from USDA’s Office of Inspector General (Audit Report 50601-0005-31) has also raised congressional interest in compliance implementation. The report looked at various aspects of compliance implementation including the dataset used to select tracts

WHAT WE DO: OUR MISSION

The Research, Education, and Economics (REE) mission is responsible for advancing scientific knowledge related to food and agriculture through research, extension, and education. Four agencies (and the Office of the Chief Scientist) comprise the REE Mission area: Agricultural Research Service (ARS), Economic Research Service (ERS), National Agricultural Statistics Service (NASS), National Institute of Food and Agriculture (NIFA). Also, the Under Secretary is USDA’s Chief Scientist with USDA-wide responsibilities for scientific integrity and coordination of research and education. The National Agricultural Research, Extension, Education, and Economics (NAREEE) Advisory Board provides advice to the Secretary and Congress on relevance and adequacy of REE programs.

WHO WE ARE: OUR WORKFORCE

REE Agency Employment (approximations):
- ARS: 7,700 Employees
- ERS: 360 Employees
- NASS: 950 Employees
- NIFA: 390 Employees
- OCS: 7 Employees
- REE: 10 Employees

WHO WE SERVE: OUR CONSTITUENTS

REE provides scientific research, economic research and analysis, and statistical information to inform USDA program and policy decisions, science-based solutions to farmers and agriculture industry, and educational programs for the next generation workforce.

KEY UPCOMING DECISIONS

- National Action Plan for Combating Antibiotic Resistant Bacteria (CARB): Whether to request funding from the REE agencies and across other Mission Areas of USDA for CARB activities as a priority initiative.
- The Billion-Ton Bioeconomy Initiative: In February 2017 USDA and DOE are expected to sign an MOU supporting Bioenergy R&D and Joint Vision. Following the MOU signing, the launch of the Interagency Action Plan on the Bioeconomy is expected.
- U.S. Farm Income Forecasts: The first ERS release for 2017 will happen in February. Forecasts are used by USDA and its stakeholders to inform perspectives on the financial health of the U.S. agricultural economy.

BUDGET HIGHLIGHTS FY 2016

- REE Undersecretary Office $893,000 in Office of the Secretary’s budget
- Mission area agencies total appropriation in FY 2016 is over $3.3 billion.
- Office of the Chief Scientist and the NAREEE Advisory Board funded through REE agencies
- REE appropriation in inflation adjusted dollars is less than in 2010

FY 2016 Budget Authority

ARS: 46%
ERS: 47%
NASS: 5%
NIFA: 3%

The Office of the Under Secretary of Research, Education, and Economics currently has 10 staff members, including the Under Secretary, Dr. Cathie Woteki. The Deputy Under Secretary, Dr. Ann Bartuska, is a career USDA employee. The positions of Chief of Staff Senior Advisor, and Confidential Assistant are currently filled by political appointees. The Communications Director and Public Affairs Specialist positions are filled by career USDA employees. The two executive assistants and the program assistant are also career USDA employees.

Biographies for career and political staff in key leadership positions

Dr. Catherine (Cathie) Woteki
Under Secretary for Research, Education, and Economics and Chief Scientist (Political)
202-720-5923, catherine.woteki@osec.usda.gov

Dr. Catherine Woteki is Under Secretary for United States Department of Agriculture's (USDA) Research, Education, and Economics (REE) mission area, as well as the Department's Chief Scientist. Her responsibilities include oversight of the four agencies that comprise REE, the Agricultural Research Service (ARS), National Institute for Food and Agriculture (NIFA), Economic Research Service (ERS), National Agricultural Statistics Service (NASS), and the Office of the Chief Scientist. The National Agriculture Library and National Arboretum, are within ARS and thus, also fall under this mission area.

Before joining USDA, Dr. Woteki served as Global Director of Scientific Affairs for Mars, Incorporated, where she managed the company's scientific policy and research on matters of health, nutrition, and food safety.

From 2002 to 2005, she was Dean of Agriculture and Professor of Human Nutrition at Iowa State University, where she was also the head of the Agriculture Experiment Station. Dr. Woteki served as the first Under Secretary for Food Safety at USDA from 1997 to 2001, where she oversaw U.S. Government food safety policy development and USDA's continuity of operations planning. Dr. Woteki also served as the Deputy Under Secretary for REE at USDA in 1996.

Prior to going to USDA, Dr. Woteki served in the White House Office of Science and Technology Policy as Deputy Associate Director for Science from 1994 to 1996. During that time she co-authored the Clinton Administration’s policy statement, “Science in the National Interest.” Dr. Woteki has also held positions in the National Center for Health Statistics of the U.S. Department of Health and Human Services (1983 to 1990), the Human Nutrition Information Service at USDA (1981 to 1983), and as Director of the Food and Nutrition Board of the Institute of Medicine at the National Academy of Sciences (1990 to 1993). During her tenure as Director of the Food and Nutrition Board she had direct responsibility for twenty-seven studies and co-authored a nutrition book entitled Eat for Life which became a Book of the Month Club selection.

Dr. Woteki’s research interests include nutrition, food safety policy, risk assessment, and health survey design and analysis. She is the author of over sixty refereed scientific articles and twelve books and technical reports.
In 1999, Dr. Woteki was elected to the Institute of Medicine of the National Academy of Sciences, where she has chaired the Food and Nutrition Board (2003 to 2005). She received her M.S. and Ph.D. in Human Nutrition from Virginia Polytechnic Institute and State University (1974). Dr. Woteki received her B.S. in Biology and Chemistry from Mary Washington College (1969).

Dr. Ann Bartuska
Deputy Under Secretary for Research, Education, and Economics
202-720-5923, ann.bartuska@osec.usda.gov

Dr. Ann M. Bartuska is Deputy Under Secretary for USDA's Research, Education, and Economics (REE) mission area. She came to REE in September, 2010 from the USDA Forest Service, where she was Deputy Chief for Research & Development, a position she had held since January 2004. She served as Acting USDA Deputy Undersecretary for Natural Resources and Environment from January - October of 2009, and was the Executive Director of the Invasive Species Initiative of the Nature Conservancy from 2001-2004. Prior to this, she was the Director of the Forest and Rangelands staff in the Forest Service in Washington, DC.

Dr. Bartuska is an ecosystem ecologist with degrees from Wilkes College (B.S.), Ohio University (M.S.) and West Virginia University (Ph.D.). She represents USDA on the Committee on Environment, Natural Resources and Sustainability of the White House National Science and Technology Council. Bartuska is currently on the Multi-disciplinary Expert Panel (MEP) of the Intergovernmental Panel on Biodiversity and Ecosystem Services (IPBES), chartered by UNEP, and is active in the Ecological Society of America, serving as Vice-President for Public Affairs from 1996-1999 and as president from 2002-2003. She has served as co-chair of the Science and Technology for Sustainability Roundtable of the National Academies, on the Board of the Council of Science Society Presidents, and is a member of AAAS (American Association for the Advancement of Science) and SACNAS (Society for the Advancement of Chicanos and Native Americans in Science).

Dr. Chavonda Jacobs-Young
Administrator, Agricultural Research Service
202-720-3656, c.jacobsyoung@ars.usda.gov

Dr. Chavonda Jacobs-Young has served as Administrator of the U.S. Department of Agriculture's chief scientific in-house research agency since February 2014. Previously, Dr. Jacobs-Young had served as ARS Associate Administrator for National Programs, where she led the Office of National Programs, which manages the research objectives of the Agency, and the Office of International Research Programs, which is responsible for ARS’ liaison with its international partners.

Prior to moving into her roles at ARS, Dr. Jacobs-Young served as the Director of the Office of the Chief Scientist at USDA, where she was responsible for facilitating the coordination of scientific leadership across the Department to ensure that research supported by, and scientific advice provided to, the Department and external stakeholders were held to the highest standards of intellectual rigor and scientific integrity. She served as the Acting Director for USDA’s National
Institute of Food and Agriculture, and has served as a senior policy analyst for agriculture in the White House Office of Science and Technology Policy.

Dr. Jacobs-Young is a native of Georgia. She holds M.S. and Ph.D. degrees in Wood and Paper Science and a B.S. degree in Pulp and Paper Science and Technology from North Carolina State University. She also is a graduate of American University's Executive Leadership in Public Policy Implementation Program.

Dr. Mary Bohman
Administrator, Economic Research Service
202-694-5000, mbohman@ers.usda.gov

Dr. Bohman joined ERS in 1997 and previously served as Director of the Agency's Resource and Rural Economics Division, Deputy Director for Research in the Market and Trade Economics Division (MTED), and Chief of MTED's Europe, Africa, and Middle East Branch. Other public-sector positions held include details to the White House Office of Science and Technology Policy and to USDA's Under Secretary for Farm and Foreign Agricultural Services. From 1990 to 1997 she was on the Agricultural Sciences faculty at the University of British Columbia.

Mary is a member of the Agricultural & Applied Economics Association, the Association of Environmental and Resource Economists, and the International Association of Agricultural Economists. She serves as Co-Chair of the Global Steering Committee for the Global Strategy for Agricultural and Rural Statistics under the United Nations Statistical Commission.

Dr. Bohman received her Ph.D. from the Department of Agricultural Economics, University of California, Davis and her B.S. from the School of Foreign Service, Georgetown University.

Hubert Hamer
Administrator, National Agriculture Statistics Service
202-720-3896, hubert.hamer@nass.usda.gov

Before becoming administrator, Mr. Hamer served as director of the Statistics Division, which produces and releases more than 400 national statistical reports each year covering the agency’s crops, livestock, economic, demographic, environmental, and census programs. He also served as executive director of the NASS Agricultural Statistics Board (ASB) and executive director of the Advisory Committee on Agriculture Statistics. From May 2000 until April 2010, Hamer was NASS Associate Deputy Administrator for Field Operations, overseeing 24 state field offices as well as the Training and Career Development Office.

Hamer completed the program for Senior Managers in Government at Harvard University’s John F. Kennedy School of Government in 2004 and completed the Office of Personnel Management (OPM) Executive Potential Program in 1994. As part of the OPM program, he served as a fellow with the Senate Budget Committee and worked on the staff of the Secretary of Agriculture.
Hamer was born on a small livestock and row crop farm in Benton County, Mississippi, and later continued his development in Grand Junction, Tennessee. He is a graduate of Tennessee State University.

**Dr. Sonny Ramaswamy**

**Director, National Institute of Food and Agriculture (Political-term)**

202-720-4423, sonny@nifa.usda.gov

Dr. Sonny Ramaswamy was appointed by President Barack Obama in 2012 to serve as Director of the National Institute of Food and Agriculture. The Director of NIFA serves a six-year term based on legislation and is also subject to reappointment for an additional six-year term.

Prior to starting at NIFA, Dr. Ramaswamy held a number of academic positions, including: Dean of Oregon State University’s College of Agricultural Sciences; Director of Purdue’s Agricultural Research Programs; university distinguished professor and head of Kansas State’s Entomology Department; and professor of entomology at Mississippi State.

Dr. Ramaswamy received his B.S. degree in agriculture and M.S. degree in entomology from the University of Agricultural Sciences, Bangalore, India. His doctorate is in entomology from Rutgers University. He is also a graduate of Harvard University’s Management Development Program.

**Kim Green**

**Director of the Office of the Chief Scientist**

202-720-3444, kim.green@osec.usda.gov

Ms. Kim Green was selected to be the Director of the Office of the Chief Scientist in 2014, after eight years of service to USDA within the Food Safety and Inspection Service (FSIS). She held several positions with FSIS, including Acting Deputy Assistant Administrator, Director of the Food Defense and Assessment Staff, and Director of the Data Analysis and Integration Staff. She served as Acting District Manager for the Denver District of the Office of Field Operations, responsible for public health and food safety for the Agency's largest operational region, stretching from Nebraska to Guam. Ms. Green was on detail with the Natural Resources Conservation Service in 2014. Before joining USDA, Ms. Green was Vice President for Research, Science, and Technical Affairs for the International Bottled Water Association.

She holds a Bachelor of Science Degree in Chemistry and a Master of Science in Geochemistry, both from The Colorado School of Mines. She was appointed to the U.S. Army Science Board and served from 1991-1997. Ms. Green is the author or co-author of more than 30 peer-reviewed scientific publications.
Overview of REE Programs and Operations

Mission Statement:
The Research, Education, and Economics (REE) mission area of the U. S. Department of Agriculture has Federal leadership responsibility for advancing scientific knowledge related to food and agriculture through research, extension, and education.

Priority Goals:
Building on REE’s 2010 “A Roadmap for USDA Science,” the REE Action Plan, first developed in 2012 and revised in 2014, establishes goals and priorities for USDA science and education. It includes strategies and actions to help coordinate efforts to achieve these goals:

- Goal 1: Local and Global Food Supply and Security
- Goal 2: Responding to Climate and Energy Needs
- Goal 3: Sustainable Use of Natural Resources
- Goal 4: Nutrition and Childhood Obesity
- Goal 5: Food Safety
- Goal 6: Education and Science Literacy
- Goal 7: Rural-Urban Interdependence and Prosperity

Several goals have sub-goals to provide programmatic emphasis. For each goal or sub-goal, strategies are identified that provide a vision for how the goals can be supported. Through alignment with the various components in the REE plan, USDA agencies demonstrate that their programs support the stated goals, which in turn support the broader Departmental goals, set forth by the Secretary of Agriculture.

The Research, Education, and Economics (REE) mission area works to address the challenges that exist today and those that will confront the country in the future. Through the combined efforts of all REE scientists, researchers, and partners, USDA has created a robust infrastructure to perform world-class science and to deliver classroom and community education and transfer technologies from the labs to the private sector for commercialization.

Major Programs in REE:
The Agricultural Research Service (ARS) is the largest intramural research agency of USDA. ARS has a workforce comprised of life and physical scientists, engineers, and veterinarians who represent a wide range of disciplines and work at more than 90 locations across the country and at 5 overseas laboratories. The ARS research agenda is broad, with about 750 research projects organized under 4 major program areas: Nutrition, Food Safety, and Quality; Animal Production and Protection; Natural Resources and Sustainable Agricultural Systems; and Crop Production and Protection.
The Economic Research Service (ERS) is USDA’s primary source of economic information and analysis, and economic and social science research. The mission of ERS is to inform and enhance public and private decision making on economic and policy issues related to agriculture, food, the environment, and rural development.

The National Agricultural Statistics Service (NASS) is USDA’s statistical agency. NASS conducts hundreds of surveys every year and prepares reports covering virtually every aspect of U.S. agriculture. The statistical data provided by NASS is essential to the public and private sectors for making effective policy, production, and marketing decisions on a wide range of agricultural commodities. NASS also conducts statistical science research on survey design, sampling, and other methodological issue areas. NASS works closely with the States in determining their agricultural profiles.

The National Institute of Food and Agriculture (NIFA) is the primary extramural research, education, and extension funding agency of USDA. Its mission is to invest in and advance agricultural research, education, and extension to solve societal challenges. Some of funding opportunities are specific to the Land-Grant University System, and others open to participation by other academic institutions, government agencies, non-governmental organizations, and even private sector entities.

About 94 percent of NIFA funds are used for program grants that are distributed to science professionals around the country to fund innovative solutions to local and global challenges. Grant recipients include colleges and universities across the nation, including the 112 1862, 1890 and 1994 Tribal Land-Grant Institutions; Hispanic-serving institutions; non-land grant colleges; and other academic organizations. Approximately 51 percent of funding is distributed to programs at land-grant universities and other colleges based on eight legislated formulas, generally referred to as “capacity” funding. Partnerships with federal agencies and other entities leverage NIFA’s investments. Approximately four percent of the NIFA programs support higher education and youth development-related efforts, including 4-H programs through the Cooperative Extension System.

Other USDA Organizations: While other USDA organizations do not directly fall within REE mission area jurisdiction (ex: Forest Service (FS) Research and Development (R&D)), their contribution is vital to USDA’s science agenda. Forest Service R&D provides the basic and applied science that underpins the agency’s efforts to promote resilient forests and sustainable communities that can adapt to forest threats such as climate change, fire, and insect and disease infestations. The knowledge and information gained from this research benefits the American public by improving the health and productivity of the Nation’s forests, and the quality of life of communities by providing protection from fire, improving water and air quality, and supporting other ecosystem services in both urban and rural communities.
United States Department of Agriculture
2016 Presidential Transition
Research, Education, and Economics Mission Area (REE)

Program Planning and Evaluation:
The Department’s Office of the Chief Scientist (OCS) was established pursuant to the 2008 Farm Bill. OCS assists USDA’s Chief Scientist in providing strategic coordination of the science that informs the Department’s decisions, policies, and regulations that affect all aspects of U.S. food and agriculture and related landscapes and communities. OCS advises the Chief Scientist, as well as agency leadership and senior staff across the Department, on science policy and science issues. The Office further participates with the Chief Scientist and agency leadership and senior staff in developing and communicating critical policy and program management decisions. Externally, the OCS provides liaison between the Department and other federal entities, as well as members of academia, and industry groups, in identifying and addressing issues of high scientific priority. The OCS ensures the preparation and dissemination of a broad range of information resource documents critical to policy and decision-making processes. OCS Senior Advisors conduct analytical or policy studies and projects that promote the strategic interests of the U.S. Government.

The Office provides Departmental leadership and coordination for the formulation, administration, interpretation and evaluation of the Department’s science and research integrity policies and initiatives. It ensures that research supported by and scientific advice provided to the Department and its stakeholders is held to the highest standards of intellectual rigor and scientific integrity.

The National Agricultural Research, Extension, Education, and Economics Advisory Board (NAREEEAB) provides advice to the Secretary of Agriculture, Congress and land-grant colleges and universities on top priorities and policies for food and agricultural research, education, extension and economics. The Board is made up of 25 members, each of which represents a specific category of U.S. agricultural stakeholders, as mandated by Congress. The Board is charged to provide recommendations to the Under Secretary of the Research, Education, and Economics mission area on the draft strategic plan and to conduct an annual review of the relevance of the REE programs and activities to the established priorities and the adequacy of funds for those programs. The NAREEE Advisory Board also provides advice and recommendations to the Secretary, Congress, and the land-grant colleges and universities on the National Genetic Resources Program; and on the Citrus Disease Research and Extension Program and the Specialty Crop Research Initiative through mandated annual consultations with the National Institute of Food and Agriculture. The NAREEE Advisory Board recently appointed 7 new members. 15 members of various subcommittees of NAREEE are currently being reviewed for appointment. NAREEE has an additional 9 members whose terms will expire in September 2017 and a solicitation to accept nominations for these members will be posted in early spring 2017. NAREEE is exempt from the chartering requirements of the Federal Advisory Committee Act (7 USC 2123(f)).

The National Agricultural Statistics Service (NASS) Advisory Committee on Agricultural Statistics (ACAS) advises the Secretary of Agriculture on the scope, timing, content, etc., of the periodic censuses and surveys of agriculture, other related surveys, and the types of information to obtain from respondents concerning agriculture. ACAS currently has 9 members with terms expiring in January 2017 and, nominations to replace these members are currently being accepted for review. The ACAS charter is current and will not be up for renewal until August 15, 2018.

The Research, Education, and Economics appropriation in 2016, in inflation adjusted dollars is less than in 2010.

**Office of the Chief Scientist**
The 2008 Farm Bill authorizes funding for OCS’ operation through the transfer of funds from agencies within REE.

**National Agricultural Research, Extension, Education, and Economics (NAREEE) Advisory Board**
The National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended, sets a cap of $500,000 annually (including staff salaries) for the operation of the NAREEE Advisory Board. The REE mission area agencies share in the cost of the Board based on an established percentage: Economic Research Service – 10%; National Agricultural Statistics Service – 10%; Agricultural Research Service – 40%; National Institute of Food and Agriculture – 40%.

II. **Top Issues/Hot Topics**

**Timeline**
The REE Action Plan Report on progress will be compiled over the first few months of 2017. The REE Report to Congress will be compiled simultaneously. There are several board meetings that will take place in the beginning of 2017 including the CARB Advisory Council in January. The BRDi Board meets quarterly, with the first meeting likely to take place in late March. In April, a meeting of the Foundation for Food and Agriculture Board meeting including *ex officio* members will occur. The NAREEE Board will also meet in April. The CARB Advisory Council will convene again in May.
Mission Area Issues

- **Presidential Advisory Council on Combating Antibiotic-Resistant Bacteria (PACCARB):** The PACCARB was established in September 2015 by the HHS Secretary in consultation with the Secretaries of Agriculture and Defense. The charter describes PACCARB’s role to provide advice, information, and recommendations regarding programs and policies intended to support and evaluate the implementation of the Combating Antibiotic Resistant Bacteria (CARB) Executive Order 13676, including the National Strategy and the National Action Plan for Combating Antibiotic-Resistant Bacteria. OCS works with HHS, DoD and the PACCARB co-chairs supporting interagency meetings, coordinating USDA participation and inputs to PACCARB, and serving as Alternate Ex-Officio.

- **Billion-Ton Bioeconomy Initiative:** Seven agencies constitute the U.S. Government’s Biomass Research and Development Board which developed the billion ton bioeconomy initiative. USDA along with other agencies engaged in clean energy research and development are working to find innovative ways to accelerate results. In February 2017 USDA and DOE are expected to sign an MOU supporting Bioenergy R&D and Joint Vision. Following the MOU signing, the launch of the Interagency Action Plan on the Bioeconomy is expected.

- The Economic Research Service’s U.S. **Farm Income Forecasts** are updated three times per year, including the first release for 2017 that will take place during the first half of February. The ERS farm income and finance program measures, forecasts, and explains indicators of economic performance for the U.S. farm sector and farm businesses by resource region and commodity specialization. The program's data and analysis are used by USDA and its stakeholders to better understand factors related to the financial health of the U.S. agricultural economy. The analysis is useful in identifying subsectors and business types that are performing particularly well, or poorly, relative to past trends and to other types of farms. Financial performance measures include the farm sector's receipts and expenses; gross and net value added; and both net cash farm income and net farm income. Measures also include changes in the sector's assets, debt, and overall wealth, as well as financial ratios that depict solvency, liquidity, and efficiency. Taken together, the measures summarize the financial condition of the farm sector.

- The **USDA Climate Hubs** were established in 2014 to develop and deliver science-based, region-specific information and technologies to agricultural and natural resource managers; to enable climate-informed decision-making; and direct land managers to USDA agency programs and regional partners to build resilience to climate variability. Five Hubs are hosted by ARS and five are hosted by the FS. The Hubs focus on partnership development, stakeholder engagement, regional assessments, information synthesis, tool development, adaptation demonstrations, education, research outreach and translation.
Scientific Integrity: In December 2015, the Chief Scientist, in consultation with the USDA Science Council, accepted recommendations made by the Departmental Scientific Integrity Officer (DSIO) to revise DR 1074-001. In accordance with the delegations of authority specified in Title 7 CFR 2.21a(11)(iv), the Under Secretary for REE, as the USDA Chief Scientist, has primary responsibility for “[developing] mechanisms to address scientific integrity within the Department.” Accordingly, the Chief Scientist has overall responsibility for the USDA Scientific Integrity Policy, which was established by the issuance of Departmental Regulation (DR) 1074-001 (“Scientific Integrity”) on May 10, 2013. In December 2015, the Chief Scientist, in consultation with the USDA Science Council, accepted recommendations made by the Departmental Scientific Integrity Officer (DSIO) to revise DR 1074-001. A revised version of the DR and an accompanying procedural manual were subsequently drafted by the DSIO in collaboration with USDA agency and staff office representatives (i.e., the Agency Scientific Integrity Officers), and entered into the USDA Directives clearance system in June 2016. As of October 6, 2016, final clearances for issuance of the revised DR and manual were pending.

The National Agricultural Research, Extension, Education, and Economics (NAREEE) Advisory Board: The NAREEE Board’s Citrus Disease Subcommittee will meet February 2-3, 2016, to conduct the annual mandated consultation with the National Institute of Food and Agriculture on the agenda and annual priorities and budget for the Citrus Disease Research and Extension (CDRE) Program. The Citrus Disease Subcommittee will draft and issue a letter of recommendations to USDA in the 2nd quarter of 2017. These recommendations will potentially influence the Request for Pre-Proposal Applications for the CDRE program.

The Foundation for Food and Agriculture Research (FFAR) was authorized by Congress as part of the 2014 Farm Bill and operates as a non-profit corporation leveraging public and private resources to increase the scientific and technological research, innovation, and partnerships critical to boosting America's agricultural economy. Congress initially provided $200 million for FFAR which must be matched by non-federal funds as FFAR identifies and approves projects. The REE Under Secretary, with the support of the Office of the Chief Scientist, is delegated by the Secretary to lead the USDA review of proposed FFAR activities to ensure that the Foundation’s work complements USDA activities. USDA and FFAR are in the process of finalizing a Memorandum of Understanding between USDA and the Foundation. The MOU will formalize the working relationship between USDA and FFAR, as FFAR becomes a partner in supporting the research initiatives of USDA. The Board adopted an aggressive plan to spend down the $200M by the end of 2018. The majority of the funds will be allocated to challenge areas the Board identified and a proportion of funds will be held for other priorities that may arise. We are asked to submit ideas for specific projects we would like FFAR to undertake within both categories (challenges and other opportunities). All of which is dependent on finding non-Federal partners with matching funds. Concerns remain about oversight of financial matters within FFAR.
- **National Bio and Agro-Defense Facility (NBAF):** Since 2004, DHS and USDA have worked closely to fulfill the Homeland Security Presidential Directive 9 mandate for the agencies to plan to establish safe, secure, state-of-the-art agriculture biocontainment laboratories that research and develop diagnostic capabilities for foreign animal and zoonotic diseases (those that can pass between animals and humans). The NBAF—a $1.25 billion next-generation biocontainment facility under construction in Manhattan, Kansas—is the result of DHS’ and USDA’s planning efforts (including APHIS and ARS). The NBAF will replace existing, aging biocontainment laboratories located at the Plum Island Animal Disease Center (PIADC) in Orient Point, New York. DHS has received all of the NBAF construction funds and plans for the NBAF to be fully operational in 2023. USDA is working closely with DHS on the transition planning for the move from PIADC to NBAF. In its version of the 2017 appropriations bill, the Senate Agriculture Appropriations Subcommittee included language encouraging DHS and USDA to work together on a plan for the future operation of NBAF, including consideration of the appropriate agency to manage the facility. As a result, USDA and DHS face several complex technical and financial questions, including: long term administration costs, technical expertise in managing a facility with private sector tenants, and any additional management requirements for BSL-4 level facilities. It is estimated that it will require significant sums to operate the facility. Any transition to USDA would require a corresponding increase in resources for USDA.

- **The National Animal Health Laboratory Network (NAHLN):** is the Nation’s system for surveilling for animal disease. R&D is needed to support the 5 pillars related to high consequence animal disease threats: Prepare, Prevent, Detect, Respond, and Recover (PPDRR). R&D is inadequately funded and most pillars are far from completion. The National Institute of Food and Agriculture (NIFA) has no reliable stream of sufficient funding to engage the extramural scientific community leaving the animal health-resource challenged Agricultural Research Service to do most of the work through intramural research. A competitive program prioritizing R&D imperatives within and between all 5 PPDRR pillars would be a great boost to agriculture security. NIFA’s Food and Agriculture Defense Initiative (FADI) needs approximately $30-40 M for improving infrastructure. The NAHLN provides a framework for a network of labs to coordinate emerging disease detection. Samples often go to university labs rather than federal labs and there are differences across universities in capabilities, equipment, and resources. A negative test in one university may not be as reliable if another university has better capabilities to analyze samples. Laboratories with different capabilities using different technologies must be able to communicate. Without harmonized processes and coordination, early detection is challenging. Presently, much work is being accomplished through good will. For example, APHIS provides fee for service for surveillance but labs are doing more than they are being funded for: the situation will not continue indefinitely. The Federal Government is dependent on the civilian sector to provide reagents. If there is an event for which there is only one or a few supplier(s) of reagents and they become overwhelmed or are unable to produce, testing will not be possible. NIFA funding to laboratories through the NAHLN has been cut approximately 40% and is insufficient for
infrastructure maintenance and response. In 2006, NAHLN was able to respond to three foreign animal diseases. By 2014, that number has only risen to four because of decreased funding.

- The **Global Open Data for Agriculture and Nutrition** (GODAN) is a partnership of over 370 partners from national governments and nongovernmental, international, and private sector organizations seeking to make data on agriculture and nutrition open, available, useable, and accessible for unrestricted use worldwide. The Office of the Chief Scientist coordinates the U.S. Government participation in the GODAN initiative. It is anticipated that both the chairs of the 2017 G7 and the G20, Italy and Germany respectively, will take up the open data for agriculture and nutrition topic as a priority for their terms.

- **China Garden**: The Chinese government recently agreed to fund the construction of the National Chinese Garden Project (China Garden) at the National Arboretum. Official groundbreaking was scheduled to take place in late October 2016. The Chinese government has agreed that they will hire and pay directly all contractors. Previously, the National China Garden Foundation (NCGF) was identified to be the hiring authority and as such, there were concerns on the availability of funds to pay for construction. The recently completed MOU with the Chinese government makes clear the new intent of the Chinese to hire, manage and pay for all contractors related to the construction of the China Garden. The MOU also includes provisions to protect the interests of the U.S. National Arboretum since authority to direct the operations of the contractors will no longer reside with NCGF. Additional provisions include hours of access to, and prohibiting any contractor housing on Arboretum grounds. Finally, the Chinese indicated their intent to complete construction in 3 years. The next steps are for NCGF to raise the endowment for maintenance and to monitor all aspects of construction through an Owners’ Representative hired specifically for that role.

**Under Secretary’s Board Commitments**

The Under Secretary serves on the following boards:

- Biomass Research and Development Board (BRDB)
- National Science and Technology Council (NSTC) Committee on Homeland and National Security (CHNS)
- NSTC Committee on Science (CoS)
- NSTC Committee on Technology (CoT)
- NSTC Task Force on Ebola-Response Science and Technology
- NAREEE Advisory Board
- Foundation for Food and Agriculture
- Global Research Alliance
- China MOST Joint Working Group
- India Joint Working Group
Deputy Under Secretary’s Board Commitments
The Deputy Under Secretary serves on the following boards:

- NSTC Committee on Environment, Natural Resources, and Sustainability (CENRS)
- NSTC Committee on Science, Technology, Engineering, and Math (CoSTEM)
- Chair, NSTC subcommittee on Global Change Research
- 4H Board of Trustees
- NAS Science and Technology For Sustainability Roundtable
- Vice-Chair Civil Applications Committee (CAC)
- Co-chair NSTC Interagency Working Group on Scientific Collections

17
WHAT WE DO: OUR MISSION

USDA Rural Development provides both direct financial assistance and public-private financial partnership opportunities with more than 40 programs focused on rural economic growth, to assist rural communities in creating the prosperity they need to become self-sustaining, re-populating, and economically thriving. USDA Rural Development provides grants, loan guarantees, and affordable direct credit, when private loans are unavailable or impractical, creating opportunities in housing, business, and infrastructure and serving as a catalyst to improve conditions in rural America by offering technical assistance and increasing the flow of capital through leveraged partnerships.

WHO WE ARE: OUR WORKFORCE

Rural Development employs over 4,700 people across the country with offices located in every state, the Customer Service Center (CSC), the Chief Information Office, and the National Finance Accounting and Operations Center (NFAOC) in St. Louis, MO, and Headquarters in Washington, DC.

WHO WE SERVE: OUR CONSTITUENTS

Rural Development provides direct service to individuals, businesses, and other public and private entities, that reside in rural areas through a network of more than 400 offices nationwide allowing RD to connect to and provide services to constituents at a local level, serving communities where they live.

KEY UPCOMING DECISIONS

- Implementation of Comprehensive Loan Program technology system enhancements
  - Rural Housing Service
- Upcoming funds management decisions for oversubscribed programs including Section 502 Direct Loans, MPR Section 515, and Community Facilities Direct Loans.
  - Rural Business Cooperative Service
- Rural Energy for America program rule adjustments to include New Market Tax Credits and update definition of small business.
- Business and Industry loan guarantee program fee change in Fiscal Year 2018.
  - Rural Utilities Service
- Strategic plan for FCC Broadband rule compliance.
- Resolution of issues with Puerto Rico Aqueduct and Sewer Authority (PRASA) water loan portfolio

BUDGET HIGHLIGHTS FY 2016

FY 2016 RD budget authority of $3.25 billion ($2.95 billion in discretionary and $118 million in mandatory funds) supporting a program level of $39.5 billion and $489 million respectively, for a total of $40 billion in available resources for both accounts.

As of FY 2016-Q3 the RD portfolio totals 1.3 million loans valued at over $216 billion.

Discretionary budget growth in the last 2-4 years has been generally flat at the agency level with some variation at the program level:

FY 2013 $2.4 billion/$38 billion
FY 2014 $2.6 billion/$38 billion
FY 2015 $2.6 billion/$38 billion
WHAT WE DO: OUR MISSION

USDA’s Rural Business-Cooperative Service (RBS) administers programs to support business development and job training opportunities for rural residents, supporting business growth and development, facilitating sustainable renewable energy development, and developing regional food systems. RBS also leads cooperative development and capacity building in high-poverty rural communities through regional planning and place-based initiatives. Our programs help provide the capital, technical support, educational opportunities and entrepreneurial skills that can help rural residents start and grow businesses or access jobs in agricultural markets and in the bio-based economy.

WHO WE ARE: OUR WORKFORCE

Rural Business-Cooperative Service employs 99 staff at Headquarters in Washington D.C.

WHO WE SERVE: OUR CONSTITUENTS

Rural Business-Cooperative Service provides direct service to individuals, municipalities, rural businesses, agricultural producers and other public and private entities that reside in rural areas delivering most programs through RD’s large nationwide field network and guaranteed products through partner financial institutions nationwide.

KEY UPCOMING DECISIONS

- Rural Energy for America program rule adjustments to include New Market Tax Credits and update definition of small business.
- Business and Industry loan guarantee program fee change in Fiscal Year 2018.

BUDGET HIGHLIGHTS FY 2016

In FY 2016 RBS budget authority was $90.45 million in discretionary program funding, $133.3 million in mandatory program funding and $4.46 million for Salaries and Expenses, supporting a program level of $1.35 billion.

As of FY 2015-Q4 the RBS loan portfolio totaled $6.73 billion of which $635 million is held directly and $6 billion represents outstanding loan guarantees.

RBS budget growth in the last 2-4 years has had a moderate downward trend with a spike in 2014 due primarily to an increase in mandatory program funding authorized in the 2014 Farm Bill:

FY 2013 $274 million/$1.09 billion
FY 2014 $385 million/$1.37 billion
FY 2015 $234 million/$1.20 billion
WHAT WE DO: OUR MISSION

USDA’s Rural Housing Service (RHS) offers a variety of programs to build or improve housing and essential community facilities in rural areas. RHS provides loans, grants and loan guarantees for single- and multifamily housing, housing for farm laborers, and community facilities such as: child care centers, fire and police stations, hospitals, libraries, nursing homes, schools, first responder vehicles and equipment, and more. RHS also provides technical assistance loans and grants in partnership with non-profit organizations, Indian tribes, state and federal government agencies, and local communities.

WHO WE ARE: OUR WORKFORCE

Rural Housing Service employs 108 staff at Headquarters in Washington D.C. and 478 staff at the Customer Service Center (CSC) in St. Louis MO. Many other headquarters staff that serve all of RD’s headquarters and all field staff are funded through the RHS Salaries and Expenses (S&E), which contributes to RHS’ artificially high S&E to program fund ratio compared to other agencies in RD.

WHO WE SERVE: OUR CONSTITUENTS

Rural Housing Service provides direct service to individuals, municipalities, and other public and private entities residing in rural areas. The Agency delivers most programs through RD’s large nationwide field network and its guaranteed products through partner financial institutions nationwide. Some larger projects are approved in the National Office, and direct mortgage loan servicing is handled at the CSC one year after origination.

KEY UPCOMING DECISIONS

- Upcoming funds management decisions for oversubscribed programs including Section 502 Direct Loans, MPR Section 515, and Community Facilities Direct Loans.
- Single Family Direct loan origination system (UniFi) replacement: The replacement system is scheduled to deploy October 2017. The key decision to be made is on the best approach to replace UniFi.

BUDGET HIGHLIGHTS FY 2016

In FY 2016 RHS budget authority was $1.62 billion in discretionary program funding and $417.8 million for Salaries and Expenses, supporting a program level of $27.5 billion.

As of FY 2015-04 the RHS loan portfolio totaled $145.8 billion of which $331 billion is held directly and $114 billion represents outstanding loan guarantees.

RHS budget growth in the last 2-4 years has had a slight upward trend with the growth in program funds outpacing S&E funds by more than double and a generally flat program level:

FY 2013 $1.41 billion/$27.3 billion  
FY 2014 $1.69 billion/$27.3 billion  
FY 2015 $1.73 billion/$27.4 billion

FY 2016 Budget Authority

- Discretionary Programs 21%
- Salaries and Expenses 79%

The S&E budget for RHS includes support for the other RD agencies.
WHAT WE DO: OUR MISSION

USDA’s Rural Utilities Service (RUS) administers programs designed to provide new or improved infrastructure to rural communities by increasing access to broadband and 21st century telecommunications services; funding sustainable renewable energy development and conservation; financing reliable and affordable electric systems; working to integrate electric smart grid technologies; and developing reliable and affordable rural water and wastewater systems.

WHO WE ARE: OUR WORKFORCE

Rural Utilities Service employs a combined 271 staff at Headquarters in Washington D.C., and field offices throughout the US.

WHO WE SERVE: OUR CONSTITUENTS

RUS’ three program areas offer a range of products tailored to meet the diverse financing needs of rural America. As a result, our eligible borrowers and grantees vary depending on the program. They include rural electric cooperatives, rural telecommunications cooperatives, and rural water districts; utility producers, suppliers and distributors; not-for-profit utilities and for-profit investor-owned utilities; state and local governments and tribal communities; and more.

KEY UPCOMING DECISIONS

- Strategic plan for FCC Broadband rule compliance.
- Full implementation of Rural Energy Savings Program (RESP)
- Resolution of issues with Puerto Rico Aqueduct and Sewer Authority (PRASA) water loan portfolio

BUDGET HIGHLIGHTS FY 2016

In FY 2016 RUS budget authority was $567 million in discretionary program funding and $34 million for Salaries and Expenses, supporting a program level of $8.21 billion.

As of FY 2015-Q4 the RUS loan portfolio totaled $60.36 billion of which $60.03 billion is held directly and $327 million represents outstanding loan guarantees.

RUS budget growth in the last 2-4 years has had a slight upward trend with a spike in 2014 due primarily to an increase in mandatory program funding authorized in the 2014 Farm Bill:

FY 2013 $554 million/$7.2 billion
FY 2014 $686 million/$7.51 billion
FY 2015 $556 million/$7.46 billion
I. Organizational Overview

Mission

Rural Development’s (RD) mission is to increase economic opportunity and improve the quality of life for all rural Americans. That mission touches every facet of Rural America throughout the country, and through our three agencies and State and local offices of Rural Development we provide financial and technical assistance to rural residents, businesses, and private and public entities. RD uses more than 40 loan and grant programs to create opportunities in housing, business, and infrastructure and serves as a catalyst to improve conditions in rural America by offering technical assistance and increasing the flow of capital through leveraged partnerships that help make prosperity and better living a reality in Rural America.

Rural Development’s programs are grouped within its three agencies: (1) the Rural Business-Cooperative Service (RBS), which implements regional planning and place-based approaches with technical assistance and financing tools to develop and expand cooperatives, business, and industry, including small businesses, and renewable energy and value added agriculture projects; (2) the Rural Utilities Service (RUS), which provides assistance for water and waste disposal, rural electric and telecommunications, including broadband access; and (3) the Rural Housing Service (RHS), which provides assistance for home ownership, multi-family housing, and essential community facilities such as health and public safety infrastructure.

The type of assistance offered includes direct and guaranteed loans, grants, cooperative agreements, technical assistance, and other payments. Some programs provide assistance to intermediaries that make loans or provide technical assistance to the ultimate beneficiaries. Several programs require or encourage recipients to contribute their own resources or obtain third-party financing to support the total cost of projects, thereby leveraging Government support with private sector financing.

RD delivers these programs through a network of more than 400 area offices and 47 State offices, a customer service center and finance office in St. Louis, Missouri, and a headquarters in Washington, DC. RD’s Operations and Management Division, located in Washington, DC and St. Louis, MO, manages all administrative areas for RD, including human resources, civil rights, legislative and public affairs, Information Technology (IT), and procurement.
Strategic Plan

The following objectives guide the investment strategy of Rural Development, supporting the USDA goal to: Assist Rural Communities to Create Prosperity so They Are Self-sustaining, Repopulating, and Economically Thriving (Strategic Goal 1):

**Objective:** Enhance Rural Prosperity, Including Leveraging Capital Markets to Increase Government’s Investment in Rural America

Number of Jobs created or Saved through investments in business entrepreneurship, cooperatives, and industry.  
(2009 baseline: 68,000)  
(2018: 53,000)

Percentage of targeted RD investments in high-poverty areas that leverage private-sector funding.  
(2013 baseline: 4.5%)  
(2018: 10.0%)

Percentage of rural residents who are provided access to new or improved services resulting from RD investments.  
(2013 baseline: 46.7%)  
(2018: 51.4%)

**Objective:** Increase Agricultural Opportunities by ensuring a robust safety net, creating new markets, and supporting a competitive agricultural system

Percentage of beginning; racial and ethnic minority; and women farmers financed by USDA.  
(2012 baseline: 36%)  
(2018: 41%)

Number of local and regional food systems supported annually through USDA investment.  
(2013 baseline: 170)  
(2018: 423)

**Objective:** Contribute to the Expansion of the Bioeconomy by Supporting Development, Production, and Consumption of Renewable Energy and Biobased Products

Millions of kilowatt hours (mWh) generated in rural America from alternative energy sources.  
(2009 baseline: 2,304 mWh)  
(2018: 1,070 mWh)

Number of jobs created and/or retained through USDA investments supporting production of renewable energy and Biobased products, and renewable energy measures.  
(2012 baseline: 1,300 jobs)  
(2018: 1,500 jobs)

---

1 Reduction in target due to current services budget restrictions
2 Reduction in target due to current services budget restrictions
Overview of Agency Programs and Operations

*Rural Housing Service (RHS)* administers Housing and Community Facilities Programs. RHS provides funding for single family housing, apartments for low-income persons or the elderly, housing for farm laborers, childcare centers, fire and police stations, hospitals, libraries, nursing homes, schools, and much more. In partnership with non-profits, Indian tribes, state and federal government agencies, and local communities, RHS creates packages of technical assistance and loan and grant funds to assist rural communities, and individuals with access to these programs.

*Click on a link below for more detailed RHS Housing and Community Facilities Loan and Grant information and contacts or visit [http://www.rd.usda.gov/programs-services/all-programs](http://www.rd.usda.gov/programs-services/all-programs):*

- **Single Family Housing Direct Home Loans**
  Single Family Housing provides direct, means tested loans for the purpose of purchasing a home in an eligible area, with an interest rate based on the borrower’s income and fluctuates with the current Treasury rate and may be subsidized down to one percent interest. Direct loans are limited to families with incomes less than 80 percent of area median income.

- **Single Family Housing Home Loan Guarantees**
  Single Family Housing provides guarantees on home loans in eligible areas though a network of approved lenders that are means tested limited to families with incomes less than 115 percent of area median income.

- **Mutual Self-Help Housing Technical Assistance Grants**
  Provides grants to qualified organizations to help them carry out local self-help housing construction projects. Grant recipients supervise groups of very-low- and low-income individuals and families as they construct their own homes in rural areas. The group members provide most of the construction labor on each other’s homes, with technical assistance from the organization overseeing the project.

- **Rural Housing Site Loans**
  Rural Housing site loans provide two types of loans to purchase and develop housing sites for low- and moderate-income families:
  - Section 523 loans are used to acquire and develop sites only for housing to be constructed by the “Self-Help” method.
  - Section 524 loans are made to acquire and develop sites for low- or moderate-income families, with no restriction as to the method of construction.
United States Department of Agriculture
2016 Presidential Transition
Rural Development (RD)

- **Farm Labor Direct Loans & Grants**
  Provides affordable financing to develop housing for year-round and migrant or seasonal domestic farm laborers.

- **Housing Preservation & Revitalization Demonstration Loans & Grants**
  Restructures loans for existing Rural Rental Housing and Off-Farm Labor Housing projects to help improve and preserve the availability of safe affordable rental housing for low income residents.

- **Housing Preservation Grants**
  Provides grants to sponsoring organizations for the repair or rehabilitation of housing occupied by low and very low-income individuals.

- **Multi-Family Housing Direct Loans**
  Assists qualified applicants that cannot obtain commercial credit on terms that will allow them to charge rents that are affordable to low-income tenants.

- **Multi-Family Housing Loan Guarantees**
  Works with qualified private-sector lenders to provide financing to qualified borrowers to increase the supply of affordable rental housing for low and moderate-income individuals and families in eligible rural areas and towns.

- **Multi-Family Housing Rental Assistance**
  Provides payments to owners of USDA-financed Rural Rental Housing or Farm Labor Housing projects on behalf of low-income tenants unable to pay their full rent.

- **Community Facilities Direct Loans & Grants**
  Provides affordable funding to develop essential community facilities in rural areas. An essential community facility is defined as a facility that provides an essential service to the local community for the orderly development of the community in a primarily rural area, and does not include private, commercial or business undertakings.

- **Community Facilities Loan Guarantees**
  Provides loan guarantees to eligible private lenders to help build essential community facilities in rural areas.

- **Community Facilities Technical Assistance and Training Grant**
  Provides grants to public bodies and private nonprofit corporations, to provide associations Technical Assistance and/or training to identify and plan for community facility needs that exist in their area.

- **Economic Impact Initiative Grants**
  Provides funding to assist in the development of essential community facilities in rural communities with extreme unemployment and severe economic depression.
United States Department of Agriculture
2016 Presidential Transition
Rural Development (RD)

- **Rural Community Development Initiative Grants**
  Provides funding to help non-profit housing and community development organizations support housing, community facilities, and community and economic development projects in rural areas.

- **Tribal College Initiative Grants**
  Provides funding to [1994 Land Grant Institutions](#) (Tribal Colleges) to make capital improvements to their educational facilities and to purchase equipment.
United States Department of Agriculture
2016 Presidential Transition
Rural Development (RD)

*Rural Business-Cooperative Service (RBS)* administers job training, energy, and business development programs, including cooperative and business development, community economic development, regional planning and financing, rural and Tribal place-based approaches and other self-help initiatives. RBS also offers programs to provide the educational opportunities, training, technical support, and tools for rural residents to start small businesses and to access jobs in agricultural markets, the green economy, and other emerging markets, as well as acquire training in vocational and entrepreneurship skills they can use in the marketplace and business sector.

RBS also leads the coordination and implementation of community economic development-related activities in high poverty rural communities such as regional planning, place-based initiatives, local and regional food systems, and cooperative development. These activities enable high poverty rural areas to increase local capacity, increase their readiness for accessing RD’s financing tools, and capitalize greater access to partners and other federal resources to improve conditions and opportunities for historically unserved and underserved groups.

*Click on a link below for more detailed RBS Business and Cooperative Loan and Grant information and contacts or visit [http://www.rd.usda.gov/programs-services/all-programs](http://www.rd.usda.gov/programs-services/all-programs):*

- **Business and Industry Loan Guarantees (B&I)**
  Provides protection against loan losses so that lenders are willing to extend credit to establish, expand, or modernize rural businesses through loan guarantees for rural businesses, allowing private lenders to extend more credit to eligible entities.

- **Intermediary Relending Program (IRP)**
  Provides 1% interest direct loans to local intermediaries that relend to businesses for community development projects in rural communities at a higher interest rate and use their interest earnings to pay for their administrative expenses and develop capital reserves.

- **Rural Business Investment Program (RBIP)**
  This program provides loan guarantees to establish equity funds to support business development in rural areas. This funding provides additional access to venture capital type funding. These for-profit investment fund entities use equity raised in capitalizing their funds to make equity investments in small enterprises located in rural areas.

- **Rural Business Development Grants (RBDG)**
  RBDG is a competitive grant designed to fund training, technical assistance, construction, land development, equipment, and capitalization of revolving loan funds leading to the development or expansion of small and emerging private businesses in rural areas that have fewer than 50 employees and less than $1 million in gross revenues. Programmatic activities are separated into enterprise or opportunity type grant activities.
United States Department of Agriculture
2016 Presidential Transition
Rural Development (RD)

- **Rural Economic Development Loan and Grant (REDLG)**
  This program provides zero interest loans to local utilities which, in turn, pass through to local businesses for projects that will create and retain employment in rural areas. The utility is responsible for repayment to the agency. Grant funds are provided to local utility organizations which use the funding to establish revolving loan funds. Loans are made from the revolving loan fund to projects that will create or retain rural jobs. When the revolving loan fund is terminated, the grant is repaid to the Agency.

- **Rural Microentrepreneur Assistance Program (RMAP)**
  This program provides one percent direct loans and grants to microenterprise development organizations (MDOs). The loans will be used to establish reserves for relending to microentrepreneurs, and the grants are made to the MDOs which may relend a portion to provide training, operational support, business planning, and market development assistance to microloan borrowers and microentrepreneurs.

- **Value Added Producer Grants (VAPG)**
  The VAPG program provides grants to help agricultural producers enter into value-added activities related to the processing and/or marketing of bio-based, value-added products with an emphasis on generating new products, creating and expanding marketing opportunities, and increasing producer income.

- **Advanced Biofuel Payment Program**
  Supports expanding production of advanced biofuels by paying advanced biofuel producers for finished advanced biofuel products.

- **Biorefinery, Renewable Chemical, and Biobased Product Manufacturing Assistance Program**
  Provides loan guarantees to assist in the development, construction, and retrofitting of new and emerging technologies for the development of Advanced Biofuels, Renewable Chemicals, and Biobased Product Manufacturing.

- **Repowering Assistance Program**
  Provides funding for up to 50% of the total eligible project costs for bio refineries to install renewable biomass systems for heating and power at their facilities; or, to produce new energy from renewable biomass.

- **Rural Energy for America Program Energy Audits & Renewable Energy Development Grants**
  Provides grants to assist rural small businesses and agricultural producers by conducting and promoting energy audits, and providing renewable energy development assistance.
United States Department of Agriculture
2016 Presidential Transition
Rural Development (RD)

- **Community Economic Development**
  Leads USDA’s cooperative development research, training, and technical assistance; provides capacity building, training, and technical assistance to high poverty rural communities; manages rural and Tribal place-based and local and regional food systems initiatives; and implements cross-cutting 2014 Farm Bill requirements such as Strategic Economic and Community Development, Healthy Food Financing Initiative, and Performance Impact Evaluation.

- **Cooperative Grants**
  Provides competitive grants to eligible individuals and organizations, producers, and other businesses to support cooperatives and cooperative development.

- **Rural Energy for America Program Renewable Energy Systems & Energy Efficiency Improvement Loans & Grants**
  Provides guaranteed loan financing and grant funding to agricultural producers and rural small businesses for renewable energy systems or to make energy efficiency improvements.

- **Cooperative Programs**
  Provides information on financial assistance opportunities to assist rural businesses, including cooperatives, and agricultural producers in conjunction with other Rural Development program areas as well as educational reports and programs that promote the understanding of cooperative principles and practices, research and statistics.
Rural Utilities Service (RUS) provides funding opportunities in the form of grants, loans, and loan guarantees, for the development and commercialization of Electric, Telecommunications, and Water and Waste utility services.

Click on a link below for more detailed RUS Loan and Grant information and contacts or visit http://www.rd.usda.gov/programs-services/all-programs:

- **Community Connect Grants**
  Provides grants to help fund broadband deployment into rural communities where it is not yet economically viable for private sector providers to deliver service.

- **Broadband Loan Program**
  Furnishes loans and loan guarantees to provide funds for the costs of construction, improvement, or acquisition of facilities and equipment needed to provide service at the broadband lending speed in eligible rural areas.

- **Distance Learning and Telemedicine Loan and Grant Program**
  Provides grant funds to help rural communities use the unique capabilities of telecommunications to connect to each other and to the world, overcoming the effects of remoteness and low population density. For example, this program can link teachers and medical service providers in one area to students and patients in another.

- **Electric Loan and Loan Guarantee Program**
  Provides insured loans and loan guarantees to nonprofit and cooperative associations, public bodies, and other utilities. Insured loans primarily finance the construction of electric distribution facilities in rural areas. The guaranteed loan program has been expanded and is now available to finance generation, transmission, and distribution facilities. The loans and loan guarantees finance the construction of electric distribution, transmission, and generation facilities, including system improvements and replacement required to furnish and improve electric service in rural areas, as well as demand side management, energy conservation programs, and on-grid and off-grid renewable energy systems.

- **Telecommunications Loan Program**
  Provides financing for the construction, maintenance, improvement and expansion of telephone service and broadband in rural areas.

- **Circuit Rider Program**
  Provides technical assistance to rural water systems having day-to-day operation, financial or management issues.

- **Emergency Community Water Assistance Grants**
  Provides grant funds to help eligible communities prepare for, or recover from, an emergency that threatens the availability of safe, reliable drinking water for households and businesses.
• **Grants for Rural and Native Alaskan Villages**
  Provides grant funds to help remote Alaskan Villages provide safe, reliable drinking water and waste disposal systems for households and businesses.

• **Household Water Well System Grants**
  Provides grant funds to help qualified non-profits and Tribes create a revolving loan fund to extend access to clean, reliable water to households in eligible rural areas.

• **Individual Water & Wastewater Grants**
  Provides grant funds to households residing in an area recognized as a Colonia before October 1, 1989, to connect service lines to a residence, pay utility hook-up fees, install plumbing and related fixtures, i.e. bathroom sink, bathtub or shower, commode, kitchen sink, water heater, outside spigot, or bathroom.

• **SEARCH - Special Evaluation Assistance for Rural Communities and Households**
  Provides funding to help very small, financially distressed rural communities with predevelopment feasibility studies, design assistance, and technical assistance on proposed water and waste disposal projects.

• **Solid Waste Management Grants**
  Provides funding for organizations that provide technical assistance or training to improve the planning and management of solid waste sites.

• **Water & Waste Disposal Grants to Alleviate Health Risks on Tribal Lands and Colonias**
  Provides funding to facilitate access to safe reliable drinking water and waste disposal facilities and services to low-income communities that face significant health risks.

• **Water & Waste Disposal Loans & Grants**
  Provides funding for clean and reliable drinking water systems, sanitary sewage disposal, sanitary solid waste disposal, and storm water drainage to households and businesses in eligible rural areas.

• **Water & Waste Disposal Loan Guarantees**
  Provides up to a 90% guarantee on loans from private lenders that provide affordable financing to qualified borrowers to improve access to clean, reliable water and waste disposal systems for households and businesses in rural areas.

• **Water & Waste Disposal Predevelopment Planning Grants**
  Provides funding to assist low-income communities with the initial planning and development of an application for USDA Rural Development Water and Waste Disposal direct loan, grant, and loan guarantee programs.
• **Water & Waste Disposal Revolving Loan Funds**
  Provides grant funding to help qualified non-profits create a revolving loan fund that can provide financing for the extension and improvement of water and waste disposal systems in rural areas.

• **Water & Waste Disposal Technical Assistance & Training Grants**
  Provides funding to qualified, private non-profits that provide technical assistance and training to (a) identify and evaluate solutions to water and waste problems; (b) assist applicants in preparing applications for water and waste disposal loans and grants; and (c) assist associations in improving operation and maintenance of existing water and waste facilities in eligible rural areas.

• **Rural Energy Savings Program (RESP)**
  RESP was established to help rural families and small businesses achieve cost savings by providing loans to qualified consumers to implement durable cost-effective energy efficiency measures. RESP authorizes the RUS Administrator to make loans to utilities, and similar entities, that agree to use the loan funds to relend those funds to their consumers for the purpose of implementing energy efficiency measures.
Office of Operations and Management (O&M) performs numerous administrative services for the three agencies (RHS, RBS, and RUS), the Department, Congress, and other agencies. This shared services model makes RD unique within USDA and helps RD function more like one cohesive agency. In some cases portions of these services have been outsourced by agreement to the Department such as Schedule C and SES HR support to the Office of Human Resources Management, and certain aspects of IT support to the USDA CIO. In those instances O&M staff may either provide direct support or act as liaison to contracted service providers. In other cases O&M directorates complement Departmental functions, providing support to RD at the agency level in areas like civil rights, procurement, and Legislative and Public Affairs. Find contact information here for services provided in the following areas:

- Alternative Dispute Resolution
- Chief Information Officer
- Civil Rights
- Cultural Transformation
- Emergency Preparedness
- Human Resources
- Legislative and Public Affairs (LAPAS)
- Native American Coordination
- Outreach & Community Engagement
- Procurement and Administrative Services

Office of the Chief Financial Officer (CFO) is responsible for the full cycle of financial operations from formulation to execution, associated with Rural Development direct and guaranteed loan, grant, and administrative activities through the Budget Division, and oversees the mission area’s financial and program performance through the Financial Management, and the Policy and Analysis Divisions.

National Financial and Accounting Operations Center (NFAOC) is organized under the RD Office of the Chief Financial Officer and provides expert financial management, accounting, and portfolio management for Direct and Guaranteed Credit Reform Loans and Grants for both Farm Service Agency (FSA) and RD. The NFAOC is divided into two main operational units: Portfolio Management, which oversees all loan and grant servicing functions of both RD and FSA; and Financial Management, which oversees all financial operations and reporting functions related to the Chief Financial Officer Act, as well as the reporting requirements imposed by the Office of Management and Budget (OMB) and U.S. Department of Treasury.

Customer Service Center (CSC), formerly known as the Centralized Servicing Center, is organized under the Rural Housing Service and provides a complete servicing solution for all Single Family Housing Direct loans as well as processing services for Single Family Housing Guaranteed loan loss claims, Multi-Family Housing loan payments, and management of the foreclosure process and Real Estate Owned (REO) property. Assistance is available for both external customers and RD employees.

Organizational History

The official lineage of Rural Development goes back to 1935, when President Franklin D. Roosevelt signed Executive Orders 7027 and 7037 as part of his “New Deal.” These orders established the Resettlement Administration and Rural Electrification Administration (REA) (respectively), in order to relocate destitute families stricken by the Depression, restore soil-eroded areas, and provide modest emergency loans to farmers for land and equipment and electricity to rural areas.

Over time, Congress has expanded REA’s role to oversee a rural telephone program (in 1949), authorized the Rural Telephone Bank and use of revolving loan funds to finance the agency’s telecommunications programs (in the 1970’s), and most recently tasked the agency with delivery of Internet-based telecommunication programs, including distance learning and broadband.

Meanwhile, the Resettlement Administration was transferred to the U.S. Department of Agriculture in 1937 and renamed the Farm Security Administration, expanding its role beyond short-term resettlement loans to farm land ownership supervised credit programs. In 1946, Resettlement programs were eliminated and the organization was again renamed as Farmers Home Administration (FmHA). In 1949, rural housing programs were added. In 1954, clean drinking water programs were added. In 1961, the housing programs were expanded to include all rural residential communities with populations less than 2,500. In 1965, grants became available through the agency to finance water and sewer projects. Population limits continued to rise through the years for eligibility of RD programs and in 1968, a revision to the Housing Act of 1949 established the Interest-Credit program.

In October, 1994, President Clinton signed the Department of Agriculture Reorganization Act of 1994. That law split the programs administered by the FmHA among several new agencies. Farm loan programs moved to the Farm Service Agency, which had formerly been known as the Agricultural Stabilization and Conservation Service. FmHA’s housing and community facilities programs were moved to the Rural Housing Service. FmHA’s water and sewer loans were moved to the Rural Utilities Service, which also took on the rural electric and telephone programs that had formerly been administered by the Rural Electrification Administration. FmHA’s business and industry programs were moved to the Rural Business and Cooperative Service, which also incorporated the cooperative education, statistics, and technical assistance programs which had formerly been administered by the Agricultural Cooperative Service. The Rural Housing Service, Rural Utilities Service and the Rural Business and Cooperative Service were all organized under a “mission area,” which soon became known as Rural Development, the financier for rural America -- built on the legacy of these Depression-era agencies begun over 79 years ago.
Organizational Chart

The Office of the Under Secretary

The Office of the Under Secretary for the Rural Development Mission Area, located in the Whitten Building in Washington, DC, consists of the Under Secretary, Deputy Under Secretary for Policy and Planning, Deputy Under Secretary for Operations and Management, and the Chief of Staff, Senior Advisor, and Confidential Assistant to the Under Secretary, supported by career staff consisting of one advisor, Special Project Manager, and NFAC Liaison, one Administrative Office Manager, and three Administrative Specialists, along with one contracted Policy Advisor and the Office of the Chief Risk Officer.

Agency leadership report directly to the Under Secretary, while the Chief Financial Officer, Deputy Administrator for Operations and Management, and all State Directors report to the Deputy Under Secretary for Operations and Management, with exceptions for the Offices of Civil Rights and Legislative and Public Affairs who also report directly to the Under Secretary on select issues.
United States Department of Agriculture  
2016 Presidential Transition  
Rural Development (RD)  

Biographies of career staff in key leadership positions  

Operations and Management  

Edna Primrose  
Deputy Administrator  
202-692-0207, Edna.Primrose@wdc.usda.gov  

Edna Primrose was named Deputy Administrator for Operations and Management in December 2012. As Deputy Administrator, Ms. Primrose is responsible for providing executive leadership in planning, developing, and administering all administrative management program policies and operational support for RD.  

Ms. Primrose previously served as the National Director for the Office of Job Corps at the Department of Labor. In 1984, Ms. Primrose began her professional career with the International Union of Operating Engineers (IUOE). In 2002, she served as the Job Corps Chief Performance Officer. Ms. Primrose earned a Bachelor’s degree from Towson University.  

Francisco Salguero  
Chief Information Officer  
202-692-0212, Francisco.Salguero@wdc.usda.gov  

Francisco Salguero is currently the Chief Information Officer for RD and has successfully led the administration of RD's IT portfolio management and service delivery activities for over 40 RD loan, grant, and loan guarantee programs. He also participates in agency budget formulation and oversees an IT investment management process for selecting, controlling, and evaluating IT investments.  

Mr. Salguero started his career in the private sector and began his federal service in 2005 at USDA Food Safety Inspection Service. Prior to joining RD, Mr. Salguero served as the Associate CIO for the Client Technology Service formerly the International Technology Service, the USDA Office of the Chief Information Office organization that provides end-user technology support to RD, USDA agencies, and other federal agencies.  

Anita Adkins  
Director, Human Resources  
202-260-8689, Anita.R.Adkins@wdc.usda.gov  

Anita R. Adkins serves as RD's Human Resources Director. Ms. Adkins started her career with RD in August 2013 and is responsible for leading and directing all HR services and programs. She previously served as the Senior Advisor to USDA's Chief Human Capital Officer and Director and Deputy Director, Departmental Management, Office of Human Resources Management (OHRM). She also worked with the USDA Forest Service, Department of the Army, Defense Logistics Agency, and the Veterans Administration, serving in various senior manager and HR roles at the George Washington and Jefferson National Forest in Roanoke, VA and later at Headquarters in Washington, D.C.
Angilla Denton  
Director, **Civil Rights**  
202-692-4109, [Angilla.Denton@wdc.usda.gov](mailto:Angilla.Denton@wdc.usda.gov)

Angilla Denton serves Rural Development as the Civil Rights Director and has responsibility and oversight of Rural Development’s nationwide Civil Rights programs and Equal Employment Opportunity programs.

Ms. Denton has over 20 years of management experience in both the public and private sector. Since her arrival at Rural Development in 2002, Ms. Denton has served as a Loan Specialist, Area Director, and Administrative Program Director. She has also led multiple committees and special initiatives, including training under StrikeForce, EEO Committee advisor, Nevada RD Affordable Housing Chair, Cultural Transformation activities, and Special Emphasis Programs.

John Pavek  
Director, **Emergency Preparedness**  
202-720-2078, [John.Pavek@wdc.usda.gov](mailto:John.Pavek@wdc.usda.gov)

In January 2007, John Pavek was selected as the Director, Emergency Preparedness Program for RD. He is also RD's Informational Security Officer and principal liaison to the U.S. Department of Agriculture's Office of Homeland Security and Emergency Coordination. Further, Mr. Pavek serves as USDA's Recovery Action Officer and Coordinator, a USDA member of the United States Government Radiological Advisory Team for Environment, Food, and Health.

Mr. Pavek's previous USDA appointment was with Rural Utilities Service in the Electrical Staff Division. Prior to joining RD in 1998, Mr. Pavek worked in the electric utility industry. Prior to working in the electric utility industry, he sailed as First and Chief Engineer and served as an Officer in the United States Navy Reserve from 1985 until 1994.

Sharon Randolph  
Director, **Procurement and Administrative Services**  
202-720-0736, [Sharon.Randolph@wdc.usda.gov](mailto:Sharon.Randolph@wdc.usda.gov)

Sharon Randolph joined Rural Development as the Assistant Administrator for Procurement and Administrative Services (PAS) in December 2000, which is comprised of three divisions: Procurement Management Division (Washington, DC); Property and Supply Management Division (St. Louis, MO); and the Support Services Division (Washington, DC). Ms. Randolph provides leadership and oversight for procurement and contracting activities, and several critical support services programs in support of Rural Development nationwide.

Prior to December 2000, she served as the Customer Service Division Director, in RD's Office of the Chief Information Officer. She also served three years with the Bureau of Labor Statistics, at the Department of Labor, and as a computer programmer, where she was responsible for developing various components of the 1990 U.S. Census data collection statistical model.
Gail Lacey  
**Director, Cultural Transformation**  
202-692-0118, [Gail.Lacey@wdc.usda.gov](mailto:Gail.Lacey@wdc.usda.gov)

Gail Lacey is responsible for implementing Senior Leadership's vision and goals for cultural transformation within the Mission Area, while providing guidance to the agencies and states regarding implementation of Cultural Transformation Action Plans.

Ms. Lacey's entire federal career has been with the U.S. Department of Agriculture, Rural Development, including the former Farmers Home Administration (FmHA). Her career started as a temporary emergency loan program employee with FmHA in Idaho. She served in several positions while in Idaho and accepted a position in the National Office in 1990.

Prior to serving as the Rural Development Cultural Transformation Program Manager, Ms. Lacey served as the Assistant to the Deputy Administrator for Operations and Management from 2001 to 2011.

---

**Office of the Chief Financial Officer**

Roger Glendenning  
**Chief Financial Officer**  
202-692-0145, [Roger.Glendenning@wdc.usda.gov](mailto:Roger.Glendenning@wdc.usda.gov)

Roger Glendenning is the Chief Financial Officer for Rural Development. Mr. Glendenning started his career in housing and farm related programs in 1987 with the Farmers Home Administration in Delaware and Maryland before moving to the Washington, DC headquarters office in 1996. He has worked at Headquarters in the capacity of Director of the Single Family Housing Guaranteed Loan Division (2001-2006), Chief Budget Officer (2007-2009), Budget Division Director (2010-2012) and Chief Financial Officer (2013 – present).

---

Tony Bainbridge  
**Director, National Financial and Accounting Operations Center**  
314-457-4150, [Tony.Bainbridge@stl.usda.gov](mailto:Tony.Bainbridge@stl.usda.gov)

Tony Bainbridge is the Director of the National Financial and Accounting Operations Center (NFAOC) for Rural Development. Mr. Bainbridge started his career in the Finance Office covering all Rural Development programs in 1989 with the Farmers Home Administration in St. Louis, MO. He has worked in various capacities in the newly named NFAOC, covering Program Loan Cost Expenses (1990-1995), Electronic Funds Transfers (1996-1999), and Direct Loan and Grant Branch providing loan servicing for all Rural Development loan and grant programs (2000-2010), Deputy Chief Financial Officer (2010 – 2014), and Director NFAOC (2014 - present).
Leslie Barrack
Director, Budget Division
202-401-2718, Leslie.Barrack@wdc.usda.gov

Leslie Barrack is the Budget Director for RD. Ms. Barrack started her career in the Rural Development Budget office in 1992 as a Budget Technician and then Budget Analyst through 2003, including a one-year detail to the House Appropriations Subcommittee on Agriculture. She worked in the Veterans Affairs Department Budget office as a Budget Analyst (2003), the House Appropriations Subcommittee on Agriculture as Professional Staff (2004-2010), the USDA Office of Budget and Program Analysis as a Program Analyst (2011-2014), including a six-month detail to the Office of Management and Budget, and back to Rural Development as the Budget Director (2014-present).

John Dunsmuir
Director, Financial Management Division
202-692-0082, John.Dunsmuir@wdc.usda.gov

John Dunsmuir is the Director of RD’s Financial Management Division (FMD). In this position he oversees all of the Management/Internal Controls for RD nationwide, including Office of Inspector General (OIG) Audits, Investigations, and Hotlines, Government Accountability Office (GAO) Audits, Management Control Reviews (MCR), and State Internal Reviews (SIR).

Mr. Dunsmuir served as the Deputy Director of FMD for over 10 years and began his career with RD as an Accountant with the Rural Utilities Service (RUS). Mr. Dunsmuir’s other federal career includes positions as an Accountant/Auditor with the Federal Energy Regulatory Commission, and the Department of Health and Human Services’ Office of Inspector General. His career in private industry includes serving as the Controller for a wholesale and retail paint and glass company, a nuclear fuel accountant for a major public utility, and a department manager for a trucking company with over 1,000 tractors and trailers on the road.

Mr. Dunsmuir received his Bachelor of Science degree from King’s College, Wilkes-Barre, PA and practiced as a Certified Public Accountant for several years.
Joyce Allen
Deputy Administrator, Single Family Housing
202-205-4996, Joyce.Allen@wdc.usda.gov

Joyce Allen is the Deputy Administrator of the Rural Housing Service Single Family Housing Programs. Ms. Allen joined USDA in 1991, as an Assistant County Supervisor for the Farmer’s Home Administration in a county office in Berlin, New Jersey. She accepted an assignment in 1994 to Washington DC, where she developed policy and regulation for the Section 538 Guaranteed Rural Rental Housing Program. Ms. Allen has also worked at the U.S. Department of Housing and Urban Development (HUD), where she served as the Director of Multifamily Housing Development and oversaw the FHA multifamily mortgage insurance programs.

Bryan Hooper
Deputy Administrator, Multi-Family Housing
202-720-9739, Bryan.Hooper@wdc.usda.gov

Bryan Hooper is the Deputy Administrator for Multi-Family Housing in the Rural Housing Service of the U.S. Department of Agriculture. He manages USDA’s nationwide portfolio of approximately 15,000 multi-family properties, representing more than 470,000 units of affordable rental housing and a federal government investment of $11 billion. Mr. Hooper also manages over $1.1 billion in rental assistance and housing voucher payments to more than 280,000 low- and very-low income tenants.

Bryan holds Bachelor’s and Master’s Degrees from The American University in Washington D.C., and a J.D. from the George Washington University.

Rich Davis
Deputy Administrator, Community Facilities
202-720-1500, Rich.Davis@wdc.usda.gov

Rich Davis has been serving as the Deputy Administrator for Community Facilities Programs in Rural Development since August 2010. RD Community Programs provide direct and guaranteed loans and grants to help rural communities develop or improve their essential community facilities for public use in rural areas. Previously, Mr. Davis served as the Acting Deputy Administrator for Single Family Housing from August 2009 to August 2010. Prior to that assignment, he served as Director of the Program Support Staff for 13 years, in which he was responsible for overseeing all architectural, environmental and other technical support to Rural Development’s business, housing and community facilities programs.
Christine Mechtly
Deputy Administrator, Customer Service Center
314-457-5970, Christine.Mechtly@stl.usda.gov

Christine Mechtly started her career with the Farmers Home Administration as an accountant in 1991. Ms. Mechtly served as Assistant Chief, Direct Loan and Grant Branch (2002-2010), Director, Policy and Internal Review Division (2010-2012), and Director, Financial Analysis and Control Division (2012-2014) in the Office of the Deputy Chief Financial Officer. She also served as the Deputy Director of Portfolio Management for the National Financial and Accounting Operations Center (NFAOC) (2014-2015). Ms. Mechtly was selected as the Deputy Administrator of the Customer Service Center in October 2015.

Edward Duval
Director, Program Support Services Branch
202-690-1370, Ed.Duval@wdc.usda.gov

Edward Duval currently serves as the Director of Rural Development’s Program Support Staff (PSS), a division within the Rural Housing Service. He currently leads numerous Risk Management initiatives such as oversight of appraisals, environmental and architectural reviews. These activities serve to mitigate the risk to the over $200Bil Rural Development portfolio. Lean Six Sigma, project management, SharePoint and dashboard development are also expertise possessed by the PSS.

Mr. Duval has over 30 years of business experience in both the private and public sectors. The first 15 years of his career were spent as a small business owner developing and marketing medical accounting systems for the Nursing Home Industry. Since 1994 he has worked almost exclusively with Rural Development programs as a contractor and USDA employee, of which he came on board in March, 2004. He is very familiar with all aspects of RD programs including systems, data, and the personnel making up Rural Development.
Rural Business-Cooperative Service

Claudette Fernandez
Deputy Administrator, Business Programs, Acting
202-245-1175, Claudette.Fernandez@wdc.usda.gov

Claudette Fernandez currently serves as Acting Deputy Administrator for RBS’ Business Programs. Previously, Ms. Fernandez has served as Acting Chief of Staff for the RBS Administrator and Director for RBS’ Business Programs Specialty Programs Division and Cooperative Programs Grants Division.

Prior to joining USDA in 2012, she served as a Senior Program Manager for FEMA’s multi-hazard mitigation and preparedness programs, South Georgia Regional Development Center, Prince George's County Department of Housing & Community Development as a community planner and supported African and Middle-Eastern humanitarian affairs at the United Nations Secretariat.

Originally from the Philippines, Claudette has a Bachelor of Arts Degree in Political Science and a Master of Public Administration from Valdosta State University, a Master of Engineering Science from George Washington University and a Graduate Certificate in International Business Management from Georgetown University.

Chad Parker
Deputy Administrator, Cooperative Programs
202-720-7287, Chad.Parker@wdc.usda.gov

Chad Parker leads teams that administer the Cooperative Grant Programs, the Community Economic Development initiative, and the cooperative education, research, statistics, and outreach activities. Mr. Parker has previously served as Deputy Administrator, Business Programs (2014); Deputy Administrator, Cooperative Programs (2012-2013); Acting Deputy Administrator, Single Family Housing (2010 and 2011); Acting Deputy Administrator, Community Programs (2009); and in various other positions in USDA Rural Development and the Rural Electrification Administration since 1991. He has also previously worked as a pig farmer, bag boy, bell hop, assistant mechanic, welder, gravel pit water truck driver, and printer shop apprentice. Mr. Parker holds a M.B.A. and B.S. from Virginia Tech’s Pamplin School of Business.

Mark Brodziski
Deputy Administrator, Energy Programs
202-205-0903, Mark.Brodziski@wdc.usda.gov

Mark Brodziski is the Acting Deputy Administrator of RBS Energy Programs, which supports energy efficiency improvement projects and renewable energy systems for rural small businesses and farmers and ranchers, and the Biorefinery, Renewable Chemical and Biobased Product Manufacturing Assistance Program.

Mr. Brodziski has worked with USDA since 1983 including serving as the Director of the Specialty Lenders Division, Wisconsin Rural Development, Business and Community Programs Director.
United States Department of Agriculture  
2016 Presidential Transition  
Rural Development (RD)  

Rural Utilities Service  

Christopher McLean  
Assistant Administrator, Electric Programs  
202-720-6285, Christopher.McLean@wdc.usda.gov  

Christopher A. McLean is the Assistant Administrator, Electric Programs at the Rural Utilities Service. This is Mr. McLean’s third time at RUS. In 2014, Mr. McLean was an Acting Director in USDA’s Office of the Assistant Secretary for Civil Rights (OASCR) and, in 2013, was a civil rights fellow in OASCR’s Policy Office.  

Previously, Mr. McLean was a senior advisor to the RUS Administrator; co-owned e-Copernicus (a consulting firm); and was the Executive Director of the Consumer Electronics Retailers Coalition. He also served as RUS Deputy Administrator, Administrator and worked as a Senate staffer.  

Jacki Ponti-Lazaruk  
Assistant Administrator, Water Programs  
202-720-1172, Jacki.Ponti@wdc.usda.gov  

Jacqueline M. Ponti-Lazaruk has served as Assistant Administrator for USDA Rural Development’s Water and Environmental Programs (WEP) since January 2008. During her tenure in WEP, nearly $15 billion has been invested in new and improved water and waste infrastructure benefitting more than 20 million rural residents. She has also been called upon to lead agency-wide efforts, such as the implementation of more than $20 billion in Recovery Act funding received by RD, and has served as the RUS Chief of Staff and as Acting Administrator. Ms. Ponti-Lazaruk served as the RD Assistant Administrator for Telecommunications Program from 2006 to 2008.  

Keith Adams  
Assistant Administrator, Telecom Programs  
202-720-9556, Keith.Adams@wdc.usda.gov  

James Murray  
Assistant Administrator, Program Accounting and Regulatory Analysis, Acting  
202-720-0799, James.Murray@wdc.usda.gov  

James J. Murray started his career with the Rural Utilities Service (then called the Rural Electrification Administration) in 1978 as a staff accountant and has subsequently served as an accounting Branch Chief, and Deputy Assistant Administrator of Program Accounting and Regulatory Analysis (PARA) and is currently Acting Assistant Administrator for PARA.
Mr. Murray is a certified public accountant in the state of Virginia and a member of the Accounting and Finance Subcommittee of the National Association of Regulatory Utility Commissioners and a member of the Society of Depreciation Professionals.
Biographies of political staff in key leadership positions

Lisa Afua Serwah Mensah
Under Secretary
202-720-4581, Lisa.Mensah@osec.usda.gov

Lisa Afua Serwah Mensah was nominated by President Obama for the position of Under Secretary of USDA Rural Development and was confirmed by the U.S. Senate in November of 2014. An expert in using financial tools to improve the economic security of the working poor, Ms. Mensah has experience in the private financial sector and has worked extensively on small and micro business development, housing, financial and savings policy.

Prior to joining USDA, she was the founding Executive Director of the Initiative on Financial Security at the Aspen Institute. In that role she led a national bi-partisan effort with leaders of financial institutions, non-profit executives and experts to promote solutions to the complex problems of helping more Americans save money, buy homes, and finance retirement. Ms. Mensah began her career in commercial banking at Citibank before joining the Ford Foundation where she was responsible for the country’s largest philanthropic grant and loan portfolio of investments in rural America.

Ms. Mensah holds an M.A. from the Paul H. Nitze School of Advanced International Studies of The Johns Hopkins University and a B.A. from Harvard University. Born and raised in Oregon, she is the daughter of an immigrant from Ghana and of a former Iowa farm girl. She resides in Maryland with her husband and two children.

Lillian Salerno
Deputy Under Secretary for Policy
202-720-4581, Lillian.Salerno@osec.usda.gov

Lillian Salerno was appointed by President Obama as Deputy Under Secretary (DUSEC) on August 7, 2015. As DUSEC for the Rural Development Mission Area, she oversees the development of strategies and policy initiatives. A former entrepreneur, business owner, and small town lawyer, she understands the unique challenges facing our food systems, the Bioeconomy, and capital investments that are critical in supporting and strengthening America’s rural communities. Before her appointment she also served as Administrator of Rural Business-Cooperative Service.

Ms. Salerno has an extensive work history in the private sector, both in the U.S. and abroad. Prior to her service in the federal government, Ms. Salerno successfully founded an advanced manufacturing company and served as the Executive Director for the Safe Healthcare International Institute.
Vernita Dore
Deputy Under Secretary for Operations & Management
202-720-4581, VernitaF.Dore@osec.usda.gov

Vernita Dore serves as Deputy Under Secretary of the USDA Rural Development Mission Area. As Deputy Under Secretary, Ms. Dore's responsibilities include overseeing Operations and Management, the Office of the Chief Financial Officer, Office of Civil Rights, and forty-seven State Directors across the nation. Additionally, Ms. Dore served as Senior Advisor to the Under Secretary for Rural Development, and has held management positions throughout the agency, building a wealth of experience during her thirty years of with Rural Development. Ms. Dore was appointed by President Barack Obama as USDA’s Rural Development State Director of South Carolina in August 2009.

Ms. Dore has dedicated her professional career to improving the quality of life in rural communities. She has been especially impactful in educating and empowering our children; she has elevated the quality of life for rural youth and their families by securing financial resources to re-build and renovate schools, children’s hospitals and new libraries equipped with state-of-the-art technology. She has also been a consistent leader in Rural Development's efforts to create jobs and economic opportunities for rural citizens across our nation.

A native of Beaufort, South Carolina, Ms. Dore earned a Bachelor of Arts degree in Journalism from the University of South Carolina. She has received additional professional development from Harvard's John F. Kennedy School of Government, the University of South Carolina's Darla Moore School of Business, the Federal Executive Institute, and USDA Graduate School. Ms. Dore is a fellow of the Diversity Leadership Institute at Furman University.

Andrew Givens
Chief of Staff
202-720-4581, Andrew.Givens@osec.usda.gov

Andrew Givens serves as the Chief of Staff to the USDA Rural Development Under Secretary. Previously, he served as Vice President, Government Affairs at the Public Broadcasting Service. Prior to PBS, he was a Special Counsel at Covington and Burling. On the Senate Appropriations Committee, Mr. Givens spent six years as General Counsel and also served as Minority Staff Director for the VA/HUD Subcommittee. Prior to the Senate, he practiced law at Dow, Lohnes and Albertson. Mr. Givens has a J.D. from University of Virginia Law School, M.P.A. from Princeton University and a B.A. from Harvard College.
Tony Hernandez
Administrator, Rural Housing Service
202-692-0268, Tony.Hernandez@wdc.usda.gov

Tony Hernandez was sworn in as the Rural Housing Service Administrator on December 16, 2013. Prior to being appointed, Mr. Hernandez served as Director of the Division of Local Government within the Colorado Department of Local Affairs, Director of the Colorado Business Center with the Fannie Mae Corporation, and HUD Region 8 Administrator with the Clinton Administration.

Mr. Hernandez was a business planner and senior marketing representative for the IBM Corporation for 13 years and a Colorado State Representative for nine years. Mr. Hernandez has a Master’s Degree in Management and Public Policy from Carnegie-Mellon; Master’s Degree in Community Organizing and Social Planning from University of Denver; and Bachelor of Social Work from Colorado State University.

David Lipsetz
Associate Administrator, Rural Housing Service
202-692-2732, David.Lipsetz@wdc.usda.gov

David Lipsetz is the Associate Administrator for USDA’s Rural Housing Service, having started at USDA in 2014 as the RHS Chief of Staff. He is a recognized authority on affordable housing policy who draws on experience as a federal official and local program administrator to help communities develop in a more equitable and sustainable manner.

Mr. Lipsetz came to USDA from HUD, where he served as a Deputy Assistant Secretary and Senior Advisor for Public and Indian Housing. Prior to HUD, David worked for housing agencies in New York City and Oakland, CA. He also spent several years on Capitol Hill, most notably as a Legislative Assistant to Congressman John Dingell. As an Ohio native, Mr. Lipsetz earned graduate degrees in City & Regional Planning and Sociology from Ohio State and a Bachelor’s degree from Michigan State.

Sam Rikkers
Administrator, Rural Business-Cooperative Service
202-690-4730, Samuel.Rikkers@wdc.usda.gov

Sam Rikkers was appointed Rural Business-Cooperative Service Deputy Administrator in December 2014. He joined USDA after serving as Director of the Energy and Environment Team with the White House’s Presidential Personnel Office.

Prior to this position, Mr. Rikkers served as Regional Field Director in Wisconsin on President Obama’s re-election campaign. From 2007 to 2012, he was an attorney with a commercial litigation firm in New York City specializing in antitrust and First Amendment law. Before practicing law, Mr. Rikkers spent years working as a community and political organizer nationally and internationally. He earned a J.D. from the University of Wisconsin, a Master of International Affairs from Columbia University and a B.A. in Political Science and Philosophy from Macalester College in St. Paul, Minnesota. He also served as a volunteer with the U.S. Peace Corps in rural Zambia. Mr. Rikkers is from a small town in Southern Wisconsin.
Brandon McBride
Administrator, Rural Utilities Service
202-720-9541, Brandon.McBride@wdc.usda.gov

In March of 2015, Brandon McBride was appointed by President Obama to serve as the 19th Administrator of USDA’s Rural Utilities Service. Mr. McBride’s appointment follows his role as a senior staff member for the United States Senate Committee on Agriculture, Nutrition and Forestry. Mr. McBride, a lifelong public servant, has dedicated his career to fighting for rural America.

Before working for the Senate Committee on Agriculture, Nutrition and Forestry under the leadership of Chairwoman Debbie Stabenow, Mr. McBride served for several years as a senior legislative assistant for United States Senator Blanche L. Lincoln. As a member of Senator Lincoln’s staff, he handled appropriations and economic development issues. Mr. McBride earned his undergraduate degrees as well as his Master’s degree in Public Administration from Arkansas State University.

Joshua Cohen
Deputy Administrator, Rural Utilities Service
202-720-6285, Joshua.Cohen@wdc.usda.gov

Joshua Cohen was appointed Deputy Administrator of USDA’s Rural Utilities Service in October 2015. Before coming to USDA, he served for 14 years in state and local government, including as Chief Administrative Officer of the Maryland Department of General Services and as the Mayor of Annapolis, Maryland. Before working in Rural Development he was in the criminal justice field, working as a Parole and Probation Agent, as a trainer for police and correctional officers, and as a grant director for a crime victims’ resource center.

Mr. Cohen earned a degree in Economics from the University of Maryland, and is pursuing a Master’s in Public Administration from the University of Baltimore. He lives in Annapolis with his wife Lesley, an oncology research nurse, and their two daughters.

David Sandretti
Director, Legislative and Public Affairs
202-720-1019, David.Sandretti@oc.usda.gov

David Sandretti is a seasoned communications professional who, prior to USDA, worked on Capitol Hill, in the non-profit advocacy arena, and the private sector. He served as communications director for the Senate Environment and Public Works Committee under Senator Jim Jeffords for two years and as communications director and chief spokesperson for Senator Barbara Boxer for 10 years. He also served as press secretary for Senator Russ Feingold for two years. He worked for the firm of Fingerhut Powers and Smith as a senior associate serving a variety of political and labor clients. Mr. Sandretti grew up on his family’s dairy farm in southeastern Wisconsin.
Rural Development has historically operated with approximately 6,200 employees. Currently the agency is operating with an on-board staff of less than 5,000. At the same time staff levels decreased, Appropriations Act's increased the amount of available program level for negative subsidy rate programs with no additional administrative funding. Further, Rural Development is provided with significant amounts of mandatory funding through the Farm Bill and must absorb the cost of implementing these authorities through existing resources. These actions further hamper the agency's ability to provide service to the rural residents and effectively manage the portfolio of programs provided by Congress. Additionally, recent Appropriations Acts have transferred costs of approximately $20 million for GSA rent from the Department to the agency further restraining the S&E account from supporting the existing mission.

3 The amount for mandatory programs reflect the amounts in the Farm Bill less CHIMP and Sequester.
4 Comprehensive Loan Program spending prior to 2014 was not specifically called out in appropriations language, however spending did occur as a percentage of recovery act funds available, as explained later in this document through annual and supplemental Appropriations Act's from FY 2009 to FY 2013. The 2014 Appropriations Act was the first time Congress designated the amount of funding that was to be expended on CLP development within a fiscal year.

</tr>
</tbody>
</table>

The reduction in the cost of money from the Treasury has reduced or eliminated the operational cost of the 502 direct and 502 guaranteed (respectively) during the Obama Administration. Lower interest rates coupled with increased fees have eliminated the need for budget authority to support a robust $24 billion loan program for single family guaranteed housing. Further, increases in Rental Assistance Payments have significantly increased the need for budget authority requirement, as a result operational hurdles exist, due to lack of staff and underwriting larger projects while still ensuring the integrity of the portfolio is maintained.

RBS receives significant amounts of mandatory funding with no additional administrative support. The reduction in discretionary budget authority represents lower levels of grant funding across small business and cooperative development programs.

Total: $4,423,418 $693,378 $634,330 $587,348 $554,315 $686,044 $556,207 $602,048

The most significant trend to highlight in RUS is the change in subsidy cost associated with the Water and Waste Disposal Service. The cost of money to the Treasury was reduced annually during the Obama Administration, this had a direct impact on some key loan programs within Rural Development. This one change significantly reduced the operational cost of several programs. The water and waste disposal loan program operated at a negative subsidy rate in FY 2014 and 2015. The electric and telecommunications program operate at negative subsidy rates as well. This table is displayed in budget authority terms.

Enterprise Workforce Data
As of September 30, 2016, Rural Development has a workforce of 4,818 employees, of which the following are:

- **Full-time:** 4,777 employees
  - **Schedule A:** Of the 4,777 employees, 9 are Schedule A
  - **Pathways:** Of the 4,777 employees, 153 are Pathways
- **Part-time:** 41 employees
  - **Schedule A:** Of the 41 employees, 0 are Schedule A
  - **Pathways:** Of the 41 employees, 12 are Pathways
- 1486 employees are unionized
- Of RD’s total workforce, 27% are eligible to retire within the next year
Approximately 68 occupations are represented across RD. Of those, the five most populated occupations include:

- 1165- Loan Specialist (1,970 employees)
- 1101- General Business and Industry (Loan Tech) (1,353 employees)
- 0301- Miscellaneous Administration and Program (321 employees)
- 0343- Management and Program Analysis (124 employees)
- 2210- IT Management (108 employees)

There are 2,597 (54 percent) permanent employees in mission critical occupations (MCO) reported, to USDA, for RD. For purposes of workforce reporting, a mission critical occupation is defined by the Office of Personnel Management (OPM), as “Occupations agencies consider core to carrying out their missions. Such occupations usually reflect the primary mission of the organization without which mission-critical work cannot be completed.” RD’s MCO’s are:

- 1165- Loan Specialist (1,970 employees)
- 0301- Miscellaneous Administration and Program (321 employees)
- 0343- Management and Program Analysis (124 employees)
- 2210- Information Technology Management (108 employees)
- 0201- Human Resources Management (74 employees)
### RHS Workforce by Program Area

United States Department of Agriculture
2016 Presidential Transition
Rural Development (RD)
RD’s headquarters offices are located in Washington, D.C., which houses 10.5% of its workforce, and St. Louis, MO, which houses an additional 17.1% of RD’s workforce.

RD has 47 State Offices, and more than 400 local offices nationwide to work directly with constituents. The majority of RD’s employees (3,342 as of September 30, 2016) are located in state or local offices.
II. Policies and Regulations

Statutory Authorities

A number of statutes have authorities over rural development programs. In addition to periodic Omnibus Farm Bills, new RD legislation generally amends three major authorizing statutes:

1. Consolidated Farm and Rural Development Act;
2. Food, Agriculture, Conservation, and Trade Act of 1990;
3. Housing Act of 1949; and

Cooperative Marketing Act of 1926 (7 U.S.C. 451 et seq.)

The Cooperative Marketing Act established the Division of Cooperative Marketing within the United States Department of Agriculture to assist agricultural cooperatives in gathering and sharing data and the Cooperative Research and Service Division which conducted agricultural cooperative research and service activities.

Rural Electrification Act of 1936 (7 U.S.C. 901 et seq.)

The act established the Rural Electrification Administration during the Great Depression to create jobs and electrify rural areas by providing subsidized loans and grants to rural electric cooperatives. The 1994 USDA reorganization eliminated REA and incorporated its functions under the Rural Utilities Service. This act authorizes RUS electric, telephone, and broadband programs.

Title V of this act gave authorization to the Farmers Home Administration to grant mortgages for the purchase or repair of rural single-family houses. Title V authorized financial assistance in rural areas to farmers, owners, developers, and elderly persons for the purchase of rural property and construction of adequate facilities, insurance on various loans, and financial assistance for rental housing for farm workers. The USDA Rural Housing Service today, as with the Farmers Home Administration in the past, ensures and guarantees a variety of housing loans for home purchases, repair, and rental housing development.

The legislation was originally enacted as the Consolidated Farmers Home Administration Act of 1961. In 1972, Title V was changed to the Consolidated Farm and Rural Development Act, and is often referred to as the ConAct. The ConAct, as amended, currently serves as the authorizing statute for most USDA Rural Development lending and grant programs.

This legislation affirmed USDA as the lead agency for rural development and named USDA as the lead federal coordinator for rural policy. The act also added minor reporting responsibilities to the 1972 Rural Development Act.
Food Agriculture, Conservation and Trade Act of 1990 (P.L. 101-624)

The Federal Agricultural Improvement and Reform Act of 1996 amended the Food Agriculture, Conservation and Trade Act of 1990 to authorize the USDA to establish what is now the Rural Utilities Service Distance Learning and Telemedicine Grant Program. This program provides grants to communities to support the construction of projects that will establish broadband to provide distance learning and telemedicine opportunities in rural communities.

Federal Crop Insurance Reform and Department of Agriculture Reorganization Act of 1994 (P.L. 103-354)

Title II authorized reorganization of the Department of Agriculture. It authorized the Secretary to establish the position of Under Secretary of Agriculture for Rural Economic and Community Development to succeed the Under Secretary of Agriculture for Small Community and Rural Development. The act further organized Rural Development into the Rural Housing Service (community facilities, technical assistance, and outreach), Rural Business-Cooperative Service (cooperatives, business and industry loans), and the Rural Utilities Service (electric, telecommunications, water). The legislation also abolished the Rural Electrification Administration established under the Rural Electrification Act of 1936 establishing the Rural Utilities Service as its successor.

The Agriculture Risk Protection Act of 2000 (P.L. 106–224)

This Act established the RBS Value Added Producer Grant program.

The Food, Conservation and Energy Act of 2008 (P.L. 110-246)

Title VI of this act reauthorized various RD programs and authorized loans and guarantees to support locally or regionally produced agricultural food products. The act also established the Rural Microentrepreneur Assistance Program and Delta Regional health care grant program. Title IX continued RBS Energy Programs from the 2002 Farm Bill for Biorefinery assistance, repowering assistance, the bioenergy program for advanced biofuels, and the Rural Energy for America program.

The Agricultural Act of 2014 (P.L. 113-79)

The Rural Development title of the 2014 Farm Bill reauthorized most existing RD programs through FY 2018. The bill amended the water and waste water direct and guaranteed loan programs to encourage financing by private or cooperative lenders to the maximum extent possible. The law also provided a 3%-5% carve-out of the Community Facilities appropriation for technical assistance, and encouraged the use of loan guarantees where possible. This law included a new provision directing the Secretary of Agriculture to begin collecting data on the economic effects of the projects that USDA Rural Development funds to assess their long-and short-term viability, and directed the Secretary to develop simplified applications for funding.

The 2014 Farm Bill eliminated several business programs, but consolidated many of their objectives into a broader program of Business Development grants. The law also provided $150 million in mandatory spending for pending rural development loans and grants and $63 million in mandatory spending for the Value-Added Product Grants program.

The law retained the 2008 Farm Bill provision permitting communities that might otherwise be ineligible for USDA funding to petition USDA to designate their communities as “rural in
character,” thereby making them eligible for program support. The law also amended the definition of rural area in the 1949 Housing Act so that areas deemed rural between 2000 and 2010 would retain that designation until USDA receives data from the 2020 decennial census. The provision also raised the population threshold for eligibility from 25,000 to 35,000.

Further, the law reauthorized funding for programs under the Rural Electrification Act of 1936, including the Access to Broadband Telecommunications Services in Rural Areas Program and the Distance Learning and Telemedicine Program under the Food Agriculture, Conservation and Trade Act of 1990. For Access to Broadband Telecommunication Services in Rural Areas, the law also established new procedures to compare applications and to set funding priorities. Additionally, a new Gigabit Network Pilot Program for high-speed broadband service was authorized at $10 million for each fiscal year FY 2014-FY 2018. The law also authorized a new Rural Energy Savings Program to fund loans to qualified consumers to implement energy efficiency measures.

**Important Policies and Regulations**

Rural Development releases an average of approximately 10 new regulations per year. Of those, approximately 20% are deemed significant and/or economically significant by the Office of Information and Regulatory Affairs.²

The following are the significant RD regulations that were finalized within the last year:

- **Community Facility Loans** - Interim Rule published July 6, 2016, and made effective the same date, amending regulations on Community Facility Direct Loans to enable RHS to make loans to eligible lenders who would then in turn re-loan those funds to applicants for projects that are eligible under the Community Facilities Direct Loan program.

- **Business and Industry Guaranteed Loan Program - Guaranteed Loanmaking and Servicing Regulations** – Final rule published June 3, 2016, and made effective August 2, 2016, strengthening criteria for non-regulated lender participation, provisions for New Markets Tax Credits and Cooperative Stock Purchase Program, and modified loan scoring criteria.

- **Rural Broadband Access Loans and Loan Guarantees** – Final Rule confirmation published June 9, 2016 and made effective the same date, addressing the topics of broadband service and lending speed definitions, eligibility criteria, rate affordability, affiliated companies, usage restrictions, and wireless broadband service. Specifically, Section 6104 of the Agricultural Act of 2014 (the 2014 Farm Bill) adjusted certain service area eligibility criteria, established new priority considerations and introduced new reporting sections which required more detailed information gathering and publishing for both the Agency and awardees.

² Number of new regulations released per year (on average): (these include both significant and not significant regulations based on the total number of proposed RD regulations identified in the fall regulatory agenda from years 2012 through 2016 – 5 year avg. 53 proposed RD regulations appeared.) Based on 53 proposed rules appearing in the 5 year regulatory agenda, 13 were deemed significant/economically significant or 18.87% of the total.
Overview of the policy/regulation review process

Rural Development promulgates regulations in Title 7 of the Code of Federal Regulations, Parts 1600 through 1999, 3500 through 3599, and 4200 through 4299. In accordance with Executive Order 12866 and Departmental Regulation 1512-1, subject matter experts in each program area prepare rulemakings and work in conjunction with staff from the Office of General Counsel (OGC) and either Regulations and Paperwork Management Branch (RPMB) for non-RUS programs, or Program Development and Regulations Analysis (PDRA) for RUS programs. RPMB and PDRA are responsible for ensuring that Departmental and Federal requirements are followed for clearance and issuance of regulations, including implementation of the Paperwork Reduction Act of 1995.

RD policy and regulatory actions generally originate from the Program Branch Chief, Division Director, or Agency Assistant Administrator level and are then reviewed and cleared within the Agency through the same channels. The action is then provided to all affected RD Headquarters offices. For RHS and RBS, this includes Civil Rights, Program Support Services, the Faith-Based Coordinator, and Native American Coordinator, for review and comment prior to analysis by PDRA/RPMB. OGC then reviews and provides legal guidance, opinions, and edits as appropriate before PDRA/RPMB final clearance. Once cleared by PDRA/RPMB and subsequently signed by the Administrator, the action leaves the Agency for review and approval to publish provided by the USDA Office of Budget and Program Analysis (OBPA). Once approved, the action receives its final approvals from the Under Secretary before it is returned to PDRA/RPMB for publication. Regulatory actions deemed Significant by Office of Management and Budget (OMB) Under Executive Order 12866, need further clearance by the USDA Secretary and OMB.
United States Department of Agriculture
2016 Presidential Transition
Rural Development (RD)

GAO and OIG Audits

Open OIG Audits

Rural Business Programs Intermediary Relending Program (IRP) – JUN 25, 2010
In this report OIG examined the agency’s controls over IRP to determine if they adequately ensure that program funds go to whom and for what they are intended. One recommendation related to recovery of funds made to borrowers for ineligible purposes remains open. Partial restitution has been received on the sole account in question and RD is seeking closure of the audit based on this disposition.

OIG initiated this audit to assess the effectiveness of Rural Development’s internal B&I guaranteed controls over loan prioritization, financial reviews, and eligibility, and whether the agency’s outreach program was effective in ensuring that Recovery Act funds were obligated. Two recommendations related to final rule publication and training remain open. Initial training and publication of the enhanced B&I rule is complete and RD is seeking closure of the audit based on this disposition.

Rural Rental Housing Program Project Costs and Inspection Procedures – SEP 27, 2012
The purpose of this audit was to evaluate the agency’s internal controls designed to ensure that owners accurately report the financial operations, and maintain the physical condition, of properties participating in the RRH Program. Six recommendations related to the ability of agency controls to detect any misuse of RRH Program funds by borrowers and their management agents remain open. Closure of this audit is expected later this calendar year and depends on the publication of several revised rules and a new handbook.

ARRA Broadband Initiatives Program (BIP) – MAR 29, 2013
This audit was commissioned to assess RUS’ internal controls over the approval of BIP loan and grant applications, including, adequacy to ensure projects were eligible and whether RUS took actions to mitigate the risks of overbuilding in service areas. One recommendation related to production of service area maps in the Broadband Program Mapping Tool remains open.

ARRA - B&I Guaranteed Loans - Phase III – MAR 29, 2013
Audit objectives were to assess the servicing of Recovery Act-funded B&I guaranteed loans, if Recovery Act funds were used properly, and whether the program was effective in terms of its performance measures. One recommendation, assigning lenders responsibility for balance sheet equity certification at closing remains open. A revised procedural notice has been published pending audit closure.

ARRA Broadband Initiatives Program (BIP) Post-Award Controls – AUG 22, 2013
This audit assessed RUS’ controls over BIP awardees’ fulfillment of their grant and loan/grant agreements (post-award controls) and evaluated the effectiveness of BIP in meeting and attaining Recovery Act goals. One recommendation requiring capture and analysis of post award performance remains open. The agency is currently seeking revision of the recommendation based on data collection challenges related to comingling of public and private funds by awardees, obfuscating performance results.
Rural Business - Cooperative Service Grant Programs Duplication – MAR 25, 2014
This audit’s objective was to determine if there is duplication, overlap, or fragmentation of program objectives, goals, and/or funding in RBS grant and loan programs. Two recommendations related to program consolidation and duplication prevention remain open. Consolidation of four grant programs and revision of the RD Instruction related to Loan and Grant fund allocation is expected to be completed by end of calendar year closing this audit.

Single Family Housing Direct Loan Servicing and Payment Assistance Recapture (Centralized Servicing Center) – JUL 18, 2014
In this audit, OIG reviewed how RHS services SFH direct loans to determine if CSC performs yearly reviews of borrower income, if the borrower is eligible for payment subsidy, and if payment subsidy is accurately calculated and repaid. Two recommendations related to receivable recapture and master death file debarment procedures remain open and are being addressed under the Do-Not-Pay initiative.

Review of Rural Rental Housing's Tenant and Owner Information – SEP 24, 2015
This audit attempted to determine whether owners of RRH projects, or their management agents, report reasonable and accurate project operation information, and whether tenants report eligibility information accurately. Nine recommendations related to the automation of multiple program controls, payment recapture and project review remain open. Project reviews for anomalous payments are currently in progress, automation solutions are in the design phase, and fulfillment of repayment demand letters are under review by the National Appeals Division.

Rural Development Single Family Housing Direct Loan Credit Reporting – MAR 28, 2016
This audit examined whether Rural Development accurately reported borrower repayment statuses in a timely manner to credit reporting bureaus and appropriate databases. Nine recommendations related to reporting deficiencies, data gaps, data accuracy, Debt Collection Improvement Act compliance, and Interagency Servicing Agreements are expected to remain open until mid-2017.

Rural Energy for America Program (REAP) – AUG 8, 2016
The objective of this audit was to determine whether REAP loan and grant recipients and projects met eligibility requirements and whether appropriate project performance measures were established and achieved.
Significant Closed OIG Audits

This audit was commissioned to determine if Rural Development field personnel complied with the agency’s established internal control procedures at loan origination and closing that ensure homes and program participants who received Recovery Act funds met eligibility guidelines.

ARRA Rural Business Enterprise Grants – SEP 5, 2012
In this audit, OIG assessed the controls used for determining eligibility and servicing of Recovery Act-funded RBEGs including evidence used in determining eligibility and ranking at the state and national level.

Rural Development's Controls over Eligibility Determinations for the Rural Community Facilities Program's Direct Loan and Grant Recovery Act Activities – SEP 28, 2012
OIG initiated this audit to determine if program participants and project purposes met eligibility requirements and if RHS properly monitored Recovery Act funds, ensuring that they were disbursed and used in accordance with project specifications.

Recovery Act Single Family Housing Direct and Guaranteed Loans – DEC 12, 2012
This audit was to determine if Rural Development’s SFH Direct and Guaranteed Loan Programs met the performance goals established to measure their effectiveness in meeting the purposes of the American Recovery and Reinvestment Act.

This audit was to determine if RBS internal controls were functioning as intended to ensure grant recipients used funds for authorized purposes, met grant objectives in a timely manner, and provided the required matching funds, where applicable.

OIG conducted this audit to evaluate Rural Development’s internal controls that evaluate the issuance of loss claim payments to lenders.

OIG reviewed the effectiveness of RUS’ Recovery Act-specific performance measures for the Water and Waste Direct Program (WWD) including whether controls over WWD expenditures were adequate to ensure RUS spent Recovery Act funds as intended.

Rural Development Procurement Controls – MAR 24, 2014
In this audit, OIG assessed whether RD selected contractors and prepared procurement contracts in accordance with Federal Acquisition Regulations, ensured funds were correctly accounted for and used in the proper period, adequately monitored contract funding and unliquidated balances, and verified that deliverables were met in accordance with contract terms and provisions.
Open GAO Audits

RURAL HOUSING SERVICE: Opportunities Exist to Strengthen Farm Labor Housing Program Management and Oversight – JUL 13, 2011
GAO examined the demand for the FLH program; RHS’s processes for ensuring that the program is providing decent housing for eligible farmworkers; and the financial status and financial management of FLH properties.

FORECLOSURE MITIGATION: Agencies Could Improve Effectiveness of Federal Efforts with Additional Data Collection and Analysis – JUN 1, 2012
GAO examined the federal and nonfederal response to the housing crisis, the current condition of the U.S. housing market, and opportunities to enhance federal efforts.

RURAL HOUSING SERVICE: Efforts to Identify and Reduce Improper Rental Assistance Payments Could Be Enhanced – JUL 3, 2012
GAO reviewed the extent to which RHS has examined the sources and magnitude of improper rental assistance payments, RHS’s compliance with requirements and guidance concerning improper payments, and potential lessons RHS could learn from HUD efforts to identify and reduce improper rental assistance payments.

HOUSING ASSISTANCE: Opportunities Exist to Increase Collaboration and Consider Consolidation – AUG 16, 2012
GAO assessed the extent to which there is overlap or fragmentation in selected housing programs, federal collaborative efforts, and implications of consolidating selected housing programs.

ENTREPRENEURIAL ASSISTANCE: Opportunities Exist to Improve Programs' Collaboration, Data-Tracking, and Performance Management – AUG 23, 2012
In response to a statutory requirement, this report discusses the extent of program overlap and fragmentation, the effects on entrepreneurs, and agencies’ actions to address them; and the extent of tracked program information and whether these programs have met their performance goals and been evaluated.

This report examines how the workforces of USDA’s service center agencies changed from fiscal year 2003 to fiscal year 2012, the extent to which USDA’s policy on supervisory ratios aligned with OPM guidance in fiscal year 2012, and the extent to which USDA’s service center agencies followed leading practices when closing offices and reducing staff in fiscal year 2012.

TELECOMMUNICATIONS: USDA Should Evaluate the Performance of the Rural Broadband Loan Program – MAY 23, 2014
This report assessed issues related to the loan program geographic distribution and financial performance of loans and the relationship between loans, broadband deployment, and economic development, and how USDA evaluates progress towards these outcomes.
RECOVERY ACT: USDA Should Include Broadband Program's Impact in Annual Performance Reports – JUN 17, 2014
This report addresses how RUS ensures that projects are approved, completed by the deadline, and the extent to which RUS provides information that shows broadband program impact.

This report examines USDA’s climate change priorities and how these align with national priorities, the status of USDA’s climate change efforts, and the challenges USDA faces in implementing its climate efforts and the steps it has taken to overcome these challenges.

WATER INFRASTRUCTURE: EPA and USDA are Helping Small Utilities with Asset Management; Opportunities Exist to Better Track Results – JAN 4, 2016
This report examines what is known about the use of asset management among the nation’s water utilities, particularly small water utilities including the benefits, challenges, and steps EPA and USDA are taking to help small water utilities implement asset management.

This report discusses recent trends in the credit subsidy costs of the RHS Single Family Housing Guarantee program, the process for estimating those costs, and the extent to which RHS policies and procedures for the program are consistent with federal standards for managing credit programs.

This report describes USDA efforts to streamline and improve administrative services since 2011 and examines opportunities that may exist to strengthen these efforts.

This report assesses federal agency Information Technology spending, including the oversight of at-risk legacy investments and the overall age and obsolescence of federal IT.
Significant Closed GAO Audits

This report examines federal wind-related initiative programs or groups of agency activities that promoted wind energy through a specific emphasis or focus, wind-related initiatives implemented by federal agencies in fiscal year 2011, and their key characteristics. Assessments included the extent of fragmentation, overlap, and duplication, if any, among these initiatives, and the extent to which they were coordinated, along with how agencies allocate support to projects through their initiatives and the extent to which they assess applicant need for support.

**Improving Disposition and Oversight Practices May Increase Returns on Foreclosed Property Sales** – JUN 20, 2013
This report examined disposition goals, strategies, practices, and effectiveness in disposing of properties compared with those of the private sector; and FHA oversight of contractors that maintained and marketed their Real Estate Owned properties.

**TELECOMMUNICATIONS: Federal Broadband Deployment Programs and Small Business** – FEB 7, 2014
This report addresses the federal government’s efforts to ensure the availability of broadband services for small businesses, and the effect of selected federally funded and municipal networks on broadband service and small businesses.

**MANAGING FOR RESULTS: Implementation Approaches Used to Enhance Collaboration in Interagency Groups** – FEB 14, 2014
This report assessed how interagency groups responded to the central collaboration challenges identified in its prior work of defining outcomes; measuring performance and ensuring accountability; establishing leadership approaches; and using resources, such as funding, staff, and technology including those groups related to federal housing finance.

**NATIVE AMERICAN HOUSING: Additional Actions Needed to Better Support Tribal Efforts** – MAR 27, 2014
This report examines common housing challenges tribes face and actions that could be taken to address them.

This report examines the role of the federal government in the development and use of alternative jet fuels, key challenges to developing and using alternative jet fuels, and actions that the federal government plans to or could take to help address those challenges.

**USDA FARM PROGRAMS: Farmers Have Been Eligible for Multiple Programs and Further Efforts Could Help Prevent Duplicative Payments** – JUL 8, 2014
This report examines USDA programs that provided financial assistance to farms during the effective period of the 2008 farm bill (2008 through 2013), the potential for overlap and duplication among these programs; the extent that farms received payments from farm programs and the amount of these payments; and the internal controls USDA has designed to help prevent duplicate payments for the same crop losses to the same farms.
NATIONAL FLOOD INSURANCE PROGRAM: Additional Guidance on Building Requirements to Mitigate Agricultural Structures' Damage in High-Risk Areas Is Needed – JUL 29, 2014
This report evaluates the possible effects of NFIP, including its building requirements, on farmers in riverine areas that have a high risk of flooding and examines, among other things, the effects of building requirements on farmers in high-risk areas, and options for addressing any challenges farmers face.

This report describes the market developments since 2000 that have led to changes in the federal government’s role in the single-family housing finance system, analyzes whether and how these developments have challenged the housing finance system, and presents an evaluation framework for assessing potential changes to the system.

This report addresses federal programs that fund these services and supports for older adults, how these services and supports are planned and delivered in selected localities, and agency efforts to promote a coordinated federal system of these services and supports, including those related to affordable housing and community facilities.

ELECTRICITY GENERATION PROJECTS: Additional Data Could Improve Understanding of the Effectiveness of Tax Expenditures – MAY 28, 2015
GAO examined state and federal supports for the development of utility-scale electricity generation projects—power plants with generating capacities of at least 1 MW that are connected to the grid and intend to sell electricity—for fiscal years 2004 through 2013. This report identifies key state supports for these projects; examines key federal support provided through outlays, loan programs, and tax expenditures for these projects; and examines how state and federal supports affect the development of new renewable projects.

FEDERAL LOW-INCOME PROGRAMS: Multiple Programs Target Diverse Populations and Needs – JUL 31, 2015
This report describes federal programs (including tax expenditures) for low income recipients, identifies the number and characteristics of impoverished households, identifies the number, poverty status, and household characteristics of select program recipients, and examines research on how certain programs may affect incentives to work.

TELECOMMUNICATIONS: Additional Coordination and Performance Measurement Needed for High-speed Internet Access Programs on Tribal Lands – DEC 18, 2015
The report examines the perspectives of tribes and providers on high-speed Internet access and barriers to increasing this access; the level of interrelation and coordination between federal programs that promote high-speed Internet access on tribal lands; and existing data and performance measures related to high-speed Internet on tribal lands.
INNOVATIVE MANUFACTURING: Commerce Should Target Program Outreach to Address Capital Access Gaps – FEB 4, 2016
This report assesses the status of the Economic Development Administration’s (EDA) implementation of the Innovative Technologies in Manufacturing (ITM) program and the extent to which EDA has coordinated with other agencies to ensure that ITM program activities do not duplicate the efforts of other federal loan guarantee programs.

NONBANK MORTGAGE SERVICERS: Existing Regulatory Oversight Could be Strengthened – APR 11, 2016
This report examines, among other factors, recent trends in mortgage servicing and the oversight framework in which non-bank servicers operate.

MUNICIPAL FRESHWATER SCARCITY: Using technology to improve distribution system efficiency and tap nontraditional water sources – APR 29, 2016
This report examines technologies that could reduce demand on freshwater supplies by improving distribution system efficiency; technologies that could increase water supply by using nontraditional water sources; and locations and types of water utilities where these technologies are most commonly adopted.

This report examines community lender participation in the mortgage servicing market and potential effects of CFPB’s Mortgage Servicing Rules (MSR) on them, potential effects of MSR capital rules on holding or selling by community lenders, and the process regulators used to consider impacts of these new rules on mortgage servicing and the capital treatment of MSRs.

Other Significant Audits
OIG Federal Managers Financial Integrity Act (FMFIA) Audits

85401-17-FM – Findings: RD will accelerate the conversion from the federally non-compliant RUS Legacy system to the compliant RULSS.

04601-0001-31 – Findings: OIG found issues with the methodology the Centralized Servicing Center applied to determining payment subsidy eligibility and recapture.

85401-0005-11 – Findings: RD will develop and implement a formal review and evaluation process to assess results from the current SFH subsidy models, explaining and documenting any adjustments needed in the methodology.

04601-0002-31 – Findings: Rural Development was not compliant with the Debt Collection Improvement Act and the Fair Credit Reporting Act.
III. Congressional Relations and Issues

Overview

RD programs are generally supported throughout Congress and are a point of interest to many members due to the potential impact programs have on their constituents. The RD legislative team has continuous interaction with staff and members of the following Committees: House Agriculture, House Appropriations Subcommittee on Agriculture, House Finance Services, Senate Agriculture, Senate Appropriations Subcommittee on Agriculture, Senate Banking, and Senate Indian Affairs. The following is a compilation of RD related issues regularly raised by Congressional leaders over the past two years at Congressional hearings or through direct inquiries.

RD Wide

Chief Risk Officer (CRO) - Congressional leaders have a regular interest in the creation of a CRO within RD. RD has been working to implement a CRO function within the RD USEC office. This action is consistent with direction provided by Congress in the FY 2015 House of Representatives Agriculture Appropriations Report. The position was posted at the end of July 2016. Congressional notification and candidate selection is expected in October 2016. The anticipated start date of the CRO is late November 2016.

Tribal Relations – Members of Congress with tribal or native communities have an interest in how RD programs are being utilized in Indian Country. Agency outreach and funding levels are at the center of many issues raised by members including most recently at a hearing of the Indian Affairs Committee on June 22, 2016. Many members of the Senate Indian Affairs Committee are also members of the Agriculture, Appropriations, and Banking Committees.

IT Infrastructure – While generally an issue of importance to many in Congress, IT infrastructure inquiries regularly come from Appropriators specifically requesting information on how RD is utilizing funding provided for IT upgrades or program delivery.

Program Duplication – During Congressional hearings some members will regularly ask about program duplication and why RD administers programs similar to other programs within the federal government. This issue is normally raised when discussing housing, energy, and broadband programs and their relationship to DOE, HUD, and SBA programs. GAO also issues a regular report on duplication of programs throughout the federal government that members often reference.

Rural Poverty - Congressional leaders have a regular interest in what RD is doing to combat rural poverty. Questions can touch on any area of the RD mission such as economic development, affordable housing, critical infrastructure, and broadband access. A number of members have been advocating for a “10-20-30” plan to address persistent poverty counties across the United States. This plan would require at least 10 percent of federal funds in certain accounts be directed to counties with a 20 percent poverty rate for the last 30 years. In response to this, USDA has launched several place based initiatives that span Federal Agencies precisely for the specific purpose of focusing on those rural communities such as StrikeForce and Promise Zone initiatives.
Rural Definition - The House Appropriations Subcommittee on Agriculture, Rural Development, Food and Drug Administration, and Related Agencies directed RHS to submit a report listing the criteria used to define the “rural in character” standard used in determining program eligibility. The Agency was also instructed to explain how it accounts for incarcerated populations and students of colleges and universities in its population counts. Due to the suspension of eligibility determinations made solely on the basis of Rural in Character designations, the Agency has not responded to this request (House Report 114-205).

Similarly, the Agency has not responded to House Report 113-468, in which the same Congressional subcommittee directed them to provide a report on its implementation of the three-part test to determine a community's eligibility to participate in rural housing programs as required by the Housing Act of 1949, as amended. The requested report was expected to include information on the factors the Agency uses to determine whether a community is “rural in character” and when a serious lack of mortgage credit exists, along with a history of the agency's actions using this three-part test since the 2000 U.S. Census, and implementation of changes made by the Agricultural Act of 2014.
United States Department of Agriculture
2016 Presidential Transition
Rural Development (RD)

Rural Housing Service

502 Direct Single Family Housing Loan Program – USDA’s main housing loan program, 502 Direct loans are designed to help low-income individuals purchase houses in rural areas. Funds can also be used to build, repair, or renovate a house, including providing water and sewage facilities. The program provides fixed-interest mortgage financing to low-income families who are unable to obtain credit elsewhere. While this program falls under the jurisdiction of the House Financial Services and Senate Banking Committees, it is a regular point of interest and inquiry in the Senate and House Agriculture Committees due to the importance of affordable housing in rural America.

Community Facilities Program (CF) – The CF loan and grant program, administered by RHS, supports essential community facilities in rural areas with a population of 20,000 or less and has the strong support of many members of Congress. Most recently, the 2014 Farm Bill authorized the addition of a technical assistance and training component to the CF program designed assist communities in identifying and planning community facility needs. The provision authorizes use of not less than 3% or more than 5% of the total CF appropriation for this technical assistance component.

Consumer Financial Protection Bureau (CFPB) – In accordance with the Dodd-Frank Act arising from the financial crisis of 2008 and related Mortgage Servicing issues, CFPB was created to provide accurate, consistent, and transparent information to borrowers relative to mortgage debt owed. Even though the regulation does not specifically pertain to government loans Congress has asked whether the Customer Service Center is in compliance with CFPB and what resources are needed to attain compliance. RHS is striving to comply with the Act when servicing Single Family Housing loans.

RHS Multi-Family Housing Program (MFH) – The MFH program is of great interest to many members of Congress as it funds the construction, acquisition, and rehabilitation of Multi-Family housing for low to moderate income residents by providing 90% loan guarantees to certified lenders to make rental housing affordable to those residents. Most recently members have been concerned with how RHS will address the number of properties exiting the program, which potentially leaves constituents without affordable housing.

RHS has been working to provide more data to MFH customers to improve their understanding of properties at risk of exiting and to encourage transfers of those properties to owners interested in retaining affordable housing. An exit tool has been developed to provide the public with portfolio data and RD has been increasing outreach through buyers, sellers, and industry meetings.

RHS is also working to incentivize nonprofit, mission-based organizations to acquire at-risk Section 515 housing through a demonstration program. Under this program, Section 515 loan transfers to program eligible non-profit entities will be able to earn a return on their own resources initially invested in the property when the property is estimated to leave the Section 515 program as a result of the natural maturity or final payment of the loan. By allowing non-profit organizations to earn on their initial investment, RD anticipates an increase in non-profit organization participation in multi-family housing portfolio preservation efforts.
RHS Multi-Family Housing Program Funding – In FY 2016, MFH used all funding in its Rental Assistance, Voucher, Multi-family Direct (Section 515), Multi-family Guaranteed (Section 538), and Multi-family Preservation and Revitalization (MPR) programs. The Section 538 program had the authority to increase its guarantee authority up to 25% above its budgeted level. RHS exercised that authority and used the additional $37.5 million. The MPR program used all FY 2016 budget authority, prior year carryover, and has conditionally approved (subject to available funding) enough transactions through September 2016 to use nearly all of its expected FY 2017 budget authority. The Section 515 program also used its budget authority on portfolio revitalization, leaving no money for new construction of affordable housing needed to offset the loss of housing by older properties exiting the program.

RHS Rental Assistance (RA) – RA is project-based assistance used in conjunction with RHS Section 515 and Section 514/516 Farm Labor Housing loan/grant programs. The program provides rental assistance directly to the owners of some RHS-financed projects under contracts specifying that beneficiaries will generally pay no more than 30% of their income for rent. The program makes up the difference between the tenant’s contribution and the rental charge. Congressional leaders are interested in participation rates of the program and whether current appropriated dollars are sufficient to cover demand.

In FY 2016, Congress requested quarterly reports on the status of funding in the RA program. This was as a result of MFH running out of RA funds in FY 2015. In addition, in FY 2016 Congress asked GAO to perform a review of the RA program and RD’s efforts relating to maturing mortgages. These reviews are expected to remain ongoing through at least early calendar year 2017.
Rural Business-Cooperative Service

Biorefinery, Renewable Chemical, and Biobased Product Manufacturing Assistance Program (Section 9003) – The 2014 Farm Bill expanded the scope of renewable energy programs within RBS to include the development of new and emerging technologies for advanced biofuels. Members have been particularly interested in mandatory spending and CHIMPS related to this program.

Healthy Food Financing Initiative (HFFI) – The 2014 Farm Bill authorized $125 million for HFFI and laid out several priorities including projects that use local foods as a strategy to increase healthy food access. The Department of Treasury and the Department of Health and Human Services also support HFFI through existing programs. While a number of members support this program, others have raised questions about how the program would be structured and operate.

Rural Energy for America Program – This program provides funding to eligible farmers, ranchers, and small businesses for purchasing renewable energy systems and making existing energy systems more efficient.

Value-Added Producer Grant Program (VAPG) – VAPG is supported by many in Congress. The 2014 Farm Bill added two new priorities to the VAPG program: one for Veteran farmers and ranchers and one for projects that best contribute to creating or increasing marketing opportunities for operators of small and medium-sized farms and ranches structured as Family Farms, Beginning Farmers and Ranchers, Socially-Disadvantaged Farmers and Ranchers, and Veteran Farmers and Ranchers.
United States Department of Agriculture
2016 Presidential Transition
Rural Development (RD)

Rural Utilities Service

Broadband – Access to broadband in rural America is a high priority to many members of Congress. RD broadband programs are strongly supported by both the authorizing and appropriations committees. The 2014 Farm Bill amended the Farm Bill Broadband program in order to strengthen the evaluation of applicants, increase transparency, and more effectively target resources to areas lacking broadband. As a result, RUS published an interim final rule in July 2015 to further define underserved areas, prioritize applications that offer service to the greatest proportion of unserved households, and outline the minimum acceptable level of broadband service. Hearing questions or inquiries from members traditionally revolve around RD efforts to expand access to areas of most need and how RD coordinates with other federal agencies such as the Federal Communications Commission.

Water and Environmental Program (WEP) Open and Free Competition Policy – Senator Shelby and Representative Aderholt of Alabama have inquired about the RUS, WEP open and free competition policy guidance issued to staff in FY 2012. They have raised specific concerns of ductile iron manufacturers who believe the policy dictates that PVC pipe be used, or preferred, on WEP projects. These concerns have led to language being included in the most recent appropriations bill regarding this issue.

Clean Power Plan (CPP) – On August 3, 2015, the CPP Final Rule was issued by the Environmental Protection Agency. RUS has heard concerns from law makers on how the final rule will impact RUS power supply borrowers that own coal generation assets and the subsequent risk to the RUS loan portfolio and in turn to U.S. taxpayers. Many rural electric cooperatives invested in coal-fired generation facilities with loan funds from and with the support of RUS. The current RUS loan portfolio for power supply borrowers is approximately $20 billion of which 35% or $7 billion are secured by coal-fired generation assets. Fifty four coal-fired plants in 21 states are financed with RUS loan funds.

Rural Water and Waste Disposal Program (WWD) – The Rural Water and Waste Disposal Program, a popular program among many members, supports construction and improvements to rural community water systems unable to get reasonable credit in the private market. The Water and Waste loan and grant programs assist eligible applicants in rural areas and cities and towns of up to 10,000 residents. Drinking water, sanitary sewerage, solid waste disposal, and storm drainage facilities may be financed with direct and guaranteed loans and grants. This program is also extremely popular with customers and is oversubscribed. The 2014 Farm Bill provided $150,000,000 in mandatory funding to address the backlog of pending applications in the RD/RUS Water and Waste Disposal Loan and Grant Program.

Rural Energy Savings Program (RESP) – RESP authorizes the RUS Administrator to make loans to utilities, and similar entities, that agree to use the loan funds to relend those funds to their consumers for the purpose of implementing energy efficiency measures. RESP also requires RUS to establish a plan for measurement and verification training, and technical assistance of the program. Sen. Merkley has been interested and involved in this program since its development.
IV. Internal and External Stakeholders

Important relationships with other Federal Departments or organizations

Appalachian Regional Commission (ARC): ARC is a regional economic development agency that represents a partnership of federal, state, and local government. Established by an act of Congress in 1965, ARC is composed of the governors of the 13 Appalachian states and a federal co-chair, who is appointed by the president. ARC is an additional source of funding and technical assistance for many of RD’s customers, and has partnered with RD on many projects and initiatives.

Delta Regional Authority (DRA): Established in 2000 by Congress, the Delta Regional Authority makes strategic investments of federal appropriations into the physical and human infrastructure of the 252 counties and parishes that make up the most distressed areas of the country’s Delta Region communities. Through the States’ Economic Development Assistance Program, these investments help to improve transportation and basic public infrastructure and to strengthen our workforce development system and local business environments for some of the same constituents served by RD. DRA is also another source of funding and technical assistance for many of RD’s customers, and has partnered with RD on many projects and initiatives.

Department of Commerce, Economic Development Administration (EDA): The EDA’s mission is to lead the federal economic development agenda by promoting innovation and competitiveness, preparing American regions for growth and success in the worldwide economy by encouraging its partners around the country to develop initiatives that advance new ideas and creative approaches to address rapidly evolving economic conditions. EDA currently partners with USDA RD and a number of other agencies on the “Build America” initiative, and has provided valuable data, technical assistance and funding to a number of rural economic development efforts that involved RD.

Department of Energy, Loan Programs Office (LPO): LPO investments are designed to accelerate the deployment of innovative clean energy projects and advanced technology vehicle manufacturing facilities across the United States. Some recent partnerships between LPO and RD have involved Bioeconomy projects.

Farm Credit Administration (FCA): FCA is an independent Federal agency that regulates and examines the banks, associations, and related entities of the Farm Credit System (FCS), including the Federal Agricultural Mortgage Corporation (Farmer Mac). The FCS is the largest agricultural lender in the United States. It is a nationwide network of lending institutions that are owned by their borrowers. It serves all 50 States and Puerto Rico and works with nearly every RD program area.

Federal Emergency Management Agency (FEMA): RD activities intersect with FEMA through a number of Disaster Assistance Programs for emergency water assistance, home owners, Community Facilities program borrowers, and business owners and that may be administered in conjunction with FEMA activities, as well as a continuing partnership of cross-agency referral.
Government Contact Center Council: The RD CSC has a contact center where homeowners can call to receive various types of information and services. To ensure consistency throughout the administration IRS, Social Security, and others with call centers developed this partnership to discuss challenges, successes, and directions related to managing government call centers.

Joint Federal Housing Agency Group: RHS is a member of this Joint Federal Housing Agencies task force, along with Housing and Urban Development, Veteran Administration (VA), Ginnie Mae, the Federal Housing Finance Agency, and the Consumer Financial Protection Bureau. The purpose of the task force is to increase cooperation among Federal housing agencies, to pool resources, and to achieve uniform housing regulations, policies, and practices whenever possible.

National Endowment for the Arts (NEA): RHS works with NEA to provide, coordinate, and implement technical assistance on place-based and arts-focused economic development in rural communities, through programs such as Our Town.

National Food and Agriculture Council (NFAC): The NFAC was established in 1982 as a governing body for Departmental policies and directives within the USDA with the primary purpose of coordinating all activities that require cooperative involvement across agencies in the field. The NFAC has representation from every Agency and management entity within the Department of Agriculture and is replicated at the State and Local level through similar bodies known as State FACs and Local FACs. Rural Development, Natural Resources Conservation Service, and Farm Service Agency (also known as the “Service Center Agencies”) share the leadership role as chair of the council on an annually rotating basis. The NFAC uses its network of SFACs and LFACs to disseminate USDA directives, coordinate intra-agency efforts, and to reduce costs through shared space and other resources both at headquarters and in the field. Every three years the RD Deputy Under Secretary for Operations and Management chairs this council with support from the RD Special Projects Manager/NFAC Liaison, which will occur again January 2018.

The Organization for Economic Cooperation and Development (OECD): OECD is a 35 member institution based in Paris, France. This international agency works with governments to understand what drives economic, social and environmental change. They measure productivity and global flows of trade and investment and analyze and compare data to predict future trends. They also set international standards on a wide range of topics, from agriculture and taxes to the safety of chemicals. The common thread of their work is a shared commitment to market economies backed by democratic institutions and focused on the wellbeing of all citizens. USDA, Rural Development holds a dedicated seat as a Vice-Chair and is a voting delegate to the OECD Working Party on Rural Development. This committee shapes and provides guidance to the OECD Rural Secretariat on rural development policy work at the OECD.

RD Employee Associations – National Association of Credit Specialists (NACS) and National Association of Support Personnel (NASP): NACS and NASP were both founded in 1973 under the former Farmers Home Administration. They were subsequently recognized as a consultative body and an association in 1974 and 1978, respectively. NACS and NASP members are all current or former RD employees who meet and work together to find ways to expand and improve the services provided to rural America.
Working hand-in-hand with RD senior leadership and agency managers, their accomplishments have been demonstrated in numerous process improvements and positive changes over the past 40 years.

Both associations have National Officers that serve as their Executive Board, Zone Representatives that speak for their zone (region), and committees that focus on specific programs and areas, and often provide input and participation in National Office taskforces and working groups. Both associations hold joint Zone meetings and an annual conference, which are attended by RD National Office representatives. NACS and NASP are funded through member dues and additional funds requested and provided by the RD Deputy Administrator for Operations and Management each year.

**RD Enterprise Governance Group Participation within USDA:** To support collaborative efforts within the USDA and manage overlapping interests and responsibilities, the Department has established standing councils with Department and Agency membership. RD leaders serve on these councils, which include, but are not limited to:

- CFO Council
- CIO Council
- Management Council
- Civil Rights Director Council
- Strategic Sourcing Council
- Homeland Security Council
- Cultural Transformation Taskforce
- Mission Area Human Resources Directors Council
- Labor-Management Forum

**RD Labor Organizations:** RD adheres to Departmental Regulation DR-4070-711, Labor Relations, to administer the Agency’s Labor Relations program. Labor relations essentially involves vesting management, employees, and unions with certain rights, as follows:

a. **Employee Rights** - To organize, bargain collectively, and participate through labor organizations in employment decisions affecting them.

b. **Management Rights** - To determine mission, budget, organization, number of employees, internal security practices; hire, assign work, direct, layoff, and retain employees, or to suspend, remove, reduce in grade or pay, or take other disciplinary action, and make determinations regarding contracting out.

c. **Union Rights** – Exclusively represent and act on behalf of its bargaining unit employees on matters pertaining to personnel policies, practices, and working conditions.

The Federal Labor Relations Authority (FLRA) certified the American Federation of State, County and Municipal Employees (AFSCME), Local 3870, as the exclusive representative for bargaining unit employees (BUEs) in Rural Housing Service, Rural Utilities Service, and Rural Business Service in Washington, D.C. Its purpose is to deal with Agency management regarding conditions of employment affecting employees, including
collective bargaining. The unit includes 267 BUEs, 64 of whom are dues paying members, occupying varying positions and grades. All are non-supervisory positions.

The American Federation of Government Employees (AFGE) Local 3354 was certified as the exclusive representative of the CSC’s Bargaining Unit Employees in 1997. The unit includes 485 BUEs, 278 of whom are dues paying members.

A list of the Agency’s bargaining unions and units is provided below:

Rental Policy Working Group: Multi-Family Housing is a member of the Rental Policy Working Group, which includes FHA, Treasury and OMB. The objective of the group is to better align rental housing policy across the federal government. Ongoing work is being done in the areas of physical property inspections, property financial reporting, Capital Needs Assessments, and energy conservation.

U.S. Department of Health and Human Services (HHS): RHS and HHS have a strong history of collaborating to help meet the health care needs of rural communities. RHS and the HHS Office of the National Coordinator for Health Information Technology and Health Resources and Services partner to leverage their resources to increase the availability of capital for health care facilities and health information technology, with the goal of improving the accessibility and quality of medical services in rural communities. This collaboration is further outlined in a Memorandum of Understanding between the two agencies.

U.S. Department of Housing and Urban Development (HUD): RHS and HUD work together to share information, coordinate programs and policies, leverage resources, and more. Partners within HUD include the Federal Housing Administration, Community Planning and Development, and Rural Housing and Economic Development. HUD also directly assists RHS with the following:

- Single Family Housing Income Limits: Single Family Housing programs are means-tested. Before assistance can be provided, the applicant’s income must not exceed prescribed thresholds. The thresholds (50%, 80% or 115% of area median income) are determined by the Secretary of HUD in cooperation with the Secretary of Agriculture. HUD determines the limits and provides the income data to USDA on an annual basis.
- FHA TOTAL Scorecard: Through an interagency agreement, HUD allows USDA to use the FHA TOTAL Scorecard tool as the decision component in the RD Guaranteed Underwriting System (GUS).

U.S. Environmental Protection Agency (EPA): RHS works closely with various offices within EPA, including the Office of Sustainable Communities, to provide and coordinate technical assistance on community planning and economic development in rural places, promote energy efficiency in federally-funded housing, and more.

U.S. Department of Justice, Civil Rights Division: The Civil Rights Division of the Department of Justice provides a wide array of legal services designed to protect the civil rights of all individuals. As such, RD is routinely engaged with this Division both to protect the rights of our employees as part of the Equal Employment Opportunity Act and to protect the rights of our customers related to topics like Environmental Justice, the Fair Housing Act, and the Equal Credit Opportunity Act.

U.S. Department of Treasury: Both directly and through the Department of Treasury’s Federal Financing Bank (FFB), RD utilizes various authorities to obtain, guarantee, and lend funds administered by the Department of Treasury to support RD’s substantial number of Federal Credit Programs. The FFB also holds several unique authorities that allow them to serve more directly as a lender with USDA RD as guarantor in certain Business and Utilities programs, and in some cases repurchase government backed securities at its discretion. The current RD Under Secretary is also a Federal Representative of the Community Development Advisory Board organized in Treasury’s Community Development Financial Institutions Fund.
United States Department of Agriculture  
2016 Presidential Transition  
Rural Development (RD)  

U.S. Small Business Administration (SBA): The SBA and RD collaborate across multiple programs and projects, most notably the SBA 7(a) loan program and the RD RBS Business & Industry Loan Program. At multiple levels of both organizations, leadership has recently noted other opportunities for SBA and RD to leverage programs such as Rural Business Development Grants with existing SBA loan program customers. Some of this work is also conducted at the state and local level through community development organizations.

U.S. Department of Veterans Affairs (VA): CSC has an ongoing pilot project with VA for the sale of RD’s Real Estate Owned properties for a portion of the states. Upon obtaining title to properties in designated states, RD transfers securitization, maintenance, and marketing of properties to VA. VA has a contract vehicle for the sale of their properties and includes the RD properties in the disposition of both sets of properties. The Economy Act agreement has been in place for one year, is set to expire in April of 2017, and will be extended in the near future. The cost of agreement services is $10 Million annually.

White House Rural Council (WHRC): The White House Rural Council was established by Presidential Executive Order in June 2011 with the goals of improving coordination among federal agencies and deepening partnerships with external stakeholders. The council is chaired by the Secretary of Agriculture with membership comprised of the heads of 25 federal agencies and supported by the U.S. Department of Agriculture. RD has worked closely with WHRC since its inception on multiple cross agency initiatives designed to leverage resources across the federal government to combat rural poverty, improve rural infrastructure, grow regional economies, and enhance the overall quality of life in rural America.
Stakeholder group overview

**American Bankers Association:** National trade association established over 140 years ago that represents financial institutions of various sizes and charters. The majority of member banks have less than $250 million in assets. RD meets with the organization each year at their annual conference.

**American Biogas Council:** The mission of the American Biogas Council is to create jobs, environmental sustainability and energy independence by growing the American biogas industry. Primary focus is on anaerobic digesters, food waste, manure, and distributed energy.

**American Council on Renewable Energy (ACORE):** ACORE is a national non-profit organization dedicated to advancing the renewable energy sector through market development, policy changes, and financial innovation. ACORE is a strong advocate for the Rural Energy for America Program.

**American Farm Bureau:** The American Farm Bureau Federation, commonly referred to as the Farm Bureau, is a nonprofit organization and describes itself as the largest general farm organization in the United States. Their primary communication has recently focused on the Rural Cooperative Development Grant program.

**Association of Communication Engineers (ACE):** The Telecommunications Program works with ACE members on issues related to our loan and grant programs. We participate in their annual Board meeting by presenting update and technical information to them. We also collaborate on an ACE/RUS School which is a three-day training program coordinated by ACE to facilitate new information and updates about our program. ACE educates their members on how to assist RUS grantees and borrowers in project implementation.

**Association of Cooperative Educators:** This association provides members a forum to highlight programs and practices that increase understanding, innovation and professionalism in cooperative education. Their primary communication has focused on the Rural Cooperative Development Grant program and Cooperative Agreements.

**Bank of America:** Bank of America is the lender of record to Fulcrum Sierra Biofuels. Bank of America and Fulcrum are preparing for a financial close of their Section 9003 loan in December of 2016 and to start construction of their Biorefinery. This will be the first Section 9003 loan closed since January, 2011.

**Bank of Montgomery:** Top lender under the B&I program for three of the last five years. Mr. Vansickle is also the Chairman of the NRLA Board. RD meets regularly with this stakeholder regarding various projects throughout the year.

**Biofuels Digest:** The Digest is the world's most widely distributed daily electronic biofuels (Bioeconomy) newsletter. The Digest also sponsors weekly webinars and biofuels-related conferences.

**Biomass Thermal Energy Council (BTEC):** BTEC is an association of biomass fuel producers, appliance manufacturers and distributors, supply chain companies and non-profit organizations that view biomass thermal energy as a renewable, responsible, clean and energy-efficient pathway to meeting America’s energy needs. BTEC engages in research, education,
and public advocacy for the fast growing biomass thermal energy industry. BTEC is a strong advocate for the Rural Energy for America Program.

**Biotechnology Innovation Organization (BIO):** BIO is the world's largest trade association representing biotechnology companies, academic institutions, state biotechnology centers and related organizations across the United States and in more than 30 other nations. BIO members are involved in the research and development of innovative healthcare, agricultural, industrial and environmental biotechnology products. BIO is a strong advocate of expanding the Biorefinery Assistance Program (9003) to provide more opportunities to biorefineries that produce renewable chemicals and other Biobased products.

**Cedar Rapids Bank and Trust:** Top lender under the B&I program for two of the last five years. RD meets regularly with this stakeholder regarding various projects throughout the year.

**Center for Budget & Policy Priorities:** Center for Budget & Policy Priorities is a nonpartisan research and policy institute that focuses on federal and state policies on poverty and inequality and fiscal responsibility.

**Citibank:** Citibank is the lender of record to Ensyn Georgia Biorefinery. Citibank and Ensyn are preparing for a financial close of their Section 9003 loan in early 2017 and to start construction of their Biorefinery.

**Coleman Publishing:** Publishes the Coleman Report as well as various small business loan underwriting guides. RD meets annually with this stakeholder at a lender roundtable they host each December.

**Cooperation Works!:** Cooperation Works! is a network of organizations promoting rural development through the formation of cooperatives in the United States. Their primary communication has recently focused on the Rural Cooperative Development Grant program.

**Corinne Young LLC:** is a strong advocate of expanding the Biorefinery Assistance Program (9003) in order to provide more opportunities to biorefineries that produce renewable chemicals and other Biobased products.

**Council for Affordable and Rural Housing (CARH):** CARH is a major stakeholder of Rural Housing Service. The Administrator and Deputy Administrator of Multi-Family Housing often engage with CARH by attending major meetings and inviting CARH to provide input on Multi-Family Housing Programs in writing and in person at RHS Headquarters. CARH’s national membership is comprised of large housing development organizations, multi-family housing property owners, and multi-family housing management companies. CARH has regional committees focused on local multi-family housing development and preservation.

**Credit Union National Association:** The Credit Union National Association (CUNA) is the largest national trade association in the United States serving America's credit unions. With its network of affiliated state credit union associations, CUNA serves America’s nearly 7,000 credit unions, which are owned by more than 100 million consumer members. Their primary communication has recently focused on the RBS lending programs and RD cooperative development activities.
Distributed Wind Energy Association (DWEA): The Distributed Wind Energy Association (DWEA) is a collaborative group comprised of manufacturers, distributors, project developers, dealers, installers, and advocates, whose primary mission is to promote and foster all aspects of the distributed wind energy industry. Distributed wind, commonly referred to as small and community wind, is the use of typically smaller wind turbines at homes, farms, businesses, and public facilities to offset all or a portion of on-site energy consumption. DWEA is a strong proponent of the REAP program.

Education Partners and Stakeholders: The CF Program remains engaged in strengthening investments in rural education through outreach activities with targeted participants such as Board of Regents, Independent Colleges and University Associations, State Departments of Education, Charter School Associations and private school associations.

Enterprise Community Partners: Leverages resources to create affordable housing in strong neighborhoods. Within Enterprise are entities that lend funds, finance development and manage and build affordable housing. To date, Enterprise has invested $18.6 billion, helped create nearly 340,000 homes.

Environmental Law and Policy Center: The Environmental Law & Policy Center is the Midwest’s leading public interest environmental legal advocacy and eco-business innovation organization, and among the nation’s leaders. ELPC led the charge to create the Farm Bill’s first-ever clean energy programs in 2002 focusing on the Rural Energy for America Program. ELPC is a strong advocate of the REAP program including energy efficiency and energy in agriculture.

Farm Credit System – CoBank: CoBank is a national cooperative bank serving vital industries across rural America. The bank provides loans, leases, export financing and other financial services to agribusinesses and rural power, water and communications providers in all 50 states. Their primary communication has recently focused on the RBS lending programs, the Rural Cooperative Development Program and RD cooperative development activities.

Federation of Southern Cooperatives: There are three major themes of the Federation's mission, work and accomplishments over the past forty years: to develop cooperatives and credit unions as a means for people to enhance the quality of their lives and improve their communities; to save, protect and expand the landholdings of Black family farmers in the South; and to develop, advocate, and support public policies to benefit membership of Black and other family farmers and low income rural communities. Their primary communication has recently focused on the Rural Cooperative Development Program, the Socially Disadvantaged Group Grant Program and Cooperative Agreements.

Greater Nevada Credit Union: B&I lender of the year for FY2016 and very active with energy programs. The lender is also a cooperative. RD meets regularly with this stakeholder regarding various projects throughout the year.

Holland & Knight: Works with energy and clean technology companies to develop and execute strategies for access to government grants, loans and contracts across multiple states and federal agencies, including the U.S. Department of Energy, U.S. Department of Agriculture (9003, Biorefinery Assistance Program) and U.S. Department of Defense.
Housing Assistance Council (HAC): HAC is an organization dedicated to affordable housing advocacy. HAC leadership engages with Rural Housing Service leadership on a regular basis. HAC leadership often speaks at the same conferences RHS leadership participates in, and helps RHS promote major program changes and improvements in their weekly email blasts and in their quarterly publication *Rural Voices Magazine*.

Independent Community Bankers of America: Primary national trade association for small US banks, representing more than 6,000 community banks of all sizes and charter types. RD meets with this organization each year at their annual conference in March.

Institutional Investors and Accounting Firms: RD has ongoing relationships with a wide variety of outside stakeholder groups, including accounting firms, institutional investors in the capital credit markets, and association groups, which help to market and leverage RD programs.

Institute of Real Estate Management (IREM): IREM is an international community of real estate managers dedicated to ethical business practices, maximizing the value of investment real estate, and promoting superior management through education and information sharing.

Kentucky Highlands Investment Corporation: Kentucky highlands is a venture capital and private equity firm that also assists businesses with developing financing packages and is one of the leading nonregulated lenders under the RBS B&I program. RD communicates regularly with this group at various events hosted by other stakeholders.

Kilpatrick, Townsend & Stockton, LLP: focuses on U.S. and international project development finance and private placement representation of renewable and conventional energy, clean technology, environmental and infrastructure clients including a focus on USDA 9003 program and DOE programs. Clients represent developers, lenders, EPCs, O&Ms, equipment providers, private equity, venture capital and infrastructure funds.

Live Oak Bank: Live Oak Bank is one of the top lenders in the REAP guaranteed loan program.

National Affordable Housing Management Association (NAHMA): NAHMA is an organization made up of hundreds of multi-family housing property managers and management companies. NAHMA membership and CARH membership often overlap. RHS interacts with NAHMA by attending and speaking at major events and conferences they host as well as inviting feedback about RHS Multi-Family Housing Programs.

National Association of Affordable Housing Lenders (NAAHL): NAAHL represents organizations committed to increasing private lending and investing in low- and moderate-income communities. Members consist of private sector lenders and investors in affordable housing and community economic development: banks, loan consortia, financial intermediaries, local and national nonprofits, and public agencies.

National Association of Counties (NACO): NACO is an organization focused on researching and publishing data broken down by counties. NACO’s data helps USDA Rural Development explain the differences in needs between urban and rural areas. Rural Housing Service invites NACO to major Rural Housing events and will refer parties interested in learning more about the needs of rural America to NACO to get an in-depth understanding.
National Association of Development Organizations: The National Association of Development Organizations provides advocacy, education, research, and training for the nation’s regional development organizations. The association and its members promote regional strategies, partnerships, and solutions to strengthen the economic competitiveness and quality of life across America’s local communities. Their primary communication has recently focused on Promise Zones, Farm Bill Section 6025, and regional strategic planning activities.

National Association of Realtors (NAR): NAR helps Rural Housing Service promote Single Family Home Loan Programs to their national network of realtors. Realtors are often the first person potential homeowners interact with when trying to find an affordable way to purchase a home which makes this a key audience expanding RHS program awareness. Rural Housing Service invites NAR to come to USDA headquarters at least once a year to network with RHS leadership and learn more about RHS programs.

National Association of State Departments of Agriculture (NASDA): NASDA grows and enhances agriculture by forging partnerships and creating consensus to achieve sound policy outcomes between state departments of agriculture, the federal government, and stakeholders. NASDA has strong interest in the REAP program.

National Association of State Energy Offices (NASEO): NASEO is the only national non-profit association for the governor-designated energy officials from each of the 56 states and territories. Formed by the states in 1986, NASEO facilitates peer learning among state energy officials, serves as a resource for and about state energy offices, and advocates the interests of the state energy offices to Congress and federal agencies like USDA RD.

National Council of State Housing Agencies (NCSHA): NCSHA is made up of a large network of State Housing Finance Association leadership. NCSHA is a one stop shop for RHS to promote and publicize major program changes, needs, and improvements to a national stakeholder audience. Every year RHS leadership has a speaking role at NCSHA’s annual conference.

National Bankers Association: National trade organization representing minority and women owned financial institutions. RD meets at least twice per year with this organization and also attends their annual convention in October.

National Biodiesel Board: The National Biodiesel Board (NBB) is the national trade association representing the biodiesel industry in the United States. NBB is a strong advocate of the REAP program and the Advanced Biofuels Payment Program (Section 9005).

National Center for Appropriate Technology (NCAT): NCAT runs the Appropriate Technology Transfer for Rural Areas [ATTRA] program that supports data, information, and technical assistance focused on sustainable agriculture for farmers. Their primary communication has recently focused on the beginning and veteran farmer activities and Cooperative Agreements.

National Cooperative Bank (NCB): Is a leading financial services company dedicated to serving cooperatives and socially responsible organizations nationwide. Their primary communication has recently focused on RBS lending programs and cooperative development activities.
National Cooperative Business Association (NCBA): NCBA is the oldest not-for-profit cooperative development and trade association in the United States, fostering cooperative and international economic and social development in the United States and abroad. Their primary communication has recently focused on the Rural Cooperative Development Program, the Socially Disadvantaged Group Grant Program and Cooperative Agreements.

National Council of Farmer Cooperatives (NCFC): NCFC works on a wide range of legislative and regulatory issues of interest to agricultural cooperatives and their farmer and rancher owners. This includes cooperative tax issues, antitrust issues, energy, international trade, conservation and many others. Their primary communication has recently focused on the Value Added Producer Grant Program and agricultural cooperative development activities.

National Farmers Union (NFU): NFU represents family farmers, fishers, and ranchers across the country with formally organized divisions in 33 states. The National Farmers Union believes that good opportunities in production agriculture are the foundation of strong farm and ranch families, and strong farm and ranch families are the basis for thriving rural communities. Their primary communication has recently focused on the Rural Cooperative Development Program and agricultural cooperative development activities.

National Housing Conference (NHC) – NHC is an independent organization that hosts a large event in Washington, D.C. every year. In 2016 NHC’s conference focused specifically on rural housing needs for the first time in 30 years which brought much needed attention to the subject. Regardless of the focus, USDA Rural Development has a speaking role in the conference every year.

National Housing Law Project (NHLP): NHLP is a nonprofit national housing and legal advocacy center that works with a nationwide network of low-income housing advocates to increase and preserve the supply of decent, affordable housing, improve existing housing conditions, including physical conditions and management practices, expand and enforce low-income tenants' and homeowners' rights, and, increase housing opportunities for racial and ethnic minorities.

National Housing Trust: The National Housing Trust is focused on bringing together federal, state and local policymakers, private owners and investors, affordable housing practitioners, and the public to support quality, healthy neighborhoods with a range of housing options so that families of all income levels have an opportunity to thrive.

National Low Income Housing Coalition: The National Low Income Housing Coalition focuses on policy advocacy, research, and intervention efforts designed to preserve existing federally assisted homes and housing resources, expand the supply of low income housing, and establish housing stability as the primary purpose of federal low income housing policy.

National Partnership of Farmworker and Rural Organizations (MAFO): MAFO is a farmworker advocacy organization. MAFO invites RHS leadership to participate in and speak at their major meetings to discuss RHS’ Farmworker Housing Programs. MAFO often provides written feedback about how RHS can improve farmworker housing programs.

National Rural Electric Cooperative Association (NRECA): NRECA is the national service organization for more than 900 nonprofit rural electric cooperatives and public power districts providing retail electric service to more than 42 million consumers in 47 states, and whose
United States Department of Agriculture
2016 Presidential Transition
Rural Development (RD)

retail sales account for approximately 12 percent of total electricity sales in the United States. Their primary communication has recently focused on the RBS lending programs and cooperative development activities. RUS meets often with NRECA representatives and attends annual, regional, and occasionally board meetings. RUS’ relationship with NRECA and rural electric cooperatives has helped improve RD’s regulations and requirements and increased awareness of additional RD funding opportunities in rural areas.

**NTCA–The Rural Broadband Association:** NTCA is the association representing nearly 900 independent, community-based telecommunications companies that are leading innovation in rural and small-town America. Their primary communication has recently focused on the RBS lending programs and cooperative development activities. The Electric Program has had a strong partnership with the National Rural Electric Cooperative Association, which was created during the establishment of the Rural Electrification Administration, to help deliver electric service to rural areas 80 years ago.

**National Rural Housing Coalition (NRHC):** NRHC is a major stakeholder of RHS’ Mutual Self-Help Housing programs. RHS interacts with NRHC by participating and speaking at their annual meetings and conferences, and during Homeownership Month (June) to publicize and promote self-help housing.

**National Rural Lenders Association (NRLA):** NRLA is a national association representing banks and financial institutions. Their mission is to advocate for USDA Guaranteed Lending programs to support rural economic development. RD meets twice per year with the organization and also attends their annual conference in October.

**National Rural Utilities Cooperative Finance Corporation (NRUCFC):** The Electric Program has had a strong partnership with the NRUCFC, which was incorporated in 1969 to supplement RUS lending to rural electric cooperatives. RUS provides loan guarantees to NRUCFC, which has over $20 billion in loans. This relationship with NRUCFC and rural electric cooperatives has strengthened funding opportunities for rural electric cooperative utilities.

**National Rural Water Association (NRWA):** RUS has a long partnership with NRWA, which is the nation’s largest water and wastewater utility organization, and actively participates in NRWA conferences and training. RD Water and Environmental Programs staff partner with NRWA to provide critical training and technical assistance to rural water and waste utilities. NRWA provides training and on-site technical assistance to rural utility operators through its Circuit Rider program, conducts energy audits of water and wastewater systems, and provides sustainability training to utility operators. In addition, NRWA conferences and in-service training provide a wealth of information and training on utility management, operations, and governance. In the past year, WEP has worked with NRWA to promote RD Apply, (a new online application system) and has provided RD Apply training at nearly all NRWA national and state conferences.

**National Sustainable Agriculture Coalition:** The National Sustainable Agriculture Coalition is an alliance of grassroots organizations that advocates for federal policy reform to advance the sustainability of agriculture, food systems, natural resources, and rural communities. Their primary communication has recently focused on the Value Added Producer Grant Programs, the Rural Energy for America Program and the B&I Guaranteed Loan Program.
NeighborWorks America: NeighborWorks is a national organization that works with communities in need to improve housing and community economic development. NeighborWorks funds often leverage USDA investment dollars across several Rural Housing Service programs.

Opportunity Finance Network: The Opportunity Finance Network (OFN) is made up of hundreds of Community Development Finance Institutions (CDFIs). USDA has many programs rural CDFI’s qualify for, and OFN can help USDA promote those programs to their membership. Every October OFN hosts an annual meeting in Washington D.C., where USDA often participates and occasionally has a speaking role.

Orion Advocates: Orion Advocates is a full service government relations consulting firm. Patrick Rita focuses on the paper and forest products industry including the wood pellet industry and wood pellet manufacturers interests' in the Advanced Biofuels Payment Program.

Renewable Fuels Association (RFA): RFA's mission is to drive expanded production and use of American-made renewable fuels and bio-products worldwide.

Rural Community Assistance Corporation (RCAC): RCAC plays a major technical and management assistance role in the RHS Mutual Self Help Program every year. RCAC also recently received several million dollar Community Facilities Re-lending loan to reinvest in rural community facilities nationwide.

Rural Community Assistance Partnership (RCAP): RD Water and Environmental Program staff partner with RCAP, a federally-funded national nonprofit comprised of six regional partners, to provide training and on-site technical assistance to WEP borrowers that are financially unsustainable to help them achieve sustainability. WEP also partners with RCAP on special initiatives such as the Colonias project, which will help the poorest Colonias communities obtain financing and technical assistance to support water and wastewater infrastructure.

Rural LISC: Rural LISC works with USDA Rural Development to promote advocacy for investment in rural America. Rural Housing Service is often invited to have a speaking role at major Rural LISC meetings and conferences.

Self Help Bank: Self Help Bank is one of the top lenders in the REAP guaranteed loan program.

Smart Growth America (SGA): USDA works with SGA to bring innovative solutions, funding ideas, and insights from years of community development experience to small towns experiencing slow or nonexistent growth. In 2016 USDA Rural Development worked with SGA through a cooperative agreement to host workshop events in rural towns. USDA and SGA also completed financial analysis of each one of these communities so the town leadership could create an informed community economic development plan.

The Mortgage Bankers Association of America (MBA) – MBA is an organization made up of thousands of mortgage lending professionals across the country. RHS invites MBA leadership to many events at headquarters to network with RHS leadership and major stakeholders. MBA’s major publication (News Link) has featured many Single Family Housing program improvements over the years, and the editors/reporters are always open to working with RHS to publicize major achievements and changes.
Western Telecom Association (WTA): The RUS Telecommunications Program works with WTA members on issues related to our loan and grant programs. We participate in their spring and fall meetings by holding office hours to interact with current and potential borrowers. We also meet with them and their members upon request. WTA advocates for rural Telephone and Cooperatives relative to access for federal resources and favorable policies for their members.

a. Recent engagements with stakeholder groups

The O&M Division’s Office of Outreach and Community Engagement (OCE) includes a team of four Outreach Coordinators in the National Office. The team regularly collaborates with a diverse range of partners and stakeholders to extend RD’s reach to populations in rural areas that have been historically underserved. These partners and stakeholders include organizations that serve minority groups, federally recognized tribes, faith based organizations, Veterans, and new and beginning farmers. Some issues include lack of information about RD’s programs, lack of credit being available through traditional lenders, lack of culturally appropriate program information, and lack of capacity to access RD’s programs. Additionally, the Outreach Team helps to facilitate economic development roundtables with rural communities, connect partners that assist with developing regional plans, host Community College seminars to assist community colleges with economic development, and provide training to staff to help deliver RD’s programs more effectively in underserved communities. A sample of activities is included below.

V. Top Issues

Hot Topics

The following are a collection of hot topics issues within the Rural Development mission. Some have received limited inquiries by Congress, but mostly are of high importance within USDA and for RD stakeholders.

RD Wide

Continued Labor Negotiations in Washington, DC and St. Louis, MO

Washington, DC – Working conditions are governed by a Collective Bargaining Agreement (CBA) between the Agency and the Union. The current CBA was enacted on July 16, 2010, and expired on July 15, 2015, but continues to be operational until completion of existing negotiations. Negotiations with the union began on August 17, 2015 and continue to date.

St. Louis, MO – The current CBA began on November 5, 2009, and November 24, 2012, and expired most recently on November 24, 2015, but continues to be operational until completion of existing negotiations. Negotiations with the union began in January 2015 and negotiations continue to date.

Contract Procurements – Provided below is a list of National Office contracts that are due to expire in the first quarter of FY 2017 (October 1 – December 31, 2016).

</table>
Federal Employee Viewpoint Survey – In 2012, OPM administered a census survey to all federal employees to measure employees’ perceptions of whether, and to what extent, conditions characterizing successful organizations are present in their agencies. Since then these surveys have continued annually as a random sampling of a percentage of employees based on the population of each organization within an agency or mission area. In 2012-2013, RD experienced a reduction of staff and budget that may account for the decrease in employee satisfaction and reduced positive scores in 2013. At the beginning of FY 2014, efforts were directed toward areas with low positive scores from the 2013 FEVS results through listening sessions, increased funding for training needs, IT equipment upgrades, and enhanced communication efforts. These efforts have been continuing through 2015 and 2016 and have made a positive impact on the scores.

Information Technology Investments – RD has made a considerable investment of time and resources to modernize and streamline the systems used to deliver and manage RD’s housing, business, and utilities loan and grant programs. These investments include new software platforms, enhanced cyber security measures, updated end-user and enterprise hardware, and the consolidation of recurrent cost items such as managed print services. The largest investment in those systems, otherwise known as the Comprehensive Loan Program (CLP), is focused on developing a more agile Enterprise wide IT platform for program delivery that condenses and optimizes systems, enables a more rapid rollout of new or changed business requirements, improves data transparency and reporting capability to support executive decision-making, and modernizes technologies, increasing the availability of support and longevity of future systems.

Information Technology, Comprehensive Loan Program – CLP’s more than $100 million Information Technology development effort originated in 2009 with initial funding from the American Recovery and Reinvestment Act. Because of the size and scope of this investment CLP is categorized as a “Major Investment” by the USDA subjecting the effort to continuous monitoring for compliance and progress milestones by OMB using the Federal IT Dashboard.

After the investment planning stage of this effort, progress was initially delayed due to Sequestration spending cuts. CLP fully resumed work in FY 2014 with $21 million in appropriated funds, followed by another break in development in June 2015, due to multiple vendor contract protests re: its major support services contract vehicle award. RD successfully awarded a new contract in July 2016 and is moving forward with the remaining $34 million necessary to complete CLP’s modernization mission. Thanks to a favorable cost variance and CIO rating, CLP is currently reported as Green by OMB.

Leasing Shared Services Model with RD, Farm Service Agency (FSA) and Natural Resources Conservation Service (NRCS) – In 2014, the USDA Office of Procurement and Property Management and the three Service Center Agencies – FSA, NRCS, and RD – initiated efforts to collectively resolve leasing challenges through the establishment of a USDA Center of Excellence (COE) for Leasing. In FY 2016 the USDA established the Lease Accountability and Strategy Division (LASD) to manage this new Leasing Shared Services Model. At the same time, RD established a Leasing Shared Services Lead position to serve as the primary conduit to the Department, RD Real Property Leasing Specialists, and the agencies. Realignment of lease portfolio workloads and other collaborative efforts needed to fully implement the Leasing Shared Services Model will continue into FY 2017.
Program Metrics (Section 6209) – Section 6209 of the 2014 Farm Bill requires several RD programs to incorporate program metrics in program evaluation. This section is of high importance to OMB. OBPA and the RD Special Projects Manager are currently leading the effort to determine how we might best consider program metrics for the affected RD programs. This remains a critical issue as we move forward on future regulatory actions.

Regionalization of Administrative and Program Support Services – Over the past five years, RD has examined its administrative and support functions to identify potential areas to more effectively leverage these services to achieve cost efficiencies, savings and/or avoidance. In Fiscal Years 2011-12, RD experienced severe staff losses of over 1,000 personnel primarily due to the Voluntary Early Retirement Authority (VERA) and Voluntary Separation Incentive Payment (VSIP) exercises brought on by significant budget reductions. Two particularly hard-hit areas in the RD Mission Area were Real Estate Appraisal Services and Human Resources Management. In 2012, the RD Office of the Under Secretary directed the State Directors to establish plans responding to the reductions in Program Support functions (i.e. Appraisals, Architecture, and Engineering) and Administrative functions (i.e. HR, Procurement, and Budget) on a regional basis. With a nationwide portfolio that grows by $1 billion per month, states needed to streamline administrative functions to support the Agency’s programmatic demands without sacrificing business needs and customer service.

The result was Regionalization, which generally left the existing field organizational structure in place and left the employees performing these functions assigned to their current state organizations while performing the work for the region. Regional Administrative Program Manager (RAPM) and Regional Program Support Manager (RPSM) Positions, one per region and functional area, were created to manage the workflow of the virtual, regional teams. The structure, processes, and procedures implemented have begun to institutionalize Regionalization as RD’s way of doing business and generated multiple benefits in standardization, maximizing resources, increased accountability and customer service.

Rural Infrastructure Opportunity Fund – In 2014, USDA launched a public-private partnership with Capitol Peak Asset Management and CoBank, a national cooperative bank and member of the Farm Credit System. Designed to facilitate the flow of capital to infrastructure projects in rural America, the U.S. Rural Infrastructure Opportunity Fund included a commitment by CoBank to use up to $10 billion of its balance sheet capacity to lend and co-lend in support of fund-related projects. Since the fund’s inception, CoBank has lent more than $3 billion to over 400 financings of projects in the power, water, communications and community facilities industries.

Rural Opportunity Investment initiative (ROI) – In 2014, USDA launched ROI to expand private sector investment in rural communities. Rural communities have significant infrastructure needs, limited access to credit, and an abundance of investment opportunities. ROI is working to identify incremental opportunities for investment in rural water, energy, and broadband projects, reduce barriers to investment, and connect projects with investors. RD has recently hired four new career staff members to augment the current team. These Financial Investment Specialists will work directly with the Rural Development mission area’s program agencies while also reporting directly to the office of the Under Secretary for Rural Development. Their mission will be to build and expand on the work of ROI by engaging with the private sector to recruit investment to rural America.
Small Business Program – RD’s 2016 Vendor Communication Plan, approved by the USDA Office of Small Disadvantaged Business Utilization (OSDBU), increased RD’s engagement with small businesses in FY 2016 by promoting effective communication between RD representatives and industry partners. Already, in FY 2016 RD obligated $15 million to Small Businesses, $4 million to Small Disadvantaged Businesses, $2 million to Women Owned Small Business, $609,000 to Service Disabled Veteran Owned Small Businesses and Veteran Owned Small Businesses, and $798,000 to Historically Underutilized Business Zone Small Businesses. The final FY 2016 totals will be updated by November 2016. In FY 2015, four small businesses received USDA OSDBU Small Business Awards, and RD’s Rural Housing Service Single Family Housing Program contracting staff were recipients of the Small Business Program Special Achievement Award.
United States Department of Agriculture
2016 Presidential Transition
Rural Development (RD)

Rural Housing Service

Community Facilities Portfolio Management – The CF direct loan program has seen a seven-fold increase from a program level of $300 million in FY 2011 to $2.2 billion in FY 2016. This surge in funding has resulted in the CF loan portfolio doubling in size since FY 2011 increasing the workload of managing this rapidly increasing portfolio.

Community Facilities Relending Program - In September 2016 RD announced that it was making funds available to community lending institutions that qualify as eligible lenders through a new program called the Community Facilities Relending Program. This program allows RD to make direct loans to community lending institutions, referred to as “re-lenders,” who then re-loan the funds to eligible applicants to acquire, maintain, build, or renovate essential community facilities. The Community Facilities Relending Program targets community lending institutions working in high poverty and persistent poverty areas. This change to the CF rule is intended to increase RD’s impact in high need areas and empower experienced community-based organizations. The community lenders that receive CF funds through this relending program will have to hold their borrowers to the same rules and regulations current Community Facilities Direct Loan program borrowers follow.

Community Facilities Technical Assistance and Training Grants – CF is implementing a Technical Assistance and Training (TAT) Grant Program. A final rule with comments was published in the Federal Register on January 14, 2016. However, subsequent delays did not allow adequate time for applicants to submit applications or for funds to be obligated prior to the end of FY16. RHS plans to implement this program in the first quarter of FY17 by publishing a Notice in the Federal Register. In the absence of delays, RHS should be able to make announcements within 5 months of the date the Notice is published.

RHS Centralization initiative / Foreclosures and Real Estate Owned (REO) properties – For the small percentage of cases where RD properties are taken into receivership, RD began the effort of consolidating the management of foreclosures and REO properties function at CSC. Historically, RHS has struggled to manage and dispose of these properties efficiently, however a new MOU with the Veteran’s Administration has centralized the process for a limited number of states.

RHS Comprehensive Property Assessment – In 2015, RHS conducted a physical assessment on a sample of properties from across the spectrum of MFH programs. The assessment concluded that there was a shortfall of approximately $5.6 billion in funds needed to modernize and maintain the utility of our portfolio over 20 years. The bulk of the $4.7 billion cost was to preserve the Section 515 portfolio.

RHS Efforts to Address the Rural Opioid Epidemic – In 2016, USDA announced steps RHS is taking to help fill the need for transitional housing for people in recovery from substance use disorders. These steps included guidance to field staff that: encourages the use of Community Facilities financing for transitional housing projects; makes vacant USDA-owned properties in 22 states available for lease or sale to non-profits to convert into transitional housing; and outlines a pilot in four states (Missouri, Nevada, New Hampshire, and Vermont) to make vacant multi-family rental housing units available to tenants participating in drug court programs. In 2014 and 2015, RHS also provided more than $213 million to 80 projects in 34 States to develop or improve mental health facilities in rural areas.
RHS Loss Claims Project – The Customer Service Center approves all payments for losses experienced by partner mortgage servicers participating in the Guaranteed Rural Housing program. Due to program growth (over 400% since 2007), insufficient automation, limited staff, and fiscal resource limitations, the process of paying loss claims needed a complete analysis and overhaul. This project is designed to establish efficient, cost-effective, automated solutions to pay loss claims timely thereby minimizing costs of interest, penalties, and administration resulting from delays in loss claim payments. The project is fully funded and on track for completion by the end of FY 2017.

RHS Section 502 Direct Funding – In the last two Fiscal Years Borrower demand for Section 502 Direct loans has historically exceeded the program’s funding capacity, inviting questions from stakeholders about the sufficiency of the program’s funding level. In years prior to FY 2012, the Section 502 Direct program level often fluctuated between $1.1 billion and $1.2 billion, and the program fully used both its low and very low income funding. For example, obligations in FY 2010 exceeded the total program level ($2.1 billion), despite being more than double current program authority. However, while the FY 2010 obligation level is a better proxy for demand than current program levels, that obligation level cannot be supported by current staffing resources.

RHS Single Family Guarantee / User Fee and Delegated Authority – New authority granted by the Housing Opportunity through the Modernization Act of 2016 authorized RHS to collect a user fee of no more than $50 from guaranteed lenders. This new funding source is estimated to provide approximately $4 million annually for use in funding system enhancements to housing loan servicing systems. However, funding necessary for implementation of the User Fee and Delegated Authority regulation has not yet been identified. Initial implementation is planned for FY 2019 and 2020, with full implementation in 2021. Attention to securing the resources necessary for this implementation may be required.
Advanced Biofuel Producer Payments (Section 9005) – Producers of advanced biofuels are eligible for payments based on the amount of advanced biofuels they produce. Last year Senator Collins and the Biomass Thermal Energy Council, expressed concerns to Secretary Vilsack over the 85 percent discount on BTU value for solid advanced biofuels produced from forest biomass and the 5 percent cap on payments to producers of such fuels. The Secretary indicated that RBS will re-evaluate these factors. RBS has completed this evaluation and is in the process of developing a work plan and revised regulation addressing these concerns. RBS expects to revise the regulation to be effective later in FY 2017.

Business and Industry Guaranteed Loans & First Farmer’s Bancorp – First Farmer’s Bancorp, LLC, dba First Farmers Financial, headquartered in Orlando, Florida, was approved as an eligible non-traditional lender for the Business and Industry Guaranteed Loan (B&I) Program in seven states. Nikesh Patel, the founder and CEO of First Farmers Financial, was arrested by federal authorities on fraud charges, accused of fabricating loan-guarantee forms by forging the signatures of government officials and inventing borrowers. First Farmers Financial is alleged to have sold into the secondary market approximately 25 B&I loans that were never received or approved by the Agency. Nikesh Patel has plead not guilty to the charges. The Agency has determined that there were only 4 valid loans totaling $22.9 million made to First Farmer’s Financial (three loans in Georgia and one loan in Florida). Two of these loans have now been sold to an eligible lender, Northeast Bank, and the Agency is recommending a promissory note sale of Lancaster Energy Partners, LLC.

On August 31, 2016, a complaint was filed against the United States in Florida alleging a FTCA claim based on allegations that the USDA was negligent in certifying First Farmers as a non-traditional lender under the B&I loan guarantee program. The complaint was filed by a number of individual banks and investments funds.

In media reports, there has been some confusion about the significance that First Farmers Financial, LLC was an approved lender in the B&I Program. Approved lender status merely authorizes the lender to request that USDA guarantee a loan under the program. Approved lenders do not have authority to guarantee private loans on behalf of USDA. Instead, USDA reviews each and every loan submitted for the program to determine if the loan meets the requirements of the B&I Program before USDA guarantees the loan.

Business and Industry Guaranteed Loans, Guarantee Fee Rate – Since authorization was received in the FY 2012 Appropriations Act, this program has been charging an initial guarantee fee equal to 3% of the guaranteed amount of the loan, primarily to cover potential portfolio delinquencies. However, from 2012 to present the program has made significant strides in reducing delinquencies and improving portfolio performance.

A significant number of stakeholders and potential clients have recommended that the Agency return its guarantee fee to 2%, indicating that such a change would make the program much more competitive in the marketplace. Given the circumstances, RBS may need to discuss rate changes in the future.
Local and Regional Food Systems – RBS provides substantial funding for local and regional food projects and actively promotes local and regional food investments as important tools for rural economic development. These RBS efforts contribute to the Know Your Farmer, Know Your Food initiative, which coordinates local and regional food systems efforts across the Department. The following items are examples of the activities taking place at RBS:

- In FY 2015, RBS funded 311 local food project grants through RBDG, RCDG, SDGG, ARC, VAPG, B&I, REAP, and RMAP, totaling $91.6 million.

- In partnership with Wholesome Wave, RBS developed an AgLearn online training course for regional food system funders and investors on how to assess and finance local and regional food enterprises. With support from RBS staff, the training will be utilized by RD field staff and made available to the public.

- Creating new markets by linking rural producers to urban markets where local food demand is high. USDA’s Food LINC initiative (launched in March 2016) is leveraging over $2.4 million in both USDA and philanthropic funds and by working directly with its local Value Chain Coordinator and Community Development Financial Institution (CDFI), Communities Unlimited, Inc. (Fayetteville, AR), RBS is connecting small scale and minority farmers in the Arkansas-Mississippi Delta to consumers in Memphis, Tennessee, with the goals of increasing revenue to local producers, creating jobs along the value chain, and increasing access to healthy food.

- RBS developed a multi-volume technical report series called “Running a Food Hub.” The report series offers food hubs valuable information on how to plan for success, address challenges, and achieve viability.

- Staff have participated and presented in over 30 food systems conferences, webinars, and workshops – directly reaching well over 3,000 stakeholders with information and resources for developing local and regional food systems.

- RBS has supported the development of the organic sector through about $50 million in loans and Value Added Producer Grant funding, supporting producers entering new markets and diversifying production.

New and Beginning Farmers and Ranchers – USDA recognizes that the rapid aging of the American farmer is an emerging challenge. The average age of the American farmer now exceeds 58 years, and 2014 data shows that almost 10% of farmland in the continental United States will change hands in the next five years. This recognition has evolved into a robust, transparent, tech-based strategy to recruit the farmers of tomorrow. RBS has played a central role in these efforts by:

- Launching the first comprehensive, interactive online tool for new and beginning farmers, www.usda.gov/newfarmers.

- Supporting new and beginning farmers through its Value-Added Producer Grants and the Rural Energy for America Program, RBS is helping family farmers innovate and strengthen their operations. In doing so, these programs help family farmers stay on their farms.
Place-Based Initiatives – RBS is the primary lead on two cross agency place based initiatives; Rural and Tribal Promise Zones and Stronger Economies Together.

Rural and Tribal Promise Zones: Promise Zones is a White House initiative announced by President Obama in his 2013 State of the Union. Through three rounds of designations, we have a total of four rural and four tribal Promise Zones. The four rural Promise Zones are Southeastern Kentucky (since April 2014), South Carolina Low Country (since April 2015), Southwest Florida (since April 2016) and Eastern Puerto Rico (since April 2016). The four tribal Promise Zones are Choctaw Nation of Oklahoma (since April 2014), Pine Ridge Indian Reservation in South Dakota (since April 2015), Spokane Tribe in Washington State (since April 2016) and Pride of the Great Plains in North Dakota (comprising Turtle Mountain Band of Chippewa Indians and Spirit Lake Nation, since April 2016). RBS’s Community Economic Development (CED) team directly supports the rural and tribal Promise Zones economic activities.

Stronger Economies Together (SET): The SET Initiative is a cooperative agreement award with the Southern Rural Development Center (SRDC) which provides training and technical assistance to identified rural communities to assist with developing their regional economic development plan. Initiated in 2010, SRDC serves as a conduit for allocating training and technical assistance resources to appropriate land-grant co-op extension (including partnership with 1890 universities) to target SET Regions that are selected competitively. The plan increases the ability of isolated communities such as those in the Colonias, Appalachia, Delta, and Tribal regions to engage, identify their challenges and opportunities, capitalize on their regional assets, and increase their readiness to compete for Rural Development and other federal funds. Since completion of the first training in 2012, over $588 million in investments were received by SET regions, of which, 48% were from Rural Development.

Rural Business Investment Program (RBIP) – Existing and prospective Rural Business Investment Companies have recommended that RBS amend certain regulatory requirements. RBS is exploring updated program regulations to: Enable a Rural Business Investment Company (RBIC) to invest in an enterprise that is primarily located in a rural community, but may have a headquarters in a non-rural area; make the small business test equal to at least 25% of all investments, rather than the current two-pronged test which requires 50% investments in smaller enterprises, and 50% of those in small businesses; and change testing schedules for rural/metro and size of portfolio companies investments over a grace period of two to five years, as opposed to the end of each fiscal year.

In 2014, USDA licensed a $154.5 million Rural Business Investment Company (RBIC) that has been making private equity investments in agriculture-related businesses including bio-manufacturing and advanced farming technologies. This RBIC, managed by Advantage Capital Agribusiness Partners, has made 12 investments to-date, totaling $41 million.

Since 2015, an additional four funds have been conditionally licensed and two more are currently under RBS and Farm Credit Administration review. These conditional RBICs have a combined goal of raising approximately $335 million to invest into rural businesses. It is anticipated that Innova and Open Prairie will close in December 2016, with Meritus Kirchner and McLarty to close in 2017.
Value-Added Producer Grant Program (VAPG) – The VAPG, is a grant program within RBS. While effective in delivering grants that help agriculture producers in rural America expand their opportunities in the marketplace, stakeholders hold conflicting interests as they relate to the program. The National Sustainable Agriculture Coalition is actively pursuing both regulatory and legislative modifications to the VAPG program that would provide additional priority to specific categories like beginning farmers and ranchers and socially disadvantaged farmers and ranchers. The National Council of Farmer Cooperatives appears comfortable with the present priorities, but opposes modifications that will impact priority for agricultural cooperatives.

Modifying the VAPG scoring priorities to significantly enhance any one of the priority categories will likely reduce applications funded for larger cooperatives or other priority areas. RBS feels the present distribution of awards adequately meets the needs in a fair manner.
Rural Utilities Service

Rural Energy Savings Program (RESP) – Authorized in the 2014 Farm Bill, RESP was established to help rural families and small businesses achieve cost savings by providing loans to qualified consumers to implement durable cost-effective energy efficiency measures. RESP authorizes the RUS Administrator to make loans to utilities, and similar entities, that agree to use the loan funds to relend those funds to their consumers for the purpose of implementing energy efficiency measures. RESP also requires RUS to establish a plan for measurement and verification training, and technical assistance of the program. A NOSA was published on June 21, 2016 announcing the availability of $52 million in loans for FY16.

Rural Water Fund – USDA is working to leverage its existing Water and Environmental Programs portfolio which provides loans, grants and loan guarantees for drinking water, sanitary sewer, solid waste and storm drainage facilities in rural areas and cities and towns of 10,000 people or less. The policy goal of this pilot is to bring institutional investors into the market for rural water infrastructure lending by selling a participation interest in a bundle of USDA’s existing water loan assets to a private counterparty. In exchange for the sale, the counterparty would make a forward commitment for a certain amount of rural water lending within a specified period of time. The counterparty would target rural communities with populations greater than 10,000 people because they are not eligible for USDA’s grants and low interest rate loans for water infrastructure. The sales plan is expected to be sent to OMB before the end of 2016.
Timeline

January

CSC Support Services contract with Task Source for $3.3 Million expires January 17, 2017

CF Technical Assistance and Training Grants: target implementation in early FY17 - CF Technical Assistance and Training Grant Program implementation. A Final Rule with Comments was published in the Federal Register on January 14, 2016. However, subsequent delays did not allow adequate time for applicants to prepare and submit applications or for funds to be obligated prior to the end of FY16. The Agency plans to implement this program in the first quarter of FY17 by publishing a Notice in the Federal Register. In the absence of unplanned delays, the Agency should be able to make announcements within 5 months of the date the Notice is published.

March

RD Instruction 3570-A, Community Facilities Direct Loan and Grant Regulation: anticipate needing clearance of interim/final rule in the second half of FY17 - Consolidating the CF Direct Loan and Grant Regulations into one single regulation. Also included in this consolidation will be the inclusion of broadband projects as an eligible purpose for the CF Program.

RD Instruction 3570-E, Servicing Community Facilities Loans and Grants: anticipate needing clearance of interim/final rule in the second half of FY17 - The CF Program currently uses 7 different regulations to service CF loans and grants, this would consolidate the applicable parts of all 7 regulations into one servicing regulation.

The extension of the CSC Real Estate Tax Services contract with Corelogic for $1.3 Million annually expires March 2017

The CSC Property Preservation contract with Corelogic/MCS for $21 Million annually expires March 2017

The CSC Skip Trace Contract for finding address and occupant information with Experian for $35,000 expires March 2017

June

Single Family Guarantee – Regulation 7 CFR 3555: User Fee and Delegated Authority – Final Rule June 2017 - The Housing Opportunity through Modernization Act of 2016 authorizes the Secretary to (1) allow preferred lenders to issue loan guarantees without involving agency staff, and (2) require users of the Guaranteed Underwriting System to pay a user fee that will support the enhancement and maintenance costs of GUS and supporting systems. The fee will enable the agency to effectively administer the program and better manage portfolio risk. RHS is in the process of revising the regulation to add new sections pertaining to (1) the delegation of guarantee issuance authority (“delegated authority”), and 2) the remittance of the GUS user fees.

RHS needs approximately $1 million upfront for system enhancements to implement the User Fee and Delegated Authority regulation. The source of these funds have not yet been identified. This cost would be spread over a two-year period for system development and user
acceptance testing (FY 2017 and FY 2018). An additional $450,000 would be necessary to ensure minor changes to the system can be made following the initial implementation (FY 2019, 2020, and 2021), as is customary with any major system enhancement. Full implementation would occur in FY 2021.

Single Family Direct – Regulation 7 CFR 3550: Limitation on Seller Concessions and Repayment Ratios – Final Rule by August 2017 - This rule will also revise the way in which the Agency calculates the repayment ratios for applicants by including homeowner association dues and other recurring, property-related assessments in the calculations.

WHO WE ARE: OUR MISSION AREA

DM's mission is to provide management leadership to ensure that USDA's administrative programs, policies, advice, and counsel meet the needs of USDA program organizations, consistent with laws and mandates. DM is also tasked to provide safe and efficient facilities and services to customers.

WHO WE ARE: OUR WORKFORCE

- OES 24 employees
- OHRM 130 employees
- OHSEC 65 employees
- OPPM 115 employees
- OSDBU 8 employees
- OCIO 998 employees
- OO 198 employees
- Office of the Assistant Secretary 9 employees

WHO WE SERVE: OUR CONSTITUENTS

DM is the central administrative management organization, serving all USDA employees.

KEY UPCOMING DECISIONS

South Building and GWCC Modernization

To address the many life safety and accessibility deficiencies as well as the failing operational systems, USDA has developed a strategy to modernize the South Building and George Washington Carver Center.

The project has an estimated cost of $776.15 million in today's dollars and would take five years to complete.

BUDGET HIGHLIGHTS FY 2016

- Overall Budget Authority $736,145
- 18% Direct
- 0% Mandatory
- 70% Working Capital Fund
- 12% Reimbursements
I. Organizational Overview

Organizational Chart

Departmental Management is a subcabinet level office led by the Assistant Secretary for Administration. The Office of the Assistant Secretary for Administration (OASA) is the immediate office for Departmental Management. OASA consists of the Assistant Secretary for Administration, two Deputy Assistant Secretaries for Administration, the OASA Chief of Staff, and the Senior Advisor to the Assistant Secretary for Administration as well as administrative support staff. Of the four leadership positions within OASA, three are political positions and one is career. The Deputy Assistant Secretary for Administration and administrative support staff are career positions for OASA.
Biographies for career and political staff in key leadership positions

Political:

**Dr. Gregory L. Parham**
Assistant Secretary for Administration
202-720-3291, Gregory.Parham@osec.usda.gov

Dr. Gregory L. Parham was appointed Assistant Secretary of Agriculture for Administration in June 2013. Prior to this appointment, he was designated Acting Assistant Secretary, and served as the Administrator of the U.S. Department of Agriculture’s (USDA) Animal and Plant Health Inspection Service (APHIS).

Previously, Dr. Parham served as APHIS’ Associate Administrator and as the Deputy Administrator for Marketing and Regulatory Programs - Business Services, after joining APHIS as the agency Chief Information Officer. He began his Federal career as an Epidemic Intelligence Service Officer with the Public Health Service at the Centers for Disease Control. He joined USDA in 1982, and has worked for several USDA agencies including: the Food Safety and Inspection Service, the Extension Service, the Cooperative State Research, Education and Extension Service, and the Office of the Chief Information Officer.

Dr. Parham holds a master’s degree from the Johns Hopkins University in administrative science and doctorate and bachelor degrees from The Ohio State University in veterinary medicine and microbiology.

**Yeshimebet Abebe**
Deputy Assistant Secretary for Administration
202-720-3291, Yeshimebet.Abebe@osec.usda.gov

Yeshimebet Abebe serves as the Deputy Assistant Secretary in the Office of the Assistant Secretary for Administration effective May 16, 2016. Prior to her current role, she served as the Chief-of-Staff for Research, Education and Economics. She has also served as an Advisor to the Secretary for Special Projects, Special Assistant in the Office of the Under Secretary for Rural Development, and as a Special Assistant in the Rural Utilities Service.

Prior to her USDA service, Ms. Abebe practiced law and worked on the Barack Obama presidential campaign. Ms. Abebe holds a Bachelor of Science in Urban and Regional Studies from Cornell University, a Masters in International Law and the Settlement of Disputes from the United Nations Mandated University for Peace, and a Juris Doctor from the University Of Miami School Of Law.
Henry (Hank) Bennett, Director  
Office of Small and Disadvantaged Business Utilization  
202-720-7117, Henry.Bennett@dm.usda.gov  

Hank Bennett was appointed as the U.S. Department of the Agriculture’s Director of the Office of Small and Disadvantaged Business Utilization (OSDBU) in May of 2016.

As Director of OSDBU, Mr. Bennett is responsible for ensuring that the Department’s purchasing agencies engage small businesses - the "engines that drive the Nation’s economy" - so that USDA continues to be a leader, and one of the Federal government’s top performing departments in utilizing small and disadvantaged businesses.

Mr. Bennett has extensive experience working with a diverse range of small businesses. Prior to joining the USDA, Mr. Bennett was part of a team that started a community bank in Tulsa, Oklahoma. Among other roles, he served as the bank's Board Secretary, Community Reinvestment Act Officer, and a Senior Lender. Mr. Bennett developed and managed a large loan portfolio of which more than half of the loans were to women, minority, and veteran owned small businesses, non-profit organizations, and churches.

Mr. Bennett has also served at the Democratic National Committee, worked in several roles for Mayor Alvin Brown of Jacksonville, Florida, and served for several other Democratic legislators and organizations.

Janet Nuzum  
Director of Asian American and Pacific Islander Affairs  
202-260-8259, Janet.Nuzum@osec.usda.gov  

Janet Nuzum currently serves as USDA’s Senior Advisor and Director of Asian American and Pacific Islander (AAPI) Affairs, a position she assumed in January 2016. In this role, Ms. Nuzum leads USDA’s engagement with Asian Americans and Pacific Islanders across the United States, and represents USDA on the White House Initiative on AAPIs.

Prior to her current position, Ms. Nuzum served as Associate Administrator of the Foreign Agricultural Service (FAS), overseeing the agency’s work on international agricultural trade. Ms. Nuzum’s career before USDA spanned three decades of public policy work, much of which was in the field of international trade policy and law. She has served as a Senate-confirmed Presidential appointee as Commissioner and Vice Chairman of the US International Trade Commission. Ms. Nuzum also worked on Capitol Hill in the U.S. House of Representatives on the committee staff of the House Ways and Means Committee and on the personal staff for two Members of Congress.

In addition to a Law degree from Georgetown University Law Center and a Bachelor’s degree in economics and government from Smith College, Ms. Nuzum has a graduate certificate in landscape design from The George Washington University and an executive education certificate
from the Harvard University Kennedy School of Government. Ms. Nuzum studied Japanese as an undergraduate student at Yale University and in Kyoto, Japan at Doshisha University.

Elisabeth Reiter
Senior Advisor to the Assistant Secretary for Administration
202-431-1034, Liz.Reiter@osec.usda.gov

Elisabeth Reiter currently serves as Senior Advisor to the Assistant Secretary for Administration. In this role, Ms. Reiter directs Secretary Vilsack's Signature Process Improvement initiative, working with each agency and staff office to successfully improve customer-facing business processes using Process Improvement tools. Previously, she served as Chief of Staff to the Under Secretary for Farm and Foreign Agricultural Services. Prior to government service, Reiter was Deputy Director of Advance for the Obama for America campaign in 2007-2008. Ms. Reiter worked previously on the successful campaigns of Virginia Governor Tim Kaine (D) in 2005 and Senator Jim Webb (D-VA) in 2006. Ms. Reiter also worked on Senator John Kerry's (D-MA) 2004 presidential bid. Reiter is a graduate of the University of Mary Washington in Fredericksburg, Virginia.

Career:

Malcom Shorter
Deputy Assistant Secretary for Administration
202-720-3291, Malcom.Shorter@osec.usda.gov

Malcom A. Shorter has served as the Deputy Assistant Secretary for Administration since June 2013. He is an accomplished administrative and financial professional with combined expertise in government relations and operational management. Mr. Shorter retired from the United States Army in September 2003 after a distinguished military career of more than 20 years. From January 2007 until February 2013, he served as the Democratic Staff Director for the House Committee on Veterans’ Affairs. He also served as the Director, Office of Budget, Finance and Administration, Office of the Special Trustee for American Indians, United States Department of the Interior (DOI) and as the Assistant Director for Programming and Budget, Office of Counternarcotics, United States Department of Homeland Security (DHS).

Mr. Shorter graduated from Rutgers University in 1981 with a Bachelor of Science Degree in Economics. He also holds a Master of Science Degree in Administration from Central Michigan University. His military education includes the Infantry Officer Career Course, the United States Army Command and General Staff College, and the Brookings Institute Congressional Fellowship Program.
Roberta Jeanquart
Director, Office of Human Resources Management and Chief Human Capital Officer
202-690-2994, bobbi.jeanquart@dm.usda.gov

Roberta “Bobbi” Jeanquart serves as Director of the Office of Human Resources Management and the Chief Human Capital Officer for USDA. She provides vision and leadership to USDA-wide human resources programs, including human resources policy, employee and labor relations, recruitment and diversity, and workforce and succession planning. In addition, she serves as the USDA representative to the Chief Human Capital Officers Council. Ms. Jeanquart was also named by the Deputy Secretary to serve as USDA’s Senior Accountable Official for implementation of the Executive Order on Improving the Senior Executive Service and also was appointed to serve on the People and Culture Workgroup that helped develop the President’s Management Agency. Ms. Jeanquart has served in a number of leadership positions since joining USDA in 2009, including Deputy Assistant Secretary for Congressional Relations and Chief of Staff for Departmental Management. She is a graduate of USDA’s Senior Executive Service Candidate Development Program. Ms. Jeanquart has 11 years’ experience working on Capitol Hill serving as an associate staff to the House Agriculture Appropriations Subcommittee. She also served for 10 years as the executive director of the National Association of Resource Conservation and Development Councils a national non-profit organization. Ms. Jeanquart is a native of Wisconsin, and holds a bachelor of arts in political science from Marquette University. Ms Jeanquart completed her graduate studies in comparative politics at the University of Toledo.

Jonathan Alboum
Chief Information Officer
202-720-8833, Jonathan.Alboum@ocio.usda.gov

Jonathan Alboum has served as the U.S. Department of Agriculture’s Chief Information Officer (CIO) since June 2015. In this role, Alboum works with stakeholders across USDA’s 17 component agencies and throughout government to formulate Information Technology (IT) strategies, and to develop policies that support IT budget formulation and execution, portfolio management, governance, IT operations, and information security.

Prior to his appointment as CIO, Mr. Alboum held several leadership positions at the USDA and the General Services Administration (GSA). He most recently served as the Program Executive for USDA's Modernize and Innovate the Delivery of Agriculture Services initiative, where he provided executive leadership for a $400+ million SAP implementation that gives farmers and ranchers the flexibility to update customer information at any Farm Service Administration (FSA) county office, enables them to more efficiently manage multiple customer records, reduces improper payments, and provides program eligibility information through a single view. Before that, Mr. Alboum served at GSA as the Associate CIO for Enterprise Governance and Planning. Mr. Alboum began his Federal government career at the USDA Food and Nutrition Service (FNS), where he served as the Deputy CIO and the CIO.
Mr. Alboum earned a MS in the Management of Information Technology from the University of Virginia's McIntire School of Commerce and a BS in Systems Engineering from the University of Virginia's School of Engineering and Applied Science.

Jean Daniel, Director  
Office of the Executive Secretariat  
202-720-6630, Jean.Daniel@osec.usda.gov

Office of the Executive Secretariat Director Jean Daniel has over 17 years of leadership and management experience in USDA. During her tenure with the Department, she served as Public Affairs Director for the Food and Nutrition Service, Special Assistant to the Food, Nutrition, and Consumer Services Under Secretary, Senior Advisor to the Deputy Administrator for Management, Director of Change Management and Organizational Engagement, and Acting Deputy Administrator for Management.

Todd H. Repass, Jr.  
Director, Office of Homeland Security and Emergency Coordination  
202-720-0272, Todd.Repass@dm.usda.gov

Todd H. Repass, Jr. serves as the Director of USDA's Office of Homeland Security and Emergency Coordination. He has served as the Director since January 2010. Mr. Repass is responsible for leading Department-wide efforts and initiatives for USDA physical security, radiation safety, emergency programs, personnel and document security, preparedness programs and policies, and Government continuity operations. In this role, Mr. Repass serves as the USDA Security Officer and Intelligence Officer.

Previously, Mr. Repass has held multiple program management, acquisition, environmental, and logistical positions throughout his twenty-five year career. Mr. Repass also worked for the U.S. Department of Defense.

Mr. Repass earned his degree in Business/Accounting from Saint Andrews College in 1989. He is married with four children.

Duane Williams  
Director of Operations  
202-720-3937, Duane.williams1@dm.usda.gov

Duane Williams currently serves as the Director for the Office of Operations in Departmental Management. Prior to accepting that position, Duane served as the Deputy Director for the Office of Operations. Prior to his appointment to the Office of Operations, he served as the Deputy Director of Human Resources for Rural Development Agency. Mr. Williams started his career with the Agricultural Marketing Service (AMS) 29 years ago as a Marketing Specialist in the Perishable Agricultural Commodities Act Branch, a regulatory program in AMS. During his time in AMS, he held multiple leadership and management positions.
Mr. Williams is a 1986 graduate of North Carolina Agricultural and Technical State University, where he earned his Bachelor of Science degree in Economics with a concentration in Transportation and Logistics. He is also a graduate of USDA’s Senior Executive Service Candidate Development Program, administered through American University’s Key Leadership Program.

Lisa M. Wilusz, Director  
Office of Procurement and Property Management  
202-720-9448, Lisa.Wilusz@dm.usda.gov

Lisa M. Wilusz serves as Senior Procurement Executive and Director for U.S. Department of Agriculture’s Office of Procurement and Property Management. Ms. Wilusz has over 20 years’ experience with the Federal government. She began her Federal career in 1995 as a contract specialist with USDA’s Food and Nutrition Service Agency, and worked as a procurement analyst supporting U.S. Department of Transportation’s Research and Special Programs Administration. Additionally, Ms. Wilusz has extensive experience managing enterprise level IT projects.

As a Presidential appointee, Ms. Wilusz serves as Vice Chair for the Federal AbilityOne Commission. The AbilityOne Commission oversees a $3 billion procurement program that employs more than 45,000 disabled Americans who supply services and goods to support Federal programs. Finally, Ms. Wilusz oversees the Federal BioPreferred Program, which encourages the development and use of biobased products in Federal and private sectors.

Overview of Agency Programs and Operations

Departmental Management (DM) is USDA’s central administrative management organization. DM provides support to policy officials of the Department, and overall direction and coordination for the administrative programs and services of USDA. In addition, Departmental Management manages the Headquarters Complex and provides direct customer service to Washington, D.C. employees.

DM’s mission is to provide management leadership by ensuring that USDA administrative programs, policies, advice, and counsel meet the needs of USDA program organizations, while complying with laws and mandates. DM is also tasked to provide safe and efficient facilities and services to customers.

DM includes seven offices led by Office Directors. The Office Directors report directly to the Assistant Secretary for Administration.

Office of the Chief Information Officer

The Office of the Chief Information Officer (OCIO) is charged with improving management, capital investment, and oversight of the government’s IT resources.
OCIO conducts planning, education, management, analysis, and governance of USDA’s annual IT investment portfolio, which in FY2016 was comprised of 32 major IT investments and 172 non-major IT investments. OCIO partners with USDA component agencies to create business relationships that support effective IT portfolio management processes and a strategic decision-making environment.

**Cyber Policy and Oversight**
The Office of Cyber Policy and Oversight provides leadership on IT security policy development, security oversight, risk management, information security training and awareness, and information security intern recruiting.

**Enterprise Network Services**
Enterprise Network Services provides oversight in the planning, operation, and management of USDA telecommunications network.

**National Information Technology Center**
The National Information Technology Center provides innovative, cost effective, and secure information technology solutions to government agencies.

**International Technology Services**
The International Technology Services program provides comprehensive, fee-for-service information technology, associated operations, security, and technical support services to end users.

**Security Operations Center**
The Agriculture Security Operations Center monitors, collects, and analyzes key data to identify patterns that indicate exploitation of vulnerabilities, intrusions, and malicious activities.

**Enterprise Applications Services**
Enterprise Applications Services manages a variety of enterprise applications services, development efforts, and integration projects, including Innovations and Emerging Technologies, Applications Engineering, and Applications Solutions, Identity, Credentials and Access Management, and Workforce Development Solutions.

**Office of the Executive Secretariat**
The Office of the Executive Secretariat (OES) manages the correspondence, documents, and records of the Secretary of Agriculture. OES is a valuable resource not just for the Secretary and immediate staff, but for the whole Department.

**Correspondence management**
OES ensures that all USDA officials are included in the process of drafting documents for the Secretary through a managed system of reviews and clearances. OES then works with other agencies to respond in an appropriate and timely manner. Additionally, OES ensures that Federal Register notices, memorandums, reports, and all other documents prepared for the
Secretary are fully vetted and prepared correctly for signature.

*Maintenance of official documents*
OES collects and maintains the official records of the Office of the Secretary of Agriculture.

**Office of Homeland Security and Emergency Coordination**

The Office of Homeland Security and Emergency Coordination (OHSEC) leads the Department’s security, preparedness, and response efforts through training, coordination, and the development and execution of policies and procedures to ensure employees and stakeholders are prepared to support the entire USDA mission.

*Emergency Programs Division*
The Emergency Programs Division serves as a focal point for emergency management and coordination of natural or man-made disasters within the scope of the USDA mission.

*Personnel and Document Security Division*
The Personnel and Document Security Division processes and adjudicates investigations for National Security and Public Trust positions at USDA.

*Physical Security Division*
The Physical Security Division provides physical security policy, oversight, review, and advice to the 17 USDA Agencies and 12 staff offices.

*Radiation Safety Division*
The Radiation Safety Division maintains safe use of radiation sources in USDA and coordinates USDA’s Radiological Emergency Response to national incidents.

*Resilience and Preparedness Division*
The Resilience and Preparedness Division develops, implements, and maintains emergency preparedness, emergency response, and continuity policies, plans, and procedures for the Department.

**Office of Human Resources Management**

The Office of Human Resources Management (OHRM) provides direction and leadership in formulating and issuing Departmental policy relating to personnel management, including recruitment and employment, employee and labor relations, compensation and performance management, payroll/personnel systems, and personnel management evaluations. OHRM has assisted the Assistant Secretary of Administration in implementing the Strategic Management of Human Capital Initiative under the President’s Management Agenda (PMA) and audits agency human capital activities.

*Virtual University*
This program establishes policy and provides oversight, and leadership for USDA employee
development and training in alignment of human capital goals.

**Diversity, Recruitment, and Work/Life Division**
The Diversity, Recruitment, and Work/Life Division provides Departmental policy guidance, oversight and leadership for the USDA Disability, Special Emphasis, Recruitment, Veterans Hiring and Work/Life programs.

**Executive Resources Management Division**
The Executive Resources Management Division is the centralized entity that sets policy, and provides guidance and support for USDA executive level employees, which include members of the Senior Executive Service (SES), Senior Level (SL), Scientific and Professional (ST), and political appointed employees.

**Human Resources (HR) Policy Division**
The Human Resources (HR) Policy Division sets policy and administers human resources policy related to classification, employment, compensation and leave, benefits, performance management, recognition and awards, and Departmental human resources directives.

**Strategic Human Resources Planning and Accountability**
The Strategic Human Resources Planning and Accountability Division directs implementation of the Human Capital Assessment and Accountability Framework of Title 5, Code of Federal Regulation (CFR), Part 250, which provides a systematic means for USDA to plan, implement, and evaluate performance outcomes on all aspects of human capital management policies, programs, and activities in support of the USDA Strategic Plan and the Secretary’s priorities.

**Equal Opportunity Accountability Division**
The Equal Opportunity Accountability Division is responsible for setting USDA policy and guidance related to equal opportunity accountability programs and initiatives.

**Employee and Labor Relations**
The Employee and Labor Relations Division develops, maintains, and implements Departmental initiatives related to labor and employee relations, including policies on labor-management relations, grievances, employee conduct, unacceptable performance, discipline, adverse actions, drug testing program management, employee assistance program management, workplace violence prevention program management, employee welfare and recreation associations, associations of management officials and/or supervisors, and other organizations.

**Human Resources Operations Division**
The Human Resources Operations Division provides services and technical advice in the areas of classification and position management, staffing, placement and recruitment, pay and compensation, payroll and processing, performance management, employee benefits, awards and recognition, employee and labor relations, maintenance of employee files and records, information systems, and personnel security. This division also oversees payroll processing and pay quality assurance efforts.
United States Department of Agriculture  
2016 Presidential Transition  
Departmental Management Mission Area (DM)

**Office of Operations**

The Office of Operations (OO) provides overall direction, leadership, coordination, and guidance in activities relating to facilities management, engineering and architecture, internal energy conservation, recycling, and mail and copier management programs. OO is also responsible for managing, operating, maintaining, repairing, and improving the USDA’s Headquarters’ complex as well as the George Washington Carver Center in Beltsville, Maryland.

OO provides a diverse array of support activities including: facilities operations and maintenance, engineering, architecture, design and construction oversight, space and asset management, internal energy conservation, recycling, sustainable practices, physical and technical security, parking management, executive driver services, HSPD-12 badging, occupational safety and health, occupant emergency management, accessible technology, reasonable accommodation, interpreting services, concessions/food service and child development center oversight. OO also provides centralized business services including: mail, courier, copier and duplication, general supply/equipment, excess personal property, forms and publication distribution, and warehouse services. The office also is responsible for providing executive support services to the Office of the Secretary and for the management and oversight of the USDA Visitor’s Center, which provides education and outreach to employees and the public.

**Office of Procurement and Property Management**

The Office of Procurement and Property Management (OPPM) provides policy, advice, and coordination for acquisitions and procurements, and management of Federal property. OPPM led the Department’s efforts in the Real Property PMA initiative. OPPM also provides oversight and policy on transportation, supplies, motor vehicles, and aircraft.

*Property Management*

The OPPM property management division manages leasing for the USDA and assists USDA agencies in disposing of excess buildings and structures. In addition, OPPM manages the Department’s alternative fuel use target set by Executive Order 13423.

*BioPreferred*

OPPM oversees the BioPreferred voluntary labeling program to increase the purchase of biobased products in the commercial marketplace. OPPM also helps to promote sustainable Federal procurement through use of the sixty-four biobased product categories.

**Office of Small & Disadvantaged Business Utilization**

The Office of Small & Disadvantaged Business Utilization (OSDBU) provides policy and leadership in fostering the use of small, disadvantaged, and women-owned businesses as Federal contractors. OSDBU works closely with USDA’s contracting offices to develop a comprehensive set of policies that strategically align oversight and accountability with a proactive outreach and
small business assistance program across USDA’s large decentralized mission area. These policies position USDA to sustain its small business accomplishments and to support and carry out the Department’s small business goals.

**Key Initiatives:**

- **DM** is leading a Department-wide process to review and evaluate administrative service delivery and to identify areas of improvement that would create efficiencies and improve service provided. This process, called the Administrative Solutions Project (ASP), is intended to streamline operations, eliminate or minimize redundant activities, identify process improvements, and improve customer service for program agencies and offices. The ASP is a core component of the USDA Blueprint for Stronger Service, and is focused on the functional areas of Civil Rights, Information Technology, Human Resources, Finance/Budget, Homeland Security, Procurement, and Property Management.

- **DM** also leads USDA’s engagement with the Asian American and Pacific Islander community and the White House Initiative on AAPIs (WHIAAPI). The focus of this portfolio, consistent with that of WHIAAPI, is to improve AAPIs’ understanding of, access to, and participation in federal (USDA) programs and services in which they may be underserved. The mission is one that cuts across the work of all USDA agencies and departmental offices, although some agencies have a larger role than others.

- **Presidential Memorandum "Improving the Federal Recruitment and Hiring Process" dated May 11, 2010,** established hiring reform initiatives to address major, long standing impediments to recruiting and hiring the best and the brightest into the Federal civilian workforce. Hiring Reform builds on the collaboration between OPM and Agencies to streamline the hiring process and recruit top talent, especially for mission-critical jobs. The President's initiative provides for a vigorous Government-wide recruiting effort, makes it easier for Americans to apply for Federal jobs, raises the bar on candidate quality, and provides a commonsense approach to the overall hiring process through clear objectives and detailed guidance. These steps are taken with rigorous adherence to, and respect for, the merit system principles upon which the civil service is grounded. USDA has also instituted additional hiring requirements for USDA organizations to ensure continuing progress towards transforming the hiring process. The requirements of the Presidential memorandum includes:
  1. Eliminate written essay-style questions (KSAs) at the initial stage of the application process;
  2. Allow individuals to apply with resume and cover letter;
  3. Use category rating;
  4. Hiring manager accountability and involvement;
  5. Improve the quality and speed of hiring;
  6. Notify applicants about their status
In addition, within USDA have adopted best practices for hiring under an initiative called Hiring Excellence. These best practices include:

- Focus on improving our 80-day hiring timeline goal
- All hiring managers must complete the Hiring Matters: Hiring Managers Making the Hiring Process Work training in AgLearn;
- Hiring managers must consult their Human Capital Plans prior to initiating the hiring process;
- For every recruit action, there must be a Mandatory Pre-Hiring Consultation between a hiring manager and a Human Resources (HR) specialist that includes, at a minimum, a review of the position description, job analysis, and crediting plan;
- Review hiring flexibilities prior to advertising a vacancy;
- Advertise vacancies either through Delegated Examining (DE)/Demo or Merit Promotion, but not both — subject, of course, to your labor agreements;
- Vacancy announcements should be open between five to ten days;
- Limit the number of applications for those occupations you historically receive a high volume of applications;
- Continue to provide additional training to HR staff to address competency gaps and take appropriate steps to improve the overall engagement of our HR employees;
- For each stage of the hiring process, identify where there are issues to be resolved and, where appropriate, reengineer those processes;
- Extensions to certificates must not be routinely granted; and
- Hiring Managers must complete Office of Personnel Management OPM hiring manager survey.
Budget and Staffing Summary

- Approximately 20% of Office of Operations, Office of Procurement and Property Management, and the Office of Human Resources Management are eligible to retire within the next year.
- OPPM has 1 key position it anticipates becoming vacant within the next 90 days.
- OHRM has 3 key positions it anticipates becoming vacant within the next 90 days.

### Summary by Agency:

- **OCIO Total**: $428,731
- **OES Total**: $486,236
- **OHRM Total**: $467,406
- **OHSEC Total**: $446,196
- **OO Total**: $443,890
- **OPPM Total**: $504,092
- **OSDBU Total**: $458,472

### Staff Years:

- **OCIO**: 949
- **OES**: 24
- **OHRM**: 308
- **OHSEC**: 15
- **OO**: 212
- **OPPM**: 44
- **OSDBU**: 14

**Total Staff Years**: 1566
United States Department of Agriculture
2016 Presidential Transition
Departmental Management Mission Area (DM)

II. Top Issues/Hot Topics

Timeline

January
- Finalize bring your own device program (OCIO)
- Determine Scope and implementation for security training for USDA workforce (OHSEC)

February
- Determine whether to maintain Executive Order 13522, Creating Labor-Management Forums To Improve Delivery of Government Services, and if so, whether to develop different success metrics, to continue with labor-management forums, annual labor relations climate assessment surveys, or to develop alternate methods/procedures for administering the Pre-Decisional Involvement process (OHRM)

March
- Obtain eBoard and GSA approval to establish NITC data center as Federal shared service provider (OCIO)
- The Biennial Allocation Request and justifications to support the allocation of new SES, SL, and ST slots is due to OPM (OHRM)
- Nominations for Presidential Rank Awards are due to OPM (OHRM)
- Executive Order 13693 “Planning for Federal Sustainability in the Next Decade” which requires vehicle petroleum reduction by 4% by the end of Fiscal Year 2017 and that all new vehicles employ telematics (OPPM)

April
- Certification renewal for USDA’s SL/ST performance system is due to OPM (OHRM)
- FITARA self-assessment plan, updated common baseline, and FITARA IT management maturity model verification due to OMB (OCIO)
- Eagle Horizon Exercise (OHSEC)

May
- USDA Enterprise Roadmap Update due (OCIO)
- USDA IT Asset Inventory Submission due (OCIO)
- Park Center Lease Expiration (OO)

June
- Implement new customer facing services, including eVPN2, Managed Print Services 2, and MS 0365 upgrades (OCIO)
- An approved compensation plan for the SES is due to USDA Executives by June 30, 2017. Any new or revised Departmental initiatives will need to be incorporated into executive performance plans as soon as possible, but no later than June 30, 2017, if executives are expected to be held accountable and rated on them during the Fiscal Year 2017 performance cycle (OHRM)

Other
- TBD- New Chairperson for the Executive Review Board needs to be appointed within 30 calendar days after the appointment of a new Secretary (OHRM)
• TBD- As soon as practical after the appointment of a new Secretary, decisions will need to be made as to whether or not to approve any new SES appointments or actions that have been suspended (OHRM)

Mission Area Issues

Office of the Chief Information Officer

FEDERAL INFORMATION TECHNOLOGY ACQUISITION REFORM ACT (FITARA)

The Federal Information Technology Acquisition Reform Act (FITARA) was enacted on December 19, 2014, and outlines specific requirements relating to the following:

• Federal Chief Information Officer authority enhancements
• Enhanced transparency and improved risk management in Information Technology (IT) investments
• Portfolio Reviews
• Expansion of training and use of IT cadres
• Federal Data Center Consolidation Initiative (FDCCI), more recently known as the Data Center Optimization Initiative (DCOI)
• Maximizing the benefit of the Federal Strategic Sourcing Initiative (SSI)
• Government-wide software purchasing programs

In order to provide more specific guidance for the implementation of FITARA, the Office of Management and Budget Memorandum M-15-14, Management and Oversight of Federal Information Technology, was issued. The objectives of M-15-14 state that covered agencies shall conduct a self-assessment that identifies current conformity with or gaps in conformity with a Common Baseline and Implementation Plan (herein known as the Common Baseline), and articulate an implementation plan describing the changes it will make to ensure that all Common Baseline and milestone and action table responsibilities are either implemented or provisioned for by December 31, 2015.

This self-assessment shall include a discussion of how Agency senior leaders and program leaders will work in partnership to facilitate the successful implementation of the Common Baseline and milestone and action table and how the Agency CIO will be enabled as a strategic partner integrated in shaping Agency strategies, budgets, and operations.

• In response to the M-15-14 mandate, the United States Department of Agriculture (USDA) developed the United States Department of Agriculture Federal Information Technology Acquisition Reform Act Common Baseline and Implementation Plan, dated November 14, 2015, which reinforces the role and authority of USDA’s CIO in establishing an inclusive, integrated governance process that manages IT as a strategic resource.
In addition, the USDA established the **Actions and Milestones Table**, which captures the progression of tasks related to the success of the common baseline. The USDA **Common Baseline** establishes a framework for USDA to implement the specific authorities that FITARA gives to the **Chief Financial Officer (CFO) Act** Agency CIOs, and builds upon the responsibilities outlined in the **Clinger-Cohen Act of 1996**. The Common Baseline speaks to the roles and responsibilities of other applicable senior Department officials including the CFO, the Chief Acquisition Officer (CAO), Senior Procurement Executive (SPE), the Chief Human Capital Officer (CHCO), and the Director, Office of Budget and Program Analysis (OBPA) (the USDA CIO, CFO, CAO, SPE, CHCO and OBPA Director, as a group, shall herein be identified as the CXOs).

USDA also developed FITARA scorecards in the following domains:

1. IT Security
2. IT Investment Health
3. FAC P/PM Program Manager Certification
4. Data Center Consolidation/Optimization
5. Privacy Compliance
6. Acquisition Approval Request Compliance
7. Open Data Compliance
8. Section 508 Compliance

The Scorecards are designed to evaluate and score the performance of the Agencies and Staff Offices in order to delegate authority down to the component CIOs. The USDA CIO will use these scorecards as part of his assignment plan strategy, providing empirical data to assist in assigning responsibility down to the component CIOs.

**CONTINUOUS DIAGNOSTICS AND MITIGATION (CDM)**

The Department of Homeland Security’s Continuous Diagnostics and Mitigation (CDM) Program provides federal departments and agencies with capabilities and tools that identify cybersecurity risks on an ongoing basis, prioritize these risks based upon potential impacts, and enable cybersecurity personnel to mitigate the most significant problems first. Congress established the CDM program to provide adequate, risk-based, and cost-effective cybersecurity and more efficiently allocate cybersecurity resources.

CDM is being implemented in three phases, with a fourth phase anticipated. The CDM Phases, objectives, and tools/capabilities are shown in the table below. USDA is working with DHS to implement Phase 1, and initiating the planning for Phase 2.

Key Details

- USDA fully participated in the CDM program, and has volunteered as early adopters in Phase Two.
- We are currently implementing the capabilities of Phase One:
  - Hardware Asset Management (HWAM) solution, ForeScout, is 50% deployed. This is increasing Cybersecurity staff’s knowledge of systems on USDA networks and directly reducing exploitable cyber-attack surface by providing information about unauthorized or unmanaged devices.
  - Software Asset Management (SWAM) solution, RES ONE, is currently 15% deployed, enabling access and control of the services and technologies employees need while reducing the risk of data breaches and cyber-attacks.
  - Dashboard and Security Event Integration Management (SEIM), SPLUNK, and RSA Archer will be implemented by June of 2017. Upon implementation, USDA FISMA reporting will be streamlined through partial automation, with less human error.
- USDA is exploring options for funding out-year operations and maintenance costs after DHS funding ends after FY17.

Office of Homeland Security and Emergency Coordination

OHSEC is preparing to update the USDA Radiological Emergency Response Plan to conform to current FEMA guidelines for Federal Agency emergency response. OHSEC is also building a strong counterintelligence program to protect billions of dollars in research and development, science and technology, information technologies, critical infrastructures, employee information, and other sensitive information. Once risks are fully identified, the program will provide education and training to the Department’s employees.
Office of Human Resources Management

Secretary’s Executive Resources Board
Each Federal agency is required by 5 U.S.C. § 3393(b) to establish one or more Executive Resources Boards (ERB’s), the members of which shall be appointed by the Secretary. The ERB conducts the merit staffing process for career entry into the Senior Executive Service (SES) and entrants into the Presidential Management Fellow Program. Other functions relating to the management of the Department’s executive resources, as delegated by the Secretary, include the oversight of HR matters related to SES and Senior Level (SL) and Scientific or Professional (ST) employees. Departmental Regulation DR-1061-003, dated November 4, 2014, establishes the policy for USDA’s ERB. The ERB is comprised of a Chairperson, a Vice Chairperson, and a mix of SES and SL/ST employees representing their Mission Areas, Agencies, and Staff Offices. The ERB meets monthly to discuss executive resources policies and procedures impacting SES and SL/ST employees and makes recommendations to the Secretary. A new Chairperson will need to be appointed by the incoming Secretary. The current Vice Chairperson is a career executive and will continue the business of the Board until a new Chairperson is appointed. The current Chair is Acting Deputy Secretary Scuse.

2018/2019 Biennial Allocation Process
Pursuant to 5 U.S.C. § 3133(a), Federal agencies are required – during each even-numbered calendar year (CY), to examine their needs for SES positions for each of the two fiscal years beginning after such calendar year, and to submit to OPM a written request for each of such fiscal years. Although not expressly required by statute, Federal agencies conduct the same examination and submit a similar written request to OPM for their positions in the SL and ST systems. OPM allocates SES, SL, and ST positions to Federal Departments and in accordance with these reviews. USDA’s current allocations are:

- 399 SES slots
- 42 SL slots
- 49 ST slots

Through this process, called the biennial allocation process, OPM reviews organizational missions, plans, and structures to assess the extent to which executive resources are being used in an efficient manner. OPM conducts this process as a part of the overall strategic management of the Government’s executive resources pool. The biennial allocation process requires OHRM, Executive Resources Management Division to conduct an assessment of all USDA executive resources needs and allows Mission Areas, Agencies, and Staff Offices to submit requests for new SES, SL, and ST allocations as appropriate, based upon changing or shifting mission critical work. As part of this process, Mission Areas, Agencies, and Staff Offices are also required to review the SES position designations (career reserved or general, career, and non-career) for all encumbered and vacant positions.

The Executive Resources Management Division currently is in the process of meeting with each Mission Area, Agency, and Staff Office to determine their executive needs for the OPM data call
that is anticipated in December of 2016 for the 2018/2019 biennial. A preliminary response to OPM on USDA’s anticipated needs will be due upon the receipt of the data call. A formal justification and accompanying documentation is required to be submitted in the first quarter of calendar year 2017 if USDA intends to request any additional executive allocations.

Land Management Workforce Flexibility Act
This Act (PL 114-47) was signed into law on August 7, 2015, and allows certain current and former land management agency employees who are serving or have served under a time-limited appointment to compete for any permanent position in the competitive service at a Land Management Agency, or any other agency, under “internal” merit promotion procedures. Land Management Agencies include:

- U.S. Forest Service, USDA
- Bureau of Land Management, DOI
- National Park Service, DOI
- Fish and Wildlife Service, DOI
- Bureau of Indian Affairs, DOI
- Bureau of Reclamation, DOI

OHRM has issued instructions to agencies to provide implementing instructions to servicing HR offices to ensure compliance with this Act.

Per Executive Order 13522, in order to evaluate the effectiveness of labor-management collaborations in improving government efficiency, the Labor Relations Branch is responsible for leading the efforts for conducting an annual USDA Labor-Management Climate Assessment Survey for all USDA agency-level labor-management forums to measure the labor-management relationship across the entire USDA. Determining barriers for building effective partnership efforts between labor and management within USDA continues to be a hot topic.

Affordable Care Act and Casual Employees
USDA’s Forest Service (FS) has the authority to hire on the spot certain emergency workers to cope with sudden and unexpected emergencies related to wildland firefighting responsibilities and other hazardous incidents. In 2015, FS hired 7,212 emergency workers who are termed “casual hires.” Most of the casual hires work a few days or a few weeks, and are hired from the local area where the fire is located. However, there are occasions where the employees work for extended periods during the fire season. On October 17, 2014, OPM issued a regulatory change to 5 CFR 890 that applied the requirements of the Affordable Care Act (ACA) to temporary employees who work full time for more than 90 days. We initially believed that this change did not apply to casual hires. After consultation with Office of Personnel Management and the USDA Office of the General Counsel, it was determined that health benefits coverage must be offered under the ACA to this group of casual hires if they work more than 130 hours in a month for three consecutive months. These casual hires are paid by the Department of the Interior (DOI), who also employ casual hires. USDA collaborated with DOI to ensure all qualifying
employees were offered coverage beginning in January 2016 and throughout the summer fire season.

**Office of Operations**

*South Building and George Washington Carver Center (GWCC) Modernization Project Strategy*

USDA has been working for over 25 years (beginning with the 1995 Modernization Project) with extremely limited funding to maintain and modernize the historic USDA Headquarters Complex. With mounting deferred maintenance, aging infrastructure, long-standing life safety issues (unabated hazardous materials, lack of critical fire safety systems, outdated electrical systems, etc.), and non-compliance with contemporary building and accessibility codes, the USDA Headquarters is the only agency headquarters in Washington, D.C. that has not been modernized. The business-as-usual model of requesting modernization funds from Congress has not provided a viable means for funding the over $140 million in deferred maintenance or the funding required to complete modernization.

To address the many life safety and accessibility deficiencies, as well as the failing operational systems, USDA has developed a strategy to complete modernization. The goals and objectives of the new modernization strategy are to correct the serious deficiencies with the South Building and to achieve operating cost reductions both by reducing the footprint through the elimination of all leases in the National Capital Region and by improving energy efficiency. While continuing to reduce USDA’s real property footprint is important through elimination of leased facilities, each day that the South Building remains without proper fire protection, which would be corrected through the installation of an automatic sprinkler system, the safety of all occupants and visitors is seriously compromised. Likewise, modernization will allow the Department to achieve energy reduction goals, which will lower present operating expenses.

The USDA OO is embarking on a new business model that will utilize a hybrid funding approach. USDA would combine five (5) funding mechanisms to overcome the limitations associated with one single approach. In today’s dollars, USDA requires $776.15 million to completely modernize the South Building and GWCC. Under the hybrid option, an additional $376 million in ESPC finance fees would need to be added to the cost. The five (5) funding options under the hybrid approach include:

1. The energy savings performance contract (ESPC) – a public-private partnership tool available through the Department of Energy (DOE) which utilizes third-party financing and guaranteed energy and operational efficiency savings to pay for high-value energy conservation measures over time.
2. Non-recurring Expense Fund (NEF) – Granted to USDA by Congress with the express intent of maintaining and using unobligated balances of expired discretionary funds for projects such as facilities infrastructure and capital acquisition.
3. Annual Appropriations (over the next 5 years) – $20 million annual appropriations needed over next 5 years will be used for project requirements that cannot be funded under the ESPC or where the NEF funding has not accumulated in sufficient amounts to meet current funding needs. This includes costs incurred for payments on GSA program loans for furniture (see below), transition expenses, information technology, visual and telecommunications equipment, increased security costs for protection of construction equipment, construction delays, etc.

4. Backfill from Agency Appropriations – As agencies move into the South Building and/or GWCC from leased space, there could be an opportunity to capture some or all of the funds used for lease payments to assist with modernization funding.

5. GSA Total Workplace Furniture & Information Technology Program (FIT) – GSA’s FIT Program will be used to fund all new furniture acquisition for the South Building, with an estimated cost of $69.4 million.

People’s Garden Site Improvements and Perimeter Security Plan
The People’s Garden Initiative began in 2009 as an effort to challenge USDA employees to create agriculturally productive gardens at the agency’s facilities and the inaugural People’s Garden is located at the Whitten Building. The initiative is named in honor of President Lincoln’s description of USDA as the “People’s Department.”

USDA commissioned the People’s Garden Site Improvements and Perimeter Security project to expand the People’s Garden Initiative across its headquarters’ grounds with a focus on sustainability, landscape enhancement, and education. In addition, as the only federal office building on the National Mall which also houses a Cabinet level position, USDA required a perimeter security plan. The scope of the project included the expansion of the People’s Garden theme with sustainable practices site-wide, integration of low impact development practices site-wide including bio retention swales, permeable and pervious paving, soil cells for street trees and rain gardens, integration of Level IV Perimeter Security, and a reduction of on-site parking.

The People’s Garden site improvements and perimeter security is a multi-phase project that encompasses the entire grounds of the USDA Headquarters Complex. Following presentations, USDA received conceptual approval of the site development plans from the National Capital Planning Commission (NCPC) and the Commission of Fine Arts (CFA) in July 2014. Upon approval, Federal Agencies have a 4-year approval limit to begin construction or face a new requirement to obtain approval again. OO has requested funding in the FY2018 budget for this project.

The HQ People’s Garden is OO’s Garden and the USDA flagship demonstration garden that supports public engagement in support of the Agricultural Marketing Service nationwide People’s Garden initiative.
The HQ Perimeter Site Improvement and Security Plan is the plan for improving security and sustainability around HQ buildings by incorporating mandatory security protection elements into the sustainability features of the HQ grounds in support of Executive Orders 13693 and 13508. This plan is a product of cooperation between USDA, the National Capital Planning Commission, GSA, the DC State Historic Preservation Office, and the National Park Service. Site improvements under this plan are separate and apart from the larger USDA South Building and GWCC Modernization plan.

**National Liberty Memorial**

The National Liberty Memorial (Memorial) was authorized on January 2, 2013, by Section 2860 of Public Law 112-239. It allows the National Mall Liberty Fund D.C. (Fund) to establish a memorial on eligible Federal land to honor the more than 5,000 slaves and free black persons who served as soldiers and sailors or provided civilian assistance during the American Revolution. On September 26, 2014, P.L. 113-176 approved the establishment of the Memorial within Area I, the area comprising the central Monumental Core of the District of Columbia and its environs. Potential sites within Area I for the Memorial includes properties under the control of GSA and Department of the Interior. The three sites include: the Interior South Triangle (Virginia Avenue/19th Street), Freedom Plaza, and the west side of the Jamie L. Whitten Building (the preferred site of the Fund given its proximity to the Washington Monument, its location along 14th Street as a gateway into and out of the city, and the high volume of pedestrian traffic the site receives). The site also has a connection to the National Museum of African American History and Culture.

GSA, as the property owner has the overall lead responsibility for this project. However, USDA has and continues to be committed to working with our partners. The next step in the process is the development of a Memorandum of Understanding (MOU) between GSA, USDA, and the Fund to include: roles and responsibilities; information on design development, and a narrative that supports and articulates the role of African Americans in the Revolutionary War and its relationship to the Department.

**Park Center Lease**

The lease at the Food and Nutrition Service Building, Park Center in Alexandria, VA, expires 5/31/2017. The General Services Administration (GSA) is analyzing the six Final Proposal Requests (FPRs) received September 23rd. The current time frame for occupancy of the new facility is between June 1, 2017 and May 31, 2018. An extension of the Park Center lease will likely be required. General requirements for the replacement facility include: ISC Level III security requirements; the offered space must be contiguous and accommodated in no more than one building; must be within 2,640 walkable linear feet of an existing Metrorail station. As the liaison for space in the NCR, OO has assisted FNS and GSA with developing the Program of Requirements and other logistics; however, GSA has the lead on the leasing acquisition and award.
Office of Procurement and Property Management

- USDA Category Management Hardware – A Blanket Purchase Agreement catalog offering certified hardware products (workstations, laptops, tablets, servers) at pre-competed prices.
- USDA Enterprise-wide Managed Print Services (MPS) – An Indefinite Delivery contract for a next generation USDA MPS that enhances the existing MPS within USDA to reduce the overall cost of producing images for an environmentally sustainable MPS solution.
- OMB Reduce the Footprint update is typically due in October of each year. The goal for FY2017 is to reduce the square footage of offices by 328,045 and warehouses by 28,016.
- Executive Order 13693 “Planning for Federal Sustainability in the Next Decade” which requires vehicle petroleum reduction by 4% by the end of Fiscal Year 2017 and that all new vehicles employ telematics.
- Improving lease management practices through the establishment of LASD procedures and quality assurance review process for lease delegation requests submitted to GSA.

Office of Homeland Security and Emergency Coordination

- Office of Inspector General (OIG) open audit:
  o 61701-0001-21- FY 2016 Agro-Terrorism Prevention, Detection, and Response

- Government Accountability Office (GAO) open audit:
  o GAO-16-797 – Federal Disaster Assistance - 441286

Office of Human Resources Management

- 2014 (GAO-14-288) GAO “U.S. Department of Agriculture: Workforce Decisions Need Better Linkage to Missions and Use of Leading Practices” [http://www.gao.gov/products/GAO-14-288](http://www.gao.gov/products/GAO-14-288) This report examines: (1) how the workforces of USDA’s service center agencies changed from fiscal year 2003 to fiscal year 2012, (2) the extent to which USDA’s policy on supervisory ratios aligned with OPM guidance in fiscal year 2012, and (3) the extent to which USDA’s service center agencies followed leading practices when closing offices and reducing staff in fiscal year 2012. GAO recommends, among other things, that USDA take actions to revise its supervisory ratios policy; amend its policy on organizational changes to follow leading practices; and require RD and FSA to document links between various incentives and reshaping of strategic goals. USDA generally agreed with GAO’s findings but disagreed with one finding and recommendation on supervisory ratios.

  GAO was asked to review workforce planning for federal veterinarians. This report examines: (1) department-wide efforts USDA and HHS have made for their routine veterinarian workforces, (2) the extent to which USDA has identified the veterinarians needed for emergency response to an animal disease outbreak, and (3) the steps OPM and other federal agencies have taken to achieve the goals of the government-wide strategic plan for the veterinarian workforce. GAO reviewed USDA, HHS, and government-wide workforce plans, and interviewed relevant officials. GAO recommended that USDA assess and address veterinarian workforce needs for emergency response to an animal disease outbreak, and that OPM review agencies’ use of direct-hire authority for veterinarians and monitor and evaluate progress and obtain leadership support for achieving government-wide veterinary workforce goals. USDA partially agreed, noting that it has taken steps to assess its emergency needs.

Office of Procurement and Property Management

Procurement Policy

Procurement Systems

The following audits were conducted by the USDA OIG in the last four years in which the IAS program was subjected to review as part of other OPPM audits:

- In 2015, HMMP was under a GAO audit: GAO-15-35 “Agencies Should Take Steps to Improve Information on USDA’s and Interior’s Potentially Contaminated Sites”.

Office of Small & Disadvantaged Business Utilization

In late May of 2016, GAO began an audit of USDA’s OSDBU at the request of the Chair of the House Committee on Small Business. Almost all other federal departments’ and agencies’
OSDBU’s are undergoing the same audit. While this audit is not a regular, recurring occurrence, it is certainly not unusual or unexpected. Similar audits were conducted by GAO in 1995, 2003, and 2011, all at the request of the Chair of the House Committee on Small Business, and all focusing on very similar issues and objectives. The objectives of the current audit are:

- Assess whether the OSDBU director reports to the head or deputy of the head of the agency as defined in the National Defense Authorization Act revisions; and

- Determine the functions conducted by the OSDBUs at selected federal agencies.

Based on previous audits, GAO anticipates concluding the audit, and returning the report sometime during the second or third quarter of calendar year 2017. In the interim, GAO communicates with USDA’s OSDBU office for any questions, requests for additional information, and any other item or action it needs to develop their report.

In previous audits, the GAO found that USDA was not in compliance with the section of the Small Business Act that requires the OSDBU Director to report directly to the Secretary or his designee. Instead, USDA had previously designated the Assistant Secretary for Administration as the OSDBU Director, who then delegated nearly all authority to the lower-ranking Director in the OSDBU office. That lower-ranking official would report to the ASA, who would in turn report to the Deputy Secretary.

At the entrance conference for the current audit USDA clarified that it has altered the reporting structure and responsibilities to comply with the requirements of the law. The OSDBU Director now has the full authority as described in the law, and reports directly to the Deputy Secretary. USDA also discussed the various roles and responsibilities of the OSDBU office, and how they implement the various laws, statutes, and regulations related to OSDBU.
WHAT WE DO: OUR MISSION

The Office of Advocacy and Outreach (OAO) was established by the 2008 Farm Bill, to ensure that all constituents, including those historically underserved, have access to USDA programs. As the face of USDA in the community, OAO’s mission is to improve the viability and profitability of small farms and ranches, beginning farmers and ranchers, and socially disadvantaged farmers or ranchers through outreach and collaboration with community-based organizations, higher education institutions, and other USDA Agencies and Mission Areas. The 2014 Farm Bill broadened OAO’s reach to now include advocacy and outreach for veteran farmers and ranchers. OAO’s partnerships with Minority Serving Institutions help to close the professional achievement gap and create a diverse workforce pipeline.

WHO WE ARE: OUR WORKFORCE

- We employ 49 people across the country with offices located in 20 states and the District of Columbia.

WHO WE SERVE: OUR CONSTITUENTS

OAO’s constituents range from a variety of farmers and ranchers, including the small and beginning, the historically underserved, and the veteran. OAO works with community-based organizations to provide state of the art training to farmworkers and the farming community at large. Their work with Higher Education Institutions provides scholarships and internships to a diverse population of students. OAO works across the USDA and serves as the driving force to increase access to USDA programs for underserved constituents.

KEY UPCOMING DECISIONS

- FY 2017 Notice for 2501 Grants Program. A decision will be needed as to the timing and policy considerations for the 2017 solicitation for grant applications.

BUDGET HIGHLIGHTS FY 2016

- The Annual Ag appropriations bill for FY 2016 provides budget authority for the following:
  - OAO Discretionary - $1.209 million; and
  - 2501 Grant Program - $10 million
- The USDA Shared Cost Program provides budget authority for the following:
  - 1890 Initiatives;
  - 1994 Programs; and
  - Hispanic Serving Institutions

FY 2016 Budget Authority

- OAO Discretionary
- OAO Mandatory
- 1890 Initiatives
- 1994 Programs
- Hispanic Serving Inst
- Other Reimbursable
I. Organizational Overview

Executive Summary

The Office of Advocacy and Outreach is the lead organization in U.S. Department of Agriculture (USDA) for planning, developing, administration, and coordination of all Department programs and activities concerning advocacy and outreach programs as they relate to small farms and ranches; beginning farmers and ranchers; and socially disadvantaged farmers or ranchers. The major divisions within OAO are Small Farms and Beginning Farmers & Ranchers Program; Socially Disadvantaged Farmers Program; Farmworker Coordination Program; the Higher Education Initiative; and Community Engagement.

Agency’s Mission/Strategic Plan

The mission of OAO is to improve access to USDA programs and enhance the viability and profitability of small farms and ranches. Through these actions, OAO will support the Department’s commitment to ensuring that all USDA constituents, including historically underserved groups and veteran farmers and ranchers, have the opportunity to participate in and benefit from the programs offered by the Department. OAO serves as an advocate for underserved constituents and as an avenue for them to have input into programmatic and policy decisions to improve their viability and profitability.
## Strategic Goal 1:
**Assist rural communities to create prosperity so they are self-sustaining, repopulating, and economically thriving.**

### Promote partnerships between USDA and Higher Education Institutions to create awareness of Federal career opportunities and develop a strong pipeline of diverse talent for USDA.

### To develop of strong pipeline of diverse talent for USDA.

<table>

<tr>
<th>Programs that Contribute</th>
<th>Key Outcome</th>
</tr>
</thead>
<tbody>
<tr>
<td>Higher Education Institutions Program; which include: USDA/1890 National Program, USDA/1994 Program, and Hispanic Serving Institutions National Program.</td>
<td>To close the professional achievement gap by providing opportunities to talented and diverse young people to support the agricultural industry in the 21st century.</td>
</tr>
</tbody>
</table>

## Strategic Goal 5:
**Create a USDA for the 21st century that is high-performing, efficient, and adaptable.**

### Increase access to programs of the Department, and increase the viability and profitability of small farms and ranches, beginning farmers or ranchers, and socially disadvantaged farmers or ranchers.

### Ensure the Department and its programs are open and transparent.

### Outreach and Assistance for Socially Disadvantaged Farmers and Ranchers

### Increase the viability and profitability of small farms and ranches, beginning farmers or ranchers, and socially disadvantaged farmers or ranchers.

Organization’s History

OAO was established as an office under the Food, Conservation, and Energy Act of 2008, 7 USC 6934. OAO’s purpose is to improve access to USDA programs and enhance the viability and profitability of small farms and ranches, beginning farmers and ranchers, socially disadvantaged farmers and ranchers, and veteran farmers and ranchers. Through these actions, OAO will support the Department’s commitment to ensuring that all USDA constituents, including historically underserved groups and veteran farmers and ranchers, have the opportunity to participate in and benefit from the programs offered by the Department. OAO serves as an advocate for underserved constituents and as an avenue for them to have input into programmatic and policy decisions to improve their viability and profitability.
Biographies of career staff in key leadership positions

Carolyn C. Parker
Director of the Office of Advocacy and Outreach
202-720-6350, Carolyn.Parker@osec.usda.gov

Ms. Carolyn Parker serves as the first permanent Director of the Office of Advocacy and Outreach (OAO), joining in the agency in October 2011. In her short time as Director of OAO, Ms. Parker has managed to numerous accomplishments, including, but not limited to: Securing 36 internships and research positions for students attending Southern University and secured more than $37,000 worth of excess property for use by the University of Maryland at Eastern Shore. Initiated partnerships with the Thurgood Marshall College Fund (TMCF), the Hispanic Association for Colleges and Universities (HACU), the Washington Internships for Native Students and sponsored internships for diverse students across the Department. She implemented the 2016 E. Kika De La Garza Fellowship Program; and established the 2501 Annual Conference for Socially Disadvantaged Veteran Farmers and Rancher. Under Ms. Parker’s leadership and direction OAO has collaborated with USDA agencies to establish a work plan with milestones to evaluate the Beginning Farmers program goal effectiveness, and worked with the Future Farmers of America and the 4-H to host agriculture-based events for more than 80,000 K-12 and college level students from the southeast and the mid-west.

Ms. Parker has served in various leadership capacities at the USDA. As a County Supervisor, Ms. Parker served for the Farmers Home Administration in rural New Jersey where she administered Single Family Housing and Farm Programs. She served in the Community Facilities Loan Programs as the Director of the Business and Industry Program for more than 15 years. Prior to joining the Office of Advocacy and Outreach, she served as the Assistant Deputy Administrator for Business Programs in Rural Development. She has worked at USDA for approximately 35 years. The programs administered involved individuals, corporations, and other business entities, financial institutions, non-profit and community based organizations, as well as local, state, and Federal partners.

Ms. Parker is a native of Wilmington, Delaware and currently resides in the State of Maryland. She is a graduate of the University of Maryland Eastern Shore where she earned a Bachelor of Science degree in Business Administration. Mrs. Parker earned a Master’s in Public Administration from American University in Washington, D.C.

Christian Obineme
Associate Director of the Office of Advocacy and Outreach
202-720-6350, Christian.Obineme@osec.usda.gov

Mr. Christian Obineme joined the Office of Advocacy and Outreach (OAO) in 2014 where he serves as the Associate Director. Mr. Obineme’s primary role is to provide an authoritative vision and technical assistance to the program leads in carrying out the mission of the OAO. He is responsible for analyzing and implementing legislative changes impacting the mission and overall operation of the Staff Office. He prepares and conducts briefings, presentations, for
Agency Administrators, partners, University officials and non-profit institutions regarding highly sensitive and critical issues impacting the Department’s outreach priorities. Mr. Obineme actively participates in strategy sessions for program development and plans, organizes, directs, reviews, and coordinates the day to day programmatic activities of the office. He is responsible for securing the resources necessary to support OAO activities and administration of the operational programs. He has established private and public project cooperative agreements ensuring completeness and conformity to contracting laws and regulations. As the direct supervisor for all program leads, Mr. Obineme provided leadership, guidance, and operational expertise across the Staff Office of Advocacy and Outreach. Mr. Obineme chairs the USDA Agency Outreach Coordinators meetings and serves on the Department’s Performance Improvement Council. He provides administrative and technical supervision, direction and leadership to assigned staff. He assigns responsibilities, delegates authority and determines operating policies, as well as exercising general direction over the work and reviewing operations to ensure the attainment of program objectives.

As an employee of the Agricultural Research Service of USDA, Mr. Obineme served as the Beltsville Area (BA) Facilities Director (Facilities and Asset Manager) from 1990 through 2008. He was responsible for the construction and renovation activities conducted at the Beltsville Agricultural Research Center (BARC), the U.S. National Arboretum (USNA), Washington, D.C., and the Beltsville Human Nutrition Research Center (BHNRC).

From 2007 to 2008, Mr. Obineme served as Supervisory Project Manager of the Research Facilities Solutions (Beltsville Area “Most Efficient Organization”), providing supervision and oversight for the efficient operation of all units and teams within the organization.

From 2005 to 2007, Mr. Obineme was the Chief of Beltsville Area Engineering and Construction Branch. In this position, he provided engineering and construction management support to the Beltsville Area (including BARC, USNA, the Glenn Dale facility, and worksites in Chatsworth, NJ, Presque Isle, ME, and McMinnville, TN) and the National Agricultural Library.

Mr. Christian Obineme is a resident of Baltimore County in Maryland. He earned a B.S. degree in Urban Studies in 1985, and later graduated with a Masters of Business Administration degree with a concentration in Finance and a Masters of Architecture degree, all from Morgan State University, Baltimore City, Maryland. He also completed the Executive Leadership in Public Policy Implementation Program at American University, Washington, D.C.

United States Department of Agriculture
2016 Presidential Transition
Office of Advocacy and Outreach (OAO)

- OAO employs a workforce of 49 employees of which the following are full-time and part-time:
  - Full-time: 49 employees
  - Part-time: 0 employees
- Of our total workforce, 9 (18 percent) are eligible to retire within the next year.
- Our headquarters is located in Washington, D.C., which houses 49 percent of our workforce.
- OAO has 19 field locations across the United States to work directly with our constituents.

II. Policies and Regulations

Statutory Authorities

OAO was established by Section 14013 of the Food, Conservation, and Energy Act of 2008 (2008 Farm Bill), P.L. 110-246 in October 2009, Codified as 7 USC 6934. Section 12201 of the Agricultural Act of 2014 (P.L. 113-79) Codified as 7 USC 2279, broadened the OAO’s responsibilities to include advocacy and outreach for veteran farmers and ranchers.

Important Policies and Regulations

There have been no published regulations/policies from OAO outside of administrative regulations.

Overview of the policy/regulation review process

Programs approved in our Farm Bills are implemented within OAO via a working partnership with our Office of General Counsel and the Office of Budget and Program Analysis (OBPA) and OMB. After approval, the Standard Operating Procedures are updated to reflect programmatic changes. Unless the implementation is administrative, the office provides the public with notification via the Federal Register Notice and via email distribution to our partners and stakeholders.

The OAO uses the process above to publish an annual Funding Opportunity Announcement to solicit proposals for grant funding competition under the Outreach and Assistance for Socially Disadvantaged and Veteran Farmers and Ranchers Grant Program (also known as the 2501 Program). These past publications have been used to successfully administer the 2501 Program.

III. Congressional Relations and Issues

Overview

- OAO Section 2501 Grants (Senate Agriculture/House Agriculture)

On May 18, 2015, both the House and Senate Agriculture Committee requested documents and briefings regarding the USDA Office of Advocacy and Outreach (OAO) Section 2501 grants given to organizations to promote outreach of USDA programs. USDA briefed both Committees staffs on July 17, 2015. USDA produced 4783 pages of documents in response to requests from the Committees.

- StrikeForce

Both the House and Senate Agriculture Committees have sent to USDA oversight requests USDA regarding the USDA StrikeForce Initiative. StrikeForce was a concept initiated by USDA during the Obama Administration to focus on areas of persistent poverty with USDA RD, FSA, and NRCS programs. Initially, the StrikeForce Pilot Project was initiated by the USDA Office of Advocacy and Outreach (OAO) partnering with Community Based Organizations (CBOs) to engage in outreach activities on the part of USDA. After the pilot project, StrikeForce continued as USDA initiative led by the three field-based organizations (RD, FSA, and NRCS) as an effort to give “intensive care” to areas of persistent poverty. Rather than being led by OAO, there has been a designated staff person in DM that is the liaison on the project with OSEC.

Congressional Oversight focused on an OIG report that indicated some issues with the CBOs involved, as well as an OIG Report of Investigation (ROI) that found potential wrongdoing on the part of certain USDA officials, and indicated that the matter was referred for prosecution.
to the DOJ public integrity branch as well as a local US Attorney, both of whom declined prosecution. Shortly after the ROI was issued, the offending USDA official resigned from office.

USDA OGC has initiated a search of e-mails with the USDA e-Comply system, and has obtained the search set. USDA OGC is awaiting on additional review of those documents until there is further interest by the Committees.

IV. **Internal and External Stakeholders**

**Important relationships with other Federal Departments or organizations**

**Internal Agencies:**
- OAO works across the USDA with all agencies and mission areas:
  - Providing talented scholars to various agencies and mission areas to help close the professional achievement gap and create a diverse workforce pipeline
  - OAO Hosts monthly USDA Outreach Coordinators meetings to provide a forum for agency outreach coordinators at the National level to share information, best practices, and any outreach opportunities available to communities and individuals at large. Collaborative assistance across agency and mission area outreach efforts, serve as the driving force to increase access to USDA programs for underserved communities.

**External:**
- Community-based organizations (CBO)
  - OAO works with CBOs to provide state of the art training to farmworkers and the farming community at large
- Higher Education Institutions
  - OAO partners with HEI, such as the 1890 and 1994 Land-Grant Universities, as well as Hispanic Serving Institutions, to provide talented, diverse student with scholarships and internship opportunities
- Scholars and Interns
  - Through internship programs such as Hispanic Association of Colleges and Universities, Thurgood Marshall College Fund, and The Washington Internship for Native American Students, the Office of Advocacy and Outreach provides internships to students and recent graduates.
- Socially Disadvantaged (historically underserved), Veteran, Farmers and Ranchers
  - OAO works to increase access to USDA programs, as well as increase viability and profitability of Veteran, Farmers and Ranchers
United States Department of Agriculture  
2016 Presidential Transition  
Office of Advocacy and Outreach (OAO)

- **Small & Beginning Farmers & Ranchers**  
  - The OAO provides direction, guidance and oversight to the Beginning Farmers and Ranchers Advisory Committee. The Committee advises the Secretary on ways to develop programs to provide coordinated assistance to beginning farmers and ranchers while maximizing new farming and ranching opportunities. The committee also works to enhance and expand Federal and State partnerships to increase financing for beginning farmers and ranchers. These efforts are designed to assist USDA to increase access to programs, as well as increase viability and profitability of small and beginning farmers and ranchers.

- **Minority Farmers**  
  - The Minority Farmers and Ranchers Advisory Committee advises the Secretary of Agriculture on the administration of the Outreach and Assistance for Socially Disadvantaged Farmers and Ranchers Competitive Grant Program. The committee advises the Secretary on how to increase participation of socially disadvantaged farmers and ranchers in U.S. Department of Agriculture (USDA) programs, and advises the Secretary about civil rights activities of USDA as such activities affect USDA programs.

- **Socially Disadvantaged Policy Research Center, Alcorn State University, Alcorn, Mississippi**  
  - OAO provides funding and collaboration to support policy recommendations to the Secretary and USDA.

- **State and Local Officials (including churches, schools, and chamber of commerce)**  
  - OAO works with the State and Local Officials to further the USDA strategic objectives in rural America.

**Stakeholder group overview**

- **Advisory Committee for Beginning Farmers and Ranchers** - The Advisory Committee for Beginning Farmers and Ranchers established under the Agricultural Credit Improvement Act of 1992, 7 U.S.C. § 1929 Note. The Committee’s purpose is to advise the Secretary on ways to develop programs to provide coordinated assistance to beginning farmers and ranchers while maximizing new farming and ranching opportunities.

- **Minority Farmer Advisory Committee** - The Minority Farmer Advisory Committee whose purpose is to advise the Secretary on implementation of section 2501 of the Food, Agriculture, Conservation, and Trade Act of 1990, 7 U.S.C. § 2279; methods of maximizing the participation of minority farmers and ranchers in USDA programs; and civil rights activities within the Department as such activities relate to participants in such programs. Members of the Committee include socially disadvantaged farmers or ranchers, representatives of nonprofit organizations that work with minority farmers and ranchers; civil rights professionals; representatives from institutions of higher learning; and other persons the Secretary deems appropriate.

- **Strike Force Initiative** - The **Strike Force Initiative** provides assistance to USDA’s socially disadvantaged farmers and ranchers in communities with counties of persistent poverty. Several Community Base Organizations (CBOs) are selected and enter into cooperative
agreements to carry out the Strike Force’s mission to identify the needs of those communities and coordinate USDA staff on program insistence to address the issues of those communities.

- **1890 Taskforce**– USDA/1890 Task Force partnership was forged to strengthen the ties between USDA agencies and the 1890 Land Grant Universities. The 1890 Task Force Meeting is held to provide information and guidance in order to advance the interests of USDA, strengthen agricultural research, and improve educational opportunities at the 1890 Colleges and Universities.

- **USDA and AIHEC Leadership Group**: The USDA and the American Indian Higher Education Consortium (AIHEC) Leadership Group are represented by the seven USDA Mission Areas and by presidents from the 1994 Land Grant Institutions. This group makes recommendations to the 1994 Program.

**Recent engagements with stakeholder group**

- **February 11, 2016 - The USDA and American Indian Higher Education Consortium (AIHEC) Leadership Group**
  - Washington, D.C.
  - The AIHEC meets annually to provide recommendations to the 1994 Tribal Land-Grant program.

- **September 23, 2016 – Monthly 2501 Grantee Teleconference:**
  - Via Teleconference Service
  - Grantee Teleconferences are held to provide grantees with information regarding the administrative requirements for the awards, update the grantees on upcoming USDA-OAO projects, and answer questions or concerns from the grantee.

- **September 26-27, 2016 – 2nd Annual 2501 Partnership Symposium**
  - Cleveland, Ohio
  - The Annual Symposium provides HEIs and CBOs the opportunity to network and speak with USDA representatives about specific programs affecting their operations. This year, during a networking opportunity, a community-based organization and a Higher Education Institution established a formal partnership through a Memorandum of Understanding to collaborate on outreach and technical assistance for beginning and minority farmers.

- **September 29-30,2016 - Advisory Committee for Beginning Farmers and Ranchers**
  - The last Advisory Committee meeting was conducted in a public forum in Cleveland, Ohio. USDA representatives provided committee members with program overviews and requests for recommendations on program or policy improvement. The committee reviewed the requests for assistance and begin identifying and deliberating on potential recommendations for the Secretary’s review and action.
May 2016 Minority Farmer Advisory Committee
  o The last Advisory Committee meeting was conducted in a public forum in New Orleans, Louisiana. USDA representatives provided committee members with program overviews and requests for recommendations on program or policy improvement. The committee reviewed the requests for assistance and begin identifying and deliberating on potential recommendations for the Secretary’s review and action.

March 2016 USDA/1890 Taskforce Meeting
  o The USDA/1890 TaskForce met in a public forum at the Jaime L. Whitten Building, in Washington, DC., the meeting was attended by the 1890 Presidents, Agriculture Deans, and Research Directors. The objective of the meeting was continue work on the Centers of Excellence which promote and expand USDA’s partnership with the 1890 Land-Grant Universities.
  o The meeting was a collaborative effort to identify and obligate departmental funding for the 5 Centers of Excellence joint efforts with other USDA Agencies and the 1890 Institutions.
  o Through the work of OAO, USDA Agencies renewed funding for the 1890 Centers of Excellence in excess of $1.6million

V.  Top Issues

Hot Topics

1. There continues to be a high level of demand by USDA constituents for grant funding associated with the OASDVFR program. The overall funding for the program was as high as $20 million annually but was reduced to $10 million with the enactment of the 2014 Farm Bill. Along with reducing the funding level for the program, the Farm Bill also added Veterans as an eligible group to receive associated grant funds. These changes have resulted in increased competition for the OASDVFR financial assistance. In FY 2014, the program received 262 applicants, with only 62 receiving funding. While in FY 2015, the program received 165 applicants, with only 54 receiving funding. The continued demand for the program and high number of applications has resulted in increased questions from Congress and constituents concerning the program’s size and scope.

2. Converting the 2501 regulation (7 CFR Part 2500) from an interim rule into a final rule. Action to complete the conversion of the 2501 regulation brings the program into compliance with the new guidelines governing Federal Grants programs. Completion of the conversion will enable the program to continue to serve traditionally underserved communities.

3. Deployment of the 2501 Grants Management system into the EzFed Grants Management system. The EzFed Grants Management system will streamline the
United States Department of Agriculture  
2016 Presidential Transition  
Office of Advocacy and Outreach (OAO)

business process for applicants and USDA staff; shortening the amount time it now takes to complete the grant process.

4. Since the establishment of OAO following the 2008 Farm Bill, the Office has been tasked with an expansive set of responsibilities for outreach and coordination on behalf of the Department. In addition, recent audit findings have identified some operational challenges for OAO that may potentially be addressed through a review and comparison of the responsibilities and resources available to implement them. Consideration may be needed as to understanding this comparison of available resources and existing responsibilities to ensure that OAO can best support USDA to improve service delivery and responsiveness to small, beginning, and socially disadvantaged producers and farmworkers.

Timeline announcement anticipated

1. Converting the regulation – March 2017
2. EzFed Grants Management system – March 2017
3. BFR Advisory Committee Recommendation – June 2017
4. Announcement of the 2017 Notice of Funding Opportunity – March 2017

WHAT WE DO: OUR MISSION
The Office of the Assistant Secretary for Civil Rights’ (OASCR) mission is to provide leadership and direction for the fair and equitable treatment of all USDA customers and employees while ensuring the delivery of quality programs and enforcement of civil rights. OASCR ensures compliance with applicable laws, regulations, and policies for USDA customers and employees regardless of race, color, national origin, sex (including gender identity and expression), religion, age, disability, sexual orientation, marital or familial status, political beliefs, parental status, protected genetic information, or because all or part of an individual’s income is derived from any public assistance program.

WHO WE ARE: OUR WORKFORCE
OASCR employs 134 staff all located at the USDA Headquarters Offices in Washington, DC.

WHO WE SERVE: OUR CONSTITUENTS
Our staff works internally with USDA agencies and employees and externally with customers across the United States to ensure fair and equitable treatment is afforded to all.

KEY UPCOMING DECISIONS
OASCR’s top three initiatives for implementation within the first 30 – 60 days of the new administration are as follows:

- Ensure agency funding is timely provided to OASCR for the cost of investigations and adjudications for their agency employment complaints to prevent sanctions.
- Provide civil rights training to all new on boarded political appointees; and
- Ensure civil rights has a separate goal section in the next Department-wide Strategic Plan.

BUDGET HIGHLIGHTS FY 2016
- Office of Civil Rights: $24,070,000
- EEO Investigations: $800,000
- Reimbursements: $600,000
- Administrative Solutions Project: $3,000,000

*The numbers above represent all available funds and not just budget activity from appropriations.

The Office of Civil Rights’ budget has remained constant since FY 2015 with increases to address IT security and training initiatives.
I. Organizational Overview

Agency’s Mission/Strategic Plan

OASCR’s mission is to provide leadership and direction for the fair and equitable treatment of all USDA customers and employees while ensuring the delivery of quality programs and enforcement of civil rights. OASCR ensures compliance with applicable laws, regulations, and policies for USDA customers and employees regardless of race, color, national origin, sex (including gender identity and expression), religion, age, disability, sexual orientation, marital or familial status, political beliefs, parental status, protected genetic information, or because all or part of an individual’s income is derived from any public assistance program. (Not all bases apply to all programs.)

OASCR has established the following three strategic goals for FY 2016 – 2020:

GOAL 1: Improve civil rights complaints processing for internal and external customers in keeping with Federal laws, mandates, and Departmental Regulations and guidelines.

GOAL 2: Engage leadership in preventing workplace conflict and support conflict management at the earliest stage possible.

GOAL 3: Demonstrate effective engagement within USDA by ensuring all USDA employees have the necessary resources to support the civil rights of all employees and customers of USDA.

The expected outcomes for Strategic Goal 1 are:
1. Civil rights complaint processes meet statutory and regulatory mandates;
2. Timeframes for civil rights complaint processing are consistent with statutory and regulatory requirements;
3. The inventory of complaints has been reduced and is maintained at a manageable level;
4. Improve reporting mechanisms and access to data through technology solutions; and
5. Improve branding of Conflict Complaints Division

The expected outcomes for Strategic Goal 2 are:
1. Participate in civil rights activities to increase awareness of ADR techniques;
2. Establish effective practices to mitigate conflict in the workplace;
3. Improve ADR training and leadership development;
4. Increase utilization of ADR;
5. Provide fair, efficient, and high quality processes for resolving workplace disputes; and
6. Provide organizational climate assessments and focus group facilitation to assist agencies in overcoming workplace challenges.
The expected outcomes for Strategic Goal 3 are:
1. Hold employees and leadership accountable for fair and equitable treatment of employees and customers;
2. Improve agencies’ implementation of discrimination complaint settlement agreements and use the results of compliance reviews;
3. Evaluate program effectiveness, determine challenges, and develop solutions;
4. Renew departmental regulations, prepare Civil Rights Impact Analysis (CRIA), increase CRIA training, monitor LEP compliance, and provide oversight for REG data collection, and prepare annual reports (No Fear Act, Age Report, and Farm Bill); and
5. Monitor Civil Rights Practitioner Training.

The OASCR Strategic Plan can be found at: https://www.ascr.usda.gov/oascr-strategic-plan-fy-2016-2020.

Key mission delivery performance measures

Key Performance Measure and Targets:

OASCR processes employment and program discrimination complaints for all of USDA employees and customers; provides training to all USDA employees; revises agency regulations, reorganizations, policies, and directives; conducts department-wide compliance reviews; serves as the primary office for conflict management; and ensures completion of mandatory certifications and accreditations are completed, which is used by most civil rights staff within USDA.

Organization’s History

From 1999 to 2002, the Office of Civil Rights, led by a Director (SES) was under Departmental Administration and the Assistant Secretary for Administration.

Section 10704 of the Farm Security and Rural Investment Act of 2002, Public Law 107-171, authorized the Secretary of Agriculture to establish the new position of Assistant Secretary for Civil Rights (ASCR). In April 2003, the first Assistant Secretary for Civil Rights was named, reporting directly to the Deputy Secretary of Agriculture.

On July 12, 2005, the then Office of Civil Rights was reorganized to become the Assistant Secretary for Civil Rights mission area to include: the Office of Outreach, the Secretary’s Diversity Council, the 1890 Task Force and the Conflict Prevention and Resolution Center.

On April 27, 2007, OASCR created the Office of Diversity and Inclusion and renamed the Office of Civil Rights the Office of Adjudication and Compliance.

Section 14013 of the 2008 Farm Bill, USDA established the Office of Advocacy and Outreach (OAO), which is housed under the Assistant Secretary for Administration. Outreach and diversity functions and duties previously in the Office of the Assistant Secretary for Civil Rights (OASCR) were transferred to OAO.

On October 1, 2009, OASCR was realigned into the newly created Departmental Management, led by the Assistant Secretary for Departmental Management. The ASCR reported to the Assistant Secretary for Departmental Management.

In November 2011, the Secretary of Agriculture in a memorandum realigned the ASCR to the Office of the Secretary. On July 30, 2012, OASCR reorganized to create a Corporate Services Division, Employment Investigations Division, and Office of Compliance Policy, Training and
United States Department of Agriculture
2016 Presidential Transition
Office of the Assistant Secretary for Civil Rights (OASCR)

Cultural Transformation Division. In addition, the Associate Assistant Secretary for Civil Rights was added back into the organizational structure.

DUTIES OF ASSISTANT SECRETARY OF AGRICULTURE FOR CIVIL RIGHTS.—The Secretary may delegate to the Assistant Secretary for Civil Rights responsibility for—“(1) ensuring compliance with all civil rights and related laws by all agencies and under all programs of the Department; “(2) coordinating administration of civil rights laws (including regulations) within the Department for employees of, and participants in, programs of the Department; and “(3) ensuring that necessary and appropriate civil rights components are properly incorporated into all strategic planning initiatives of the Department and agencies of the Department.”

In April 2009, Secretary Vilsack sent a memo to all USDA employees calling for "a new era of civil rights" for the Department. He emphasized that USDA would have zero tolerance for any form of discrimination. He also directed OASCR to lead a comprehensive program to improve USDA’s record on civil rights and move us into a new era as a model employer and premier service provider.

Biographies of career staff in key leadership positions

Winona Lake Scott  
Associate Assistant Secretary for Civil Rights  
202-401-3648,  Winona.Scott@ascr.usda.gov

Winona Lake Scott began her tenure as Associate Assistant Secretary for Civil Rights in December 28, 2013. Winona has over 20 years of experience in leadership at federal, state, and local levels in civil rights, employment and equal opportunity law, training and development, policy, strategic planning, budgeting, communications, and compliance.

She began her career in D.C. Government with the D.C. Office of Human Rights and left that agency as the Associate Director with a Certificate in Public Management from George Washington University. From Brookings Institution, Winona received a Certificate in Public Leadership and from Harvard University’s Kennedy School of Government, certification as a Senior Executive Fellow.

Prior to starting her career with the U.S. Department of Agriculture’s Office of Civil Rights in 2002, Ms. Scott served as the Director of the Fair Employment Council of Greater Washington and later self-employed as an independent contractor. Winona is currently the Associate Assistant Secretary for Civil Rights in the Office of the Assistant Secretary for Civil Rights and is responsible for providing leadership and direction for the fair and equitable treatment of all USDA customers and employees while ensuring the delivery of quality programs and enforcement of civil rights.

She graduated from the University of Massachusetts at Amherst with a B.A. in History and Seton Hall Law Center in Newark, NJ with a Juris Doctor degree. She serves as a volunteer member of the Washington, DC Executive Council of AARP, 2016 graduate of Leadership Greater Washington, the D.C. State Advisory Committee for the U.S. Commission on Civil Rights, and is a member of several social organizations.

Carl Martin Ruiz  
Director, Office of Adjudication  
202-720-5212,  Carl-Martin.Ruiz@ascr.usda.gov

Mr. Carl-Martin Ruiz serves as the Director of the Office of Adjudication, Office of the Assistant Secretary for Civil Rights (OASCR) at the U.S. Department of Agriculture (USDA), in Washington, DC. He has been a member of the Career Senior Executive Service since June 2007, and was appointed the Director of Adjudication in October 2009. In this position he is responsible for the intake, investigation, and adjudication divisions of both employment and program complaints for all of USDA.
From June 2007 to October 2009, Mr. Ruiz worked as the Director of Outreach and Diversity with OASCR, where he provided leadership, oversight and evaluation for USDA’s outreach and land-grant institution educational efforts. He was also responsible for managing the Department’s Diversity Program and in building the platform for the USDA’s highly successful workplace diversity and inclusion initiatives.

From October 2010 to September 2011, Mr. Ruiz served a detail assignment as Acting Assistant Administrator, Office of Outreach, Employee Education and Training, Food Safety and Inspection Service, USDA, Washington, DC. During this period, he led numerous food safety outreach efforts, agency mission-critical and science-based food safety training, as well as organizational and employee development training.

He also served as Special Advisor to the Acting Deputy Assistant Secretary for Civil Rights during the Presidential transition, where he was instrumental in guiding the new Administration in their implementation of the 2008 Farm Bill and USDA’s outreach initiatives. His efforts effectively reached Tribal Nations, national advocacy groups, socially disadvantaged and limited resource farmers and ranchers, small and beginning farmers and ranchers, farmworkers, community and faith-based organizations, land-grant institutions, and other stakeholders.

Prior to his work with the USDA, Mr. Ruiz was the Civil Rights Director with the U.S. Department of Transportation’s (DOT) Federal Railroad Administration, where he was responsible for implementing the provisions of Title VI of the Civil Rights Act of 1964, as amended, affecting recipients of federally assisted and federally conducted programs, such as Amtrak, and Environmental Justice efforts impacting low income and minority-based communities and Tribal Nations. He coordinated the provisions of the Americans with Disabilities Act of 1990, and helped design and advance DOT’s successful rail initiatives on accessibility and reasonable accommodations for the disabled and elderly.

In addition, he was responsible for implementing all provisions of Title VII of the Civil Rights Act of 1964, as amended, affecting equal opportunity, employment discrimination, affirmative employment, and alternative dispute resolution. He also managed the agency’s diversity and inclusion program and the minority serving institutions program.

Mr. Ruiz has held key positions with the U.S. Department of Army. He was Director of Equal Opportunity Programs (civilian and military) with the U.S. Army Garrison, Fort Belvoir, VA, and with the U.S. Army Engineer Center and Fort Leonard Wood, MO. Other positions with the U.S. Army include Alcohol and Drug Control Officer, Civilian Program Coordinator, and Professional Psychological Counselor. In his work with the U.S. Army he developed prototype initiatives in combat readiness. An Army veteran himself, Mr. Ruiz served honorably with the U.S. Army, elite 3/11 Armored Calvary (Black Horse), Reconnaissance Squadron.

Mr. Ruiz is a graduate of Harvard University’s Law School Program on Negotiations, Master in Negotiation’s Course, and the Diplomacy and International Negotiations Course. He graduated from Boston University with a Master’s Degree in Counseling Psychology; Southern
Christian University with an M.A. Degree in Philosophy, and Freed-Hardeman University with a B.S. Degree in Theology and Social Work. He is also a graduate of the Federal Executive Institute, Leadership for a Democratic Society Course, and the Army Management Staff College.

He was born in Piura, Peru, to Mario and Maria Ines Ruiz. He is the second youngest of ten children, and comes from a family with a rich military history. Mr. Ruiz is fluent in three international languages: English, Spanish and German.

D. Leon King
Director, Office of Compliance, Policy, Training and Cultural Transformation
202-720-8106, David.King@ascr.usda.gov

D. Leon King has been with USDA since June 2007. He is the Director of Office of Compliance, Policy, Training and Cultural Transformation and formerly the Deputy Director, Office of Adjudication in the Office of the Assistant Secretary for Civil Rights at the U.S. Department of Agriculture. King has more than 24 years of Federal civilian service and has worked for the Department of Veterans Affairs, the Department of Homeland Security, the Department of Labor, and the Department of Justice as a civil rights practitioner.

As a civil rights practitioner, Mr. King served at various times as a counselor, trainer, and liaison for EEO field personnel, compliance officer and director of training. A native of Winston-Salem, North Carolina, Mr. King earned a Bachelor’s and Master’s degree from North Carolina Central University; and a Law Degree from George Washington University, National Law Center.

In 2003, he retired from the U.S. Army Reserve, at the rank of Major, after serving 21 years as a Transportation Officer. During his military service, Mr. King served as a Company Commander, Staff Officer, Executive Officer and Platoon Leader. During much of his military career, he also served as his unit’s Equal Opportunity Officer. Mr. King is a graduate of the Defense Equal Opportunity Management Institute (DEOMI).

Mr. King serves an adjunct professor of History at the Northern Virginia Community College in Woodbridge, Virginia, and has also taught at Graduate School USA, formerly the USDA Graduate School.

Kenneth J. Baisden
Director and CIO, Data and Records Management Division
202-260-1897, Kenneth.Baisden@ascr.usda.gov

Kenneth J. Baisden serves as the Director and Chief Information Officer (CIO) for DRMD within OASCR. In this capacity, he oversees the USDA Civil Rights Enterprise System, manages OASCR’s Information Technology (IT) assets, and enforces various IT mandates in support of USDA’s e-Government mission.
Additionally, Ken is responsible for safeguarding and managing the department’s employment and program complaints non-electronic files. He also supervises OASCR’s Information Research Services, which is responsible for responding to telephone and mail inquiries worldwide. This unit handles over 6000 employment and USDA program complaint inquiries annually.

Ken attended college and graduate school in New York. He also served honorably in Southeast Asia with the U.S. Army. As a visionary and pragmatist, his overriding priority is to provide real time IT support to OASCR staff offices, USDA customers and employees. Ken’s greatest asset is his staff.

Candace B. Glover
Director, Conflict Complaints Division
202-720-3680, Candace.Glover@ascr.usda.gov

Candace B. Glover is Director of the Conflict Complaints Division within the Office of the Assistant Secretary for Civil Rights in Washington, DC. In this capacity, she is primarily responsible for the overall direction, management, and processing of conflict of interest and highly sensitive Equal Employment Opportunity (EEO) complaints of discrimination for USDA. Prior to joining CCD, Ms. Glover served as a Senior Adjudicator and Team Lead in the Employment Adjudication Division, where she oversaw the adjudication of approximately 500 EEO complaints annually, through the issuance of final agency decisions, final orders, and settlement agreements.

Ms. Glover is skilled in all aspects of the informal and formal EEO complaint process and frequently trains managers and employees on complaint processing trends. She is also certified as an EEO Counselor and Investigator, and has drafted countless final agency decisions.

Ms. Glover joined USDA in 2010 as a member of the Program Complaints Task Force. Prior to joining USDA, she worked as an attorney for White & Case, LLP, in Washington, DC. Ms. Glover also has experience working on Wall Street as an Investment Banking analyst and a financial consultant.

Ms. Glover is a native of Washington, DC. She attended Spelman College in Atlanta, GA, where she graduated magna cum laude in 2001 with a Bachelor of Arts degree in Economics. She is also a graduate of the University Of Virginia School Of Law, where she received her Juris Doctor (JD) in 2007. Ms. Glover is an active member of District of Columbia bar and Alpha Kappa Alpha sorority.

Cyrus Salazar
Director, Early Resolution and Conciliation Division
202-720-4040, Cyrus.Salazar@ascr.usda.gov

Cyrus Salazar serves as the Director of the Early Resolution and Conciliation Division within the Office of the Assistant Secretary for Civil Rights. In this capacity, he oversees the USDA alternative dispute resolution (ADR) policy for employment and program cases. Mr. Salazar joined the USDA from the Department of the Air Force where he served as the Air Force Equal
Opportunity Program Manager and Deputy Director of Air Force Equal Opportunity. He developed and administered Air Force-wide policy regarding military and civilian requirements for over 300,000 Airmen. His duties included developing and overseeing policy guidance for complaint processing, equal opportunity training, and organizational climate assessment.

Biographies of political staff in key leadership positions

Joe Leonard, Jr. Ph.D.
Assistant Secretary for Civil Rights
202-720-3808, joe.leonard@osec.usda.gov

U.S. Department of Agriculture (USDA) Secretary Tom Vilsack swore in Dr. Joe Leonard, Jr., as Assistant Secretary for Civil Rights on April 6, 2009. Nominated by President Barack Obama and confirmed by the U.S. Senate on April 2, 2009, Assistant Secretary Leonard is the longest serving Assistant Secretary for Civil Rights in USDA’s history and the longest serving African-American Senate confirmed appointee ever at USDA.

Under Assistant Secretary Leonard’s leadership, USDA was able to accomplish several historic accomplishments. To address long-standing allegations of past discrimination, Assistant Secretary Leonard spearheaded an effort to settle large-scale class-action lawsuits with Native American and African American farmers and ranchers and established a voluntary claims process for women and Hispanic farmers and ranchers, which provided payments of more than $2.5 billion combined and over $118 million in debt forgiveness. Notably, during Dr. Leonard’s tenure, there has been an increase in civil rights trainings within USDA nationwide, a 90% decrease in farmer complaints nationwide, a 9% increase in the number of African-American farmers and a 21% increase in the number of Hispanic farmers in the United States.

Additionally, in 2013, the Office of the Assistant Secretary for Civil Rights (OASCR) provided unprecedented protections for Gender Identity and Gender Expression for conducted programs at USDA. And, more recently, in 2014, OASCR issued a Departmental regulation prohibiting discrimination on the basis of National Origin affecting persons with limited English proficiency in assisted and conducted programs.

Under Secretary Vilsack’s leadership, and the tremendous efforts of the Office of the Assistant Secretary for Civil Rights, USDA has made a comprehensive cultural transformation. USDA’s Senior Executive Service (SES) now exceeds the government-wide workforce in 9 out of 10 diversity categories. Most notably, the percentage of minorities and women in the SES have increased by 88% and 38%, respectively. These achievements have earned USDA recognition as one of the most diverse groups of executives in the entire federal government.

Before joining USDA, Assistant Secretary Leonard served as Executive Director of the Congressional Black Caucus (CBC) under the leadership of Representative Carolyn Cheeks Kilpatrick (D-MI). While at the CBC, Leonard managed the daily activities of the Caucus and helped guide the legislative policy for its 43 congressional members.
Prior to his role at the CBC, Assistant Secretary Leonard served as the Executive Director of the Black Leadership Forum, an umbrella organization of 32 member groups that together work to develop and implement progressive public policies for social change. He has also served as the Washington, DC Bureau Chief of the Rainbow/PUSH Coalition and Director of the Arthur Fleming Institute of the Center for Policy Alternatives.

Assistant Secretary Leonard is a native of Austin, TX. He holds a Ph.D. in American history with a specialization in civil rights history from Howard University, Washington, DC; an M.A. degree from Southern University, Baton Rouge, LA; and a B.A. degree from Huston-Tillotson University in Austin, Texas. Assistant Secretary Leonard and his wife, Dr. Natasha Cole-Leonard are proud parents of a 13-year-old son, Cole.

Frederick Pfaeffle Arana
Deputy Assistant Secretary for Civil Rights
202-720-3808, Frederick.pfaeffle@osec.usda.gov

Frederick Pfaeffle Arana began his tenure as Deputy Assistant Secretary for Civil Rights at the United States Department of Agriculture (USDA) in March 2014. Prior to his current position, Mr. Pfaeffle was appointed by the White House as Principal Deputy General Counsel of the USDA, one of the largest agencies in the Federal government, with presence in 88 countries and with approximately 100,000 employees.

Mr. Pfaeffle Arana has been instrumental in leading efforts with the U.S. Department of Justice to establish a $1.33 Billion women and Hispanic claims process to resolve long-standing discrimination claims by women and Hispanic farmers, and ranchers against USDA. He also worked to resolve multi-billion dollar class-action civil rights litigation filed by African-Americans and Native-Americans. Furthermore, Mr. Pfaeffle leads teams responsible for administrative investigations and adjudication of thousands of civil rights complaints filed against the United States claiming employment discrimination and discrimination in the delivery of USDA programming. Other functions include compliance with civil rights laws and regulations and establishing civil rights policy on a national scale.

As Principal Deputy General Counsel, he assisted the General Counsel in managing the Office of the General Counsel which employs over 200 lawyers nation-wide. His responsibilities included providing legal advice to the Secretary of Agriculture and his sub-cabinet and supervising 3 Divisions and 2 Regions. In addition to his Civil Rights work, his areas of supervision included legal services in Natural Resources and Environment, Rural Development, Anti-trust, International Trade, Finance, Insurance, and Food and Nutrition Services such as the Food Stamp and School Lunch programs.

Mr. Pfaeffle Arana was born in Mexico City of Nicaraguan parents and lived in Latin America until moving to Miami to attend High School, where he became a U.S. Citizen. He attended the University of Florida and Florida International University and practiced as a CPA at a major international accounting firm until entering Law School at the University of Southern
California. He began his career in the private sector at a major California law firm in the areas of Real Estate, land use, and environmental law.

Prior to joining USDA in 2010, Mr. Pfaeffle Arana held the position of Principal Deputy County Counsel in Los Angeles County where he was responsible for legal work in the areas of Public Works, Solid Waste, Hazardous Waste and Water. He was active in the community serving as staff counsel to the Christopher Commission Investigating the LAPD following the LA riots and serving for a U.S. Senator as International Monitor to Presidential Elections in Nicaragua. Mr. Pfaeffle Arana also served as member to various boards, including the Mexican American Bar Foundation.

**Jillian Semaan**  
**Chief of Staff, Office of the Assistant Secretary for Civil Rights**  
202-260-3979, jillian.semaan@osec.usda.gov

Jillian Semaan currently serves as Chief of Staff to the Assistant Secretary for Civil Rights. She previously held the position of Senior Advisor to the Assistant Secretary for Civil Rights where much of her focus was on outreach. She is the Director of the Community and School Garden Pilot Initiative with a focus on Urban America, disadvantaged communities and childhood nutrition.

She joined the Obama campaign in 2008 as the director of scheduling/logistics for athletes and entertainers. Following the campaign she joined the presidential Inauguration committee as a talent liaison. A native of Detroit and proud Spartan, she worked for Governor Jennifer Granholm of Michigan before joining USDA as Secretary Vilsack's deputy scheduler in early 2010. She also ran congressional and city council campaigns in Michigan, and was a fundraiser for the political action committee of Senator Joe Biden, D-Del

**Ashlee Davis**  
**Senior Advisor to the Assistant Secretary for Civil Rights**  
202-260-8475, Ashlee.davis@osec.usda.gov

Ashlee J. Davis currently serves as Senior Advisor to the Assistant Secretary for Civil Rights at the U.S. Department of Agriculture. In this role she is the lead advisor for the Office of Adjudication and also directs the office’s outreach and engagement efforts. She also serves as the Director of the National LGBT Rural Summit Series where she leads the #RuralPride campaign with two national civil rights organizations. Previously, she served as White House Liaison at the U.S. Department of Agriculture where she was the principal liaison between the Office of the Secretary and the Executive Office of the President at the White House. As White House Liaison she managed the political appointment process for USDA’s non-career employees in the DC region and all 50 states.

Before joining USDA, Ms. Davis served in the White House as the Staff Assistant to the Special Assistant to the President for Presidential Personnel. In this role she assisted with the
personnel decisions and processes for Energy and Environment federal agencies, including five Cabinet-level agencies and two Executive Offices of the President.

Prior to her role at the White House, she was a Legal & Policy Fellow for the moderate think tank Third Way where her portfolio included social policy issues such as LGBT equality, education and immigration. Ms. Davis also served as a Holley Law Fellow for The National Gay & Lesbian Task Force and as a Law Clerk for University Legal Service of Washington, D.C. where she focused on the protection and advocacy of individuals with mental and physical disabilities. She is a native of Nashville, TN and holds a J.D. from Howard University School of Law and a B.A. in Politics and Philosophy from the University of Pittsburgh.

Danielle Perry Lewis
Special Advisor to the Assistant Secretary for Civil Rights
202-260-3987, Danielle.lewis@osec.usda.gov

Danielle Perry Lewis serves as the Special Advisor in the Office of the Assistant Secretary for Civil Rights, a position she has held since January 11, 2016. Before joining the Administration, Danielle was a Congressional Aide in the Office of Congressman Chris Van Hollen, where she managed a portfolio that includes social security, healthcare and civil rights issues. Prior to her work on Capitol Hill, Danielle practiced law at the Cook County Forest Preserve Legal Department.

Danielle holds a Bachelor of Arts in Political Science from Howard University and a Juris Doctor from the Howard University School of Law. She has also served as an Adjunct Professor at the University of the District of Columbia Community College and guest lecturer at Bowie State University. She has served on the Howard University Board of Trustees and is a member of several social organizations. Danielle is a native of Chicago, Illinois.
Organizational Budget and Financial Management

At the beginning of fiscal year 2010, OASCR was realigned under Departmental Management as a result of a reorganization. The fiscal year (FY) 2009 budget of $33,308,385 included Greenbook activities, and the salaries of two OASCR divisions removed from the Assistant Secretary for Civil Rights’ authority. Additionally, USDA agencies were responsible for managing contracts to process investigations of employment discrimination. Resulting budgetary changes are as follows:

- OASCR’s FY 2010 budget decreased to $24,922,000 and has remained within that range over the last few years. FY 2016’s budget is $28,470,000.
- In FY 2012, OASCR received authority to process all employment investigations for USDA which increased the reimbursable line item.
- In FY 2013 OASCR’s budget was subject to a decrease of $1,056,000 for sequestration.
- Beginning FY 2015 OASCR was appropriated $2,471,000 for rent linked to leased GSA space. (Prior to FY 2015 the rent payment came from a USDA Central Bill account and was not charged to staff offices).
- From FYs 2009 – 2016, OASCR has requested budget increases to conduct civil rights training nationally; upgrading the Civil Rights Enterprise System used to track complaints; and to coordinate outreach activities controlled by USDA agencies.

Enterprise Workforce Data

Workforce FY 2009-FY 2016

GS Level Distribution

GS 13- GS 15, 63%
GS 8- GS 12, 25%
GS 5 - GS 7, 7%
ES/SES, 2%
• OASCR employs a workforce of 135* employees of which the following are full-time and part-time:
  o Full-time: 134 employees
  o Part-time: 1 employee

* OASCR is in the process of filling approximately 20 vacancies which will increase the staffing level. The funding of the vacancies are done through appropriated and reimbursement funding.

• OASCR employs additional seasonal employees to provide support during busier months. In the spring/summer, four 1890 scholars return to work as well as students from the District of Columbia Summer Youth Employment Program.

• OASCR employs two (2) Schedule A employees. Schedule A employees are temporary appointments, which are made in increments of up to one year each for a total of up to four years of service. See Schedule A 316.402(a) for these appointments.

• Of our total workforce, 39 employees (28 percent) are eligible to retire within the next year.
• Our headquarters is located in Washington, D.C., which houses 100% of our workforce
II. Policies and Regulations

Statutory Authorities

- **Farm Security and Rural Investment Act of 2002 (Farm Bill)** PL 107–171, May 13, 2002, 116 Stat 134, Section 10704, establishment of the Office of the Assistant Secretary for Civil Rights

- **Title VI of the Civil Rights Act of 1964**, 42 U.S.C.A. § 2000d prohibits discrimination based on race, color, or national origin in programs or activities receiving federal financial assistance;

- **Title VII of the Civil Rights Act of 1964**, 42 U.S.C. § 2000e, et seq., which prohibits employment discrimination based on race, color, religion, sex, or national origin;

- **Age Discrimination Act of 1975**, 42 U.S.C.A. § 6102 prohibits discrimination on the basis of age in programs and activities receiving federal financial assistance;

- **Equal Pay Act of 1963 (EPA)**, 29 U.S.C.A. § 206 which protects men and women who perform substantially equal work in the same establishment from sex-based wage discrimination;

- **Age Discrimination in Employment Act of 1967 (ADEA)**, 29 U.S.C.A. § 621 which protects individuals who are 40 years of age or older;

- **Sections 501 and 505 of the Rehabilitation Act of 1973**, 29 U.S.C.A. § 701 et seq. which prohibit discrimination against qualified individuals with disabilities who work in the federal government;

- **Section 504 of the Rehabilitation Act of 1973**, 29 U.S.C.A. § 701 et seq. prohibits discrimination against individuals with disabilities. Section 504 ensures that the child with a disability has equal access to an education;

- **Title IX of Civil Rights Act of 1964**, 20 U.S.C.A. § 1681 prohibits discrimination on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance;

- **Executive Order 13166 (LEP)**, 65 FR 50121"Improving Access to Services for Persons with Limited English Proficiency";

- **7 C.F.R. 15 Subpart A** -prohibits discrimination in Federally-Assisted programs;

- **7. C.F.R. 15 Subpart B**, -prohibits discrimination in Federally-Conducted programs;
United States Department of Agriculture
2016 Presidential Transition
Office of the Assistant Secretary for Civil Rights (OASCR)

- C.F.R. Part 15d-Non Discrimination in Programs or Activities Conducted by the United States Department of Agriculture July 7, 2014.

- **DR 4300-04 Civil Rights Impact Analysis**; Department’s regulation which governs Civil Rights Impact Analysis (CRIAs);

- **DR 1512-001 Regulatory Decision Making**; provides a consistent process for the development and review of all regulatory actions;

- **DR 4330-005** Prohibition Against National Origin Discrimination Affecting Persons with Limited English Proficiency in Programs and Activities Conducted by USDA; and

**Important Policies and Regulations**

Departmental Regulations (DR)

- DR 4330-005: Prohibition Against National Origin Discrimination Affecting Persons with Limited English Proficiency in Programs and Activities Conducted by USDA - June 2013;
- DR 4300-003 Equal Opportunity Public Notification Policy – June 2, 2015;
- DR 4330-003Nondiscrimination in USDA- Conducted Programs and Activities – October 5, 2015;
- DR 4120-001 Annual Departmental Civil Rights Training – June 14, 2016;
- 7 C.F.R. Part 15d-Non Discrimination in Programs or Activities Conducted by the United States Department of Agriculture July 7, 2014.

Policies

- Civil Rights Policy Statement—signed and posted on June 8, 2016;
- Alternative Dispute Resolution Policy—signed and posted on June 6 2015; and

Since the beginning of FY 2016, OASCR has reviewed and cleared off on 28 significant regulations.
Overview of the policy/regulation review process

OASCR recommends and develops Departmental plans for the conduct of regular and special Civil Rights compliance reviews and investigations of agency civil rights offices and staffs as well as federally-conducted and federally-assisted programs and activities. OASCR evaluates the employment activities of USDA agencies to identify systemic discrimination and assist Agency managers in carrying out the Secretary’s EEO and civil rights program and activities.

In addition, OASCR develops annual civil rights performance plans of agency heads and civil rights staff office directors; evaluates civil rights performance with respect to agency heads and civil rights staff office directors and advises the Director concerning such performance; and provides technical assistance to agency civil rights liaisons and advise the Director on rating the EEO/Civil Rights performance element of agency heads and civil rights staff office directors.

Lastly, all statutory regulations go through a USDA clearance process if deemed significant and are processed in accordance with the procedures implemented by the Office of Budget Program Analysis (OBPA). DR 1512-001, Regulatory Decision Making Requirements, is the USDA authority for issuing regulations.

GAO and OIG Audits

Review of the Office of the Assistant Secretary for Civil Rights’ Oversight of Agreements Reached in Program Complaints (PDF), (Report No. 60601-0001-23, Issued August 2012).

OIG Audit not listed on OIG website: Review of Expenditures Made by the Office of the Assistant Secretary for Civil Rights (Report No. 50099-0001-12, Issued September 2015)

III. Congressional Relations and Issues

Overview

OASCR leadership met with Congressman Elijah E. Cummings’ staff in November 2015 with respect to USDA’s Equal Employment Opportunity (EEO) program. The meeting prompted a follow-up letter to USDA Secretary Tom Vilsack dated January 12, 2016, to address questions and action items on USDA’s fiscal year (FY) 2014 MD-715 aggregate Report submission; and why USDA had not filed aggregate MD-715 Reports for FYs 2011, 2012, and 2013.

- The Assistant Secretary for Civil Rights issued a memorandum to USDA Agency Heads requesting FYs 2015 and 2016 MD-715 Parts H and I Action Items. To ensure the requests
were understood, OASCR held quarterly action oriented MD-715 work group meetings and requested status updates on their respective Actions Items.

- A follow-up meeting was held with Congressman Cummings’ staff in early September 2016 to provide an update on the FY 2014 Parts H and I Action Items with the “Target Completion Date” of September 30, 2016, or earlier and a progress of all other Action Items.

- In an October 6, 2016, meeting with Congressman Cummings’ staff, OASCR indicated the majority of the Action Items were met and remaining items would be satisfied by September 30, 2017.

IV. **Internal and External Stakeholders**

**Important relationships with other Federal Departments or organizations**

1. **U.S. Department of Justice (DOJ)** – OASCR is a crucial member of DOJ’s Title VI Working Group which provided assistance with the development of USDA’s Limited English Proficiency regulation and guidelines and collaborates with OASCR on substantive Title VI program complaint issues.

2. **U.S. Equal Employment Opportunity Commission (EEOC)** – USDA and OASCR are required to annually submit MD-715 and 462 Reports; OASCR collaborates with the EEOC on all employment complaint matters and attends monthly EEO Director Meetings to discuss state of the art initiatives relating to employment discrimination.

3. **U.S. Department of Housing and Urban Development (HUD)** – OASCR has a Memorandum of Understanding with HUD regarding the processing of program complaints under the Fair Housing Act.

4. **U.S. Department of Health and Human Services (HHS)** – USDA and OASCR are members of the HHS Federal Interagency Health Equity Team and recently hosted the roundtable titled, “The Cross-Sector Collaboration and Resource Alignment for Health Equity: A Convening of the Partnership for Action to End Health Disparities,” to address the scope and complexity of health disparities through action on the social determinants of health—from housing and food security/access to rural economic development and access to health care.

5. **American Federation of Government Employees (AFGE) Local 3147** – AFGE represents OASCR bargaining unit employees. This is a collaborative relationship to ensure all tenets of the Collective Bargaining Agreement are fulfilled.

6. **Major Services** – OASCR is a customer of the Office of Human Resources Management, the Office of the Chief Information Officer and the Office of the Chief Financial Officer. OASCR provides IT data base access to some USDA agency civil rights staff.
Stakeholder group overview

OASCR engaged with internal or external stakeholders through interagency agreements (Federal agencies only), cooperative agreements (non-governmental organizations, universities, colleges) and non-monetary partnerships. The following is a list of those relationships:

1. Hackathon for Health & Nutrition – Interagency Agreement with ARS to fund the event
2. Landowners Association of Texas – Cooperative Agreement
   - Implement a program to provide outreach, education, and technical assistance to socially disadvantaged and veteran farmers and ranchers.
3. Texas Small Farmers & Ranchers Community Based Organization – Cooperative Agreement
   - Plan a project in support of their ongoing outreach mission to the Limited Resource, Socially-Disadvantaged, Historically-Underserved, Beginning Farmers and Ranchers, Veterans, and other minorities in the rural communities in Texas.
   - Provide outreach services by presenting workshops on the civil rights claims process and land loss prevention tools.
5. Federal Asian Pacific American Council (FAPAC) – Cooperative Agreement
   - Initiate cooperative training and outreach project in the Asian American Pacific Islander federal employee community.
   - Provide training and outreach services to minority small farmers and family farms in rural and urban communities.
7. University of Missouri Extension – Cooperative Agreement
   - Provide outreach services to support the local, urban, and community garden initiative on sustainable food while increasing the knowledge and capacity of local schools and communities.
8. National Council of Negro Women, Inc. – Cooperative Agreement
   - Provide outreach services to African American women by teaching them about their property rights.
9. League of Latin American Citizens (LULAC) – Interagency Agreement with Office of Advocacy and Outreach to support LULAC’s annual conference.
10. College/Underserved Community Partnership Program (CUPP) – Interagency Agreement with Office of Advocacy & Outreach to fund CUPP
11. Urban - Ag Academy Conference – Interagency Agreement with Office of Advocacy & Outreach to provide funding for the conference.
13. Cultivating Change Summit – Interagency Agreement with Office of Advocacy & Outreach to sponsor the summit.
• Provide outreach services to communities of color to teach farmers about their property issues.
15. Asian American Government Employees Network – Senior Executive Service-type training provided to an OASCR employee.
16. GovLab Open Data Summer Camp – Interagency Agreement with Office of Advocacy & Outreach to fund the camp.
17. Colorado 4-H Foundation – Cooperative agreement
   • Provide outreach services to support the local, urban, and community garden initiative on sustainable food while increasing the knowledge and capacity of local schools and communities.
18. Washington State University Extension – Cooperative Agreement
   • Provide outreach services to support the local, urban, and community garden initiative on sustainable food while increasing the knowledge and capacity of local schools and communities.
19. Youth and Leaders Living Actively – Cooperative Agreement
   • Provide outreach services to support the local, urban, and community garden initiative on sustainable food while increasing the knowledge and capacity of local schools and communities.
20. Boys Grow Cooperation – Cooperative Agreement
   • Provide outreach services to support the local, urban, and community garden initiative on sustainable food while increasing the knowledge and capacity of local schools and communities.
21. NRCS Strike Force Initiative – Interagency Agreement with NRCS to assist funding these initiatives.
22. Andrew Young YMCA – Cooperative Agreement
   • Assist outreach projects reaching more than 300 youth, adults, and seniors. The concentration is centered on urban farming and community gardening to obtain the adequate knowledge required to be successful apprentices of urban farming.
23. Federation of Southern Cooperatives – Cooperative Agreement
   • Assist in land retention and development, especially for African Americans, but inclusive of all family farmers.
25. True Colors Fund – Partner for LGBT Rural Summits
27. Keys Grace Academy – Cooperative Agreement
   • Provide outreach services to support the local, urban, and community garden initiative to provide sustainable food while increasing the knowledge and capacity of local schools and communities.
28. Broccoli City – Cooperative Agreement
   • Provide outreach services to support the local, urban, and community garden initiative to provide sustainable food while increasing the knowledge and capacity of local schools and communities.
29. Oberlin Community Services – Cooperative Agreement
• Provide outreach services to support the local, urban, and community garden initiative to provide sustainable food while increasing the knowledge and capacity of local schools and communities.

30. Turning Point 180 (Bread for Life Food Pantry) – Cooperative Agreement
• Provide outreach services to support the local, urban, and community garden initiative on sustainable food while increasing the knowledge and capacity of local schools and communities.

31. The Kitchen Community, Inc. – Cooperative Agreement
• Provide outreach services to support the local, urban, and community garden initiative on sustainable food while increasing the knowledge and capacity of local schools and communities.

32. United States Soccer Federation Foundation – Cooperative Agreement
• Provide outreach services to support the local, urban, and community garden initiative on sustainable food while increasing the knowledge and capacity of local schools and communities.

33. Oklahoma Black Historical Research Project, Inc. – Cooperative Agreement
• Provide outreach services to support the agriculture consensus mobilization project.

34. Texas/Mexico Border Coalition – Cooperative Agreement
• Provide outreach services to support the agriculture consensus mobilization project.

35. National Hmong American Farmers, Inc. – Cooperative Agreement
• Provide outreach services to support the agriculture consensus mobilization project.

36. Operation Spring Plant, Inc. – Cooperative Agreement
• Provide outreach services to support the agriculture consensus mobilization project.

37. Northern New Mexico College – Cooperative Agreement
• Provide outreach services to support the agriculture consensus mobilization project.

38. University of Texas Rio Grande Valley – Cooperative Agreement
• Provide outreach services for Hispanics and traditionally underrepresented populations in areas of agriculture, food, natural resources, science, engineering, health and other related disciplines.

39. St. Peter’s African Methodist Episcopal Church – Cooperative Agreement
• Provide outreach services to support the local, urban, and community garden initiative on sustainable food while increasing the knowledge and capacity of local schools and communities.

40. Metro Community Development Cooperation – Cooperative Agreement
• Provide outreach services to support the agriculture consensus mobilization project.

41. New York City Board of Education (P373K Brooklyn Transition Center) – Cooperative Agreement
• Provide outreach services to support the local, urban, and community garden initiative on sustainable food while increasing the knowledge and capacity of local schools and communities.

42. Common Ground Foundation – Cooperative Agreement
• Provide outreach services to support the local, urban, and community garden initiative on sustainable food while increasing the knowledge and capacity of local schools and communities.
Recent engagements with stakeholder groups

OASCR, in collaboration with the National Center for Lesbian Rights and the True Colors Fund, engaged with LGBT rural communities across the country to host the LGBT Summit Series, #RuralPride. Past series stops included:

4. Summit Series Stop 4: Southern University and A&M College in Baton Rouge, LA, on October 9, 2014.
5. Summit Series Stop 5: Resource Center in Dallas, TX, on October 10, 2014.
7. Summit Series Stop 7: Oasis Center in Nashville, TN, on March 29, 2015.
8. Summit Series Stop 8: Omni Atlanta Hotel at CNN Center in Atlanta, GA, on May 26, 2015.
10. Summit Series Stop 10: Millsap College in Jackson, MS, on August 14, 2015.
14. Summit Series Stop 14: Drake University Parents Hall in Des Moines, IA, on August 18, 2016.

The delegations of authority for the Assistant Secretary for Civil Rights (ASCR), 7 C.F.R. § 2.25 (a)(1)(24) was amended on September 29, 2015, to allow the ASCR to award grants and enter into cooperative agreements for the purpose of conducting outreach efforts. OASCR entered into cooperative agreements with non-profit organizations under USDA’s Community Garden Initiative. OASCR assisted several schools and communities by establishing local, urban, and community gardens. These community gardens will provide sustainable food while increasing the knowledge and capacity of local schools and communities. OASCR worked with the following entities:

1. IDEA Public Charter School Monterrey in San Antonio, TX, in 2014.
2. Moss Haven Elementary in Dallas, TX, in 2014.
3. Charles Drew Academy in Houston, TX, on February 23, 2015.
5. KIPP School in New Orleans, LA, on September 17, 2015.
7. Orchard Knob Middle School in Chattanooga, TN, on September 21, 2015.
8. McKissack Middle School in Nashville, TN, on September 22, 2015.
9. Paul Quinn College in Dallas, TX, on October 16, 2015.
10. Frederick Douglass High School in Baltimore, MD, on April 27, 2016.
11. Creative City in Baltimore, MD, on April 27, 2016.
12. Green Street Academy in Baltimore, MD, on April 28, 2016.
13. University of Missouri Extension in St. Louis, MO, on May 1, 2016.
14. Frederick Douglass Academy for Young Men in Detroit, MI, on May 12, 2016.
15. TJ Rusk Middle School in Dallas, Texas, on May 16, 2016.
17. Institute for American Indian Arts in Santa Fe, NM, on August 22, 2016.
19. Alliance at Meek Middle School in Portland, OR, on September 12, 2016.
20. Arminta Elementary School in Los Angeles, CA, on September 18, 2016.
22. Garden Place Academy in Denver, CO, on October 16, 2016.
23. Over 19 locations in Puerto Rico.

V. Top Issues

Hot Topics

1. Agency investigation funding provided in a timely manner
As of January 2013, OASCR has authority over the investigation of all equal employment opportunity (EEO) complaints of discrimination. Prior to that date, USDA agencies controlled their own EEO investigations and managed procurement of Contract Investigators. This practice created disparities in how investigations were billed as well as the quality and timeliness of the investigations. Once OASCR took over the investigation process, agencies were required to reimburse OASCR for the investigation of their respective complaints. OASCR has had to use discretionary funds to pay for EEO investigations when agencies have not reimbursed OASCR in a timely manner. OASCR is working with the OCFO to create an institutionalized reimbursable process to ensure the investigation costs are funded timely. This will ensure USDA is not subjected to sanctions from the EEOC.

2. Civil Rights Training
In 2016, Secretary Tom Vilsack designated August as “Civil Rights Month at USDA.” In response to the Secretary’s charge, OASCR conducted training on critical civil rights subjects for selected agencies and staff offices across the nation. Over 1000 USDA supervisors and non-supervisory employees participated in the trainings. OASCR seeks to continue this proactive measure in 2017.

3. Community Garden Initiative
The School and Community Garden Initiative has created over 50 gardens throughout the country. The gardens transform the lives of school children and their parents. Eating habits have changed, social behaviors have been positively enhanced, science grades
have improved and interest in agriculture has increased. OASCR seeks to continue this effort in 2017 with additional funding that has been appropriated in the budget. This outreach effort directly links to OASCR’s mission and delegated authority to provide assistance to customers residing in economically distressed communities.

Office of the Chief Economist (OCE) Fact Sheet

WHAT WE DO: OUR MISSION

The Office of the Chief Economist (OCE) advises the Secretary on the economic implications of Department policies, programs, and proposed legislation. It serves as the focal point for the Nation’s agricultural economic intelligence and projections related to agricultural commodity markets, risk and cost-benefit analysis related to international food and agriculture, energy issues related to the agricultural economy, sustainable development, agricultural labor, global climate change, and environmental markets. OCE coordinates, reviews, and clears all commodity and aggregate agricultural and food-related data used to develop Departmental outlook and situation material.

WHO WE ARE: OUR WORKFORCE

- 54 full-time, permanent employees
- All staff stationed at the USDA headquarters complex in Washington, DC
- Primarily senior-level economists, analysts, and meteorologists plus support staff

WHO WE SERVE: OUR CONSTITUENTS

- The Secretary of Agriculture and other senior USDA officials and Agencies,
- White House and other Federal Department and Agency officials
- Farmers and other participants in the food and fiber system

KEY UPCOMING DECISIONS

- USDA’s 93rd annual Agricultural Outlook Forum is February 23-24, 2017, with key roles to be decided for the Secretary and the Deputy Secretary during the opening session.
- A 2014 Farm Bill report on creating an Under Secretary for Trade and Foreign Affairs is pending completion; pending a decision by the new Secretary, $1 million is appropriated for OCE to contract with an outside organization for implementation assistance.
- Beginning February, the Secretary will attend the briefing and approve monthly releases of the World Agricultural Supply and Demand Estimates, or select a designee to do so.

BUDGET HIGHLIGHTS FY 2016

- Total budget authority $20.3 million:
  - $17.8 million discretionary
  - $932,000 mandatory
  - $1.6 million reimbursements
- Salaries and benefits account for approximately 44% of total budget
- Services from non-Federal sources, including policy research centers and Climate Hubs, account for approximately 39% of total budget

![FY 2016 Budget Authority Pie Chart]

- Immediate Office
- World Ag Outlook Board
- Risk Assessment & C-B Analysis
- Energy Policy & New Uses
- Climate Change Program
- Environmental Markets

I. **Organizational Overview**

**Agency’s Mission/Strategic Plan**

The mission of the Office of the Chief Economist (OCE) is to advise the Secretary of Agriculture on the economic implications of Department policies, programs and proposed legislation; to ensure the public has consistent, objective and reliable agricultural forecasts; to promote effective and efficient rules governing Departmental programs; to coordinate Departmental energy policy, programs, and strategies; coordinate Departmental climate change policy, programs, products, and strategies; and foster the development of environmental markets.

As a small staff office providing broad economic and analytical program and policy support to the Office of the Secretary, as well as serving as a coordinating office for many of the Department’s cross-agency initiatives and programs, OCE supports all USDA strategic goals. OCE has 6 specific strategic goals and strategic objectives that contribute to 3 of the Department’s Strategic Objectives within 2 of the Department’s Strategic Goals.

**GOAL 1:** Assist rural communities to create prosperity so they are self-sustaining, repopulating, and economically thriving.

**Objective 1.2:** Increase agricultural opportunities by ensuring a robust safety net, creating new markets, and supporting a competitive agricultural system.

**Objective 1.3:** Contribute to the expansion of the bioeconomy by supporting development, production, and consumption of renewable energy and biobased products.

<table>

In general, that mission is supported by a number of delegated authorities by the Secretary of Agriculture to the Chief Economist (see 7 CFR 2.29 at https://www.law.cornell.edu/cfr/text/7/2.29):

**Related to economic analysis.**

(i) Coordinate economic analyses of, and review Department decisions involving, policies and programs that have substantial economic implications.

(ii) Review and assess the economic impact of all significant regulations proposed by any agency of the Department.

(iii) Review economic data and analyses used in speeches and Congressional testimony by Department personnel and in materials prepared for release through the press, radio, and television.

**Related to risk assessment.**

(i) Responsible for assessing the risks to human health, human safety, or the environment, and for preparing cost-benefit analyses, with respect to proposed major regulations, and for publishing such assessments and analyses in the FEDERAL REGISTER as required by section 304 of the Department of Agriculture Reorganization Act of 1994 (7 U.S.C. 2204e).

(ii) Provide direction to Department agencies in the appropriate methods of risk assessment and cost-benefit analyses and coordinate and review all risk assessments and cost-benefit analyses prepared by any agency of the Department.

**Related to food and agriculture outlook and situation.**

(i) Coordinate and review all crop and commodity data used to develop outlook and situation material within the Department.

(ii) Oversee and clear for consistency analytical assumptions and results of all estimates and analyses which significantly relate to international and domestic commodity supply and demand, including such estimates and analyses prepared for public distribution by the Foreign Agricultural Service, the Economic Research Service, or by any other agency or office of the Department.
Related to weather and climate.

(i) Advise the Secretary on climate and weather activities, and coordinate the development of policy options on weather and climate.

(ii) Coordinate all weather and climate information and monitoring activities within the Department and provide a focal point in the Department for weather and climate information and impact assessment.

(iii) Arrange for appropriate representation to attend all meetings, hearings, and task forces held outside the Department which require such representation.

(iv) Designate the Executive Secretary of the USDA Weather and Climate Program Coordinating Committee.

Related to interagency commodity estimates committees.

(i) Establish Interagency Commodity Estimates Committees for Commodity Credit Corporation price-supported commodities, for major products thereof, and for commodities where a need for such a committee has been identified, in order to bring together estimates and supporting analyses from participating agencies, and to develop official estimates of supply, utilization, and prices for commodities, including the effects of new program proposals on acreage, yield, production, imports, domestic utilization, price, income, support programs, carryover, exports, and availabilities for export.

(ii) Designate the Chairman, who shall also act as Secretary, for all Interagency Commodity Estimates Committees.

(iii) Assure that all committee members have the basic assumptions, background data and other relevant data regarding the overall economy and market prospects for specific commodities.

(iv) Review for consistency of analytical assumptions and results all proposed decisions made by Commodity Estimates Committees prior to any release outside the Department.

Related to long-range commodity and agricultural-sector projections.

Establish committees of the agencies of the Department to coordinate the development of a set of analytical assumptions and long-range agricultural-sector projections (2 years and beyond) based on commodity projections consistent with these assumptions and coordinated through the Interagency Commodity Estimates Committees.

Related to energy.

(i) Advise the Secretary and other policy-level officials of the Department on energy policies and programs, including legislative and budget proposals.

(ii) Serve as or designate the Department representative at hearings, conferences, meetings and other contacts with respect to energy and energy-related matters, including liaison with the Department of Energy, the Environmental Protection Agency and other governmental agencies and departments.

(v) Provide Department leadership in:
(A) Analyzing and evaluating existing and proposed energy policies and strategies, including those regarding the allocation of scarce resources;

(B) Developing energy policies and strategies, including those regarding the allocation of scarce resources;

(C) Reviewing and evaluating Departmental energy and energy-related programs and programs progress;

(D) Developing agricultural and rural components of national energy policy plans; and

(E) Preparing reports on energy and energy-related policies and programs required under Acts of Congress and Executive orders, including those involving testimony and reports on legislative proposals.

(vi) Provide Departmental oversight and coordination with respect to resources available for energy and energy-related activities, including funds transferred to USDA from other departments or agencies of the Federal Government pursuant to interagency agreements.

*Related to climate change.*

(i) Coordinate policy analysis, long-range planning, research, and response strategies relating to climate change issues.

(ii) Provide liaison with other Federal agencies, through the Office of Science and Technology Policy, regarding climate change issues.

(iii) Inform the Department of scientific developments and policy issues relating to the effects of climate change on agriculture and forestry, including broader issues that affect the impact of climate change on the farms and forests of the United States.

(iv) Recommend to the Secretary alternative courses of action with which to respond to such scientific developments and policy issues.

(v) Ensure that recognition of the potential for climate change is fully integrated into the research, planning, and decision making processes of the Department.

(vi) Coordinate global climate change studies.

(vii) Coordinate the participation of the Department in interagency climate-related activities.

(viii) Consult with the National Academy of Sciences and private, academic, State, and local groups with respect to climate research and related activities.

(ix) Represent the Department to the Office of Science and Technology Policy on issues related to climate change.

(x) Represent the Department on the Intergovernmental Panel on Climate Change.

(xi) Review all Department budget items relating to climate change issues, including specifically the research budget to be submitted by the Secretary to the Office of Management and Budget.
Key mission delivery performance measures

Key Outcome: 12 monthly World Agriculture Supply and Demand Estimates (WASDE) reports issued.

Key Performance Measures and Targets:

Issue 12 monthly WASDE reports each year providing timely, comprehensive, objective agricultural commodity supply, demand, and price estimates and projections, providing a benchmark for U.S. and global markets to respond to expected changes in commodity supply and demand and thereby contributing to efficient price discovery in agricultural markets. The baseline and target performances are issuing 12 WASDE reports.

Key Outcome: Make substantial progress in the development of technical water quality metrics and guidelines that can meet the needs of emerging environmental markets.

Key Performance Measures and Targets:

(1) Prepare technical reports on issues related to farmer and landowner participation in emerging environmental markets.

(2) Develop national water quality metrics for agriculture.

Key Outcome: Increased resilience to climate change and increased participation of farmers, ranchers, and forest landowners in GHG mitigations actions.

Key Performance Measures and Targets:

(1) The Secretary of Agriculture and other senior USDA leadership are satisfied with CCPO climate change policy analysis and coordination activities. Measurement of the performance of CCPO is qualitative and is provided by direct feedback from the Chief Economist and other senior USDA leadership. The baseline performance is providing excellent climate change policy analysis and coordination. The target performance is to continue to provide excellent climate change policy analysis and coordination.

(2) Percent completion of development of regional climate change decision support tools.

Organization’s History

OCE was created by the Secretary of Agriculture on October 20, 1994, under the authority of the Federal Crop Insurance Reform and Department of Agriculture Reorganization Act of 1994, Public Law 103-354. OCE consists of the Chief Economist and Immediate Staff, the Climate Change Program Office (CCPO), the Office of Energy Policy and New Uses (OEPNU), the Office of Environmental Markets (OEM), the Office of Risk Assessment and Cost-Benefit Analysis (ORACBA), and the World Agricultural Outlook Board (WAOB).

Prior to the reorganization, there was no OCE or Chief Economist. Instead, an Assistant Secretary for Economics reported directly to the Secretary and had administrative responsibilities for all USDA economics and statistic agencies, including the Economic Research Service (ERS), WAOB, the National Agricultural Statistics Service (NASS), the Office of Energy (OE), the Economics Management Service (EMS), and the Economic Analysis Staff (EAS). Under the reorganization, the Chief Economist replaced the Assistant Secretary for Economics and the OCE was established. ERS, NASS, OE, and EMS were transferred to the Under Secretary for Research, Education, and Economics.
OCE advises the Secretary of Agriculture on the economic implications of Department policies, programs and proposed legislation. OCE serves as a focal point for the Nation’s agricultural economic intelligence and projections; risk analysis; climate change issues; and cost-benefit analysis related to domestic and international food and agriculture. OCE also supports the development of technical guidelines that outline science-based methods to measure the environmental services benefits from conservation and land management activities; provides analysis for the Department’s renewable energy, bioenergy, and biobased product programs; and is responsible for coordination, review and clearance of all commodity and aggregate agricultural and food-related data used to develop outlook and situation material within the Department.

The Immediate Office of the Chief Economist (IO) provides policy and program analyses and advice to the Secretary. The staff of the IO is unique in that it directly serves the economic and policy analyses needs of the Secretary, free of mission area program responsibilities. It informs the Secretary and the public on the economic consequences of major events affecting agriculture and rural America. Areas of major analyses include international trade agreements, risk-sharing institutions, crop insurance, commodity programs, developments in commodity markets, sustainable development, and agricultural labor. The IO plays a major role in reviewing and clearing regulatory analyses supporting significant rules issued by USDA. Because of its pivotal role in functions which cut across USDA agency responsibilities, OCE staff performs critical liaison and coordination, such as for sustainable development and agricultural labor.

The World Agricultural Outlook Board (WAOB) was created in 1977 to serve as the focal point for the Nation’s economic intelligence relative to the outlook for domestic and international food and agriculture. Prior to 1977, responsibility for USDA’s food and fiber outlook information system was fragmented among several agencies, lacking coherency. The WAOB was created to coordinate and assure the accuracy, timeliness, and objectivity of USDA’s agricultural outlook and situation analysis. The WAOB’s major reports include the Principal Economic Indicator (PEI) report known as the World Agricultural Supply and Demand Estimates (WASDE) which is produced in ‘lockup’ conditions due to its market sensitive nature and the widely referenced Weekly Weather and Crop Bulletin.

The Climate Change Program Office (CCPO) operates within the Office of the Chief Economist and functions as the Department-wide coordinator of agricultural, rural, and forestry-related climate change program and policy issues. The office was established by Statute in 1990 and placed in the Office of the Chief Economist in 1997. The CCPO ensures that USDA is a source of objective, analytical assessments of the effects of climate change and proposed response strategies. The CCPO also serves as USDA’s focal point for climate change issues and is responsible for coordinating activities with other Federal agencies, interacting with the legislative branch on climate change issues affecting agriculture and forestry, and representing USDA on U.S. delegations to international climate change discussions.

The Office of Environmental Markets (OEM) was established in 2010 in response to the Food, Conservation, and Energy Act of 2008, the 2008 Farm Bill. OEM develops the technical guidelines, science-based methods, and infrastructure necessary to facilitate participation of farmers, ranchers, and forest landowners in emerging environmental markets. OEM provides
support to the Department in ensuring that rules and regulations at the federal, state and local levels facilitate environmental markets for agriculture and rural lands; demonstrating and testing market-based approaches to conservation; developing guidance and tools to facilitate landowner participation in environmental markets; communicating the benefits of market-based conservation; assisting agencies in integrate environmental markets into USDA programs; and pursuing actions to encourage demand for environmental market credits.

The Office of Risk Assessment and Cost-Benefit Analysis (ORACBA) was statutorily created by Section 304 of the Federal Crop Insurance Reform and Department of Agriculture Reorganization Act of 1994, Public Law 103-354 and placed with OCE by the Secretary on October 20, 1994. ORACBA was created to ensure that regulatory analyses for the Department’s major proposed regulations which regulate issues of human health, human safety or the environment include a risk assessment and cost-benefit analysis that is performed consistently and uses reasonably obtainable and sound scientific, technical, economic, and other data. The risk assessment and cost-benefit requirement was included in the Act to “assure that USDA regulations dealing with health, the environment, or public safety will contain the information that the public needs to comprehend the risk; the costs of addressing it, and the benefits it will receive from these expenditures,” according to the bill’s sponsor.

The Office of Energy Policy and New Uses, and its predecessor office, Office of Energy and New Uses, mission has been to provide policy advice for the Office of the Secretary on energy matters, to coordinate energy-related activities within the Department, to serve as liaison with other Departments on energy issues, and to conduct a program of research on new uses of agricultural products. Prior to 1994, the Office reported to the Assistant Secretary for Economics. As a consequence of the 1994 Departmental reorganization, the office was functionally incorporated into the Economic Research Service.

Section 220 of the Agricultural Research, Extension, and Education Reform Act of 1998 states that "The Secretary shall establish for the Department in the Office of the Secretary, an Office of Energy Policy and New Uses." The report language accompanying the legislation states that "the Office of Energy and New Uses currently located within the Economic Research Service be moved to the Office of the Secretary ... policy direction for biofuels and new uses must come from the Secretary. Therefore, in order to give added emphasis to these key areas of agriculture, it is best to establish a more direct link between the Secretary and the Office of Energy and New Uses." The “new uses” of the office name initially focused on agricultural commodities that could be converted into new biofuels, but has broadened to include biobased products. The delegation of authority from the REE mission area, ERS to the Office of the Chief Economist was published in the Federal Register, Vol. 64, No. 144, July 28, 1999.
Organizational Chart

OCE advises the Secretary of Agriculture on the economic implications of Department policies, programs and proposed legislation. OCE serves as a focal point for the Nation’s agricultural economic intelligence and projections, providing coordination, review and clearance of all commodity and aggregate agricultural and food-related data used to develop outlook and situation material within the Department; risk assessments and cost-benefit analyses related to domestic and international food and agriculture; coordination, analysis, and research on global climate change issues; coordination, analysis, and research on renewable energy, bioenergy, and biobased product programs; support for the development of technical guidelines that outline science-based methods to measure the environmental services benefits from conservation and land management activities; coordination of sustainable development activities; and analysis of issues and developments affecting agricultural labor.
Biographies of career staff in key leadership positions

Robert Johansson  
Chief Economist  
202-720-4164, RJohansson@oce.usda.gov

Robert Johansson was selected as Chief Economist at the Department of Agriculture (USDA) in July 2015. As Chief Economist, he is responsible for the Department's agricultural forecasts and projections and for advising the Secretary of Agriculture on economic implications of alternative programs, regulations, and legislative proposals. He is responsible for the Office of the Chief Economist, the World Agricultural Outlook Board, the Office of Risk Assessment and Cost-Benefit analysis, the Climate Change Program Office, the Office of Environmental Markets, and the Office of Energy Policy and New Uses.

Since 2001, he has worked as an economist at USDA (both at the Economic Research Service and in the Office of the Chief Economist), in the Office of Information and Regulatory Affairs at the Office of Management and Budget, and at the Congressional Budget Office. In 2011, he was appointed senior economist for energy, environment, and agriculture on the President’s Council of Economic Advisers where he also participated on the White House Rural Council and the President’s Council on Jobs and Competitiveness. Dr. Johansson served as Deputy Chief Economist at the USDA from 2012 to 2014. Since 2015 he has been serving as USDA’s Chief Economist.

Dr. Johansson received B.A. in economics from Northwestern University and then served with the U.S. Peace Corps as an extension agent in several African countries from 1990 to 1995. After returning to his home State of Minnesota, he entered the graduate program in Agricultural Economics at the University of Minnesota at received his M.S. in 1997 and Ph.D. in 2000. His research has spanned a wide range of issues, including biofuels policy, water quality and quantity policies, regulatory economics, food security, and regional modeling of agricultural systems.

Warren Preston  
Deputy Chief Economist  
202-720-5955, WPreston@oce.usda.gov

Dr. Warren Preston serves as Deputy Chief Economist at the U.S. Department of Agriculture (USDA), advising the Chief Economist, the Secretary of Agriculture, and top policy officials on the economic implications of policies, programs, and legislative proposals affecting the U.S. food and fiber system and rural areas. He supports USDA policy decision making by evaluating policy options on complex domestic and global agricultural issues. After serving as USDA’s Acting Deputy Chief Economist beginning in February 2015, Dr. Preston transferred permanently to the Office of the Chief Economist as senior economist for agricultural policy in August 2015.
Prior to joining the Office of the Chief Economist, Dr. Preston served as an economist and associate deputy administrator for the Agricultural Marketing Service (AMS), analyzing and overseeing programs and policies across the full spectrum of marketing activities administered by the Livestock, Poultry, and Seed Program. From 1992 to 2001, he worked as an economist and branch chief in the Packers and Stockyards Programs of USDA’s Grain Inspection, Packers and Stockyards Administration, playing a key role in integrating economic analysis into investigative procedures and processes. From 1986 to 1992, he held a research and teaching position as an assistant professor in the Department of Agricultural Economics at Virginia Tech, focusing on agricultural marketing and the interface between public policies and food system performance.

Dr. Preston earned his bachelor’s degree in dairy science from The Ohio State University and his master’s and doctoral degrees in agricultural economics from Purdue University.

**Seth Meyer**  
**Chairperson, World Agricultural Outlook Board (WAOB)**  
202-720-6030, SMeyer@oce.usda.gov

Dr. Seth Meyer serves as the World Agricultural Outlook Board (WAOB) Chairman. Dr. Meyer is responsible for the monthly forecasts of the *World Agricultural Supply and Demand Estimates* (WASDE) report and the work of the Joint Agricultural Weather Facility.” Dr. Meyer will also serve as Program Chairman for USDA’s largest annual meeting, the Agricultural Outlook Forum.

Dr. Meyer joined USDA’s Office of the Chief Economist in 2013 as a Senior Economist for domestic agricultural policy. Prior to joining USDA, Dr. Meyer spent the previous 2 years as a part of the Food and Agriculture Organization (FAO) of the United Nations (UN) in the Global Perspectives Studies Unit, examining the long-term determinants of agriculture demand and the allocation of productive resources to meet that growing demand.

Dr. Meyer also spent 12 years as a researcher and faculty member with the University of Missouri’s Food and Agricultural Policy Research Institute (FAPRI), analyzing policies affecting grain and oilseed markets, cotton, biofuels, and agricultural commodity transportation. Meyer has authored numerous publications on these subjects, including several examining U.S. biofuel policy, and has spent time as an invited researcher at the International Rice Research Institute (IRRI) in the Philippines; the Japan International Research Center for Agricultural Sciences (JIRCAS) in Tsukuba, Japan; and the Food and Agriculture Organization of the United Nations (UN-FAO) in Rome, Italy. Dr. Meyer grew up in eastern Iowa and has a Bachelor’s and Master’s degree from Iowa State University and a Ph.D. in Agricultural Economics from the University of Missouri.
Linda Abbott
Director, Office of Risk Assessment and Cost-Benefit Analysis (ORACBA)
202-720-8022, LAbbott@oce.usda.gov

Linda Abbott serves as the Director of the Office of Risk Assessment and Cost-Benefit Analysis (ORACBA). In this role she coordinates the review of regulatory risk assessments and cost-benefit analyses for major USDA proposed rules affecting the environment, human health or human safety.

Prior to this position she served as a senior risk assessor on the ORACBA staff. While at ORACBA, she was also detailed to the USDA Office of Pest Management Policy to evaluate risk models used to assess human health exposure and ecological risk. She began her USDA career as an ecologist at the Animal and Plant Health Inspection Service where she developed risk assessments and environmental assessments required under the National Environmental Policy Act.

Dr. Abbott received her Ph.D. in biology-ecology from Utah State University, M.S. in environmental biology from George Mason University, a B.S. in biology from Florida Southern College and a J.D. from George Mason University School of Law.

William Hohenstein
Director, Climate Change Program Office (CCPO)
202-720-6698, whohenst@ose.usda.gov

Mr. Hohenstein serves as the Director of the Climate Change Program Office (CCPO), and is responsible for coordinating climate change research and program activities for the Department. The Climate Change Program Office provides coordination and policy development support for the Department’s climate change program. It serves as a focal point for support to the Secretary of Agriculture on the causes and consequences of climate change, as well as strategies for addressing climate change.

Before arriving at USDA, Mr. Hohenstein served as a Division Director in EPA’s National Center for Environmental Economics. Mr. Hohenstein has a B.S. in Natural Resource Management from Cook College, Rutgers University and a M.E.M. in Resource Economics from Duke University’s School of Forestry and Environmental Studies.

Harry Baumes
Director, Office of Energy Policy and New Uses (OEPNU)
202-401-0461, HBaumes@oce.usda.gov

Harry Baumes returned to the USDA in April 2006 serving as Associate Director of the Office of Energy Policy and New Uses. He served as the Acting Director of the Office of Energy Policy and New Uses (OEPNU) from January to November 2010. In December 2010, he was appointed Director by the Chief Economist Director of the Office. In addition to administrative responsibilities, Dr. Baumes’ activities focus on renewable energy policy and evaluation – particularly biofuels and feedstocks. Dr. Baumes has worked on the renewable fuel standard
(RFS) and coordinated USDA interaction and collaboration with the EPA on the proposed and final rule for implementing the RFS provisions of the Energy Independence and Security Act of 2007. He was responsible for the overall agenda and for the Agriculture, Forestry and Rural Development program for the ministerial level of the Washington International Renewable Energy Conference which had representation from over 120 countries and 100 minister level officials, and more than 5000 attended (March 2008).

Prior to returning to the USDA in April 2006, Dr. Baumes was Managing Director of Agricultural Services for Global Insight (G.I.). There he had management responsibilities for the Agricultural Group, including domestic and international agriculture sector forecasting and consulting services. While at G.I., Dr. Baumes led three proprietary studies that looked at biofuels and implications for U.S. agriculture. Baumes has more than 30 years of professional experience conducting and/or managing domestic and international agriculture sector studies.

Baumes holds a Bachelor of Science degree from Cornell University (1974), a Master of Science degree (1976), and a Doctorate of Philosophy degree (1978) in agricultural economics from Purdue University. Baumes’ graduate studies concentrated on quantitative methods.

Elise H. Golan
Director for Sustainable Development
202-720-2456, EGolan@oce.usda.gov

Elise H. Golan is the Director for Sustainable Development for USDA. In this role, she provides leadership in planning, coordinating, and analyzing the Department's various policies, programs and activities that impact and relate to sustainable agricultural, natural resource, and community development including food security. She plays a key role in coordinating food loss and waste reduction efforts within USDA and across the public and private sectors.

Prior to this position, Elise served as the Associate Director of the Food Economics Division at the Economic Research Service, USDA. She received her Ph.D. in agricultural economics from the University of California at Berkeley and completed a post-doctorate fellowship focusing on environmental economics at the University of Haifa, Israel. Before joining USDA, Elise did consulting work for, among others, the World Bank, the International Labour Organization, and the California Department of Finance. She served as a senior staff economist on the President's Council of Economic Advisers from 1998-99.

Dr. Golan’s research has spanned a wide range of sustainability issues, including land tenure and sustainable land management in the Sahel and West Africa; rice-straw burning and sustainable land management in California; regional and U.S. food-system modeling; food labeling and market development; food access, affordability, and security; and the distributional consequences of food policy.
Peter Feather
Agricultural Labor Affairs Coordinator
202-720-8148, PFeather@oce.usda.gov

Peter Feather serves as the Agricultural Labor Affairs Coordinator in the Office of the Chief Economist. He is responsible for analyzing the Department's various policies and activities that relate to agricultural labor, and he represents the USDA on immigration issues.

Dr. Feather has held this position since June, 2009. Prior to that, he held positions as the Fuel Economy Division Chief at the Department of Transportation, Senior Economist at the President's Council of Economic Advisers and Economist at the USDA Economic Research Service.

Dr. Feather received his Ph.D. in agricultural economics from the University of Minnesota in 1992. He also holds BS and MS degrees in agricultural economics from the University of Missouri.

II. Policies and Regulations

Statutory Authorities

OCE was created by the Secretary of Agriculture on October 20, 1994, under the authority of the Federal Crop Insurance Reform and Department of Agriculture Reorganization Act of 1994, Public Law 103-354. OCE is responsible for assessing the risks to human health, human safety, or the environment, and for preparing cost-benefit analyses, with respect to proposed major regulations as required by section 304 of the Department of Agriculture Reorganization Act of 1994 (7 U.S.C. 2204e).

OCE has responsibilities related to agricultural labor affairs, exercising functions of the Secretary under the Immigration and Nationality Act (INA), as amended (8 U.S.C. 1101 et seq.). OCE provides consultation to the Attorney General and the Secretary of Labor concerning the question of the importation of aliens as nonimmigrant temporary agricultural workers, known as “H2A” workers, under 8 U.S.C. 1101(a)(15)(H)(ii)(a).

OCE serves as Chairman of the Capper-Volstead Act Committee to identify cases of undue price enhancement by associations of producers and issue complaints requiring such associations to show cause why an order should not be made directing them to cease and desist from monopolization or restraint of trade (7 U.S.C. 292).

OCE administers a competitive biodiesel fuel education grants program (7 U.S.C. 8106).

OCE coordinates implementation of section 1245 of the Food Security Act of 1985 regarding environmental services markets (16 U.S.C. 3845).

OCE enters into contracts, grants, and cooperative agreements to further research programs in the food and agricultural sciences (7 U.S.C. 3318), enters into cost-reimbursable agreements relating to agricultural research (7 U.S.C. 3319a), and makes competitive grants to, and enters into cooperative agreements with, agricultural and food policy research centers (7 U.S.C. 3155).

Important Policies and Regulations

While OCE is not a regulatory agency and does not promulgate regulations, OCE engages in a number of activities and reports related to policy and regulatory actions within and outside of USDA.

OEPNU works closely with and coordinates USDA interaction and collaboration with the U.S. Department of Energy and with the Environmental Protection Agency on various feedstock and renewable energy issues such as the renewable fuel standard (RFS), the proposed and final rule for implementing the RFS provisions of the Energy Independence and Security Act of 2007, and RFS waiver requests. OEPNU developed and managed the implementation of the Federal Biobased Product Procurement Program (BioPreferred Program) for USDA until the program became operational and a decision was made to
transfer it to Departmental Administration in FY 2009. Research and publications released by Office has informed USDA leadership, policymakers, and the public in many renewable energy and biobased product areas, such as:

2015 Energy Balance for the Corn-Ethanol Industry, Paul W. Gallagher, Ph.D., Associate Professor, Department of Economics, Iowa State University; Winnie C. Yee, Chemical Engineer, USDA, Agricultural Research Service, Crop Conversion Science and Engineering Research Unit; Harry S. Baumes, Ph.D., Director, USDA, OCE, OEPNU, February 2016

Factors Affecting the Adoption of Wind and Solar-Power Generating Systems on U.S. Farms: Experiences at the State Level. Irene M. Xiarchos, OEPNU, OCE, U.S. Department of Agriculture and William Lazarus, Professor and Extension Economist, Department of Applied Economics, University of Minnesota. July 2013

Biobased Economy Indicators: A Report to the U.S. Congress, Prepared jointly by the OCE, OEPNU, USDA and the Center for Industrial Research and Service of Iowa State University, 2010.

CCPO produces the following reports in support of climate change and actions:
- Annual US Greenhouse Gas Inventory (contributions) – United Nations Framework Convention on Climate Change (UNFCCC) (annual)
- Biennial Report on Climate Actions (contributions)—UNFCCC (biennial)
- United States Climate Action Report to the UNFCCC (contributions) -- UNFCCC (quadrennial)
- National Climate Assessment (contributions) – U.S. Global Change Research Program (USGCRP) and Congress (quadrennial)
- Strategic Plan of the US Global Change Research Program – Congress (decadal)
- Our Changing Planet, Annual Report of the USGCRP (contributions) – Congress (annual)
- USDA Climate Change Adaptation Plan – Secretary and OMB (updated annually)
- Progress reports on USDA Climate Actions to the Secretary (quarterly)

OEM also produces several reports in support of environmental markets:
- Federal Agency Report on the Chesapeake Bay
- Chesapeake Bay Environmental Markets Team Accomplishments Report (annual)
- Progress reports for the Secretary (quarterly)
Overview of the policy/regulation review process

OCE participates in the development of reviews, clears all regulatory impact and risk analyses of Departmental significant, economically significant, and major rules to ensure they are based on objective, appropriate, and sound economic and risk analyses. Specifically, ORACBA reviews and approves statutorily required risk assessments for all major USDA regulations. ORACBA is a focal point for Departmental activities related to risk analysis, including: inter-Departmental activities; risk communication; education on risk analysis methods; regulatory reviews to ensure clearance of cost-effective, less burdensome regulations; and the integration of economic analysis and risk assessment.

The World Agricultural Supply and Demand Estimates (WASDE) report is prepared monthly and includes forecasts for U.S. and world wheat, rice, and coarse grains (corn, barley, sorghum, and oats), oilseeds (soybeans, rapeseed, palm), and cotton. U.S. coverage is extended to sugar, meat, poultry, eggs, and milk. USDA World Agricultural Outlook Board analysts chair the Interagency Commodity Estimates Committees (ICECs) comprising representatives from several key USDA agencies. The nine ICECs- one for each commodity- compile and interpret information from USDA and other domestic and foreign official sources to produce the report.

The ICECs rely on Foreign Agricultural Service (FAS) attaché reports and analysis of foreign commodity developments, Economic Research Service (ERS) domestic and foreign regional assessments, and National Agricultural Statistics Service (NASS) U.S. crop and livestock estimates. For domestic policy and market information, the Board relies on the Farm Services Agency and the Agricultural Marketing Service. WAOB and FAS use weather analysis and satellite imagery to monitor crop conditions. Additional private and public information sources are considered.

To assure the highly market-sensitive information is released simultaneously to all end-users, and not prematurely to any one, the WASDE report is prepared under tight security in a specially designed area of USDA’s South Building. The morning of release, doors in the “lockup” area are secured, window shades are sealed, and telephone and Internet communications are blocked. Once analysts present their credentials to a guard, they enter the secured area to finalize the WASDE report. Communications with the outside world are suspended until the report is released at 12:00 noon Eastern Time.

GAO and OIG Audits

OCE has not been subject to GAO or OIG audits in the past 4 years.
III. Congressional Relations and Issues

Overview

- **Environmental Markets** - Over the past 25 years, Congressional interest in environmental markets and conservation finance has steadily grown. Through amendments to the Clean Air Act of 1990, Congress adopted a “cap-and-trade” system to address pollution from sulfur dioxide. The approach has resulted in substantial environmental and public health improvements, while providing more flexibility for businesses to comply with the law. Since 2008, market-based approaches under the Clean Water Act and Endangered Species Act have fostered several billion dollars of private investment in conservation and restoration annually, and protected more than 22 million acres in the U.S. Market-based approaches are widely seen as a voluntary means to achieve regulatory goals more efficiently.

- **Food loss and waste** - Congress has interest in the issue of food loss and waste and federal efforts to reduce it. Representative Chellie Pingree introduced a comprehensive food loss and waste reduction bill in December 2015 (HR 4184) that included a number of provisions affecting USDA. Rep Pingree and Senator Blumenthal introduced companion bills in 2016 calling for a single approach to date labeling on foods to reduce consumer confusion about the meaning of such labels and thereby reduce food waste at the consumer and retail level.

- **Trade** - Key trade issues of interest to Congress include: multilateral and free trade negotiations and agreements, trade enforcement and WTO dispute settlement cases, and addressing regulatory and other trade barriers that impede U.S. agricultural and food exports. The House and Senate Agricultural Committees are also focused on the creation of an Under Secretary for Trade and Foreign Agricultural Affairs, as mandated by the 2014 Farm Bill. OCE is developing a report on the costs and benefits of different reorganization options associated with the creation of this position. The report is scheduled to be finalized in December 2016.

OCE also briefs staff from the Agriculture and Trade Committees on the U.S. notification of domestic farm programs to the WTO to demonstrate compliance with U.S. commitments.

In September, Senators Charles Schumer and Tammy Baldwin wrote to Secretary Vilsack and U.S. Trade Representative Froman to express concerns with Canadian dairy policy and its effect on U.S. dairy exports to Canada. A separate letter was sent to President Obama from 22 Members of Congress on the same issue. Members signing this letter were: Senators Schumer and Gillibrand; Representatives Rangel, Higgins, Velazquez, Israel, Donovan, Serano, Stefanik, Slaughter, Hanna, Peter King, Clarke, Meng, Tonko, Meeks, Reed, Collins, Engel, Katko, Gibson, and Maloney.
Regulatory analyses - The establishment of the Office of Risk Assessment and Cost-Benefit Analysis was considered a major development in the field of regulatory reform by one of the bill’s co-sponsors. With this history as a backdrop, Congressional actions concerning analysis of regulatory actions and transparency are of particular interest to the Office. In the last Congress, several bills were proposed concerning regulatory reform but none were passed. Below are the top three of these bills. The last one was just proposed on September 27 and has not yet been considered.

The Regulatory Accountability Act of 2015, sponsored by Senator Portman (R-OH), would amend the Administrative Procedure Act to require agencies to consider reasonable alternatives to the rule for all rules and for rules having an annual cost to the economy of more than $100 million, also consider the potential costs and benefits associated with potential alternative rules. The bill also requires the Office of Information and Regulatory Affairs to establish and update guidance on analysis of costs and benefits of proposed and final rules and risk assessments relevant to rulemaking.

The Regulatory Integrity Act of 2015, passed by the House and received by the Senate, would require all agencies to post regulatory impact analyses along with their rulemakings on their webpages or in regulations.gov. The Act would also require comments on the regulatory impact analyses be posted on the website or regulations.gov.

The Commission on Evidence-Based Policymaking was introduced in Congress in 2016 and became a public law on March 30, 2016. This law establishes a 15 member commission to examine the data collected by the federal government and statistical resources to analyze the data to, among other things, make recommendations on incorporating the data into measurements of outcomes of programs.

Representative DeFazio recently introduced legislation to require the Administrator of the Office of Information and Regulatory Affairs and the head of each Federal agency to increase transparency in the regulatory review process, and for other purposes.

Renewable Fuels Standard - The Renewable Fuels Standard remains a Congressional (both the House and Senate) topic of concern or interest across multiple Committees/subcommittees. For example, The House Energy and Commerce Committee and the subcommittee on Energy and Power have continually expressed concerns on implementation of the RFS. The EPA was late in announcing RFS mandate levels for 2014 and 2015, for which the agency drew sharp criticism from the Hill and the industry. The House Oversight Subcommittees on Interior and Healthcare, Benefits and Administrative Rules; and the Senate Committee on Environment and Public Works are other examples of Hill committees/subcommittees that have taken an interest in the RFS – from implementation, benefits/costs of biofuels production such as indirect land-use, GHG emissions/reductions, EPA’s lack of providing required reports (impacts of biofuels), and management of the program.
Pundits of the RFS attack the GHG reduction benefits cited, the GREET model based methodology to compute GHG emissions, land-use, and often the inability to produce cellulosic (advanced biofuels) and the high Renewable Identification Number (RIN) values for the various renewable fuels. The OEPNU/OCE are asked to comment on proposed and rules setting the RFS levels, changes to the RFS program (such as the feedstock pathway approval process), research studies, papers, and articles typically refuting some elements of the RFS or USDA programs (i.e. conservation reserve program, conservation compliance), and bills proposed Congress.

The RFS is subject to much criticism and is a comprehensive and broad based program with regard to enacting fuel mandates but also in operating the program. Related “policy” issues or elements that have been discussed include:

- A production tax credit for biodiesel instead of a blenders’ tax credit – shifts the direct benefit in the supply chain.
- Moving the point of obligation from the producer of the biofuel (RIN generation) downstream to the Blender of the biofuel.
- Eligible feedstocks – assess waste gas streams from industrial processes
- The Blend Wall – how to get past the “10% ethanol saturation point”

Additional issues that could arise with regard to the RFS / biofuels production include:

- Food versus Fuel (an emotional hot spot that will remain)
- Pace at which cellulosic capacity comes on line
- Advancing biomass conversion technologies
- Advancements in life-cycle analysis
- Developing new coproducts
- Implementation of the Corporate Average Fuel Economy (requiring improvement in the automobile fleet to become more efficient)

- **The Defense Production Act (DPA) initiative (Advanced Drop-In Biofuels Production Program – ADBPP) and the USDA Farm to Fleet program** are both supported by Commodity Credit Corporation (CCC) funding. In March 2011, President Obama directed the Department of the Navy (DON), Department of Energy (DOE), and the Department of Agriculture (USDA) to work with private industry to investigate how they could work together to speed the development of domestic, competitively-priced, advanced drop-in biofuels that will power both the Department of Defense and private sector transportation throughout America. DOE, DON, and USDA initiated a cooperative effort to assist the development and support of a sustainable commercial biofuels industry and to foster mutual cooperation by each committing $170 million (reduced by sequestration to about $162 million for USDA). USDA funding was provided under CCC authority to expand/develop markets for agricultural commodities (feedstocks). In December 2013, Navy and USDA jointly announced "Farm-to-Fleet" program - DOD expanded its fuel solicitations to make biofuel blends part of regular, operational fuel purchase and use by the military and CCC funds committed under the DPA will assist the effort.
Representative Conaway (R-OK), Chairman, Committee on Agriculture, and he views USDA use of CCC funds to defray the Navy’s costs of non-competitive priced alternative fuels without Congressional authority to do so. USDA has received a letter from the Congressman requesting information of the Farm to Fleet program, and Harry Baumes, Director of the Office of Energy Policy and New Uses, brief Congressional staff on the USDA’s role in the program. As of this writing the Department is still responding to the request for information.

IV. Internal and External Stakeholders

Important relationships with other Federal Departments or organizations

- The market intelligence work of the WAOB, as summarized in the monthly WASDE report which is a PFEI, is used across USDA as the official outlook for US and foreign agricultural markets. The report is also widely used across the private sector in assessing current market conditions and thus is used by a broad range of sector participants from agricultural producers to exporters and processors both domestic and foreign. The release of the WASDE report has a direct and immediate effect on agricultural commodity markets. Similarly the work of the Joint Agricultural Weather Facility (JAWF) within the WAOB is widely used to assess current crop progress and development around the world by those same market participants.

Internal Agencies

- Domestic USDA agencies, such as the Farm Service Agency (FSA), the Risk Management Agency (RMA), the Economic Research Service (ERS), Rural Development (RD) offices, and the National Agricultural Statistics Service (NASS): OCE partners with them to provide analysis and inputs regarding U.S. farm programs and the U.S. farm economy for various trade-related activities and inter-agency projects.

- USDA Foreign Agricultural Service (FAS) is a key partner on trade policy work and analysis and OCE works closely with FAS on a number of trade and economic issues.

- Federal Crop Insurance Corporation - The Chief Economist is a statutory member of the Federal Crop Insurance Corporation Board of Directors. Dr. Johansson currently serves as the Chairman for the Board. That board is responsible for providing direction to the corporation to take action necessary to improve the actuarial soundness of Federal multiperil crop insurance coverage, and apply the system to all insured producers in a fair and consistent manner. The Code of Federal Regulations (CFR) that refer to the general administrative regulations of the FCIC are codified in 7 CFR Part 400. Regulations that pertain to private sector plans of insurance submissions are published in Subpart V, 7 CFR 400.700, et seq.

- Agricultural Research Service Office of Pest Management Policy: ORACBA partners to review and evaluate pesticide risk assessments, regulatory impact analyses and rulemakings sent to the Secretary of Agriculture under the Federal Insecticide, Fungicide and Rodenticide Act.
Environmental Markets Working Group: OCE-OEM coordinates ecosystem services and environmental markets-related activities for USDA. It is most engaged with the Natural Resources and Environment Mission Area, the Natural Resources Conservation Service, the Forest Service, the Economic Research Service, the Agricultural Research Service, the Farm Services Agency, Rural Development, and the Foreign Agricultural Service.

Bioeconomy Council Coordination Committee: This is an intra-agency working group which coordinates energy and biobased product-related activities among USDA agencies. It also serves as a forum for sharing information regarding energy and biobased product activities involving USDA agencies but occurring outside of USDA.

External Agencies

- U.S. Department of State – Within OCE, the Climate Change Program Office (CCPO) serves as the primary technical office for issues related to climate change and agriculture, forests, and land use. In particular, CCPO provides technical and staff support for the international climate negotiations under the United Nations Framework Convention on Climate Change. OCE also works together on trade issues.

- White House Council on Environmental Quality (CEQ) – Working with Federal departments, agencies, and White House offices, CEQ coordinates Federal environmental policies and initiatives. CCPO is working with CEQ on several topics, including climate change adaptation and resilience and reducing greenhouse gas emissions and increasing carbon sequestration. OEM also collaborates to promote the development of technical guidelines, science-based methods, and infrastructure necessary for environmental markets.

- U.S. Global Change Research Program (USGCRP) – The USGCRP coordinates research on the impacts, causes, and responses to climate change across the Federal government. The USGCRP organizes the National Climate Assessment; USDA contributes scientific and editorial input related to agriculture, forests, and land use. The Climate Change Program Office is the USGCRP’s primary point of contact within USDA.

- National Security Council and the Office of the Chief Statistician: on the refinement and implementation of the Sustainable Development Goals. The Sustainable Development Goals were adopted at the UN General Assembly/Sustainable Development Summit in September 2015. The 17 goals and 169 targets (and 235 indicators that were subsequently developed under the authority of the United Nations Statistical Commission) are meant to provide a comprehensive vision for development to 2030. The goals and targets of the SDGs are universal, meaning that developed countries are expected to work towards the goals domestically as well as internationally. USDA will have primary or supporting responsibility for meeting a large number of SDG goals and targets.

- Office of the U.S. Trade Representative (USTR) – OCE works closely on a number of trade initiatives, including WTO dispute settlement, Anti-Dumping and Countervailing Duty (AD/CVD) investigations involving agricultural products, and trade negotiations and enforcement actions.
United States Department of Agriculture  
2016 Presidential Transition  
Briefing Material Template – Agency Level

- Department of Commerce - OCE also works with other members of the trade inter-agency group, including the Department of Commerce.

- Army Corps of Engineers, Department of Transportation, and Department of Interior (including the Fish and Wildlife Service, the Geological Survey, and Bureau of Land Management) – Collaboration facilitates greater consistency across Departments and promotes the development of technical guidelines, science-based methods, and infrastructure necessary for environmental markets.

- Environmental Protection Agency (EPA):
  - OEM promotes the development of technical guidelines, science-based methods, and infrastructure necessary for environmental markets
  - OCE on issues related to food loss and waste. In September 2015, the two agencies announced the first national food loss and waste reduction goal, calling for a 50 percent reduction by 2030. EPA and USDA are collaborating on the 2030 Champions program, which recognizes those businesses that have adopted a goal of halving food loss and waste in their operations by 2030. They are also working together to establish the National Virtual Resource Center on Food Loss and Waste.
  - OEPNU/OCE are USDA point of contact for the Renewable Fuel Standards and other related fuel regulations to support the growth of ethanol and other renewable fuels in the U.S. OEPNU/OCE interacts primarily, although not exclusively, with the Office of Transportation and Air Quality (OTAQ). By Statute, The Administrator of EPA is supposed to Confer with the Secretaries of Agriculture and Energy when setting the RFS mandate levels.
    - Periodic calls between the Chief Economist (and OEPNU) staff with the leadership of OTAQ to discuss market developments (i.e., agricultural production, biofuels), pending USDA/EPA policy program implementation/decisions (i.e., Biofuels Infrastructure Partnership, REGS Rule (announced October 3)), potential issues, and to keep each agency informed.
    - Periodic calls between OEPNU and OTAQ staff on a range of topics including but not exhaustive: status of feedstock pathway decisions, need for information (USDA and/or EPA expertise), status/schedule for program announcements, etc. Again, this call is used to keep respective agencies informed.
    - Waiver analyses – twice EPA has been petitioned by states to waive the RFS standards. OEPNU/OCE was the point of contact and conducted the analyses (impact on the agricultural sector including commodity prices, food prices, farm income effects) and provided results to the EPA (information USDA provided included as part of the official docket). The analyses assessed the impact of a waiver versus implementation of the RFS.
    - EPA regularly asks for USDA data to be provided and validated and for USDA to provide staff expertise for various feedstock pathway analyses EPA is conducting. OEPNU has coordinated meetings identifying appropriate experts that should be included.
United States Department of Agriculture
2016 Presidential Transition
Briefing Material Template – Agency Level

- OEPNU/OCE typically interacts with OTAQ regarding “agriculture oriented” feedstock analyses – particularly with regard to life cycle analysis (LCA).
- OEPNU/OCE annually facilitates EPA’s request for agricultural cropland, grassland and wetland data for its aggregate compliance review. This is a posterior review of acreage use to determine if the RFS is resulting in additional lands being cultivated in the U.S.

- Department of Energy – EPA is required to confer with USDA and DOE in setting RFS mandates. This leads to a natural working relationship between the agencies, specifically DOE’s Bioenergy Technologies Office (BETO).
  - Section 9001 of the Food Conservation and Energy Act of 2008 (FCEA) and most recently reauthorized in the Agricultural Act of 2014, established the Biomass Research and Development Board (BRDB). The BRDB is co-chaired by the USDA and DOE with 6 other agencies servicing on the BRDB. The Biomass Research and Development Board (Board) coordinates research and development activities concerning biobased fuels, products, and power across federal agencies. The organizational structure of the BRDB includes an interagency Operations Committee (OpsCo) of which the Director of the OEPNU is the senior level, USDA, career civil servant on the OpsCo. In addition, there are several other interagency subcommittees organized by theme (Feedstocks, Feedstocks Production & Management, Feedstocks Production-Genetic Improvement, Conversion, Transport & Distribution, Algae, Analysis, and now Sustainability). Work that supporting the BRDB is coordinated by the OpsCo and carried out by the various subcommittees.

The BRDB has announced a Billion Ton Bioeconomy Vision earlier this year. The vision for the Billion Ton Bioeconomy is to sustainably reach the full potential of biomass-derived products as a way of expanding our nation’s economy. In doing so, the bioeconomy will provide multiple economic, environmental, and social benefits to the Nation. The premise is that DOE led studies generically referred to as the Billion Ton Reports and are resource inventories (2005, 2011, and 2016) indicate that the U.S. has over a billion tons of biomass that could be sustainably developed, harvested, and utilized by 2030. The goal of the Billion Ton Bioeconomy is to develop and provide innovative ways to remove barriers to expanding the sustainable use of Nation’s abundant biomass resources for biofuels, bioproducts, and biopower, while maximizing economic, social, and environmental outcomes.

OEPNU/OCE provides co-leadership (with BETO) to the Analysis subcommittee. And, the Director of OEPNU was a co-author on the article titled “An Assessment of the Potential Products and Economic and Environmental Impacts Resulting from a Billion Ton Bioeconomy” forthcoming in Biofuels, Bioproducts and Biorefining journal. OEPNU director serves on the Feedstock subcommittee as well.

- OEPNU/OCE is also working with DOE BETO National Renewable Energy Laboratory (NREL) on analysis of data being collected under the Farm Services Agency Biofuels Infrastructure Partnership. USDA-FAS and DOE-BETO (NREL) have signed an Memorandum of Understanding to collect, maintain, and conduct analysis of data (data should start to become available in October 2016).
United States Department of Agriculture  
2016 Presidential Transition  
Briefing Material Template – Agency Level

- Department of the Navy – USDA programs support the development of alternative jet fuels and OEPNU/OCE has provided technical support to USDA leadership in support of the Defense Production Act (DPA) Initiative described above and works closely on it with Department of Navy and DOE’s BETO. Quarterly meetings are held to discuss status of ADBPP awardees (Fulcrum Sierra Biofuels, Emerald Biofuels, and Red Rock Biofuels). A new solicitation will be forthcoming utilizing approximately $55 million in uncommitted Navy and DOE BETO funds (timing has not been finalized).

USDA has also worked closely with Navy on the Farm to Fleet program, also discussed above. OEPNU/OCE has provided USDA leads on the Farm to Fleet and DPA with Navy.

- Department of Transportation’s Federal Aviation Administration and others: OEPNU/OCE has provided leadership on interagency programs including Farm to Fly 2 (F2F2) – a Memorandum of Understanding between USDA and commercial airline interests. Goal of F2F2 is to enable commercially viable, sustainable bio-Jet Fuel supply chains in the U.S. that are able to support the goal of one billion gallons of bio-Jet Fuel production capacity and use for the Aviation Enterprise by 2018. OEPNU/OCE participates in the interagency working group Committee on Maritime Transportation with a goal of increasing biofuels use by the maritime industry (members include DOT, USCG, Navy, NOAA, DOE, EPA, USDA).

- The Organization for Economic Cooperation and Development (OECD) – Committee for Scientific and Technological Policy, Working Party on Biotechnology, Nanotechnology, and Convergent Technology (BNCT). BNCT is concerned with the confluence of disciplines such as the life sciences, the physical sciences, engineering and information sciences, and with technologies such as biotechnology, nanotechnology1 and, insofar as they are related to issues of convergence and the emergence of new technologies, electronics and information and communications technologies. Sectors covered by the BNCT are those most likely to influence or be affected by developments in these technologies, including the health sector, manufacturing, environmental protection, the marine, agriculture, etc. Policy issues of interest to the BNCT range across topics as diverse as: research and technological development; standards and regulations; best practice policy formulation and implementation; ethical, legal and social issues; public engagement; education, skills and training; and measurement and evaluation methods and tools etc. Bioeconomy and gene editing are two program areas of work. OEPNU’s Director is lead delegate to the BNCT. Next meeting December 2016.

- Interagency Risk Assessment Consortium: ORACBA partners with the other federal agencies members on topics of food safety risks.

---

1 Nanotechnology is taken to include nano-scale science, engineering, and technology and also to refer to the use of nanotechnology in various applications and sectors.
• Chesapeake Bay Environmental Markets Team (EMT): Led by OCE-OEM and established by Executive Order 13508. The EMT is a collaboration of 12 federal agencies working to enable environmental markets to function effectively in the Chesapeake Bay Watershed.

• National Capital Area Chapter of the Society for Risk Analysis: ORACBA partners to provide training on risk assessment, risk management and risk communication.

Stakeholder group overview

• Academic community: The office augments its human capital resources through the use of cooperative agreements, a mechanism which enables the office to commission relevant research to help the office examine and evaluate issues. For example, FY16 had cooperative agreements with Cornell, Purdue, Penn State, Iowa State, Council on Food, Agriculture and Resource Economics, and the National Center for Food and Agriculture Policy, amongst others. Papers and findings have been released, are being finalized and/or are undergoing peer review for publication and workshops/conferences being planned or have held.

• USDA Global Change Task Force (GCTF) – The Director of CCPO serves as the chair of the GCTF, which coordinates Departmental activities and information related to climate change to ensure that all USDA agencies with a responsibility for climate change are kept informed of Departmental and Administrative priorities and are included in reviews, assessments, and communication efforts. The GCTF helps establish climate strategy for the USDA and integrate that strategy into research and programs. The GCTF meets monthly and includes representatives from more than 20 USDA agencies and offices.

• OCE-OEM is conducts extensive engagement with the public and private sector and has been a catalyst in generating relationships that result in innovative, science-based, practical solutions that ensure that the public’s interest is protected, and that the buyers, sellers and regulators are confident in the efficiency and credibility of market-based programs. In 2016, OCE-OEM partnered with:
  o The Nicholas Institute at Duke University to develop A Review of the Use of Early Action Incentives in U.S. Environmental Markets. The document highlights the tools and an approach used to encourage early action in environmental markets, and identifies how it can influence market development.
  o Virginia Tech to conduct an analysis of The Role of In-Lieu Fee Programs in Providing Off-Site Compensatory Mitigation. The analysis and supporting case studies suggest that In-Lieu Fee programs do not compete with mitigation banking but do provide mitigation opportunities in areas where mitigation banking alternatives are not available.
  o EPA in association with Forest Trends’ Ecosystem Marketplace to develop environmental markets data layers for EnviroAtlas, a Federally-managed environmental data platform. The newly developed layers show where markets for water, carbon, wetlands, and habitats occur on the U.S. landscape, provide information about the markets and enabling policies, and allow this information to be displayed in the context of existing environmental data. The tool allows
users to understand trends, gaps, and opportunities, as well as make inferences about demand and enabling or limiting conditions for environmental markets.

- The Council on Food, Agricultural and Resource Economics (C-FARE) to support USDA’s resource management agencies in evaluating opportunities for the valuation of carbon, water, and habitat benefits associated with USDA conservation programs.

- The University of Nebraska’s Water for Food Institute to collect water transfer and pricing data, and identify methodologies to facilitate future collection. The information will inform the development of additional resources to support and inform water transfer markets.

- The Texas Institute for Applied Environmental Research (TIAER) to support improvement of the Chesapeake Bay Nutrient Tracking Tool (CBNTT) for the quantification of edge of field nutrient loading.

- The Environmental Defense Fund to evaluate the effect of large transaction costs in agricultural carbon offset markets. OEM and EDF are drafting a paper that will provide an overview of the costs involved with getting an offset from the field to final purchase, and focus on high costs associated with verification. The larger effort aims to change voluntary and regulatory market protocols to work better for agricultural offset sellers.

- OCE-OEM serves on several environmental market advisory groups that meet regularly throughout the year, examples include: the Lake Erie Phosphorus Trading Advisory Group; the Lower Fox River Water Quality Trading Advisory Group; and, the Chesapeake Bay Water Quality Trading Advisory Group. Furthermore, OEM serves as the primary technical advisor to the National Network on Water Quality Trading. The group was founded to address the challenges associated with water quality trading programs and to develop the information resources needed to address them. The group’s members represent a diversity of agricultural operations, wastewater utilities, environmental groups, state regulatory agencies, and practitioners delivering trading programs.

- OCE has created a public-private partnership to support the development of the National Virtual Resource Center on Food Loss and Waste. The 12 partners, all of which have signed Memorandums of Understanding with USDA/OCE include the Academy of Nutrition and Dietetics, Feeding America, the Food Marketing Institute, the Grocery Manufacturers Association, the Innovation Center for U.S. Dairy, the National Consumers League, the National Restaurant Association, the Natural Resource Defense Council, Sustainable America, the EPA, the World Resources Institute and the World Wildlife Fund.

- OCE represents the United States on the Multi-sector Advisory Committee for the U.N. Sustainable Food Systems Program (SFSP).

- In conjunction with FAS and USTR, OCE has regular interaction with a broad range of U.S. agricultural groups and organizations regarding trade issues. Recent key issues and engagement on trade issues include:
• University of Maryland Joint Institute for Food Safety and Applied Nutrition (JIFSAN): ORACBA meets to discuss risk analysis training courses and risk-related databases housed on the JIFSAN website. JIFSAN is concerned with education and capacity building within the United States and abroad in risk assessment, risk communication risk management and regulatory analysis.

• National Capital Area Chapter of the Society for Risk Analysis: ORACBA meets to plan presentations on risk analysis and provide training opportunities for capacity building.

• Trade Associations:
  o The National Bioediesel Board (NBB) – expanding the biodiesel market
  o The Renewable Fuels Association (RFA) – expanding the ethanol market
  o The Biotechnology Innovation Organization (BIO) – advancing renewable chemicals, biobased products, technology and innovation, and the bioeconomy.

  Each group will schedule visits with OEPNU/OCE staff to discuss respective positions on issues/policies/pending legislations or papers/studies they have commissioned/released. Each has invited OEPNU/OCE staff to speak at and attend conferences and workshops that they sponsor.

• Biomass Research and Development Board (BRDB) - The OpsCo of BRDB convenes a weekly phone call to discuss ongoing projects and issues/concern relevant to setting the agenda for the next quarterly Biomass Research and Development Board meeting. Current example is the report, the second in a series of three, “The Billion Ton Bioeconomy Vision: Challenges and Opportunities” currently going through clearance. The third document currently being drafted will be an “implementation of a strategic plan” which is planned for completion end of 2016 or early 2017. OEPNU director is USDA’s senior career civil servant on the OpsCo and provides leadership.

• The partners of the Defense Production Act initiative, USDA, DOE-BETO, Navy, DLA-e Title III office old quarterly meeting to be briefed on the status of original award grantees. See item III.A. above. Each of the awardees (Emerald, Fulcrum Sierra, and Red Rock) is seeking to achieve financial close, the second of two milestones that must be achieved prior to awardee receiving a $70 million government grant to build a biorefinery. Red Rock and Fulcrum could achieve financial close within the next two/three months and begin construction before the end of the year. OEPNU director provides USDA technical support to for DPA initiative and keeps USDA senior leadership informed.

• OEPNU/OCE and Rural Development provide USDA leadership to the Farm to Fly 2 (F2F2) agreement. The Commercial Alternative Aviation Fuel Initiative coordinates a steering committee to carry out efforts to achieve the goals of the F2F2 memorandum of understanding - enable commercially viable, sustainable bio-Jet Fuel supply chains in the U.S. that are able to support the goal of one billion gallons of bio-Jet Fuel production.
capacity and use for the Aviation Enterprise by 2018. There are several projects at the state level that are able to take advantage of Rural Business Service programs.

Recent engagements with stakeholder group

- CCPO has been working with the State Department to prepare for the 22nd Conference of Parties under the United Nations Framework Convention on Climate Change, which was held in Marrakech, Morocco from November 7-18.
- CCPO has been working with CEQ to develop a strategy for deeply reducing greenhouse gas emissions by 2050. A key component to this “Mid-Century Strategy” is the use of biofuels and bioenergy to reduce greenhouse gas emissions and assertive forest management and tree planting to increase carbon sequestration.
- CCPO also plans to work with the State Department and CEQ to develop the next “Biennial Report,” which outlines actions that the United States is taking to reduce greenhouse gas emissions, including from the agriculture, forest, and land-use sectors.
- In September, 2015 the EPA and USDA co-sponsored a three-day workshop on water quality markets at the University of Nebraska - Lincoln. The workshop brought together more than 200 water resource professionals, including Federal, State and Local government representatives, NGOs, and agricultural and environmental stakeholders to discuss the current state of water quality markets in the United States and to identify opportunities for greater coordination and collaboration. In 2016, EPA and USDA released a report out from the workshop summarizing the primary obstacles to water quality trading and identifying seven actions that EPA and USDA would take to address them.
- Over the past year, OCE-OEM has engaged with the Association of Clean Water Administrators (ACWA) to provide outreach and support to State water quality agencies. In August, ACWA released a Water Quality Trading Toolkit to assist states in developing water quality trading programs. The Toolkit includes five water quality trading templates based upon the National Network on Water Quality Trading’s “Building a Water Quality Trading Program: Options and Considerations.” The toolkit will improve consistency across programs and reduce the costs associated with developing trading programs.
- In September 2016, OEM coordinated a roundtable on Water, Markets and Pricing at the USDA Fall Forum on Climate Variability, Water and Land Use to discuss the state of water transfer markets. The results will be incorporated into working papers currently in development.
- Recent engagements with stakeholder groups on key trade issues include:
  - Met with officials from U.S. Wheat Associates on September 23, 2016 to discuss China’s domestic support and tariff-rate quotas (TRQs) for wheat and other grains. Meeting included officials from FAS and OCE.
  - Meetings and phone calls with U.S. Grains Council officials and their legal counsel on the Chinese AD/CVD investigation of U.S. DDGS have been ongoing since December 2015.
In preparation of the documents “The Billion Ton Bioeconomy Vision: Challenges and Opportunities” five stakeholder listening sessions were held to gather information on whether it is feasible to develop the bioeconomy, identify needs and challenges, roles for the public sector, etc. The first was held in February 2016, in Washington, DC as a follow-on to the Advanced Bioeconomy Leadership Conference, and focused on CEOs and entrepreneurs. That was followed by the April sessions follow on at the International Biomass Conference & Expo in Charlotte with a focus on feedstocks and logistics (April 10), BIO World Congress on Industrial Biotechnology in San Diego (April 17) with a focus on the industrial bioenergy sector, and at the 38th Symposium on Biotechnology for Fuels and Chemicals in Baltimore (April 27) with a focus on research and development. A GoToWebinar session was hosted in DC (May 5) and focused on broad audience. OEPNU’S director led several of the listening sessions.

The National Biodiesel Board was in in September 16 to discuss its position on the biomass based diesel RFS mandate. NBB feels that EPA is setting the mandate to low and provided its rationale. NBB also offered to go over its analytical framework (model) at a separate time for OEPNU/OCE staff (an October date is being discussed but not finalized at this time).

Joint Institute for Food Safety and Applied Nutrition – presentation to students in the Summer Risk Analysis program in July and discussion in September about posting new data on food consumption on the website.

V. Top Issues

Hot Topics

• Trade – U.S. request for WTO consultations on China’s domestic support measures and potential formation of a dispute settlement panel. On September 13, Secretary Vilsack and U.S. Trade Representative Froman announced that the U.S. had made a formal request in the WTO for consultations with China regarding China’s domestic support measures for wheat, rice, and corn and compliance with their WTO commitments.

China’s determination of AD/CVD rates on U.S. exports of DDGS. On September 28, China made a preliminary determination of countervailing duty rates on U.S. DDG exports. Payments made under the federal crop insurance program and ARC/PLC program were found to be actionable and subject to a countervailing duty.

• Implementation and management of the Renewable Fuel Standard – the RFS remains a key driver in the use and expansion of renewable advanced biofuels. For the reasons cited above it will remain a priority topic. Key dates for RFS – November 30, 2016 final rule to set 2017 volumes and 2018 biomass based Diesel.

• Role of biofuels in meeting CAFE standards - The current standards call for fleet average fuel economy of 54.5 miles per gallon by 2025. Automakers have expressed a desire for higher-octane gasoline to allow for improved engine efficiency while meeting customer
demands for power output. Ethanol is an effective octane booster that is cost-competitive with gasoline and could be used to boost the overall octane of U.S. gasoline supply to as high as 100 RON, up from the present average of about 93 RON. Ongoing issue as CAFE standard implement

- **Growing the Billion Ton Bioeconomy.** This initiative is currently being championed by the Biomass Research and Development Board (co-chaired by USDA and DOE). A strategy for implementation of the plan to utilize 1 billion tons of biomass and be environmentally, economically, and socially sustainable is being prepared and should be ready by 2017q1. There are some who may not think we can produce food, fiber AND biofuels, biopower, renewable chemicals and bioproducts let alone realize environmental benefits like GHG reduction. Release date 2017q1.

- **Reducing GHG Emissions through Agriculture, Forests, and Land Use –** A major priority for the Climate Change Program Office (CCPO) is helping USDA support the Paris Agreement, through which the United States committed to reducing greenhouse gas (GHG) emissions by 26 to 28 percent below 2005 levels by 2025. A major pillar of USDA’s contribution to the Paris Agreement is the Building Blocks for Climate Smart Agriculture and Forestry. The building blocks leverage incentive-based conservation, forestry, and energy programs to reduce greenhouse gas emissions, increase carbon sequestration, and expand renewable energy production in the agricultural and forestry sectors. Through this initiative, USDA is committing to reducing greenhouse gas emissions and increasing carbon stored in forests and soils by over 120 million metric tons of carbon dioxide equivalent per year by 2025.

Another priority in the U.S. commitment to reduce emissions is through the Clean Power Plan (CPP). In particular, using biomass as a replacement for fossil fuels can reduce the GHG emissions of that electricity production. USDA is working with interested states to model the GHG impacts of biomass-based electricity production and provide support for states to include biomass as an option to comply with EPA’s requirements under the CPP.

Finally, there are opportunities to reduce transportation-based GHG emissions through the use of corn-based ethanol and other biofuels. A recent peer reviewed report by ICF International indicates that the life-cycle carbon intensity of corn-based ethanol is more than half that of gasoline and 45 percent less than the most recent estimates by EPA.

- **Coordinating Cross-cutting Responses to Climate Change –** In addition to coordinating USDA’s commitment to reduce GHG emissions and increase carbon sequestration, CCPO also works across the Department on a variety of other climate-related actions. To help USDA and its stakeholders respond to the impacts of climate change, the Department have developed adaption plans that provide detailed vulnerability assessments, reviews elements of USDA’s missions that are at risk from climate change, and provide specific actions and steps to build resilience.

Underlying USDA’s climate change mitigation and adaptation efforts are its science activities. Across the Department, agencies spent $83.5 million in FY 2016 to support
climate change research. CCPO is currently leading an effort update USDA’s strategic plan for climate change science, which will inform research priorities at agencies, land-grant universities, and other partners.

A key mechanism for coordinating USDA’s response to climate change is the regional Climate Hubs. Consisting of ten regional and sub-regional office, the Hubs deliver science-based knowledge, practical information and program support to farmers, ranchers, forest landowners, and resource managers to support climate-informed decision-making in light of the increased risks and vulnerabilities associated with a changing climate. The Hubs translate climate change research for farmers, ranchers, and forest landowners and provide feedback on what types of research and information is most useful to these stakeholders. Key partners include public and land grant universities; Cooperative Extension; USDA agencies; and a wide variety of other Federal, state, local, private, and non-profit organizations.

- **USDA Action Plan for the Sustainable Development Goals**

  At the end of September 2015, the Sustainable Development Goals (SDGs) were adopted at the UN General Assembly/Sustainable Development Summit. The 17 goals and 169 targets (and 235 indicators that were subsequently developed under the authority of the United Nations Statistical Commission) are meant to provide a comprehensive vision for development to 2030. The goals and targets of the SDGs are universal, meaning that developed countries are expected to work towards the goals domestically as well as internationally. USDA will have primary or supporting responsibility for meeting a large number of SDG goals and targets.

  At the end of 2015, the USDA Sustainable Development Council began development of a comprehensive plan for USDA to contribute to and report on relevant SDG goals and targets. The USDA Sustainable Development Council, which includes the Chiefs of Staff from each of the Mission Areas, is headed by the USDA Director for Sustainable Development (Elise Golan in the Office of the Chief Economist). The National Security Council (NSC) has been the lead agency in coordinating USG input into the development of and negotiations on the SDGs. NSC expects that the Domestic Policy Council will begin coordinating domestic action plans in 2017 if not sooner.

- **High profile issues for OCE-OEM which are likely to have significant impacts on program implementation and delivery in 2017:**
  - Several current proposals expanding the role of market-based approaches to conservation in the next Farm Bill;
  - Increasing USDA involvement in developing tools and resources to support water transfer markets;
  - The effects of large transaction costs in agricultural carbon offset markets; and,
  - Anticipated clarification of opportunities for mitigation on public lands.
• Regulatory Review issues:
  o Conducting regulatory reviews of current rulemakings
  o Identifying new regulatory actions by USDA agencies likely to be submitted for
    review
  o Identifying retrospective analyses of rules that could provide information to
    current rulemakings
  o Gathering data on labeling genetically modified foods
  o Providing training opportunities at the ORACBA Risk Forum to fill gaps in
    knowledge or analytical capacity at USDA agencies
  o Understanding the factors influencing the change in classification of several
    recent rules from not significant at the proposed stage to economically significant
    at the final stage
  o Identifying trends in food safety pathogen prevalence in meats, poultry and
    catfish
  o Identifying factors to be considered when using epidemiological data in risk
    assessments

Timeline

• Early 2017: Possibly formation of a WTO dispute settlement panel in the China
  domestic support case. Final determination in the China AD/CVD investigation of
  U.S. DDGS.
  coordinates the incoming Secretary and Staff participation in the Forum. The
  Secretary has traditionally played a leading role in the opening day at the Forum.
• April 11-13: OCE-OEM will co-host a workshop at The 2017 Water for Food Global
  Conference in Lincoln, Nebraska. The workshop will engage key stakeholder groups to
  discuss and review common elements and decisions inherent in market-based approaches to
  drought management, program design, and result in the preparation of a conference report
  on the use of water markets to support agricultural production and rural communities.
• May 30 - Proposed rule for 2018 RFS volumes
• Late 2017: The 11th WTO Ministerial Conference (MC11) will be held in Buenos
  Aires, Argentina in late 2017. Agricultural issues, in particular domestic support
  measures, will be part of the discussions for this meeting. There will be ongoing
  preparatory work; expected to intensify in mid-2017.
• Throughout – ORACBA reviews regulations put into clearance and distributed by the
  Office of Budget and Program Analysis. Reviews are not scheduled in advance and
  can’t be included on the timeline explicitly.
Appendix A: Acronyms

Provide a list of commonly used acronyms.

ADBPP  Advanced Drop-In Biofuels Production Program
AD/CVD  Anti-Dumping and Countervailing Duties
BCCC  Bioeconomy Council Coordination Committee
BETO  Bioenergy Technologies Office
BIO  Biotechnology Innovation Organization
BNCT  Working Party on Biotechnology, Nanotechnology, and Convergent Technology
BRDB  Biomass Research and Development Board
CAFE  Corporate Average Fuel Economy
CCC  Commodity Credit Corporation
CCPO  Climate Change Program Office
CEQ  Council on Environmental Quality
CPP  Clean Power Plan
DLA-E  Defense Logistics Agency - Energy
DDGS  Distiller’s Dried Grains with Solubles
DON  Department of the Navy
DPA  Defense Production Act initiative
ES  ecosystem services
EM  environmental markets
F2F2  Farm to Fly 2
GCTF  Global Change Task Force
GHG  greenhouse gas
GREET  Greenhouse Gases, Regulated Emissions, and Energy Use in Transportation Model by Argonne National Laboratory
GWU  George Washington University
ICEC  Interagency Commodity Estimates Committee
ILUC  indirect land-use
JAWF  Joint Agricultural Weather Facility
JIFSAN  Joint Institute for Food Safety and Applied Nutrition
MC11  The 11th WTO Ministerial Conference
NBB  National Biodiesel Board
OCE  Office of the Chief Economist
OEM  Office of Environmental Markets
OECD  Organization for Economic Cooperation and Development
OEPNU  Office of Energy Policy and New Uses
OpsCo  Operations Committee (of the BRDB)
ORACBA  Office of Risk Assessment and Cost-Benefit Analysis
OTAQ  Office of Transportation and Air Quality
PFEI  Principal Federal Economic Indicator
RFA  Renewable Fuels Association
RFS  Renewable Fuel Standards

WHAT WE DO: OUR MISSION

The Chief Financial Officer serves as the principal advisor to the Secretary and Senior Officials on all matters related to financial management policies, systems, accounting, internal control, assessment, and training. OCFO operations are led by the Chief Financial Officer (CFO), who is assisted by the Deputy CFO, three Associate CFOs for: Shared Services, Financial Operations, Financial Policy and Planning, and the Director, National Finance Center (NFC).

WHO WE ARE: OUR WORKFORCE

OCFO have over 1,700 employees across the country with offices in Fort Worth, TX; Kansas City, MO; New Orleans, LA; and Washington, D.C.

WHO WE SERVE: OUR CONSTITUENTS

OCFO is responsible for the financial leadership of an enterprise that has nearly 100,000 employees, 14,000 offices and field locations, $209 billion in funding, and $143 billion in annual spending (data as of FY 2015).

KEY UPCOMING DECISIONS

The top three key upcoming policy decisions for OCFO for the first 30-60 days of the new administration are:

- Determine the funding levels for FY 2018 Departmental Shared Cost Programs and decide if portions the Federal Information Technology Acquisition Reform Act (FITARA), can be funded either through a Shared Cost Program or Working Capital Fund.
- Veterans Administration implementation into Momentum Shared Services.
- Award decision of the National Finance Center “Cloud” procurement so that essential hardware is in production to support critical applications such as payroll and human resources.

BUDGET HIGHLIGHTS FY 2016

Overall Budget Authority: $390,257,000

- FY 2016 Discretionary Appropriation is $6,028,000.
- Working Capital Fund Reimbursements is $384,229,000.
- There are no Mandatory or User Fees funds in OCFO.

Organization’s History

The Secretary established the Office of the Chief Financial Officer (OCFO) in 1995 to comply with the Chief Financial Officers Act of 1990. The Office is responsible for overall financial management activities for the 100,000+ employee Department of Agriculture (USDA) and for direct management of more than 1,700 employees in the Office of the Chief Financial Officer at Agriculture headquarters in Washington, D. C. and the National Finance Center (NFC) in New Orleans, Louisiana. The Office’s duties include accounting and reporting responsibilities for approximately $143 billion in program outlays. OCFO also has management oversight responsibility for nearly a third of all non-tax debt owed to the U. S. Government. In addition, the Office administers and manages the Department’s Working Capital Fund. The appropriation for the Office of the Chief Financial Officer is authorized by 7 USC 2201 and 32 USC 901ff, and the appropriation for the Departmental Working Capital Fund is authorized by 7 USC 2235.
Biographies of career staff in key leadership positions

John G. Brewer  
Deputy Chief Financial Officer  
202-720-5539, john.brewer@cfo.usda.gov

Mr. Brewer is the Deputy Chief Financial Officer for the United States Department of Agriculture (USDA). He joined the Office of the Chief Financial Officer in March of 2002. He has been a member of the Federal Accounting Standards Advisory Board’s (FASAB) Accounting and Auditing Policy Committee. He has co-chaired a government-wide committee for the CFO Council to improve financial reporting of the United States Government, which receives a disclaimer on its financial statements.

He is a recipient of the Government-wide Initiatives Excellence Award for Efficiency and Value Creation presented by the Bethesda Chapter of the Armed Forces Communication and Electronics Association (AFCEA). The AFCEA Bethesda Government-Wide Initiatives Excellence Awards recognizes individuals or groups whose contributions in information technology have significance beyond their organization. These contributions represent achievements that advance business and citizen interaction, leading to improved effectiveness, cost-savings and leadership that meet national priorities and serve as a model of excellence government-wide.

Mr. Brewer led USDA’s efforts to be named a Federal Shared Service Provider (FSSP) for financial management by the Office of Management and Budget (OMB) and the Department of Treasury in May of 2014. This achievement was a result of USDA’s successful implementation of a new core accounting system using SAP. Mr. Brewer was instrumental in the design of the new system known as FMMI, which was built incorporating his vision of becoming an FSSP.

Mr. Brewer has over 25 years of executive management experience with international market leaders such as Nestlé and Kimberly-Clark. He has lead teams with responsibilities for Finance, Information Technology, Strategic Planning and Logistics by utilizing best practices. While the Vice President of Logistics and Information Technology at the Safeskin Corporation in San Diego, California; the company was ranked as the #1 Best Small Company in America by Forbes magazine in 1996. His efforts to develop strategic supplier relationships resulting in significant savings to Nestlé USA were recognized by the Chairman and CEO in Business Week in 1993. Mr. Brewer led the medical supplies industry in supply chain management programs and electronic communications while at Kimberly-Clark as reported in EDI World in 1991. He has been a member of the Supply Chain Steering Committee for the healthcare industry, which published the Efficient Healthcare Consumer Response in 1996.

He graduated from the University of Tennessee in Knoxville. He became a licensed certified public accountant (CPA) in Georgia and has worked with Ernst & Young as a CPA.
United States Department of Agriculture
2016 Presidential Transition
Office of the Chief Financial Officer (OCFO)

Michael W. Clanton
Associate Chief Financial Officer
202-690-3068, mike.clanton@cfo.usda.gov

Mr. Clanton has over 25 years of federal service with USDA, working in both Information Technology infrastructure operations and financial systems operations. He led USDA’s successful bid to become the newest federal financial shared service provider in 2014, and in 2015 transferred the GSA’s financial shared service systems organization to USDA. He currently leads USDA’s corporate financial management system operation, servicing all USDA agencies, GSA, and over 35 small boards and commissions.

In August 2008, he was named ACFO for Financial Systems and led the successful USDA implementation of SAP for financial management, replacing 17 separate financial systems with a consolidated Web-based system across the department’s 15 agencies and 14 staff offices. He automated key financial management processes at USDA, lowering operational costs for the financial user community.

He began his career at the OCFO National Finance Center as a systems engineer, analyzing infrastructure performance and capacity utilization. He spent six years as the project leader for NFC’s primary infrastructure modernization acquisition and implementation teams before becoming a member of the OCFO NFC senior IT management team. In his seven years in datacenter operations, he led the systems administration and engineering staff, the database management staff, the NFC IT vulnerability management team, and the IT budget and planning staff. During Hurricane Katrina, he led the restoration of NFC data center operations at the Philadelphia, PA disaster recovery site.

Throughout his career, Mike has participated in department-wide software and hardware acquisitions, collaborating with his peers in USDA to leverage the full buying power of the department and lower USDA’s total cost of ownership for Information Technology.

Mike holds a Bachelor of Science degree from Tulane University and is a Certified Project Management Professional. He is also a graduate of the Harvard University Kennedy School’s Senior Manager in Government Program.

Lynn M. Moaney
Associate Chief Financial Officer, Financial Policy and Planning
202-720-0065, lynn.moaney@cfo.usda.gov

Ms. Moaney has over 25 years developing and maintaining financial standards across the Federal Government and a proven record of leading organizational initiatives. Experience includes budget formulation and execution, acquisitions, audit, risk management, policy development, help desk support and financial operations support.
In September 2014, she was selected as the Associate Chief Financial Officer over Financial Policy and Planning. In this role, she is responsible for Department-wide development and implementation of fiscal and travel policy. Ms. Moaney serves as the Controller of the Working Capital Fund (WCF) and Shared Cost programs (SCPs) which includes formulating the $813M WCF budget and $33M SCP budget; providing agency allocation amounts and monitoring budget execution. Her responsibility also includes establishing Departmental policy related to maintaining internal controls in compliance with OMB Circular No A-123, to achieve the objectives of effective and efficient operations, reliable financial reporting, and compliance with applicable laws and regulation. Her team was in the forefront of reviewing the Department’s maturity level towards adoption of an Enterprise Risk Management (ERM) framework in response to new ERM requirements. Furthermore, she is responsible for improper payment mitigation and reporting as well as debt management, audit follow-up and overall administrative support including Continuity of Operations planning and Emergency Preparedness for the Office of the Chief Financial Officer Headquarters location. She also serves as the Chair of the National Finance Center (NFC)/OCFO Diversity and Inclusion Council and is active on several Committees and Boards within and outside the federal government.

Prior to this position, Ms. Moaney served as the Deputy Chief Financial Officer at the Federal Communications Commission where she was responsible for the day-to-day management and development of financial systems, budget, audit findings and remediation, financial statements and new or proposed changes to policy and procedures that affect financial operations.

Ms. Moaney holds a Bachelor of Business Administration degree in Accounting from Howard University and is a graduate of the Federal Executive Institute. She returns to the OCFO family as she previously worked in Financial Operations and was instrumental in implementing the Department’s legacy Foundation Financial Information System (FFIS).

Calvin W. Turner Jr.
Acting Director, National Finance Center
504-426-0104, calvin.turner@nfc.usda.gov

Mr. Turner permanent position is the Deputy Director of the National Finance Center. Prior to joining NFC, Turner was the Head of Business Banking for Hancock | Whitney Bank where he directed the enterprise-wide strategic activities for advancing the marketing and communications, branding and positioning, sales performance, product development, customer servicing, and overall growth and profitability of the Business Banking Segment for more than 300 branches in five states. Turner’s previous leadership roles with Whitney Bank were Business Banking Product/Marketing Manager and IT Program Portfolio Manager. As the Business Banking Product/Marketing Manager, Turner provided overall leadership and accountability for the development and marketing of innovative products and services (deposit accounts, online banking and bill pay, credit and debit cards, payroll cards, lines of credit, electronic checks, various payment options, merchant services, etc.) specifically tailored for the Small Business Segment. And as the IT Program Portfolio Manager, Turner was charged with
directing the enterprise-wide activities for the identification and implementation of large scale technology solutions that provided new product lines, generated increased revenue opportunities, increased operational productivity and efficiency, reduced operational costs, and enhanced customer satisfaction.

Before his tenure with Whitney Bank, Mr. Turner was the Owner/President/CEO of Total Business Solutions, which was a small business that provided marketing, consulting, graphic design, shipping, printing, and various other services to small businesses. Turner has also held leadership positions with Hibernia National Bank (now Capital One Bank), the Federal Reserve Bank in New Orleans, and United Parcel Service, and he is currently an Associate Instructor in Business Management, Organizational Development, Leadership Development, and Political Science with the University of Phoenix at the New Orleans campus.

Mr. Turner is active in the community and frequently can be seen on television volunteering as on-air talent with WYES TV/Channel 12 Public Television to help with their pledge drives, annual Art Auction, and Showboat Auction fundraisers. Turner serves/has served on the boards of numerous organizations including Berean Bible Church, Junior Achievement of Greater New Orleans, the Algiers Charter School Association, the Algiers Economic Development Foundation, Crescent City Community Housing Corporation, Algiers Community Network, 100 Black Men of Metro New Orleans, Inc., and Our Lady of Holy Cross College Friends of the Library, and he has coached Little League baseball and football with the New Orleans Recreational Department. Turner has a Master’s degree in Public Administration, and an undergraduate degree in Business Management and Communications.

C.J. Staton
Director of Financial Systems
202-692-0187, christopher.j.staton@cfo.usda.gov

Mr. Staton has over 25 years’ experience designing, building, implementing, and supporting enterprise-wide financial management systems. Mr. Staton began his career in 1988 after graduating with a B.S in Computer Technology from Purdue University in Lafayette, IN. Mr. Staton also holds a M.S in Information Systems from George Mason University, is a certified PMP, and holds a certificate in Cloud Security Knowledge from the Cloud Security Alliance. Mr. Staton began his career as a technical specialist for American Management Systems (acquired by CACI in 2003), designing and developing CORE Foundation software that was the basis for over 6 commercial products serving the Federal, State, Local, and DoD markets.

Over the next 25 years, Mr. Staton rose through the technical ranks of AMS from developer to Vice President. During his tenure he was roles included Database expert, Program and Project Manager, Director of Consulting, and Vice President in charge of the Intelligence Financial Management Practice. He spent 2 years as the product manager for the Momentum product, a leading federal financial ERP, overseeing product direction, strategy, development and support with a staff of over 100 technical resources.
Mr. Staton personally led the on-time, on-budget implementation of enterprise wide financial systems at clients such as USDA, GSA, HUD, IRS, DFAS, and multiple Intelligence agencies. He designed and executed the first shared services structure in the Intelligence community, which ultimately resulted on four agencies using the exact same financial system and sharing resources to reduce cost.

Subsequent to his AMS/CACI career, Mr. Staton served in several executive positions for multiple small companies. He joined USDA as the Director of FMS in November 2015.

Mr. Staton has five children with Kris, his wife of 26 years, and is highly active in the Boy Scouts of America, and spends a great deal of his free time hiking and camping is USDA managed forests.

Stanley T. McMichael
Director of Administrative Management
202-720-0564, stanley.mcmichael@cfo.usda.gov

Stanley McMichael is the Director of the Administrative Management Division for the U.S. Department of Agriculture’s (USDA) Office of the Chief Financial Officer (OCFO). In this role, he provides leadership and direction for budget and finance, procurement, resource management, human capital management, and facilities management decisions relating to OCFO’s Financial Policy and Planning. In a dual role capacity, Mr. McMichael serves as the Chief of Staff for the Associate Chief Financial Officer for Financial Policy and Planning. His responsibilities include day-to-day management of significant issues such as: fiscal and travel policies, conference policy oversight, Shared Cost Programs (SCPs), Diversity and Inclusion programs, Strategic Planning, Continuity of Operations, and Emergency Preparedness.

Previously, Mr. McMichael served as USDA’s Departmental Management’s Chief for Space and Asset Management. In that capacity, he was responsible for oversight and leadership of USDA’s Washington, D.C. National Capital Region’s (NCR) real property portfolio. The inventory consisted of approximately 6 million square feet of government-owned and leased facilities housing over 12,000 employees.

Mr. McMichael temporarily served as the Acting Deputy Associate Director for Retirement Services at the Office of Personnel Management (OPM). In this role, he directed and provided leadership for the budget and finance management, human resource management, business services, and technology information management programs in administering the Civil Service and Federal Employees Retirement System with an annual disbursement of over $68 billion in benefits. During his tenure at OPM, he also served on OPM’s Diversity and Inclusion team, where he gained valuable insight contributing to the successful development of Retirement Services’ comprehensive Succession Plan.

Additionally, he was Senior Advisor to USDA’s Director of Procurement and Property Management and Senior Advisor to USDA’s Office of General Counsel’s Director of
Jon M. Holladay
Chief Financial Officer
202-720-5539, Jon.Holladay@cfo.usda.gov

Jon Holladay’s career with the Department of Agriculture (USDA) began in June 1992. Since that time he has worked in numerous capacities within the Office of the Chief Financial Officer (OCFO). Mr. Holladay has been instrumental in improving the Department’s financial systems and processes. In 2004 Mr. Holladay joined the executive ranks as one of the youngest executives. In 2008 he became the Deputy Chief Financial Officer. He was awarded by the President of the United States the Meritorious Executive Rank Award and the Distinguished Rank Award for his sustained leadership accomplishments in 2008 and 2010 respectively.

Under the Chief Financial Officer Act of 1990, he is responsible to “oversee all financial management activities relating to the programs and operations of the agency.” The Chief Financial Officer has direct management of approximately 1,700 of employees located at the Washington D.C headquarters and National Finance Center in New Orleans, LA, Fort Worth, TX, and Kansas City, MO.

The USDA is one of the largest civilian agencies in the federal government with over 100,000 employees and over one-third of the non-taxable debt. The financial organization of the agency accounts for over $150 billion in program level funds and over $100 billion in loans. These programs support the areas of forest maintenance and fire-fighting, farm commodity support, food safety, agriculture development, foreign agriculture trade, domestic and foreign nutrition services, rural development, and agriculture research. With the myriad of programs, the USDA’s financial organization relies on a vast amount of complex financial software to support production and reporting requirements.

In addition to the financial management of the programs of the USDA, the Chief Financial Officer is responsibility for the National Finance Center. National Finance Center (NFC) is a Payroll Services Center of Excellence and a Human Resources Center of Excellence for the Federal Government. Through its high quality, low cost approach, NFC annually processes
United States Department of Agriculture
2016 Presidential Transition
Office of the Chief Financial Officer (OCFO)

payroll for 132 federal organizations totaling $75 billion in salaries for 625,000 civilian federal employees. The NFC reconciles 32 million healthcare benefit records. In 2005, as New Orleans was devastated by Hurricane Katrina, the NFC successfully exercised an emergency deployment plan to relocate computer systems and personnel to five alternative worksites with no visible disruption to its federal payroll customers.

Prior to becoming the Chief Financial Officer, Mr. Holladay served as the Associate Chief Financial Officer (ACFO) in June 2004. As the Associate Chief Financial Officer for Financial Policy and Planning he has performed the following activities:

- Revised the Department’s travel policy to implement a zero tolerance policy related to abuse of the travel charge card, to limit the use of travel advances, and to proscribe required disciplinary action for violation of USDA policy;
- Improved the Department’s monitoring program to identify travel card usage and repayment trends to develop strategies and methodologies to reduce the Department’s volume of delinquent accounts.
- Improved accountability over the competitive sourcing program by providing additional oral and written direction to USDA agencies regarding preparation of an accurate cost benefit analysis prior to undertaking studies, communicating with employees and union officials, and evaluating the cost of alternative proposals.

Jon Holladay is a graduate of the George Mason University School of Business.

Stacey Brayboy
Chief of Staff
202-205-0018, stacey.brayboy@cfo.usda.gov

Stacey Brayboy serves as chief of staff to the Chief Financial Officer (CFO) at the U.S. Department of Agriculture (USDA) in Washington, D.C. The Office of Chief Financial has direct management of approximately 1,700 of employees located at the Washington, D.C. headquarters and National Finance Center in New Orleans, LA.

In this capacity, she serves as a member of the OCFO executive leadership team and as a primary advisor to the CFO. She manages the daily priorities of OCFO, working closely with senior department officials, leaders of stakeholder groups, other federal agencies. Her experience in all levels of government extends over 17 years.

Most recently, as the Chief of Staff for Food Nutrition Services (FNS) at USDA, where she helped with the day to management and administering of FNS 15 nutrition assistance programs and nutrition education efforts providing access to food and healthful diet.

Prior to joining FNS, Brayboy served as the Director of Economic and Community Development for Rural Development at USDA, she helped small communities across the country better meet their economic development challenges. She also served as a member of
the Know Your Farmer, Know Your Food task force, the Strike Force task force, the Promise Zone Initiative, and Work Life and Wellness Committee.

Brayboy also served on the transition team for President Obama and Vice President Biden. She was the Obama campaign's South Carolina and Virginia state director during the Presidential primaries and later served as deputy director in Indiana and Virginia during the general election campaign.

Prior to joining the Obama campaign, Brayboy was the Deputy Director for the Virginia Council on Human Rights for the Commonwealth of Virginia. While living in Atlanta, Brayboy worked for U.S. Sen. Sam Nunn and the City of Atlanta government. Brayboy holds a bachelor’s degree in political science from Francis Marion University in South Carolina and a master’s degree in public administration from Clark Atlanta University. She is also a graduate of the Federal Executive Institute (FEI) in Charlottesville, VA.
Organizational Budget and Financial Management

No significant budget items in recent years for the appropriated account.

The Working Capital Fund (WCF) is the financing vehicle for supporting the Office of the Chief Financial Officer’s participation in the Federal Shared Services Provider (FSSP) program. As a participant in FSSP, OCFO added a significant new business line to its service offerings – Pegasys Financial Services (PFS). Under this new initiative, USDA and the General Services Administration (GSA) cooperated in a “lift and shift” strategy to move GSA financial system applications to a USDA environment under the PFS business line. This action increased WCF total operating costs by $72.9 million in FY 2016, but provides operational efficiencies to GSA and cost efficiencies to USDA through shared overhead costs among a larger customer base. FSSP and similar shared services initiatives can be a fruitful avenue to expand services and achieve additional cost efficiencies. USDA is in negotiations with a potential major customer that could add an additional $9 million in revenue in FY 2017 under the FSSP effort while improving further the operational efficiencies of services and cost efficiencies to USDA agencies.

</table>
Overview of the policy/regulation review process

The Digital Accountability and Transparency Act of 2014 (DATA Act) is the nation’s first open data law. It directs the federal government to transform all spending information into open data. The DATA Act takes two basic steps. First, it requires the Treasury Department and the White House Office of Management and Budget to establish government-wide data standards for the spending information that agencies already report to Treasury, OMB, and the General Services Administration. All agencies must begin reporting standardized spending information by May 9, 2017. Second, the DATA Act requires Treasury and OMB to publish all of this spending information for free access and download on the government’s USASpending.gov website by May 9, 2018.

The USDA OCFO FMS and PFS operate under the Working Capital Fund (WCF), which was established in 1944 (7 U.S.C. 2235). The mission of the WCF is to provide an effective financing mechanism to support those services the Secretary, with the approval of the Director of the Office of Management and Budget, determines may be performed more effectively as central services making it unnecessary to maintain separate like services in the agencies of the Department. The WCF is used to finance services provided to USDA and non-USDA agencies on a centralized, fee-for-service basis. The WCF has not received and does not receive funds as an individual discretionary account; it serves as a financing mechanism for which costs of operations are 100 percent reimbursable. Services to non-USDA agencies reduce USDA’s share of fixed costs for WCF-supported services. Centrally-managed operations provide efficient, economical services through economies of scale, extensive management attention, and regular fund reviews.

III. **Congressional Relations and Issues**

OCFO Congressional Directives:

- **Shared Costs Report.** The Committee directs the production of the report required in Public Law 113-235 to identify areas of savings and efficiencies in Shared Cost Programs (SCPs). OCFO is in the process of completing the report and expects to have it in clearance before October 31, 2016. Although the SCP Budget has remained relatively flat at $32M for the last 4 years, USDA has identified cost avoidances and efficiencies which have been reflected in the report.

- **GSA Rent and DHS Costs.** Directs the CFO to establish a uniform estimate of charges for both appropriated and non-appropriated accounts and provide accurate estimates to the Committee for the current and future fiscal years. OCFO prepared the report and it is in the Enterprise Content Management (ECM) for final clearance. To summarize, OCFO is requiring all USDA agencies and staff offices to provide an updated OMB Circular A-11 Exhibit 54 that details their General Services Administration (GSA) rental payments and Department of Homeland Security (DHS) security payments on the second Monday of August each year for inclusion with the USDA Departmental Budget.
Estimate submission to OMB. Once submitted, this information will be reviewed at the Department-level for completeness and reasonableness and then provided to OMB. As the President’s Budget is finalized, the Department will provide to the Committees a comprehensive summary of the information with the public release of the budget each year.

- **Unachieved Savings.** On April 9, 2015, USDA’s OIG informed Congress of “480 open or unimplemented recommendations totaling over $885 million”. This included 39 open recommendations and 441 unimplemented audit recommendations. The Committee finds it counterproductive to the Secretary’s effort to reduce costs when these items are still pending. The Committee directs the Secretary to develop a plan of action to address them, by priority, and provide a plan to the Committees on Appropriations of the House and Senate.

The President’s Fiscal Year 2017 budget request recommended changes to the Working Capital Fund (WCF) authority to grant franchise authority which would allow the WCF to be more competitive with other agencies that charge customers for centralized services and would allow the WCF to expand its authority to reserve operating income from just the National Finance Center to the entire Fund.

High Dollar Report: The Secretary sends the Inspector General a quarterly report of all high dollar improper payments discovered by the Department.

Supplemental Reporting to OMB for SNAP, School Lunch, School Breakfast and Federal Crop Insurance programs. The supplemental information is posted on paymentaccuracy.gov by OMB

IPERA Noncompliance: Each of USDA’s high risk programs (18 in FY 2016) must comply with IPERA. If they don’t they are mandated to take the following actions for the first three years of noncompliance:

- First year: A corrective action plan must be developed and sent to Congress
- Second year: Requests to resolve the non-compliance should be added to USDA’s budget request and sent to OMB for review
- Third year: A reauthorization proposal or legislative change must be submitted to Congress. FNS and NRCS have programs noncompliant for three years and haven’t yet completed this requirement

IV. **Internal and External Stakeholders**

**Important relationships with other Federal Departments or organizations**

OCFO is a finance shared service provider, currently servicing all USDA agencies, the General Services Administration (GSA), and over 35 small boards and commissions. USDA has been selected to provide financial services to the Veteran’s Administration (VA) and has begun work to map VA business processes to the financial system configuration. USDA is in discussions with the
Department of Homeland Security’s Federal Emergency Management Agency to provide financial system services, including automated grant processing.

**Internal Stakeholders:**

- USDA Agencies: FMS provides financial management support to all USDA agencies.
- General Services Administration (GSA): Partner on migration of Financial Management Services (FMS) systems and resources; current Pegasys Financial Services (PFS) finance shared services customer

**External Stakeholders:**

- Unified Shared Services Management (USSM): Partner on review and approval of financial management shared services customer migration processes, from discovery to service provision and sustainment

Major WCF customers (estimated revenue in excess of $10 million) include:

- Department of Homeland Security
- Department of Justice
- Department of Treasury
- General Services Administration
- Veteran Administration

**Stakeholder group overview**

OCFO has governance models employed for decision making as it relates to Shared Costs Programs (SCP) and WCF activities. These committees are comprised of senior executives (generally chief financial officers, or equivalent) of the program mission areas of the Department that fund these programs.

Office of Management and Budget – provides implementation and enforcement of Presidential policy government-wide. Also, provides guidance and oversite of budget.

USSM: ACFO Shared Services works closely with USSM to support new customer migration and will adhere to the communications cadence required by USSM.
Recent engagements with stakeholder group

On September 23, 2016, USDA was designated by the Office of Management and Budget as a Federal Shared Services Provider (FSSP) of the Momentum software solution for Financial Management.

WCF and SCP committees meet in the Spring/Summer of each fiscal year to review budget plans for 2 years out. This year’s review was for FY 2018. For the SCPs, the committee recommended that FY 2018 amounts be held at the FY 2017 funding level provided for in the Secretary’s SCP Allowance Decision memo dated July 20, 2016. Once the new administration comes on board, the FY 2018 budgets can be revisited as part of the FY 2019 SCP budget review that will be conducted in the spring of 2017. The WCF committee met with all activity centers and are finalizing recommendations for FY 2018 funding levels which are due no later than November 15, 2016.

V. Top Issues

Hot Topics

USDA will be working with the Veterans Administration to determine the appropriate configuration for the VA’s financial system in the USDA shared service environment.

Timeline

March 2017 – Update cost estimates for the full implementation of the Veteran’s Administration into USDA shared financial service

WHAT WE DO: OUR MISSION

OGC provides legal services and legal oversight required by the Secretary of Agriculture and USDA to achieve the Department’s mission and deliver programs and services to the American People. We support USDA’s efforts to help rural America thrive, reduce hunger in the U.S. and abroad, promote agricultural production, and preserve our Nation’s natural resources by providing proactive, accurate, creative and prompt legal services. We are committed to serving our clients in a way that is inclusive, collaborative, transparent, innovative, knowledge-driven and technology-enabled.

WHO WE ARE: OUR WORKFORCE

- OGC employs approximately 274 attorneys and support staff.
- We are headquartered in Washington, DC, with an additional 12 offices across the country.

WHO WE SERVE: OUR CONSTITUENTS

OGC serves as the law office of USDA and provides legal services to the Secretary of Agriculture, officials at all levels of USDA, and agencies within USDA. OGC assists DOJ with litigation in federal court, as well as provides technical assistance to members of Congress concerning the programs and activities carried out by USDA.

KEY UPCOMING DECISIONS

1. Determination by OGC leadership to open Collective Bargaining Agreement for negotiations in March 2017 with AFGE Local 1106 that represents OGC employees.
2. Respond to efforts to downsize OGC space in the South Building basement, including the USDA Law Library, Training Room and office space, in light of the Department’s modernization and space consolidation plans.
3. Determine how to maintain level of quality and responsive legal services with current OGC staff levels and possibly increase staff to FY 2009 level with projected FY 2015 flat line budget.

BUDGET HIGHLIGHTS FY 2016

- OGC’s overall budget authority is $47,880,000
- Includes $44,483,000 appropriated and $3,497,000 reimbursement funds
- Reimbursement sources include Hazardous Materials Management, Forest Service, Equal Employment Opportunity, and User Fees
- All funding is used to provide legal services to USDA

FY 2016 Budget Authority

- Appropriated: 93%
- Reimbursable: 7%
I. Organizational Overview

Agency’s Mission/Strategic Plan

OGC MISSION STATEMENT:
OGC provides legal services and legal oversight required by the Secretary of Agriculture and USDA to achieve the Department’s mission and deliver programs and services to the American People.

OGC VISION STATEMENT:
OGC supports USDA’s efforts to help rural America thrive, reduce hunger in the U.S. and abroad, promote agricultural production, and preserve our Nation’s natural resources by providing proactive, accurate, creative and prompt legal services. OGC is committed to developing its employees and to serving its clients in a way that is inclusive, collaborative, transparent, innovative, knowledge-driven and technology-enabled.

Key mission delivery performance measures

OGC serves as the law office of USDA and provides legal services to officials at all levels of USDA, as well as provide technical assistance to members of Congress concerning the programs and activities carried out by USDA.
Between 2014-2016, OGC handled over 25,000 matters, including 208 cases we consider significant because of the associated monetary value over $5 million or potential to impact USDA’s program operations.

Key Performance Measures:

<table>
<thead>
<tr>
<th>Performance Measure</th>

</tbody>
</table>

Organization’s History

By General Order of June 17, 1905, the Secretary of Agriculture established the position of Solicitor, thereby consolidating the legal activities of the Department. In 1956, Congress established the position of General Counsel of the Department of Agriculture as a Presidential appointee confirmed by the Senate (70 Stat. 742) (7 U.S.C. 2214).
Biographies of career staff in key leadership positions

Inga Bumbary-Langston
Deputy General Counsel, Office of the General Counsel (OGC)
202-690-2081, Inga.Bumbary-Langston@ogc.usda.gov

As the career Deputy General Counsel since November 2012, Ms. Bumbary-Langston has supervisory responsibility for the Office of Administration and Resource Management; Civil Rights, Labor, and Employment Law Division; the Central and Eastern Regions, and Law Library/Training. She works closely with the General Counsel, two Deputy General Counsels, and Senior Counselor to establish policy for the office and oversee operations. Ms. Bumbary-Langston joined OGC in July 2004, as Assistant General Counsel for the Civil Rights litigation section where she supervised attorneys who serve as agency counsel for high profile Equal Employment Opportunity Commission (EEOC) and U.S. Merit Systems Protection Board (MSPB) cases as well as provide support to US Department of Justice in employment and program discrimination cases filed in federal court, and provide advice and counsel to USDA senior officials. Before her tenure at USDA, Ms. Bumbary-Langston served as an Assistant U.S. Attorney and Chief of the Civil Division for the U.S. Attorney’s Office and interim U.S. Attorney for the Southern District of Iowa (Des Moines) between 1994 and 2004. Ms. Bumbary-Langston also served as an Assistant Attorney General for the State of Iowa; Executive Director, Iowa Civil Rights Commission; and was in private practice. Ms. Bumbary-Langston graduated from the University of Virginia School of Law and University of Virginia College of Arts and Sciences.

L. Benjamin Young, Jr. (Benny)
Associate General Counsel, General Law and Research Division
202-720-4814, Benjamin.Young@ogc.usda.gov

Mr. Young has been an attorney with USDA since 1991. His practice involves the supervision of 20 staff attorneys, one paralegal, and two support staff covering such diverse legal areas as the Freedom of Information Act, Federal Advisory Committee Act, government contracts, fiscal budget law, tort claims, Privacy Act, grants and agreements, appellate litigation, personal property, real property under the aegis of GSA, intellectual property, information technology, e-discovery, national security, cybersecurity, homeland security and emergency contingency planning, USDA appellate recommendations to DOJ in all cases, and the Research, Education, and Economics mission area programs of the USDA. From 2001-2002, Mr. Young was on detail to the minority staff of the Senate Agriculture Committee working on the 2002 farm bill. Mr. Young is a graduate of the University of Virginia and University of Virginia School of Law.
United States Department of Agriculture  
2016 Presidential Transition  
Briefing Material Template – Agency Level

Arlean Leland  
Associate General Counsel, Civil Rights, Labor and Employment Law Division  
202-720-1760, Arlean.Leland@ogc.usda.gov

Ms. Leland is a two-time Presidential Rank Award winner who has dedicated her federal career to promoting civil rights for all employees, applicants and recipients of programs at USDA. Ms. Leland supervises a staff of 21 attorneys in the litigation and enforcement of Equal Employment Opportunity (EEO) and program civil rights. She also advises USDA’s most senior-level management officials on EEO and program civil rights matters, and is the second highest ranking African American and female attorney in USDA’s Office of the General Counsel. A career public servant, she is a frequent lecturer and instructor in the area of EEO, federal sector personnel and labor law, and workplace disputes. Ms. Leland received her undergraduate degree in 1976 in American History from Brown University (Honors Program), and her law degree in 1979 from the George Washington University’s National Law Center. She has served on numerous boards, both local and national, is also Past President of the District of Columbia chapter of The National Coalition of 100 Black Women, and has been honored by the Royal Embassy of the Netherlands as one of their “People Who Make a Difference” for her work with pediatric AIDS and the HIV community.

Ralph Linden  
Associate General Counsel, Natural Resources and Environment  
202-720-6884, Ralph.Linden@ogc.usda.gov

Mr. Linden received his B.A. with Highest Distinction in 1979 from the University of Nebraska and his J.D. from the University of Notre Dame in 1982. He served in OGC from 1982 to 1989 as a staff attorney in the International Affairs and Commodity Programs Division (IACP); as a Deputy General Counsel, IACP, from 1989 to 1994; as Assistant General Counsel, IACP, from 1994 to 2008; as Associate General Counsel, International Affairs, Commodity Programs, and Food Assistance Programs from 2008 to 2012; and as the Associate General Counsel, Natural Resources and Environment since 2012. In this current capacity, Mr. Linden is responsible for the supervision of attorneys who provide legal advice on all aspects of natural resource and environmental law to officials of the Natural Resources and Conservation Service (NRCS), the Forest Service (FS) and senior Department of Agriculture officials overseeing these agencies. In addition, he supervises those attorneys who provide advice to all Departmental agencies with regard to statutes relating to hazardous waste and pollution control such as the Comprehensive Environmental Response, Compensation, and Liability Act. He has also served as the Associate General Counsel for the Commodity Credit Corporation since 2008 providing advice on the corporate governance activities of the Corporation, principally relating to the scope of the Corporation’s authority to act under the Commodity Credit Corporation Charter Act and with respect to the fiscal operations of the Corporation. Mr. Linden supervises an immediate staff of one Assistant General Counsel and 16 staff attorneys and works closely with the four Regional Attorneys to coordinate the provision of legal advice on NRCS and FS matters by attorneys in the twelve field offices of OGC.
Carrie F. Ricci  
Associate General Counsel, Marketing, Regulatory and Food Safety Programs Division (MRFSPD)  
202-720-3155, Carrie.Ricci@ogc.usda.gov

Ms. Ricci has supervisory responsibility for a team of 33 attorneys and professional support staff, providing legal services to USDA’s Agricultural Marketing Service, Animal Plant Health Inspection Service, Food Safety Inspection Service, and the Grain Inspection, Packers & Stockyards Administration. Ms. Ricci joined OGC in June of 2012 as the Assistant General Counsel for MRFSPD, and was appointed Associate General Counsel in October of 2013. Before her tenure at USDA, Ms. Ricci served as an Assistant General Counsel with the Department of Defense Education Activity (DoDEA), providing legal support to fourteen school districts world-wide, servicing 87,000 children in grades K-12. Before serving with DoDEA, Ms. Ricci served on active duty as an Army officer for 22 years, where she practiced criminal, fiscal, administrative, national security, and military personnel law. Ms. Ricci is a graduate of Georgetown University and the University of Maryland School of Law. She holds an LL.M. in Military Law from the Army Judge Advocate General’s Legal Center, and an LL.M. in Intellectual Property Law from the George Washington University School of Law.

David P. Grahn  
Associate General Counsel, Food Assistance, International, and Rural Division  
202-720-8063, David.Grahn@ogc.usda.gov

Mr. Grahn is responsible for the legal advice provided by the Office of the General Counsel to the Food and Nutrition Service, Farm Service Agency, Foreign Agricultural Service, Rural Housing Service, Rural Business-Cooperative Service, Rural Utilities Service, and the Federal Crop Insurance Corporation/Risk Management Agency. From 1996 to 2002, Mr. Grahn served as the Assistant General Counsel for Legislation and was responsible for the drafting and reviewing of legislation and the reviewing of Congressional testimony that affected agencies of the Department of Agriculture. Mr. Grahn was detailed to the Senate Committee on Agriculture, Forestry, and Nutrition during Congress’ consideration of the Federal Agriculture Improvement and Reform Act of 1996. From 1992 through 1995, Mr. Grahn served as a Confidential Assistant to the Administrator of the Farm Service Agency. Mr. Grahn is a graduate of the University of Minnesota Law School and Carleton College.

Andrea L. Foster  
Regional Attorney (Eastern Region)  
404-347-1090, Andrea.Foster@ogc.usda.gov

As the Regional Attorney for OGC’s Eastern Region since March 2006, Ms. Foster supervises the Atlanta Regional Office, headquarters for the Eastern Region, as well as branch offices located in Harrisburg, Pennsylvania, and Milwaukee, Wisconsin. The Eastern Region of OGC provides legal services to all the Agencies included in the umbrella of the U.S. Department of Agriculture with a particular focus on representing the Forest Service, Natural Resources Conservation Service, Rural Development, Farm Service Agency, Food and Nutrition Service, and Risk Management Agency. Work for the “Natural Resources” agencies focuses on a range
of issues including ecosystem management, endangered species protection, land use law, oil and gas mining, recreation, and wilderness management. Rural Development, Farm Service Agency, Food and Nutrition Service and Risk Management Agency work focuses primarily on commercial issues such as foreclosure laws, title issues, debt collection, bankruptcy, debarments from programs and crop insurance issues. In addition, Ms. Foster’s offices handle administrative tort claims, contract dispute litigation, civil rights and employment discrimination defense, as well as assisting the Justice Department and the U.S. Attorneys’ Offices in litigation in Federal Court. Prior to joining the USDA Office of the General Counsel, Ms. Foster was the Director of the Federal Trade Commission’s (FTC) Southeast Regional Office. As Regional Director, Ms. Foster supervised all of the enforcement, investigative, litigation and outreach activities of the FTC’s Consumer Protection Bureau throughout the southeastern United States. Ms. Foster graduated from the University of Oklahoma School of Law and University of Oklahoma College of Arts and Sciences.

**John Vos**  
**Regional Attorney (Central Region)**  
816-823-4675, John.Vos@ogc.usda.gov

Mr. Vos is the Regional Attorney for the Central Region, headquartered in Kansas City, Missouri, and also supervises two branch offices located in Little Rock Arkansas and Temple, Texas. The Central Region is comprised of thousands of communities categorized as "rural" and home to America's most productive farmland in 13 states: Iowa, Missouri, Kansas, Nebraska, Illinois, Indiana, Minnesota, Arkansas, Louisiana, Mississippi, Tennessee, Texas and Oklahoma. Mr. Vos supervises a staff of twenty attorneys and seven support professionals. The Central Region handles a wide variety of legal work in its geographic area. Mr. Vos began his legal career with OGC in 1991, in Washington, DC, in the Marketing, Regulatory and Food Safety Program Division (1991-1995) and later in the International Affairs, Food Assistance, Farm and Rural Programs Division (1996-2001). In late 2001, Mr. Vos moved to the Kansas City OGC Office, and he has been the Regional Attorney for the Central Region since 2011. Mr. Vos graduated from Calvin College and the University of Iowa College of Law, and is a native Iowan, growing up on a livestock and row-crop farm.

**Lisa Christian**  
**Regional Attorney (Mountain Region)**  
303-275-5536, Lisa.Christian@ogc.usda.gov

As Regional Attorney for OGC’s Mountain Region since 2011, Ms. Christian supervises OGC’s regional office in Denver, Colorado as well as field offices in Missoula, Montana and Albuquerque, New Mexico. The Mountain Region provides legal services to all USDA agencies in 10 states and is staffed by 24 attorneys and 7 support staff. Before joining OGC in 2011, Ms. Christian served as an Assistant U.S. Attorney for 19 years, including five years as Civil Chief for the U.S. Attorney’s Office for the District of Colorado. Previously, Ms. Christian was in private practice in Los Angeles. She graduated from Stanford Law School in 1986 and from Smith College in 1982.
Jeff Moulton
Regional Attorney (Pacific Region)
415-744-3166, Jeff.Moulton@ogc.usda.gov

As Regional Attorney for OGC’s Pacific Region, Mr. Moulton supervises OGC’s regional office in San Francisco, California, as well as the branch offices in Portland, Oregon, and Juneau, Alaska. The Pacific Region provides legal advice to USDA agencies and officials in California, Nevada, Hawaii, Oregon, Washington, Idaho, Alaska, Guam, American Samoa, Palau, the Federated States of Micronesia, and the Marshall Islands. Mr. Moulton has been an attorney with USDA since 1990. He became the Deputy Regional Attorney for the Pacific Region in 2005 and the Regional Attorney in 2008. Mr. Moulton and his team of more than 20 staff attorneys and seven members of the professional staff provide legal advice to the Forest Service, the Natural Resources Conservation Service, the Rural Development mission area, the Farm Service Agency, the Food and Nutrition Service, and other USDA agencies. Mr. Moulton received his undergraduate and law degrees from the University of California, Berkeley.

Charlene Buckner
Director, Administration and Resource Management
202-720-6324, Charlene.Buckner@ogc.usda.gov

Charlene Buckner was appointed Director of Administration and Resource Management for OGC in March 2008. Ms. Buckner is responsible for providing budget, personnel, and IT support services required by OGC. In her previous position, she served as the Finance and Budget Analyst for OGC for 18 years. Ms. Buckner has also worked as a Management Analyst and Budget Analyst in increasingly responsible positions at the Walter Reed Army Medical Center, the Defense Nuclear Agency, and the Internal Revenue Service. Ms. Buckner is a graduate of Howard University and has performed graduate work in Financial Management at American University.

Biographies of political staff in key leadership positions

Jeffrey M. Prieto
General Counsel
202-720-3351, Jeffrey.Prieto@ogc.usda.gov

On July 29, 2015, Jeffrey Prieto was confirmed as USDA’s General Counsel. Mr. Prieto joined the Office of General Counsel (OGC) in June 2014 as the Principal Deputy General Counsel. Mr. Prieto comes from the United States Department of Justice (DOJ) Environment and Natural Resources Division (ENRD) where he served since 1999. Most recently, he served as Deputy Executive Officer and General Counsel since 2012. He also served as Counsel to the Assistant Attorney General from 2010 to 2012. He joined ENRD as a Trial Attorney in 1999, after spending a year as an Attorney Advisor at the Environmental Protection Agency. During his tenure at DOJ, Mr. Prieto received multiple awards, including two DOJ Special Achievement Awards, the EPA Gold Medal for Exceptional Service, and the ENRD Assistant Attorney General Award for
Excellence in 2009 and 2011. From 1997 to 1998, Mr. Prieto was a White House Fellow assigned to the Secretary of Health and Human Services. Mr. Prieto earned a BA in history from the University of California, Santa Barbara in 1983; a J.D. from the University of California, Los Angeles School of Law in 1995, and a Masters in Public Affairs and Urban and Regional Planning from Princeton University in 1997.

Lee K. Fink
Principal Deputy General Counsel
202-205-4725, Lee.Fink@osec.usda.gov

Lee K. Fink became Principal Deputy General Counsel in May 2016. Mr. Fink first joined USDA as the Senior Counselor in the Office of the General Counsel in July 2013. He became Deputy General Counsel in October 2015. In 2012, Mr. Fink was the Voter Protection Director for the Obama campaign in Iowa, where he led the campaign’s voting rights efforts and coordinated over 700 volunteer lawyers. He previously served as the Director of Outreach and Intergovernmental Affairs at NASA, where he worked with Congress and state and local elected officials to advance the President’s agenda, and coordinated congressional visits to the final eight space shuttle launches. He has also worked in the White House Office of Presidential Personnel and on the 2008 Obama Campaign in Colorado. He has a B.A. in Political Science from the University of California, Berkeley, and earned his law degree from New York University, where he served as Editor-in-Chief/Chairperson of the Moot Court Board. After law school, Mr. Fink was a judicial clerk for the United States District Court for the Central District of California and was the statewide press secretary for now-Congressman John Garamendi’s 2002 campaign for Insurance Commissioner. From 2002-2008, Mr. Fink was a litigator in the Century City (Los Angeles) office of O’Melveny & Myers, where his practice covered the spectrum from Hollywood accounting to pro bono civil rights litigation. Lee grew up in Southern California and calls Redondo Beach his home, where he served on the planning commission and the local library foundation board.

Corey Then
Deputy General Counsel
202-720-2584, Corey.Then@ogc.usda.gov

Corey Then joined the Office of the General Counsel as a Deputy General Counsel in May 2015. Prior to joining OGC, Mr. Then served as the Special Assistant to the President for Presidential Personnel, Economics & Justice Team Lead, where he worked with economic departments and agencies across the Administration including Treasury, Commerce, Small Business Administration, Overseas Private Investment Corporation, Export-Import Bank, the U.S. Trade Representative, the General Services Administration, and independent regulatory bodies such as the Federal Reserve. Mr. Then previously served as Deputy Associate Counsel in the White House. Prior to working at the White House, Mr. Then was the Co-Founder, Managing Director and General Counsel of Renewable Capital Management, LLC, an entity that managed an economic development fund dedicated to renewable and clean tech projects. From 2006 to 2012, Mr. Then was an attorney at Williams & Connolly, LLP, where he primarily litigated cases arising from public policy disputes. Mr. Then is a graduate of Truman State University and Duke University School of Law.
Kellie Adesina  
Senior Counselor  
202-720-9240, Kellie.Adesina@ogc.usda.gov

Kellie Adesina joined the Office of the General Counsel in December 2015 as Senior Counselor. Prior to joining OGC, Ms. Adesina served as Legislative Director to Congresswoman Marcia L. Fudge where she was mainly responsible for developing and implementing the Congresswoman’s legislative agenda, as well as managing the legislative staff. In this role, Ms. Adesina also provided primary counsel to Congresswoman Fudge on an array of legislative issues, including agriculture, budget, poverty, and telecommunications. During her tenure, she guided the Congresswoman through the bipartisan Farm Bill Conference Committee negotiations. Prior to joining Congresswoman Fudge’s office, Ms. Adesina worked for Congresswoman Judy Chu as a Legislative Counsel and for Senator Robert Menendez in a variety of roles. Kellie earned her B.A. from Bethune-Cookman College, and her J.D. From The Ohio State University Moritz College of Law. She believes in service and giving back to her local community, so in her spare times she serves as a mentor, a member of Delta Sigma Theta Sorority, Incorporated, and a board member of the African American Women on the Hill Network.

II. Policies and Regulations

Statutory Authorities
N/A

Important Policies and Regulations

The Collective Bargaining Agreement (CBA) between USDA’s Office of the General Counsel and American Federation of Government Employees (AFGE), Local 1106, became effective in July 2000. AFGE Local 1106 was one of the first nationwide unions comprised of attorneys and professional staff in the federal government. OGC’s bargaining unit includes all of its employees, except those employees who are excluded from coverage under the Federal Labor-Management Relations Statute (for example, managers, supervisors, confidential employees, and employees engaged in substantive personnel work). The CBA is comprised of 44 Articles and addresses a wide variety of matters affecting conditions of employment, including Equal Employment Opportunity, Partnership, Mid-Term Bargaining, Training and Career
Overview of the policy/regulation review process

OGC provides extensive legal assistance in the development and review of regulations, notices, and other legal documents. Specifically, OGC attorneys provide extensive drafting and technical assistance to the Department and Congress on legislative proposals, support the Department in briefing Congress in response to inquiries, and assist the Department in the development of both internal and external policies.

GAO and OIG Audits

N/A

III. Congressional Relations and Issues

Overview

N/A

IV. Internal and External Stakeholders

Important relationships with other Federal Departments or organizations

Department of Justice (DOJ) – DOJ is responsible for conducting most of the trial and appellate work in which the United States is a party. DOJ represents USDA in Federal court during the prosecution and defense of civil cases in which USDA is a party; the prosecution of criminal cases brought by USDA; and the collection of debts owed to USDA which are administratively uncollectible.

OGC appears before the entities below to litigate matters:

Equal Employment Opportunity Commission (EEOC) – The EEOC is responsible for enforcing federal laws that make it illegal to discriminate against a job applicant or an employee because of the person’s race, color, religion, sex (including pregnancy, gender identity, and sexual orientation), national origin, age (40 or older), disability or genetic information. The EEOC has the authority to investigate charges of discrimination against employers, including USDA.
Merit Services Protection Board (MSPB) – The MSPB is an independent, quasi-judicial agency that serves as the guardian of Federal merit systems. Federal employees can request MSPB to conduct a hearing if the employee has been separated from his or her position, or suspended for more than 14 days.

Federal Labor Relations Authority (FLRA) – The FLRA administers the labor-management relations program for non-Postal employees worldwide. Among other responsibilities, FLRA is charged with resolving disputes under, and ensuring compliance with, the Federal Service Labor-Management Relations Statute.

Foreign Service Grievance Board (FSGB) – The FSGB handles employee grievances in the foreign affairs agencies, including USDA.

On occasion, OGC may collaborate with the following entities on key policy activities:

U.S. Trade Representative (USTR) – The USTR negotiates directly with foreign governments to create trade agreements, to resolve disputes, and to participate in global trade policy organizations. USTR also meets with agencies to gather input on trade issues and to discuss the President’s trade policy positions.

World Trade Organization (WTO) – The WTO serves a forum for governments to negotiate trade agreements and settle international trade disputes.

WHAT WE DO: OUR MISSION

The Office of Ethics (OE), reporting directly to USDA’s General Counsel, is the sole office implementing USDA’s Department-wide Ethics Program. OE conducts all ethics vetting and financial disclosure reviews for all incoming Presidential nominees and appointees. OE is the only office providing ethics services necessary to support all USDA employees and all USDA Staff Offices and Agencies. Amongst OE’s most important programs are: 1) Robust Ethics training for USDA employees; 2) Comprehensive reviews of approximately 15,000 annual financial reports; and 3) Individual ethics counseling for all employees.

WHO WE ARE: OUR WORKFORCE

- OE has a staff of 23 full time employees
- OE’s staff is primarily located in the DC Region, but we have remote employees in Illinois and Oregon

WHO WE SERVE: OUR CONSTITUENTS

OE enhances public confidence in the integrity and impartiality of USDA programs by providing ethics advice, training and guidance to all USDA employees, from its senior leadership to its junior staff, across the country and around the world.

KEY UPCOMING DECISIONS

Although OE does not have any pressing policy decisions upcoming, OE will be required to utilize INTEGRITY.GOV, the new mandatory electronic filing system, to process prospective Presidential nominees and incoming officials who may be unfamiliar with the myriad ethics requirements. OE staff will be required to work with the White House Counsel’s Office and the incoming nominees and appointees to prepare new entrant public financial disclosure reports, provide individual ethics counseling, conduct conflicts of interest analyses, and prepare ethics agreements and develop extensive compliance documentation.

BUDGET HIGHLIGHTS FY 2016

Total FY 2016 Budget Authority: $3.65 Million

FY 2016 Budget Authority

- USDA Ethics Program

100%
I. **Organizational Overview**

**Agency’s Mission/Strategic Plan**

The Office of Ethics is the sole office that operates USDA’s Department-wide Ethics Program and provides Program oversight, execution, policy development, and information to the Secretary and other senior policy officials to support the Department’s compliance with ethics laws and regulations. Additionally, the Office of Ethics serves the key functions of conducting all financial disclosure reviews, ethics training, Hatch Act training, and providing guidance to all employees of the Department. OE’s services raise employee awareness of, and compliance with the Ethics in Government Act, mandatory conflict of interest laws and the Hatch Act. USDA’s Ethics Program maintains the public’s confidence in the integrity of USDA’s workforce, programs, and initiatives.

**Key mission delivery performance measures**

The performance measures below track USDA’s Department-wide compliance with mandatory ethics training and financial disclosure filing requirements imposed by statutes and regulations. The results below are indicative of this department successfully meeting its baseline ethics requirements.

**Performance Measure 1:** Provide timely ethics training to USDA employees required to receive training.
- **Results:**
  - FY 2016: 99%
  - FY 2015: 99%
  - FY 2014: 99%
  - FY 2013: 99%
  - FY 2012: 95%

**Performance Measure 2:** Complete financial disclosure reviews within 60 days of filing.
- **Results:**
  - FY 2016: 98%
  - FY 2015: 98%
  - FY 2014: 95%
  - FY 2013: 95%
  - FY 2012: 75%

**Performance Measure 3:** Financial disclosure reports filed within regulatory time limits.
- **Results:**
  - FY 2016: 99%
  - FY 2015: 99%
  - FY 2014: 99%
  - FY 2013: 99%
  - FY 2012: 99%
Organization’s History

The Ethics in Government Act, 5 U.S.C. App 4 (the Act), established the ethics compliance requirements and infrastructure applicable throughout the Executive Branch. Under regulations implementing the Act, the head of each Executive Branch department or agency must exercise personal leadership in establishing, maintaining, and carrying out the agency’s ethics program and make available sufficient resources to ensure the agency’s ethics program can be implemented effectively (5 C.F.R. 2638.202).

The Office of Ethics (OE) is the centralized and consolidated office implementing USDA’s ethics program throughout the Department. As such, OE provides ethics services to the Secretary of Agriculture and employees at all levels of USDA concerning advice, training, and guidance about compliance with conflict of interest and impartiality rules. This includes complying with the requirements of the Stop Trading on Congressional Knowledge Act, Pub. L. No. 112-105 (2012) (The STOCK Act), Office of Government Ethics regulatory requirements (5 C.F.R. Parts 2634 through 2641) and the Hatch Act rules governing political activities (5 U.S.C. §§ 7321-7326).

In 2012, in order to highlight the importance of the USDA ethics program and to follow the best practice followed by every Cabinet-level Department, the Secretary of Agriculture ordered the realignment of the Office of Ethics from the Office of Human Resources Management to a stand-alone office reporting directly to the General Counsel (Secretary's Memorandum 1076-001, dated June 26, 2012). Oversight of all staff and ethics functions were transferred intact to the General Counsel, and the Office of Ethics and the Office of the General Counsel operate as separate organizational units.

OE consists of a Headquarters office and one Mission Areas Ethics Programs Support Branch. The current structure is the result of an organizational realignment that took place in early-2016 and combined the four branches that were previously in existence into one unified Mission Areas Ethics Programs Support Branch.

The 2016 reorganization provided a more effective and flexible structure for the Office of Ethics to utilize existing resources to successfully address the growing needs of the Department’s mission areas for ethics training, advice, and the review of over 15,000 financial disclosure reports. The realignment of the four branches into one combined branch eliminated structural barriers and enhanced the communication of information and the delivery of ethics services while also providing greater avenues for professional development and for the cross-utilization of employees. This effort aligned with the Department’s goal to improve business processes and modernize business operations.

Office of Ethics (OE)

Biographies of career staff in key leadership positions

Stuart Bender  
**Director and Designated Agency Ethics Official (DAEO)**  
202-720-2251, stuart.bender@oe.usda.gov

Mr. Bender serves as the Designated Agency Ethics Official (DAEO) and Director of the Office of Ethics at the Department of Agriculture (USDA). In this capacity, Mr. Bender is responsible for coordinating and managing the Department's Ethics Program, serving USDA employees across the country and around the globe. Mr. Bender reports directly to USDA's General Counsel.

Mr. Bender has been a public servant for more than 25 years. Before joining USDA in 2010, Mr. Bender was the Designated Agency Ethics Official and Assistant General Counsel at the Office of Management and Budget. From 1995 to 2004, he served as the Legal Counsel and Ethics Officer for the U.S. Holocaust Memorial Museum during its first decade. He has served as an attorney and ethics official in the Executive Office of the President and as a civilian attorney in the U.S. Navy.

Mr. Bender received his B.A. degree, cum laude, in political science from Brandeis University, and holds a J.D. degree, cum laude, from the George Washington University School of Law. Mr. Bender is a member of the Virginia and Maryland State Bars.

Andrew Tobin  
**Deputy Director and Alternate Designated Agency Ethics Official (ADAEO)**  
202-720-2251, andrew.tobin@oe.usda.gov

Mr. Tobin serves as the Alternate Designated Agency Ethics Official (DAEO) and Deputy Director of the Office of Ethics at the Department of Agriculture (USDA). Mr. Tobin has been with the Office of Ethics for more than 8 years. Prior to entering Federal service, Mr. Tobin worked for two years at the Office of Bar Counsel in Washington DC, assisting in the prosecution of attorney ethics violations.

Mr. Tobin received his B.A. degree, cum laude, in American Studies from Fairfield University in Fairfield, CT, and holds a J.D. degree from the Catholic University of America, Columbus School of Law. Mr. Tobin is a member of the Maryland State Bar.

Organizational Budget and Financial Management

Please note that, prior to FY 2013, the Office of Ethics was funded by Departmental Administration so budget data for those years is not included.

Potential INTEGRITY.GOV System Costs: Since January 2016, the Office of Government has required that all agencies must use INTEGRITY.GOV, the new mandatory electronic filing system developed by the U.S. Office of Government Ethics (OGE) for financial disclosure reports. Additionally, starting in January of 2017, OGE will require that all incoming political appointees and new career SES must use OGE’s INTEGRITY.GOV system (current SES will continue to file their reports using the existing system.) Although access to INTEGRITY.GOV is currently offered to agencies and their employees at no cost, the Office of Government Ethics has indicated that they may seek to charge agencies for access in the future. If that change does come to fruition, it would lead to a cost increase at USDA.

The Office of Ethics employs a workforce of 23 employees of which the following are full-time and part-time:
  o Full-time: 23 employees
  o Part-time: 0 employees

Of our total workforce, 17% are eligible to retire within the next year

Our headquarters is located in Washington, D.C., which houses 91% of our workforce. The remaining 9% (two employees) work remotely from their homes in Chicago, IL and Portland, OR.

Approximately one-third of OE’s staff members are attorneys.
II. Policies and Regulations

Statutory Authorities

The Ethics in Government Act, 5 U.S.C. App 4 (the Act), established the ethics compliance requirements and infrastructure applicable throughout the Executive Branch. Under regulations implementing the Act, the head of each Executive Branch department or agency must exercise personal leadership in establishing, maintaining, and carrying out the agency’s ethics program and make available sufficient resources to ensure the agency’s ethics program can be implemented effectively (5 C.F.R. 2638.202). The Office of Ethics (OE) is the centralized and consolidated office implementing USDA’s ethics program throughout the Department. As such, OE provides ethics services to the Secretary of Agriculture and employees at all levels of USDA concerning advice, training, and guidance about compliance with conflict of interest and impartiality rules. This includes complying with the requirements of several government ethics laws and regulations, including the following:

- The Stop Trading on Congressional Knowledge Act, Pub. L. No. 112-105 (2012) (The STOCK Act), which institutes reporting requirements for the government's most senior officials. The STOCK Act requires: (1) periodic reports of employees' securities transactions; and (2) additional notifications to the Ethics Office for officials commencing negotiations for post government employment.
- Office of Government Ethics regulatory requirements (5 C.F.R. Parts 2634 through 2641), which include standards that govern the conduct of all executive branch employees. Additionally, the regulations contain guidance concerning the interpretation of certain civil and criminal conflict of interest laws, implement statutory provisions relating to financial disclosure, and describe responsibilities relating to the administration of the executive branch ethics program.
- The Hatch Act (5 U.S.C. §§ 7321-7326), which is the federal statute governing the partisan political activities of Federal employees.

Important Policies and Regulations

1) New external reporting requirements imposed on Federal ethics programs due to changes to 5 CFR 2638: On June 6, 2016, the U.S. Office of Government Ethics (OGE) published a rule proposing to amend its regulations that govern the executive branch ethics program, which are found at 5 C.F.R. Part 2638. This rule was published in the Federal Register at 81 Fed. Reg. 36193-36211.

The proposed amendment, which is the most comprehensive revision in more than 25 years, is informed by more than three decades of experience gained by OGE and agency ethics officials in administering the executive branch ethics program. The proposed rule completely overhauls Executive Branch ethics programs, delineates the responsibilities of various stakeholders, and enumerates new key executive branch ethics procedures. Most importantly, the proposed rule
mandates several brand new data collection, tracking, and prompt external reporting requirements by Executive Branch ethics programs.

2) Revisions to the Seeking Employment Rules: On July 26, 2016, the U.S. Office of Government Ethics (“OGE”) published a final rule amending the provisions of the Standards of Ethical Conduct for Employees of the Executive Branch (“Standards of Conduct”) that govern seeking other employment found at 5 C.F.R. 2635, Subpart F. This rule was published in the Federal Register at 81 Fed. Reg. 48,687.

The final rule is the first major revision to Subpart F since 1993. The amendments implement the statutory notification requirements under section 17 of the Stop Trading on Congressional Knowledge Act of 2012 (“STOCK Act”), incorporate past interpretive guidance, add and update regulatory examples, improve clarity, update citations, and make technical corrections. For the first time, the rules also apply the definition of “seeking employment” to an employee’s social media activities.

3) Revisions to the Outside Gift Rules: On November 27, 2015, the U.S. Office of Government Ethics (OGE) published a rule proposing to revise the provisions of the Standards of Ethical Conduct that govern the solicitation and acceptance of gifts from outside sources found at 5 C.F.R. 2635 Subpart B. This rule was published in the Federal Register at 80 Fed. Reg. 74004-74018. The public comment period closed on January 26, 2016 and the final rule has not yet been issued.

The proposed amendments would make substantial changes to the existing gift regulations to more effectively advance public confidence in the integrity of federal officials. Additionally, the amendments would incorporate past interpretive guidance, add and update regulatory examples, improve clarity, update citations and make technical corrections.

4) New OMB Reputational Risk Management Requirements: Various Administrations have emphasized the importance of having appropriate risk management processes and systems to identify challenges early, to bring them to the attention of Agency leadership, and to develop solutions. On July 15, 2016, The Office of Management and Budget (OMB) updated its OMB A-123 Circular to ensure Federal managers are effectively managing risks an Agency faces toward achieving its strategic objectives and arising from its activities and operations. These expanded responsibilities reinforce the purposes of the Federal Managers’ Financial Integrity Act (FMFIA) and the Government Performance and Results Act Modernization Act (GPRAMA).

The policy changes in the recently updated Circular modernize existing efforts by requiring agencies to implement an Enterprise Risk Management capability coordinated with the strategic planning and strategic review process established by GPRAMA, and the internal control processes required by FMFIA and Government Accountability Office (GAO)’s Green Book. This integrated governance structure will improve mission delivery, reduce costs, and focus corrective actions towards key risks, including the risk of ethical failure and reputational risk to the Department.
United States Department of Agriculture
2016 Presidential Transition
Office of Ethics (OE)

The Office of Ethics will play a key role in defining and mitigating ethics risks to USDA. The circular calls for the Designated Agency Ethics Official, the Director of the USDA Office of Ethics, to become part of USDA’s Senior Management Council (SMC), which will be an agency wide, joint risk management team. The circular also details various sources that the SMC may use to identify key risks and mitigate them. Much of the work-product and compliance work that OE completes would be needed by the SMC for identifying and mitigating ethics risks. These new responsibilities will require the office to provide advanced advisory and program assessment services to the SMC and USDA that are not currently being delivered.

Overview of the policy/regulation review process

Under 5 C.F.R. 2635.105, any proposed agency supplemental regulation which modifies or supplements the Standards of Ethical Conduct for Executive Branch Employees (5 C.F.R. Part 2635) can be effective only after concurrence and co-signature by the Office of Government Ethics and publication in the Federal Register. Supplemental ethics regulations applicable to USDA employees can be found at 5 C.F.R. 8301.

In addition, OE manages the following programs to support the Department’s compliance with ethics laws and regulations:

- Department-wide ethics training program
- Department-wide financial disclosure review program
- Department-wide outside activity and employment review program
- Department-wide non-Federal sponsored travel program
- Department-wide post-government employment program

GAO and OIG Audits

USDA’s Ethics Program was audited by the U.S. Office of Government Ethics (OGE) in 2012 and a follow-up audit was conducted in 2013. In the follow up audit, OGE stated that “OE’s staffing level had been reduced by 12 employees over the last several years, noting that OGE “will continue to monitor the ethics program at USDA.” (U.S. Office of Government Ethics, Follow Up Review Letter to USDA, March 27, 2013, Page 2). OGE has indicated that, pursuant to its usual audit schedule, it is expected that the USDA Ethics Program will be audited again in 2017.

Both recent audit reports are publicly available on OGE’s website:

2012 Audit Report:
https://oge.gov/Web/OGE.nsf/Program%20Review%20Reports/68B5781C3E6A58D185257EA40070E405/$FILE/50f77ad06d0f4e99a83d90b369c9773a4.pdf?open

2013 Follow-Up Report:
https://oge.gov/web/oge.nsf/Program%20Review%20Reports/A0CA423BDDAEAA7FC85257EA40070E412/$FILE/0d6f530b812644f797f8e36a5003585f3.pdf?open
III. Congressional Relations and Issues

Overview

Hatch Act: Congress has shown an interest in past years in the political activities of Federal employees, particularly as related to political travel and public statements made in support of active candidates.

Outside Employment Rules: USDA has received inquiries from Congressional offices in the past regarding the rules governing outside employment for USDA employees, including the USDA-specific supplemental agency ethics regulations agency-specific. At USDA, pursuant to supplemental ethics regulation, any employee who is required to file either a public or confidential financial disclosure report (OGE 278 or OGE Form 450), is required to obtain written approval before engaging in outside employment. See 5 CFR § 8301.102. Additionally, employees of the Farm Service Agency, the Food Safety Inspection Service, the Office of the Inspector General, the Office of the General Counsel and Rural Development, are required to seek advance approval before engaging in certain types of outside employments regardless of their status as a financial disclosure filer. See 5 CFR §§ 8301.103-107.

Post-Employment Restrictions: The criminal post-government employment restrictions are extremely complex, particularly for former senior officials. USDA has received inquiries in the past regarding the propriety of actions taken by former government officials in their post-government employment roles.

IV. Internal and External Stakeholders

Important relationships with other Federal Departments or organizations

The White House Counsel’s Office (WHCO) works with the USDA Office of Ethics and the Office of Government Ethics to vet Presidential nominees who require Senate confirmation for appointment. The USDA Office of Ethics is in regular contact with officials from WHCO and OGE throughout the nomination process to review the financial interests of Presidentially-appointed, Senate-confirmed nominees for possible conflicts of interest with their prospective duties. When such conflicts are found, the USDA Office of Ethics identifies remedies to resolve them so that the President’s appointees can carry out their duties free from those conflicts of interest.

The USDA Office of Ethics also works with WHCO to help prospective Presidential nominees to Senate-confirmed positions comply extensive financial disclosure requirements of the Ethics in Government Act. USDA ethics officials carefully evaluate the nominee’s financial disclosure report and work to prepare an individualized ethics agreement to avoid and resolve potential conflicts of interest before the nominee enters government service.

The US Office of Government Ethics (OGE) (www.oge.gov) oversees the executive branch ethics program and works with a community of ethics practitioners made up of over 4,500
ethics officials in more than 130 agencies to implement that program. As described above, the USDA Office of Ethics works closely with OGE and the White House Counsel’s Office to vet Presidential nominees who require Senate confirmation for appointment. OGE also conducts regular program reviews of executive branch ethics programs like USDA’s. OGE’s most recent review of USDA’s ethics program was conducted in 2012.

Additionally, the USDA Office of Ethics is required to report the following information to OGE:

- Annual Program Questionnaire, OGE’s executive branch-wide survey of agency ethics programs, containing a large amount of information about USDA’s ethics program including data on the staffing of USDA’s ethics program and the status of USDA’s financial disclosure and ethics training programs. The results of the questionnaire are published on OGE’s website on an annual basis.

The US Office of Special Counsel (OSC) (www.osc.gov) investigates and prosecutes violations of the Hatch Act, a federal law passed in 1939, which limits certain political activities of federal employees. The law’s purposes are to ensure that federal programs are administered in a nonpartisan fashion, to protect federal employees from political coercion in the workplace, and to ensure that federal employees are advanced based on merit and not based on political affiliation.

The USDA Office of Ethics provides training on the Hatch Act restrictions and is in regular contact with the OSC’s Hatch Act Unit regarding potential violations and updates to the interpretation of the political activity restrictions.

The Interagency Ethics Council (http://www.iecjournal.org/) is an organization of federal employees who work in the area of standards of conduct for government employees, often referred to as “ethics” for government employees. The IEC meets on a monthly basis to make presentations on ethics topics and to discuss pressing or emerging issues that impact the work of federal ethics officials. USDA officials regularly attend and present at these meetings.

Designated Agency Ethics Officials (DAEOs) at Other Executive Branch Agencies regularly interact with USDA’s DAEO, the Director of the Office of Ethics on novel or complex ethics issues they confront. Additionally, DAEOs from throughout the Executive Branch meet with the Director of the Office of Government Ethics on a quarterly basis to provide the Director with the opportunity to share the most up-to-date information on OGE plans and initiatives.

**Stakeholder group overview**

The Office of Ethics is charged with proactively working to prevent conflicts of interest in USDA programs and, therefore, its constituents are primarily USDA employees at all levels and in all office locations. In addition, the Office of Ethics provides ethics services (e.g. ethics training, advice on the application of the federal ethics rules, etc.) to USDA’s advisory
committees, which are composed of a combination of full-time Federal employees, Special Government Employees and representatives of outside constituent groups.

Recent engagements with stakeholder group

Not applicable.

V. Top Issues

Hot Topics

Ethics Vetting for Presidential Appointees: The USDA Office of Ethics and the Office of Government Ethics work with the White House to vet Presidential nominees who require Senate confirmation for appointment. The USDA Office of Ethics is in regular contact with officials from WHCO and OGE throughout the nomination process to review the financial interests of Presidentially-appointed, Senate-confirmed nominees for possible conflicts of interest with their prospective duties. When such conflicts are found, the USDA Office of Ethics identifies remedies to resolve them so that the President’s appointees can carry out their duties free from those conflicts of interest.

For those appointees that do not require Senate confirmation (e.g. Farm Service Agency State Executive Directors, Rural Development State Directors) the Office of Ethics will work with each new appointee to assist them in using Integrity.gov to submit their OGE 278 Public Financial Disclosure Reports as required by the Ethics in Government Act. USDA ethics officials will then carefully evaluate the appointees’ financial disclosure reports and work with them to avoid and resolve potential conflicts of interest.

Ethics and Intergovernmental Personnel Act (IPA) Detailees: The IPA program allows for the temporary assignment of personnel between the Federal Government and state and local governments, colleges and universities, Indian tribal governments, federally funded research and development centers, and other eligible non-Federal organizations. IPA detailees are frequently used at the beginning of Presidential administrations to secure input from non-Federal experts. Cost-sharing arrangements for mobility assignments are negotiated between the participating organizations. The Federal agency may agree to pay all, some, or none of the costs associated with an assignment.

Although assignees to Federal agencies remain employees of their non-Federal instructions during their assignments, they are subject to a number of provisions of law governing the ethical and other conduct of Federal employees, including the criminal conflict of interest statutes found in Title 18 of the United States Code. Since conflicts of interest, or the appearance thereof, may be inherent in the assignment of IPA employees, the Office of Ethics should be consulted in the early stages of the appointment process to help ensure that potential conflict of interest situations do not inadvertently arise during an assignment.
Timeline

New appointees at all levels will be brought on board during the first six months to one year of the new administration. For those requiring Senate confirmation, the USDA Office of Ethics will interface with the White House Counsel’s Office and the Office of Government Ethics throughout the nomination process, as described above. The USDA Office of Ethics will work with appointees at all levels to assist them in satisfying their financial disclosure requirements and resolving any potential conflicts of interest. The USDA Office of Ethics will also provide detailed ethics training to new appointees to assist them in navigating the complex ethics laws and regulations that will be applicable to them in their new roles.

Appendix A: Acronyms

DAEO: Designated Agency Ethics Official
WHCO: White House Counsel’s Office
OGE: US Office of Government Ethics
PAS: Presidential Appointee requiring Senate confirmation
OSC: US Office of Special Counsel
IPA: Intergovernmental Personnel Act
WHAT WE DO: OUR MISSION

The Office of Budget and Program Analysis (OBPA) provides analyses and information to the Office of the Secretary and other policy officials to support informed decision-making regarding the Department’s programs and policies, budget, legislative, and regulatory actions.

WHO WE ARE: OUR WORKFORCE

- OBPA currently employs 48 staff
- All staff are located at Headquarters in Washington, D.C.

WHO WE SERVE: OUR CONSTITUENTS

OBPA assists the Secretary, Deputy Secretary and other senior policy officials by providing analyses and information to support informed decision-making regarding the Department’s programs and policies, budget, legislative, and regulatory actions. In fulfilling its mission OBPA works with mission areas, agencies and staff offices. OBPA serves as a liaison with the Office of Management and Budget and the Appropriations Committees of Congress.

KEY UPCOMING DECISIONS

Development of the FY 2018 Budget — Immediate need to begin developing FY 2018 programmatic budget proposals based on guidance from OMB expected in late January. Budget release could be as early as the March/April 2017 timeframe;

Draft the next USDA Strategic Plan — Departments are statutorily required to develop a new Strategic Plan and release it with the FY 2019 budget. Submittal of a draft plan to OMB is expected by June 2017; and

Development of regulatory priorities — A review of recent regulatory actions and the development of rulemaking priorities will be needed within the first months of the Administration.

BUDGET HIGHLIGHTS FY 2016

- The total budget authority for OBPA for FY 2016 is $9 million
- All funding for OBPA is discretionary funding appropriated by Congress annually.
- There have not been any major budget changes in recent years.
I. **Organizational Overview**

**Agency’s Mission/Strategic Plan**

The mission of OBPA is to provide analyses and information to the Office of the Secretary and other policy officials to support informed decision-making regarding the Department’s programs and policies, budget, legislative, and regulatory actions. OBPA’s goals and objectives include:

Goal 1: Assist the Office of the Secretary and other policy officials in decision making and policy implementation by providing objective information and analyses regarding the Department’s programs and policies.

- Objective 1: Conduct policy and program analyses, and other reviews that provide timely, objective, and analytically sound information.

Goal 2: Ensure the Department’s budget is consistent with policy decisions and that resources are allocated to agencies considering priorities, performance, and applicable law.

- Objective 2: Coordinate the preparation and presentation of a Department-wide budget that integrates performance information into the process and monitor the allocation of resources to the agencies.

Goal 3: Ensure the Department’s legislative proposals and regulatory actions are analytically sound and consistent with Departmental and Administrative policy.

- Objective 3: Provide appropriate coordination and analysis of legislative and regulatory actions.

For more information and to receive a copy of OBPA’s strategic plan, contact Associate Director Don Bice at don.bice@obpa.usda.gov.

Organization’s History

The Office of Budget and Program Analysis (OBPA) was established in June 1981. Its predecessor organization was established on July 8, 1922 (Secretary’s Memorandum No. 389), under the provisions of the Budget and Accounting Act of 1921 (Pub. L. No. 67-13), which designated that a Budget Officer was to have charge of the preparation of estimates and other appropriations for the Department.
Michael Young  
**Director**  
202-720-3323, mike.young@obpa.usda.gov  

Michael Young was appointed Director of OBPA in October, 2010. Mr. Young has over thirty years’ experience in OBPA, previously having served as the Associate Director of OBPA since January, 2006. In that capacity, he shared with the Director the responsibility for overall management of the Office. Earlier, he served as Chief of the Budget Control and Analysis Division of OBPA since December, 1994. In that position, Mr. Young was responsible for managing the review of USDA agency budgets during formulation and execution of the budget.

Mr. Young previously served in a number of budget and program analysis positions within OBPA, including Program Analyst for Research, Education and Extension programs and Budget Analyst for Food and Nutrition Programs. Earlier in his career, Mr. Young held budget and program analyst positions at the Department of Commerce and the Department of Veterans Affairs.

Mr. Young holds a Bachelor of Science degree (Botany, Colorado State University) and a Master of Business Administration degree (George Washington University).

Donald Bice  
**Associate Director**  
202-720-5303, don.bice@obpa.usda.gov  

Donald Bice is the Associate Director of OBPA and the Department’s Performance Improvement Officer (PIO). Mr. Bice has over twenty five years’ experience in OBPA. As Associate Director, he shares with the Director the responsibility for overall management of the Office.

From June 2008 through his selection to this position, Mr. Bice served as the Deputy Director for Budget, Legislative and Regulatory Systems, and was responsible for managing the development and execution of the Department’s budget, managing the Department’s regulatory and legislative reporting process, and providing Department-wide leadership to implement performance activities. Prior to that, Mr. Bice was Director of the Budget Control and Analysis Division and was responsible for managing the review of USDA agency budgets during formulation and execution of the budget.

Mr. Bice previously served in a number of positions within OBPA, including Supervisory Analyst and Senior Program Analyst with responsibility for the Department’s natural resources and research agencies. Mr. Bice graduated from the University of Maryland with a degree in Government and Politics and holds a law degree from American University.
Christopher J. Zehren
Deputy Director for Program Analysis
202-720-3396, chris.zehren@obpa.usda.gov

Mr. Zehren began his career with OBPA 32 years ago and has held a range of positions responsible for the analysis of USDA budget, regulatory, and other programmatic issues. Mr. Zehren has served as the Deputy Director for Program Analysis within OBPA since 2005. Mr. Zehren provides overall leadership and management of program analysis functions that support policy and budget decision-making within USDA. Mr. Zehren advises Department policy officials, including the Office of the Secretary, on the full range of program issues as they impact the Department’s budget, legislative authorities, and regulations. Mr. Zehren’s broad management and leadership capabilities enabled him to coordinate several Department-wide efforts, including leadership transitions in the Office of the Secretary, implementation of the 2002, 2008 and 2014 Farm Bills, and evaluation of USDA’s budget and regulatory plans. Mr. Zehren plays a critical role in communicating the Department’s goals, priorities, and initiatives to the public, Congress, and other stakeholders.

Diem-Linh Jones
Deputy Director for Budget, Legislative and Regulatory Systems
202-720-6667, diem-linh.jones@obpa.usda.gov

Diem-Linh Jones is currently the Deputy Director for Budget, Legislative and Regulatory Systems in OBPA. In her current capacity, Ms. Jones is responsible for overseeing the Department’s budget process and legislative and regulatory tracking systems. She is also the Department’s principal liaison with the Appropriations Committees on technical budget matters. Ms. Jones joined OBPA in August 2002 as a staff chief and was selected to the Senior Executive Service in December 2005.

Prior to coming to the USDA, Ms. Jones supervised the Office of Planning and Budget at the U.S. Small Business Administration and acted as Budget Officer from June 2000 to July 2001. She started her government career in July 1991 at the U.S. Department of Transportation in the Department’s Management Training Program.

Diem-Linh Jones has a Bachelor’s Degree in Business Administration from the College of William and Mary and a Master’s Degree in Public Administration from George Mason University.
Nicole Pollard
Director for Budget Control and Analysis Division
202-720-2768, Nicole.pollard@obpa.usda.gov

Nicole Pollard is the Director of the Budget Control and Analysis Division in OBPA. Ms. Pollard has over twenty one years’ experience in OBPA, and in her current position she is responsible for managing the review of USDA agency budgets during formulation and execution of the budget.

Ms. Pollard previously served in a number of budget analysis positions within OBPA, including supervisory budget analyst for the Control Staff as well as various other mission areas within USDA. Ms. Pollard held a legislative analyst position at the Agricultural Marketing Service, USDA. In 2014, Ms. Pollard was detailed to the U.S. Senate Subcommittee on Agriculture, Rural Development, Food and Drug Administration, and Related Agencies, Committee on Appropriations as a senior staff assistant position. She was responsible for the budgets of the four agencies comprising the Research, Education, and Economics Mission Area, the Natural Resources Conservation Service, and Departmental administrative offices all within USDA.

Ms. Pollard holds a Bachelor of Science degree in Business Administration from Salisbury State University.

Biographies of political staff in key leadership positions

OBPA does not have any political staff positions in its office.
Organizational Budget and Financial Management

OBPA has not experienced any major budget changes. The office’s funding is sourced entirely from discretionary appropriations provided through annual appropriations bills.

• OBPA employs a workforce of 48 employees of which the following are full-time and part-time:
  o Full-time: 47 employees
  o Part-time: 1 employee

• OBPA typically hires at least two interns during the year.

• Of the total OBPA workforce, 13% are eligible to retire within the next year.

• OBPA is located in the Whitten Building in Washington, D.C.

• None of the OBPA staff are unionized.

II. Policies and Regulations

Statutory Authorities

OBPA does not deliver programs that are authorized by statute, but manages its mission delivery by operating under statutory processes. These include adhering to a variety of budget related statutory requirements (e.g. Budget Control Act, the Anti-deficiency Act), regulatory process requirements (e.g. the Administrative Procedures Act and the Congressional Review Act), and strategic planning requirements (Government Performance and Results Act).
Important Policies and Regulations

- Annual Budget Data Calls
- Departmental Regulation 1260 (April 2002), *Legislative Reports and Proposals*
- Departmental Regulation 1512 (March 1997), *Regulatory Decision making Requirements*

Overview of the policy/regulation review process

OBPA develops objective analyses and other information products to assist policy officials in decision making as well as program oversight and coordination functions. OBPA’s responsibilities in managing Department-level budget, strategic planning and performance, legislative and regulatory analysis and coordination functions allow the office to provide support for policy actions covering the full range of USDA programs.

**Strategic Planning and Performance**

OBPA is responsible for key activities required under the Government Performance and Results Act of 1993 (GPRA) (Pub. L. No. 103-62) and for overseeing strategic planning and performance improvement activities. These responsibilities include working with agencies and the Office of the Secretary to develop the Department’s Strategic Plan, preparing the Annual Performance Plan, supporting the Deputy Secretary (Chief Operating Officer) by conducting quarterly data driven review meetings, preparing the Annual Performance Report, and focusing on ways to improve program delivery and effectiveness while operating within resource constraints. The Associate Director serves as the Department’s Performance Improvement Officer. OBPA serves as a liaison between the Department’s agencies and the Office of Management and Budget to ensure that USDA adheres to the Administration’s position on improving Government performance. OBPA carries out these responsibilities as an integral part of the other processes described below (i.e., Budget, Legislative, and Regulatory).

**Budget Process**

OBPA carries out an analytically based decision-making process with USDA policy officials to determine how best to allocate the resources of the Department among competing goals to achieve desired policy outcomes. Key stages of the budget process include formulation, presentation to the Congress and implementation of USDA’s budgets following Congressional action. Throughout the process, OBPA staff ensure budget materials support an informed decision making process and meet the technical requirements of OMB and the Congress.
In terms of budget formulation, OBPA develops guidance to be followed by USDA agencies in preparing detailed data to be submitted in support of the Administration’s and Department’s priorities. OBPA reviews agency budget proposals and prepares a set of analytical documents to assist the Secretary and Deputy Secretary in making decisions on agency budget and associated performance proposals spanning all mission areas and offices of the Department. Based on these policy decisions, OBPA works with agency budget and program staff to prepare the Department’s budget for submission to the Office of Management and Budget (OMB). After the Department’s Estimates are submitted to OMB, OBPA coordinates the discussions with OMB on its review and analysis of the budget documents and assists the Secretary and Deputy Secretary in final negotiations with OMB on the Budget. After final budget numbers are agreed to, OBPA works with the agencies to produce a set of detailed justification materials which are provided to the Appropriations Committees.

The President's Budget is due to Congress not later than the first Monday in February. At the time the budget is made public, the Department generally holds briefings for the media, Congressional staff and other interested stakeholders. OBPA develops briefing materials and budget overviews and works with the Office of Communications and the Assistant Secretary for Congressional Relations to coordinate these events. OBPA is also responsible for coordinating the preparation and review of witness statements, briefing books and other supporting materials prior to Congressional hearings on the budget and for managing the process of responding to written questions from members of the Appropriations Committees. The Secretary is generally asked to testify on the Budget before the House and Senate Appropriations Committees and is accompanied by the Budget Officer. Throughout the year, senior OBPA staff – in coordination with the Office of Congressional Relations – work closely with Appropriations Committee staff to ensure Committee requests for information are met consistent with Department policy and in a timely manner. OBPA provides updates to policy officers on significant Congressional actions involving the budget.

With regard to budget execution, OBPA is responsible for managing the Department's system of resource allocation, including funds and staff years. Key responsibilities include managing the process to request apportionment of funds by OMB and allocation of funds to agencies in order to implement programs and carry out policy decisions and program operations. OBPA provides analytical support to policy staff to assist in the decision process and to identify potential funding options to meet programmatic needs throughout the year. This may include the transfer of funds, reprogramming, or supplemental appropriations.

**Regulatory Process**

OBPA is responsible for providing analytic support to decision makers and managing the Departmentwide regulatory clearance process. A key aspect is the review of regulations for potential budgetary, performance and operational implications and working with policymakers to determine the necessary level of review for regulations, depending upon the significance of the action involved. OBPA is also often called upon to resolve
conflicts in the regulatory development process between and amongst the agencies and with OMB and other Departments. Such conflict resolution is necessary to ensure that USDA regulations are issued timely and address the needs of the entire Department and other Federal Departments. OBPA also manages the process to ensure all regulations to implement statutory requirements and establish program operating policies receive appropriate legal clearance and review by other staff offices prior to clearance by policy officers for submission to OMB and publication in the Federal Register. OBPA issues guidance to agencies covering preparation and clearance of regulations and works in close coordination with the Department’s Regulatory Policy Officer to prepare and submit the annual Regulatory Plan and Regulatory Agenda to OMB. OBPA also is responsible for coordinating requests from the Office of Management and Budget’s Office of Information and Regulatory Affairs to review other Departments’ regulatory actions.

**Legislative Process**

OBPA manages a process within the Department to ensure that legislative proposals developed to implement policy direction or to make technical changes to program authorities are reviewed and cleared by the appropriate policy officers prior to submission to OMB or the Congress. This process also ensures appropriate programmatic, legal and policy review of legislative proposals initiated by Congress or other Federal agencies which impact the Department’s activities. OBPA reviews these legislative proposals and reports and provides analytic support to policymakers regarding issues that are identified and to ensure Department policy positions are communicated to OMB. OBPA also manages a system to track and report on the status of legislative reports and proposals throughout USDA. OBPA’s management of this process ensures that all legislative proposals are developed in consideration of the resource and policy environment in which USDA operates.

**Correspondence and Other Document Review**

OBPA reviews most correspondence prepared for the Secretary’s signature and a wide range of other documents and reports to provide analyses and information to support informed decision-making.

**GAO and OIG Audits**

III. Congressional Relations and Issues

Overview

Throughout the year, senior OBPA staff – in coordination with the Office of Congressional Relations – work closely with Appropriations Committee staff to ensure Committee requests for information are met consistent with Department policy and in a timely manner. OBPA provides updates to policy officers on significant Congressional actions involving the budget.

IV. Internal and External Stakeholders

Important relationships with other Federal Departments or organizations

In support of the Office of the Secretary, OBPA works with every agency in the Department to create annual budgets, and review legislative proposals and regulatory items. Additionally, OBPA works with the Office of Management and Budget (OMB) regarding budget submissions and oversight matters.

OBPA receives IT support from OCIO, HR support from OHRM, accounting support from OCFO, and property and procurement activities from DM.

Stakeholder group overview

N/A

Recent engagements with stakeholder group

N/A
V. **Top Issues**

**Hot Topics**

**Development of the FY 2018 President’s Budget:** Because this year there is a Presidential Transition, the FY 2018 budget will most likely not be submitted the first Monday in February as the new President will have only been in office for a few days. The exact timeline and request for information will be subject to guidance from OMB. In previous Presidential transition years the new Administration has released a budget overview in early February, which outlines key policy priorities from the new Administration. A more detailed budget proposal will likely be submitted in spring, 2017 (historically April or May). Developing the details of the FY 2018 Budget will require significant input from incoming policy officials within a highly constrained time period.

At the time the budget is made public, the Department generally holds briefings for the media, Congressional staff and other interested stakeholders. OBPA develops briefing materials and budget overviews and works with the Office of Communications and the Assistant Secretary for Congressional Relations to coordinate these events. OBPA is also responsible for coordinating the preparation and review of witness statements, briefing books and other supporting materials prior to Congressional hearings on the budget and for managing the process of responding to written questions from members of the Appropriations Committees. The Secretary is generally asked to testify on the Budget before the House and Senate Appropriations Committees and is accompanied by the Budget Officer. The House Agriculture Appropriations Subcommittee generally holds a hearing with each Under Secretary and the House and Senate Interior Appropriations Subcommittees generally hold hearings with the Chief of the Forest Service.

**Development of a new USDA Strategic Plan:** The Government Performance and Results Act (GPRA) Modernization Act 2010 requires all Departments to produce a new Strategic Plan at the beginning of each new term of an Administration. An initial draft of the new USDA Strategic Plan FY2018 – 2022 is due to OMB June 2nd, 2017.

The Strategic Plan presents the long-term goals a Department hopes to accomplish by identifying long-term objectives, actions to be taken to realize those goals, key performance measures and challenges and risks that may hinder achieving results. The Department’s Strategic Plan provides the framework for agency level plans and for internally and externally reporting agency performance plans and accomplishments.

In addition, all Departments are required by GPRAMA to have a strategic performance review process. In USDA, quarterly performance meetings have been chaired by the Chief Operating Officer (the Deputy Secretary) and arranged and staffed by the Department’s Performance Improvement Officer (Associate Director of OBPA). These meetings are attended by Subcabinet and agency head level staff to discuss performance targets and accomplishments and other related issues.
Current Strategic Plan Summary

The current Strategic Plan has five strategic goals:

1. Assist rural communities to create prosperity so they are self-sustaining, re-populating, and economically thriving.
2. Ensure our national forests and private working lands are conserved, restored, and made more resilient to climate change, while enhancing our water resources.
3. Help America promote agricultural production and biotechnology exports as America works to increase food security.
4. Ensure that all of America’s children have access to safe, nutritious, and balanced meals.
5. Create a USDA for the 21st century that is high performing, efficient, and adaptable.

These goals contain 16 objectives that include the Department’s major programmatic efforts and cover the programs and services that USDA administers.

Development of USDA Regulatory Priorities: In recent Presidential transitions, the incoming Administration has issued guidance to all Federal Departments to suspend the review and issuance (publication in the Federal Register) of new regulations until the new Administration’s appointees have had the opportunity to review and approve their issuance. OBPA staff will be prepared to provide incoming policy officers a set of information on regulatory actions in the various stages of development.

The Federal-wide Spring Regulatory Agenda (agenda) will likely be released in May 2017 on the Office of Information and Regulatory Affairs’ (OIRA) Reginfo.gov. This twice-a-year (spring and fall) agenda provides a brief narrative summary of all the active/anticipated rulemakings that agencies/departments intend to publish during the 12 months following the public release of the agenda in May and December. OMB/OIRA initiates the Spring Agenda ‘cycle’ by sending out a data call to agencies/departments to begin work on their agendas in mid-February with a due date for submission to OMB/OIRA for review by mid-March. The agenda is authorized by Executive Order 12866, Regulatory Planning and Review, whereby agencies must prepare a regulatory “unified” agenda of all regulations under development or under review and a Regulatory Plan (fall only) of their most significant (Administration) regulatory priorities. In addition, the Regulatory Flexibility Act requires that agencies publish semiannual “regulatory flexibility agendas” describing regulatory actions they are developing that will have significant effects on small businesses and other small entities (5 U.S.C. 602).

Farm Bill Reauthorization: The Agricultural Act of 2014 (2014 Farm Bill) was enacted on February 7, 2014. While some provisions of the 2014 Farm Bill are permanent legislation many other provisions expire with the 2018 crop, calendar, or fiscal year and must be reauthorized or amended. The exact timeline for the development of the next Farm Bill will be determined by Congress. The Department will need to develop a strategy
for how it will engage with stakeholders and Congress, how it will govern the flow of information from agencies to the Committees, and whether to develop policy positions or legislative proposals. Historically, USDA has taken a broad range of approaches to Farm Bill development. Previous Administrations have held stakeholder listening sessions and published a highly detailed list of policy papers, while others have limited involvement to providing technical assistance to the Committees.

Timeline

While historically a detailed budget has not been released until April or May in an election year, the next administration will need to quickly determine major policy budget decisions within the first 30 days. The exact decision dates and due-out dates for the regulatory agenda are dependent on guidance released by the White House regarding taking inventory on regulations.

Other than the initial submission of the USDA Strategic Plan FY 2018-2022 on June 2, 2017 there are no set due dates for the other two items as they are dependent on further guidance from OMB and the White House. However, all three items will need action and consideration within the first 30-60-90 days of the next administration.

Appendix A: Acronyms

DM – Departmental Management
OBPA – Office of Budget and Program Analysis
OIRA – Office of Information and Regulatory Affairs
OMB – Office of Management and Budget
Office of Communications (OC) Fact Sheet

WHAT WE DO: OUR MISSION

The mission of the Office of Communications (OC) is to provide leadership, expertise, management and coordination, to develop successful communication strategies and products that advance the mission of USDA and priorities of the government, while serving and engaging the public in a fair, equal, transparent, and easily accessible manner. OC delivers information about USDA programs, policies and activities to the American people, through various media platforms and often directly to farmers, consumers, environmentalists, Congress, the business community, and other interest groups.

WHO WE ARE: OUR WORKFORCE

OC employs 72 people - - 54 Appropriated and 18 Working Capital Fund (WCF) - - located in the USDA headquarters in Washington, DC.

KEY UPCOMING DECISIONS

OC has no upcoming policy decisions for the first 30-60 days of a new administration.

WHO WE SERVE: OUR CONSTITUENTS

OC provides the highest level of support to the Secretary, Mission Areas and agencies for all their communications and outreach requirements through the implementation of cohesive strategic communications. OC’s Press Operations and Creative Development divisions help to coordinate and manage effective communications functions and materials across all of USDA’s agencies and staff offices.

BUDGET HIGHLIGHTS FY 2016

The Office of Communications is comprised of two budget entities:
- OC Appropriated
- OC Working Capital Fund (WCF)

From 2011 to 2016, USDA’s Office of Communications’ Appropriated budget experienced a 21% reduction, which has presented challenges in supporting the Department’s work in service to U.S. agriculture and rural Americans.

Office of Communications (OC)

I. Organizational Overview

Agency’s Mission/Strategic Plan

OC’s mission is to provide leadership, expertise, management and coordination, to develop successful communication strategies and products that advance the mission of USDA and priorities of the government, while serving and engaging the public in a fair, equal, transparent and easily accessible manner. OC delivers information about USDA programs and policies to the American people, in service to U.S. farmers, ranchers, producers and rural Americans. To fulfill that mission, OC disseminates information concerning USDA’s programs, policies and activities through various media and directly to our stakeholders. The success of the Department's initiatives—and the success of U.S. agriculture, both domestically and abroad—is directly aided by adequately resourced communications and public education campaigns, and the ease with which the public can access information on the Department’s programs. In recent years, OC has also taken on an increasingly important role in coordinating USDA’s communications during emergencies or other incidents that potentially affect large segments of the public and the U.S. and global economies.

Key mission delivery performance measures

OC is divided into the following divisions: Digital Communications, Creative Media & Broadcast Center, Press Operations, Speechwriting, Information Technology, Branding Events Exhibits and Editorial Review, Printing, and Photography. These divisions help to coordinate and manage effective communications functions and materials across most of USDA’s 17 agencies and 18 offices, the state and county offices across the United States, and our 96 posts overseas. With OC’s leadership over the last six years, USDA has been supporting policies that have made agriculture one of the bright spots in the economy, positioning USDA to support its constituents in taking advantage of new opportunities.

In 2016 so far, USDA web/digital assets have received over 190 million page views. While historically, these numbers have remained consistent, our average session durations have increased by almost 30% compared to the previous year, which means users are spending more time reading the content on our websites. USDA.gov alone has received over 19 million page views, with over 12 million sessions logged so far this year. Compared to previous years, these numbers have remained steady, and we believe more users are finding information through our digital network of web and social media resources. Through our Digital Analytics Program, we are able track metrics of all major USDA websites through a common dashboard. USDA digital assets consistently rank in the top ten most visited Federal websites, according to the real-time data tracker at analytics.usa.gov.

Our major digital accomplishment this year has been the establishment and curating of Medium.com stories through our USDA Results Chapter series (usda.gov/medium). Through Medium, USDA published monthly chapters related to key successes over the
United States Department of Agriculture  
2016 Presidential Transition  
Office of Communications (OC)

past 8 years. Each chapter highlights a USDA mission area or core function, giving us an opportunity to target content to the general public and traditional stakeholders, and also to the customers and constituents important to each mission area’s function. According to Medium.com, we received 16K readers so far to July’s Food Safety chapter. We continue to see an increase in reads and recommends, putting us at an all-time high at 2700+ reads. Medium.com numbers may be under-reporting as Bit.Ly is recording the highest ever click-throughs at 38,734 to the Food Safety chapter. Each week, we distribute a digital newsletter In Case You Missed It (ICYMI), carrying content from the chapter to 190,000 recipients. In June, the newsletters focused on food safety received 120,000 opens in total. We believe many of these readers link to the Medium page. Overall, readership on Medium (as measured by Medium) has climbed from about 1,600 in January to more than 16.1K for June’s Chapter on Trade. Month-to-month, our numbers trend upwards.

USDA’s social media presence has grown significantly in the past several years. Unlike most other large Federal Agencies, USDA takes a more centralized approach to social media strategy under the OneUSDA vision. Through this strategy, USDA’s Office of Communications manages all USDA-wide social media accounts and platforms through a coordinated effort. OC, OCIO and OGC negotiate Terms of Service agreements with new social media technologies, and OC reviews and approves all new media request and strategic communications plans. USDA effectively uses most major social media platforms and realizes significant gains in followers and users across all of our channels year after year. Through earned media analytics (IQMedia), so far this year, we have over 1.04 million hits on various social media channels, including 653K hits on online news, and 208K hits through twitter.

Organization’s History

The Office of Communications (OC) was established on June 7, 1913, when the Secretary of Agriculture established an Office of Information. The purpose of this office was to act as a news service to communicate possible recommendations of USDA scientists and specialists to the widest audience possible. Section 7 CFR § 2.36 delegates authority for public affairs activities from the Secretary to the Director of OC. The activities of OC have expanded as new technology has become available and as additional segments of the public have become constituents. As traditional media has expanded into the digital realm, OC has met the expectations of our customers by providing information and resources through a network of official USDA websites, social media channels, blogs, and mobile applications. The basic purpose of the office, however, remains constant: to provide leadership, expertise, management, and coordination to develop successful communication strategies and products that advance the mission of USDA and priorities of the Administration, while serving and engaging the public in a fair, equal, transparent, and easily accessible manner.

Biographies of career staff in key leadership positions

David Black
Deputy Director, Creative Development
202-720-3068, david.black@oc.usda.gov
David O. Black became Deputy Director of Communications in September 2010. In this capacity he oversees all of the creative development units and administration within the Office of Communications (OC). He is OC’s career Senior Executive. Mr. Black began his federal career with USDA in 1992 after a decade in the private sector. Mr. Black started as a video producer/director for the USDA Broadcast Media & Technology Center (BMTC), eventually becoming the Director in 2001. Over the years with USDA, Mr. Black, along with managing the staff, resources and budget of BMTC, produced and directed numerous award winning documentaries, informational videos, television feature stories and public service announcements for USDA and other federal agencies. His stories covered rural America, farmers, ranchers, Native Americans, nutrition, the environment, consumers, education, science and trade. His travels have taken him to all 50 states and across the world from Africa to Afghanistan. Mr. Black was born on the small Caribbean island nation of Jamaica. He came to the United States to attend college, graduating with honors with a degree in communication arts, specializing in radio, television and film. He resides in Fairfax, Virginia with his wife Sandy and has a son, Jason, who is a psychologist working in Wilmington, NC.

Peter Rhee
Digital Communications Division (DCD)
202-720-8138, peter.rhee@oc.usda.gov
Peter Rhee is the Director of Digital Communications. Peter leads web and social media strategies for USDA, coordinating the efforts of the Department's seven mission areas and 29 agencies and offices. He aligns the goals of all web components under the USDA umbrella with the Office of the Secretary, in support of the Secretary's "One USDA" vision. Peter is a seasoned graphic designer, web developer, and project manager and has helped lead major USDA technology investments and national campaigns. Prior to joining USDA's Office of Communications, he served as a web manager and designer for USDA's Food Safety Inspection Service. He has also managed the Department of Health and Human Services' campaigns for Women's Health Education and Promotion. Peter has a Secret Clearance, is a certified Project Management Professional (PMP), and Contracting Officer Representative (COR). He is married with two small children and lives in Springfield, VA.

Garth Clark
Creative Media & Broadcast Center (CMBC)
202-720-5376, garth.clark@oc.usda
Garth Clark is the Director of the Creative Media & Broadcast Center a Working Capital Fund (WCF) business unit within OC. Garth grew up on a family grains and cattle farm in Indiana. He attended Purdue University, graduating with a BS in Ag Economics and has a MS Management degree from Johns Hopkins University. Garth worked in broadcast television for ten years including positions as news director and anchor of a nationally
syndicated program AgDay. He joined the Office of Communications, Creative Media and Broadcast Center in 1988. Garth is married with 2 children and resides in Fairfax, VA.

Carolyn O’Connor  
**Brand, Events, Exhibits & Editorial Division (BEEERD)**  
202-720-2267, carolyn.oconnor@oc.usda.gov  
Carolyn O’Connor’s 11-year tenure in USDA’s Office of Communications includes leadership of the Departmental Branding, Government Printing Office, Photography Services, Editorial Review and Clearance, Events and Exhibits, and Constituent Affairs teams. As Branding Director, Carolyn leads a Secretarial Initiative that consolidated more than 100 different identifying symbols for the USDA’s 7 mission areas, 17 agencies and various Offices into the “One USDA” brand. She reviews and approves legal use of the brand, working closely with USDA’s Office of General Counsel, increasing USDA’s consistent identity in both domestic enterprises as well as the global marketplace, which enhances public awareness of the vast services provided by USDA. With over a decade of experience in visual design and organizational management, she has worked with numerous Federal customers in successful Working Capital Fund environments, including 13 years at the Department of Health and Human Services and 5 years at USDA before becoming Director of USDA’s Brand, Events, Exhibits and Editorial Review in 2010. Carolyn is known for envisioning and executing numerous successful initiatives across the Department and other Federal agencies.

Wayne Moore  
**Information Technology Management (ITM)**  
202-720-3989, wayne.moore@oc.usda.gov  
Daniel “Wayne” Moore has been the Chief Information Officer (CIO) for the Office of Communications for the past 12 years and has 37 years of experience at USDA. He has been a large proponent of Enterprise efforts and cost savings models during his tenure. His main goal is to provide tools that enable a customer centric approach for outreach to all internal and external stakeholders. Wayne actively participates in the CIO Council and has a wide knowledge and experience in administrative, budget, personnel, creative activities, web communications, working capital fund and appropriated activities. Currently, his staff handles all information technology and administrative activities.

Cynthia McNeill  
**Printing Services Division (PrSD)**  
202-720-8189, cynthia.mcneill@oc.usda.gov  
Cynthia McNeill is the Director of Printing Services. Her objective is to deliver exceptional service by leveraging her extensive knowledge, skills and expertise. Cynthia started at USDA in 1987 after a 12 year career at the Department of Labor, Bureau of Labor Statistics, as a Printing Assistant earning many honors and Certificates of Merit. She is responsible for the formulation, interpretation and administration of the Department’s information programs with respect to the medium of printing. She also develops policies and plans for the effective execution of the overall printing programs for the Department and its agencies. Cynthia graduated from Anacostia High School in Washington, DC and studied Computer Information System Science at the University of District Columbia completing 96 credit
Tom Witham
Photography Services Division (PhSD)
202-720-4339, thomas.witham@oc.usda.gov

Tom Witham is the Director of the Photography Services Division. He is a creative professional with an enthusiasm for photography and graphic design. He has 30 years of government service in which eight of those years were as a U.S. Navy combat cameraman and aerial photographer. As a manager, he has led Department of Defense organizations with the transition from conventional still photography to the digital age. He was an early proponent of Digital Asset Management systems within DOD and USDA. Tom has helped manage two successful Working Capital Fund graphic design business lines at Health and Human Services and USDA. Tom grew up on a working farm in rural Tennessee where he participated in various 4-H programs. His first photo award was from 4-H and he has been taking photographs ever since. Tom is an avid runner who enjoys early morning runs in the city. He likes to see the city come alive.

Biographies of political staff in key leadership positions

Matt Herrick
Director, Office of Communications
202-690-0060, matthew.herrick@oc.usda.gov

Matt Herrick has more than 16 years of communications experience with federal agencies, non-profits and media. Herrick was Spokesperson and Press Director for the U.S. Agency for International Development under former Administrator Dr. Rajiv Shah, and also served as Oxfam America's Director of Media and Public Relations. Between 2007 and 2012, Herrick served in a variety of leadership positions with USDA, including Press Secretary, specializing in agricultural production and trade, farm programs, economics, and global food security. He has a bachelor's degree from the College of the Holy Cross in Worcester, Mass., and a master's degree in journalism from Syracuse University's Newhouse School of Public Communications. Herrick lives in Bethesda with his wife and son.

Joanne Peters
Deputy Director, Press Operations
202-720-2971, joanne.peters@oc.usda.gov

Joanne Peters is the Deputy Director of Communications on the Press Operations side of OC. Joanne was formerly the national press secretary for HHS under Secretary Sebelius. Earlier in her career, Joanne served as press secretary for Congressman Bob Etheridge of NC—a strong proponent of agricultural issues in the US Congress—and as spokesperson for the Chairman of the Agriculture Subcommittee. Joanne is a Tar Heel.

</tr>
</tbody>
</table>

The Office of Communications is comprised of two budget entities: 1) OC Appropriated, and 2) OC Working Capital Fund (WCF) Reimbursable/Core, within the Creative Broadcast & Media Center (CMBC). It is important to note that from 2011 to 2016, USDA’s Office of Communications’ appropriated budget experienced a 21% reduction, which has presented challenges in supporting the Department’s work in service to U.S. agriculture and rural America. Over 90% of OC’s budget is comprised of personnel salaries, so high impact savings must come from personnel reductions that negatively impact OC’s ability to provide leadership, expertise, counsel, and coordination for the development of communication strategies, which are vital to the overall formation, awareness and acceptance of USDA programs and policies. CMBC continues to achieve certain efficiencies that have resulted in cost savings and increased product/service quality for customers. These include utilization of Indefinite Delivery, Indefinite Quantity (IDIQ) contracts for services to streamline production processes, obtain discounts, provide predictable pricing, simplify and improve product quality.

GS Level Distribution

- GS 5 - GS 7, 4%
- GS 8 - GS 12, 38%
- GS 13 - GS 15, 55%
- ES/SES, 3%
Office of Communications employs a workforce of 81 employees.
- OC Appropriated: 54 employees
- OC Working Capital Fund (WCF) Reimbursable/Core: 18 employees

OC WCF employees work in the Creative Media & Broadcast Center (CMBC) division of OC with some WCF Core positions located in the Digital Communications Division (DCD) and IT Management divisions. CMBC, within OC, provides a central resource of high-quality and cost-effective communications products and services. CMBC is an integral part of the OC strategic communications planning team, providing centralized communication strategies for the Secretary and agencies. CMBC’s combined capabilities, technology and collaboration support the Secretary’s goal of developing integrated and cost effective communications solutions while playing an essential role in providing immediate dissemination of communications for the Secretary, Deputy Secretary, and Sub-Cabinet. Its core communication services provide professional support in the areas of strategic communications coordination, Web and social media utilization and analytics all geared toward meeting the Secretary’s objectives of strengthening service and reducing costs. As a Working Capital Fund entity of USDA, CMBC strives to deliver the best balance of technology, creativity, quality and value in helping clients communicate effectively with their target audiences. The Digital Communications Division (DCD) maintains the USDA.gov web portal and Department
social media channels, and governs web and social media throughout USDA. DCD develops policies, standards, guidance associated with Digital Communications, including the coordination of work flow and content management with USDA agencies and offices. The DCD supports the institutionalization of an “OneUSDA” Digital Strategy. Continuously assessing the improvement of digital services and systems that are information-and customer-centric, DCD helps to ensure open data, content, responsive design, and web APIs are the new default, collaborating among the data, platform, and presentation layers to coordinate Digital Strategy activities across agency and functional lines, including IT, web and communication subject matter experts. As such, the Digital Communication Division, Office of the Chief Information Officer, as well as Agency web, communication and program offices make up the Department's digital strategy ecosystem.

- Of our total workforce, 20% are eligible to retire within the next year
- Our headquarters is located in Washington, D.C. and houses 100% of OC employees

II. Policies and Regulations

Statutory Authorities

7 USC 2201 is the basic authority establishing the Department. This authority states:

“There shall be at the seat of government a Department of Agriculture, the general design and duties of which shall be to acquire and to diffuse among the people of the United States useful information on subjects connected with agriculture, rural development, aquaculture, and human nutrition . . .”

OC helps the Department carry out this statutory duty “to diffuse among the people of the United States useful information on subjects connected with agriculture, rural development, aquaculture, and human nutrition . . .”

Important Policies and Regulations

7 CFR Part 2
OC recently updated its delegations (October 2011) to amend the delegation of authority from the Secretary of Agriculture to the Director of the Office of Communications to serve as the central information authority for emergency public information activities, having the authority to serve as the central authority for the Department and agency strategic communications plans as well as to serve as the central authority for the creation and use of logos/marks not otherwise provided for by specific laws and regulations, and excluding the Official USDA Seal and Official USDA Symbol.
III. Congress Relations and Issues

N/A

IV. Internal and External Stakeholders

Important relationships with other Federal Departments or organizations

OC has oversight and review protocols with all USDA agencies working through their agency leadership, Public Affairs Directors and communications staff. OC partners with and works with all Senior Leadership, inclusive of the Secretary, Deputy Secretary, the Sub-Cabinet, and the non-agency offices (i.e., OGC, OBPA, and OCR).

OC relies on Department Management’s OHRM team for all HR services, the OCFO’s office for support and assistance with financial and budgetary functions and is supported by the Department’s OCIO for all IT network and desktop support.

Stakeholder group overview

The Office of Communications works with all media entities, both nationally and internationally, across diverse media platforms, to reach the widest audience possible, inclusive of the general public, rural America, farmers, ranchers and members of Congress.

Recent engagements with stakeholder group

N/A

V. Top Issues

Hot Topics

OC will work with the incoming Administration to cover any issue or communicate any and all new proposed initiatives.

Timeline

OC will be collaborating with the Office of the Secretary to do an event to introduce the new Secretary to the Department, utilizing all our communication tools and media platforms.

Depending on when the new Secretary arrives at the Department, it is possible that the first large public event that OC would cover with the Secretary is the annual USDA Outlook Forum, February 23-24 http://www.usda.gov/oce/forum/.
WHAT WE DO: OUR MISSION

The Office of Congressional Relations’ (OCR) primary role is to facilitate communication between USDA and Congress, ensuring that both the Administration’s and the Secretary’s positions and goals are accurately, effectively, and consistently represented on Capitol Hill. The Office of External and Intergovernmental Affairs (EIA) is located within OCR and is the Departmental liaison for State and local governments. OCR’s website can be found here: http://www.usda.gov/wps/portal/usda/usdahome?navid=OCR

WHO WE ARE: OUR WORKFORCE

- Assistant Secretary
- Deputy Assistant Secretary
- Legislative Analyst and Leg. Director
- Intergovernmental & Confidential Ast.
- 3 Administrative Staff

WHO WE SERVE: OUR CONSTITUENTS

OCR provides information about USDA policies and activities to Members and staff in Congress as well as state and local officials through briefings, meetings, and notifications. We also work with Committees in preparation for hearings in which USDA officials testify.

KEY UPCOMING DECISIONS

- FY17 Budget – Ensure the Department’s priorities are included when Congress acts on a full year CR or omnibus appropriations.
- Child Nutrition Reauthorization – Congress pass a reauthorization of Child Nutrition Programs. Current authorization was extended through September 2016.
- Fire Fix – Work with Congress to address the ever increasing resources necessary to fight fires.
- Work with incoming administration on confirmation of new appointees

BUDGET HIGHLIGHTS FY 2016

As a staff Office of the Secretary, OCR’s budget ($3.9 million) is part of the larger appropriations for the Office of the Secretary. The appropriations support staffing in the office of Congressional Relations and Intergovernmental ($2.4 million) while a significant portion is transferred directly to the agencies ($1.5 million) to fund their Congressional Relations costs as well.
I. Organizational Overview

Agency’s Mission/Strategic Plan

The Office of Congressional Relations’ (OCR) primary role is to facilitate communication between USDA and Congress, ensuring that both the Administration’s and the Secretary’s positions and goals are accurately, effectively, and consistently represented on Capitol Hill. The Office of External and Intergovernmental Affairs (EIA) is located within OCR and is the Departmental liaison for State and local governments.

Key mission delivery performance measures

During the most recent calendar year (CY) USDA has had:

- 44 Hearings in CY16 (as of September 7th)
  - 15 Senate
  - 29 House

While the hearing total is relatively consistent with 2015, it does mark an increase from previous years. Oversight requests have also markedly increased since 2015.

Organization’s History

N/A

Biographies of political staff in key leadership positions

Todd Batta
Assistant Secretary for Congressional Relations
202-720-7095, todd.batta@osec.usda.gov

Todd Batta was confirmed as Assistant Secretary for Congressional Relations at the U.S. Department of Agriculture on June 17, 2014. Previously he served as Senior Advisor to the Secretary of Agriculture (USDA), a position he held since 2012. In this role, he was responsible for providing strategic advice and guidance to the Secretary regarding USDA’s budget, legislative, and regulatory agenda. From September 2011 to April 2012, Mr. Batta served as Special Assistant in the Congressional Relations office at USDA. Prior to his work at USDA, Mr. Batta served as a Legislative Assistant to U.S. Senator Herb Kohl from 2009 to 2011; as a
Professional Staff Member of the U.S. Senate's Agriculture, Nutrition and Forestry Committee from 2005 to 2009; and as a member of U.S. Senator Tom Harkin's staff from 2001 to 2005. Mr. Batta received a B.A. from Winona State University in 2001.

Reece Rushing
Acting Deputy Assistant Secretary for Congressional Relations
202-720-7095, Reece.Rushing@osec.usda.gov

Reece Rushing joined the Department in October 2015 as Senior Legislative Analyst and Director of Oversight before taking on the role of Acting Deputy Assistant Secretary in October 2016. Previously, Reece served as director of oversight and investigations for the House Natural Resources Committee Democrats, and as director of government reform, among other roles, during a seven-year tenure at the Center for American Progress. Reece began his career working on regulatory and information policy issues at OMB Watch. He received his degree in journalism from the University of Missouri.

Sarah Scanlon
Director, Intergovernmental Affairs
202-720-6643, Sarah.Scanlon@osec.usda.gov

Sarah Scanlon served as Deputy Director of External and Intergovernmental Affairs and Labor Advisor since August 2013 before becoming the Director in 2015. Before that, she began her appointment as the Chief of Staff for the Natural Resources and Environment (NRE) mission area in October 2010. She began her career 19 years ago when she worked for the American Federation of State, County and Municipal Employees (AFSCME) CSEA Local 1000 in upstate New York as a Marketing and Communications Specialist, where she negotiated benefits into state and local government's collective bargaining agreements across the state. During her tenure at CSEA, Sarah took a leave of absence to serve on Hillary Clinton's advance team in 2000 for Clinton's Senate campaign. In 2003, Sarah came to Washington, D.C. to work for the Democratic Governors' Association (DGA) serving as the Political Assistant designated to the Kentucky, Mississippi, and Louisiana gubernatorial races. After the November elections, she became a national lead advance staffer for General Wesley K. Clark's presidential campaign from until 2004. In February 2004, Sarah returned to Washington, D.C. and for two years, worked for the nonprofit organization, Democratic Grassroots Action Institute and Network (Democratic GAIN), where she was Executive Director and placed political operatives on campaign jobs at the local, state, and national level, including the Presidential election. Prior to working for the Administration, Sarah held the position of Deputy Political Director for the United Food and Commercial Workers International Union (UFCW) where she managed the political staff and campaigns for the 1.2 million union members from 2005-2010.
OCR’s budget falls into two distinct categories – appropriations retained in the Office of Congressional Relations and Intergovernmental Affairs and funds transferred to agencies to help cover costs of their congressional relations work. The attached budget chart outlines the breakdown of these funds since 2009.

Each fiscal year, the Office of the Secretary appropriation provides funding for the Office of the Assistant Secretary for Congressional Relations. Of the amounts provided for OCR activities, the Department is able to transfer funding to the agencies to maintain a portion of related personnel within the agencies. Such transfers are currently limited to occur only after a notification is provided to the Appropriations Committees as to the allocation of funding to be transferred.
OCR’s current staff levels include 15 total personnel including,
- Assistant Secretary (Senate Confirmed)
- Deputy Assistant Secretary
- Director of Intergovernmental
- Legislative Director
- Director of Oversight
- 5 Legislative Analysts
- 2 Intergovernmental Staff
- 3 Administrative Support (Career)

All excepting the 3 Administrative Support staff are political appointees

While the current staffing consists as listed above, the set up and organization of the office, including staffing numbers and assignments, are fully at the discretion of the Assistant Secretary as long as they remain within our annual budget.

All staff are based in the D.C. Office.
II. Policies and Regulations

Statutory Authorities

N/A

Important Policies and Regulations

N/A

Overview of the policy/regulation review process

OCR manages and coordinates the Department’s interactions with Congress and Congressional staff. In this role, OCR works with agency leg offices to identify incoming requests and provide responses, proactively notify member offices of funding announcements in their districts or states, and coordinates – with OBPA – notifications to appropriators when taking actions requiring notifications by annual appropriations. This coordination typically comes in the form of weekly meetings with agency, biweekly legislative director meetings, and weekly congressional interaction reports prepared by the agencies. In these processes, OCR is responsible for balancing the full scope of the Department’s priorities against the priorities of individual agencies to best fulfill the mission of the Department. Further, it is the responsibility of OCR to report on these interactions to the Office of the Secretary and the Office of the Deputy Secretary.

GAO and OIG Audits

N/A

III. Congressional Relations and Issues

Overview

OCR works closely with members and staffs of various House and Senate Committees to communicate USDA’s legislative agenda and budget proposals. USDA’s principal authorizing committees are the House Committee on Agriculture and the Senate Committee on Agriculture, Nutrition, and Forestry. In particular, these committees exercise oversight over USDA’s implementation of the 2014 Agricultural Act (commonly known as the Farm Bill) and will begin work on the Act’s reauthorization in the next Congress.

The House Natural Resources Committee and the Senate Energy and Natural Resources Committee have jurisdiction over public lands, including land managed by the Forest Service. Both committees have been actively engaged on wildfire suppression funding issues and have jurisdiction over the Secure Rural Schools Act, which helps fund public schools and roads located in counties with national forest land. The Act must now be reauthorized for payments to continue.
In the House, OCR also regularly works with the Financial Services Committee, which has jurisdiction over USDA’s Rural Housing Service, and the Education and Workforce Committee, which is responsible for reauthorization of the now-expired Healthy, Hunger-Free Kids Act of 2010. The Education and Workforce Committee has differed from the Senate Agriculture Committee in its approach to reauthorization, advancing legislation that would dilute nutrition standards and cut free meals for students in high-poverty schools.

The House and Senate Appropriations Committees provide funding for USDA agencies, offices and programs. The House and Senate Subcommittees on Agriculture, Rural Development, Food and Drug Administration, and Related Agencies have jurisdiction over USDA funding except for the Forest Service. The Subcommittees on Interior, Environment, and Related Agencies have jurisdiction over the Forest Service. Committee members not only determine what USDA can do in terms of resources; they also sometimes attach policy riders to must-pass appropriations bills that are designed to block regulatory or other executive actions. As described below, USDA will be publishing a number of proposed or final rules over the next several months that could be targets of appropriations riders.

OCR can provide upon request biographies for the key Congressional staff that serve on the committees which mostly closely work with the USDA.

IV. Internal and External Stakeholders

Important relationships with other Federal Departments or organizations

USDA’s Office of External and Intergovernmental Affairs (EIA) works with all USDA mission areas to coordinate with agencies on press releases, notifications on principal travel and communicating the Department’s initiatives and policies. USDA’s EIA office works closely with the White House’s Intergovernmental Affairs (WH IGA) and the Office of Public Engagement (WH OPE). Both offices communicate and bring together all federal entities each week for conference call or in person meetings for updates and any news or policy to be shared between all agencies. EIA also works closely with DOI, EPA, HHS, USTR, and CNCS.

EIA had an agreement with USDA’s OCIO for CON EIN that expires 12/31/2016 to help maintain our stakeholder database. This database holds all of our national and local stakeholders’ emails and contact information. The link is: https://collaboration.usda.gov/ein. Permission is needed through EAuth for access.

Stakeholder group overview

USDA’s Office of External and Intergovernmental Affairs (EIA) serves as the Department’s liaison to state, local, and tribal governments and non-governmental organizations. EIA facilitates communication between the Department and these stakeholders regarding USDA’s initiatives and policies. An important stakeholder to USDA is the National Association of State Departmental of
Agriculture (NASDA). NASDA and USDA host monthly calls to discuss hot topics or issues in states with the State Agriculture Commissioners, Secretaries, and Directors. The Deputy Secretary hosts these calls on behalf of USDA and in the room are staff or experts from each USDA agency in the room for questions. Outreach to Mayors and State Legislators across the country, both rural and urban is important to highlight USDA policies and initiatives. EIA’s database has more than 1,600 external stakeholders including but not limited to these key partners: National Association of State Departments of Agriculture (NASDA), National Association of County Commissioners (NACo), National Governors Association (NGA), National Conference of State Legislatures (NCSL), United States Conference of Mayors (USCM), Council of Government (CSG).

**Recent engagements with stakeholder group**

- Our office’s role is to support all agencies on programs, initiatives and/or campaigns at the Department daily:
- Work closely with Governors and staff; EIA is the point of contact for OSEC when a governor wants to speak or meet with USDA officials.
- Host webinar series and meetings for rural and urban Mayors to educate on USDA programs across the Department.
- Host webinars and meetings to rural State Legislators on USDA programs or initiatives.
- Host Fall Forums across the country to our external stakeholders and elected officials on subjects of land tenure and next generation of farmers and ranchers, trade, and climate. These platforms are for sharing policies and practices that are essential to supporting USDA programs.
- EIA is responsible for establishing briefings for the Agriculture Secretary to elected officials and external stakeholders:
  - Farm Bill – During Farm Bill implementation
  - Budgets – often held February each year.
United States Department of Agriculture  
2016 Presidential Transition  
Office of Congressional Relations (OCR)

V. Top Issues

Hot Topics

New Regulations

USDA agencies adopted a number of significant final and proposed regulations toward the end of the Obama Administration. These regulations are likely targets of appropriations riders and/or congressional oversight requests. They include:

• **Farmer Fair Practices Rules.** In October 2016, the Grain Inspection, Packers and Stockyards Administration (GIPSA) issued an interim final rule and two proposed rules to clarify that it is not necessary to find harm to competition in order to find that a packer, swine contractor, or live poultry dealer has engaged in an unfair, unjustly discriminatory, or deceptive practice or device or has given an undue or unreasonable preference or advantage. GIPSA had been precluded from working on these regulations since passage of the FY 2012 appropriations act. However, the 2016 Consolidated Appropriations Act did not include the prohibition, allowing GIPSA to move forward.

• **Organic Livestock and Poultry Practices.** In April 2016, the Agricultural Marketing Service issued a proposed rule to ensure consistent application of USDA regulations for organic livestock and poultry operations and maintain confidence in organically labeled products. A group of 13 senators, including the Agriculture Committee Chairman and Ranking Member as well as Majority Leader McConnell, sent a letter to Secretary Vilsack on July 26, 2015, objecting to the proposed rule, which is expected to be finalized by the end of 2016.

• **Supplemental Nutrition Assistance Program (SNAP) Retailer Eligibility Standards Rule.** The Agricultural Act of 2014 included statutory changes that require SNAP-eligible stores to maintain at least seven different varieties of foods in each staple category with perishable products to be included in at least three of the four staple food categories. In February 2016, the Food and Nutrition Service (FNS) published a proposed rule that codified the statutorily-required provisions, and made a number of other changes to reflect the intent of Congress that staple foods are those foods used primarily for home preparation and consumption that provide the main sources of nutrition intake for households. Congressional appropriators, led by Congressman Robert Aderholt, who chairs the House Appropriations Agriculture Subcommittee, inserted language in the FY 17 agriculture appropriations bill limiting the FNS’s ability to implement the proposed rule as written. The final rule is scheduled to be published by the end of 2016, with an effective date one year after publication.
• **Argentine Lemon Imports.** In 2013, Argentina requested consultations with the United States through the World Trade Organization (WTO) regarding market access for Argentine lemons. In May 2016, USDA’s Animal and Plant Health Inspection Service (APHIS) published a proposed rule that would allow the importation of lemons from Northwest Argentina if requirements are met to mitigate plant pest risks to the United States. Representatives of lemon-producing states (California and Arizona) have opposed the rule, and both the House and Senate Appropriations Committee’s approved language requiring APHIS site visits as part of the rulemaking process.

In September 2016, APHIS conducted a site visit during peak growing season that verified Argentina had implemented the proposed mitigation measures. The Obama Administration believes this rule is necessary to strengthen the trade relationship with Argentina and avoid issues with the WTO. If the Office of Management and Budget (OMB) designates the rule not significant, APHIS intends to publish a final rule in November 2016. If it is deemed significant, APHIS would aim for January 2017.

• **Biotechnology Regulations.** APHIS protects plant health from genetically engineered (GE) crops that pose a plant pest risk—such as causing disease or damage to other crops or plant products in the United States. APHIS has developed a proposal to update its biotechnology regulations under the Plant Protection Act and 7 CFR part 340. This proposal, which would be the first comprehensive change to the regulations since 1987, would help APHIS focus its resources on regulating GE organisms that may pose plant pest or noxious weed risks, and will enhance regulatory flexibilities that foster innovation and provide regulatory relief. In September 2016, USDA sent the proposed rule to the Office of Management and Budget (OMB) for review. Once OMB’s review is complete, USDA intends to publish the proposed rule for public comment. Congress has not been actively engaged to this point, as APHIS is still in the deliberative process. However, publication of the proposed rule will likely bring scrutiny given general interest in the regulation of GE organisms.

• **Horse Protection Act Rule.** APHIS administers the Horse Protection Act (HPA) and is charged with ending the abusive practice of horse soring and restoring fair competition within the walking horse industry. Horses have typically been sored through the application of caustic chemicals or foreign substances, often in concert with mechanical equipment known as action devices (“chains” and performance package “pads”) to intensify pain and cause a higher gait. While many observers believe that soring remains a major and pervasive problem, the industry and its supporters, including powerful members of Congress such as House
Appropriations Committee Chairman Hal Rogers (R-KY), believe that the practice has been substantially curtailed. In July 2016, APHIS published a proposed rule that would give APHIS responsibility for training and licensing horse show inspectors—which is currently overseen by the industry itself—and block the use of action devices. The comment period on the proposed rule ended in late October, and the agency expects to complete a final rule by the end of the Obama administration.

Wildfire Suppression Budget Fix

In fiscal year (FY) 2016, the Forest Service’s appropriated fire budget (including the FLAME account) is $3.2 billion, which is more than 56 percent of the agency’s discretionary budget, up from 16 percent of the agency’s budget in 1995. Unless changes are made, fire suppression will consume more than 70 percent of the agency’s budget by 2020.

Since the early 1990s, the Forest Service has been using the 10-year rolling average as a basis for fire suppression budgeting, which has rarely provided enough to fund the total cost of fire suppression. The Forest Service consequently has been forced to transfer large amounts from other Forest Service budget accounts. The House passed legislation in the 114th Congress that would require full funding of the 10-year average. However, fully funding the 10-year average in a constrained budget also erodes the ability to fund other critical Forest Service programs like forest restoration, recreation and services to the public.

The Obama Administration proposed a different way of funding wildland fire suppression. This proposal fixes the “up front” budgeting issue by requiring the Forest Service to budget for only 70% of the 10-year average. It also negates the need for disruptive transfers by allowing the agency to draw on funding from a cap adjustment for certain kinds of large fires and when suppression funding is exhausted. Getting a fire budget fix remains one of USDA’s top legislative priorities.

Child Nutrition Reauthorization

The Healthy, Hunger-Free Kids Act of 2010 (HHFKA) expired on September 30, 2015, and is currently operating under a continuing resolution. Though reauthorization is not required for HHFKA programs to continue, both the Senate Agriculture Committee and the House Education and the Workforce Committee have approved versions of Child Nutrition Reauthorization. The Senate version would largely protect the nutrition standards passed in HHFKA, but the House version, which has been met with bipartisan opposition, would dilute the nutrition standards and cut the availability of free meals for students in high-poverty schools. Neither of these bills have seen floor action.

2018 Farm Bill

The Agricultural Act of 2014 (known as the Farm Bill) is the primary authority for agencies and programs across USDA. OCR will be responsible for developing and implementing legislative strategy for reauthorization of the Act, which expires in September 2018. That work will need to begin immediately in the new administration, as Congress will hold hearings and begin work on reauthorization in early 2017. Among the major issues are:

- **Dairy Margin Protection Program.** The 2014 Farm Bill created the Margin Protection Program for Dairy Producers (MPP-Dairy). This Farm Service Agency (FSA) program offers dairy producers catastrophic coverage, at no cost to the producer, other than an annual $100 administrative fee, and various levels of buy-up coverage. Members of Congress representing dairy states, however, have argued the Margin Protection Program has not worked as well as anticipated, as dairy farmers are being challenged by lower dairy prices, driven by increased milk supplies and inventories, slower demand and competition from abroad. In particular, Senators Patrick Leahy (D-VT) and Kirsten Gillibrand (D-NY), among others, have expressed concerns that the Margin Protection Program does not accurately reflect regional feed costs. However, regional feed costs are calculated by a statute formula, and USDA does not have the discretion to change it.

- **Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC).** FSA relies on county-level survey data from USDA’s National Agricultural Statistics Service (NASS) in administering the ARC and PLC programs, which provide revenue and price loss payments to eligible producers for the 2014 through 2018 crop years. However, NASS publishes yields at a county level only if enough surveys are returned. Given the wide swath of counties and number of covered commodities, data for many counties has been lacking. When NASS county-level yields are not available, FSA has worked with the Risk Management Agency (RMA) to aggregate unpublished yield data for crop insurance participants and used this RMA data if there were sufficient results (at least 25% of reported acreage and at least 5 farms). These two sets of county-level yield data only provided about 43,000 yields, but represent an area such that about 90% of the base acres are in counties that had NASS or RMA county-level yields.

If the county-level data was not available, NASS district-level data (aggregate data covering a group of counties) has been used, with discretion for the FSA state committee to be able to adjust them based on knowledge of the county relative to the others in the district. If none of these data sets were available, the state committee was delegated responsibility for setting the appropriate yield using whatever sources or expert opinion it could find. The limited data available and lack of county specific data explains why for some less common crops in a state, there may be a group of counties with the same yield (e.g., a district yield) or even the same yield for the entire state in cases where there was not even district-level data.

Senators John Hoeven (R-ND) and Heidi Heitkamp (D-ND) have called into question both the order of data used (NASS, then RMA, then discretion to the state committee)
United States Department of Agriculture  
2016 Presidential Transition  
Office of Congressional Relations (OCR)

and the accuracy of the yield data. FSA is coordinating an interagency group to check the data sources for any county data that is called into question and correct when any errors are discovered. To date, there have been very minor changes to the data primarily based on input errors (typos), but there has not yet been issues found with the quality of the data used. NASS and RMA investigated the yields in question and found that no errors were made in developing the estimates from survey data (NASS) or insurance records (RMA). Senator Hoeven included a $5 million pilot in the FY 2017 Appropriations Bill that uses alternate data sets to establish new payment rates. This pilot will not be nationwide.

- **Conservation Reserve Program (CRP) Acres.** The Conservation Reserve Program pays a yearly rental payment in exchange for farmers removing environmentally sensitive land from agricultural production and planting species that will improve environmental quality. Over the last several years, USDA has experienced a record demand from farmers and ranchers interested in participating in this voluntary program. However, the 2014 Farm Bill capped the total number of acres that may be enrolled in CRP at 24 million for FY 2017 and FY 2018. Because of the competitive sign-up, a lower percentage of applications is being accepted, and some members of Congress, such as Senator John Thune (R-SD), have expressed frustration about low enrollment numbers in their states.

- **Cotton Oilseed and Stacked Income Protection Program (STAX).** The National Cotton Council has requested that USDA recognize cottonseed as a minor oilseed and thus a covered commodity for purposes of triggering ARC/PLC payments. House Agriculture Committee Chairman Conaway and other members representing cotton-producing states also have urged USDA to take this action. As part of the Farm Bill process, however, cotton was explicitly removed from commodity programs and STAX was created to meet the needs of the cotton industry. STAX is a new crop insurance product (administered by RMA) that is available for over 99 percent of cotton acreage nationwide. USDA nonetheless recognized the difficulties facing cotton producers and the cotton industry, and in June 2016, leveraged Commodity Credit Corporation authority to provide $300 million in one-time assistance to the cotton industry through the Cotton Ginning Cost Share Program.

- **SNAP Waivers.** The 1996 welfare reform legislation limited SNAP benefits for Able Bodied Adults Without Dependents (ABAWDS) to three months over a three-year time period. However, States have the option to request waivers of the time limit for areas, or the entire State, due to high unemployment. Congress has been very critical of the waiver requests. The issue is expected to be a major discussion item in the next Farm Bill, and some expect an attempt to eliminate the ability of States to request waivers, and add additional work requirements on SNAP recipients. Along with the ABAWD waivers, the next Farm Bill will closely look at waivers approved and denied by USDA, in recent years, on issues related to restrictions on SNAP purchases, photo Electronic Benefit Transfer (EBT), and drug testing of SNAP recipients as a condition of eligibility. States that have been denied approval to move forward with these efforts are engaging both
House and Senate Leadership in the hopes of gaining support for more State flexibilities in the next Farm Bill.

- **Undersecretary for Trade.** The 2014 Farm Bill required USDA to create an Under Secretary for Trade. Subsequent appropriation bills reinforced this directive, and the Department contracted an independent study by the National Academy of Public Administration (NAPA) to evaluate options for implementation. The NAPA report was completed and sent to Congress in October 2015, and USDA is now working on its own report, as required by the Farm Bill. This report, which is expected to be completed at that end of 2016, may include some of the NAPA report recommendations. However, the NAPA report left several key questions and issues unaddressed, including cost-benefit analysis of various options. The FY 16 omnibus appropriations bill also included $1 million for the Office of the Chief Economist to contract with an independent organization to provide implementation assistance once USDA completes the report.

**Secure Rural Schools**

The Secure Rural Schools and Community Self-Determination Act (SRS) Act, which was originally enacted in 2000 and substantially amended in 2008, provides compensation to local governments for the tax-exempt status of national forests. Under the Act, the Forest Service shares 25 percent of gross receipts from national forests with States to help fund public schools and roads located in counties with national forest land. The receipts, on which the 25 percent payments are based, are derived from timber sales, grazing, minerals, recreation and other land use fees, deposits, and credits.

In April 2015, the SRS Act received a two-year reauthorization, allowing for two annual payments to be made, with the last authorized payment made in FY 2016. Over $272 million in Forest Service authorized SRS funding for the FY 2016 payment year will benefit 41 states and the Commonwealth of Puerto Rico in support of local schools and roads and for other purposes. No further SRS payments may be made unless the SRS Act is reauthorized.

USDA has supported renewing SRS to ensure communities can provide critical services to their citizens. Without SRS payments, many rural counties would be forced to reduce teacher and road personnel funding. The President’s FY 2017 budget proposed a mandatory reauthorization and a four-year phase-out of the SRS Act through 2019.

WHAT WE DO: OUR MISSION

The Office of Hearings and Appeals (OHA) is a new USDA Agency that consolidates the three previously separate entities of the National Appeals Division (NAD), the Office of the Administrative Law Judges (OALJ), and the Office of the Judicial Officer (OJO). The mission of OHA is to plan, coordinate, and provide administrative support for NAD, OALJ, and OJO. OHA promotes fairness, transparency, and consistency in NAD, OALJ, and OJO proceedings through the planning, coordination, and administration of office-wide activities and initiatives.

WHO WE ARE: OUR WORKFORCE

- **NAD**: 83 employees—geographically dispersed with three regions. 41 adjudicators and 42 administrative and legal support employees.
- **OALJ**: 12 employees in Washington DC, including three Administrative Law Judges (ALJ’s) and nine legal and administrative support employees.
- **OJO**: Two employees in Washington DC. Includes the Judicial Officer.

KEY UPCOMING DECISIONS

- If all the administrative steps have not been completed to consolidate NAD, OALJ, and OJO by the time of transition, when will the new OHA be effective in FY ’17?
- Should NAD, OALJ, and OJO issue a new procedural rule that incorporates common practices of the proceedings of the three offices?
- When the FY ’17 lease expires in Park Center, Alexandria, where will NAD move its Headquarters, and will the OJO, and OALJ consolidate space with NAD?

WHO WE SERVE: OUR CONSTITUENTS

OHA serves USDA participants, farmers, and ranchers who appeal agency program decisions. OHA also serves USDA agencies and impacted parties involved in rulemaking, regulatory, and other proceedings for USDA programs.

BUDGET HIGHLIGHTS FY 2016

As a newly formed consolidated entity, OHA has no appropriation history. The budget information following this fact sheet shows the separate budget histories and highlights of the three entities for FY 2016.

FY 2016 Budget Authority

- **NAD**: $13,317,000
- **OALJ**: $1,418,000
- **OJO**: $351,000

Graph showing budget authority distribution.
I. Organizational Overview

Agency’s Mission/Strategic Plan

The Office of Hearings and Appeals (OHA) is a new USDA Agency that consolidates the three previously separate entities of the National Appeals Division (NAD), the Office of the Administrative Law Judges (OALJ), and the Office of the Judicial Officer (OJO). Previously, OALJ and OJO were offices under Departmental Administration, and NAD was an independent agency that reports to the USDA Secretary. The new mission of OHA is to plan, coordinate, and provide administrative support for NAD, OALJ, and OJO. OHA promotes fairness, transparency, and consistency in NAD, OALJ, and OJO proceedings through the planning, coordination, and administration of office-wide activities and initiatives.

This reorganization consolidates administrative support for the three USDA entities that adjudicate first- and second-level hearings and appeals at USDA. After consolidation, NAD, OALJ, and OJO will still conduct proceedings under their respective legal authorities. Their separate mission statements follow:

The mission of the National Appeals Division (NAD) is to conduct fair and impartial administrative appeal hearings and reviews of adverse decisions by certain agencies within USDA, and to issue determinations in an expeditious manner that reflect a thorough consideration of factual information that reach a proper conclusion.

The mission of the Office of Administrative Law Judges is to conduct rulemaking and adjudicatory hearings throughout the country in proceedings under approximately 50 statutes administered by USDA agencies and to issue timely, fair, and legally correct orders and initial decisions.

The Judicial Officer is delegated authority to act as final deciding officer for the United States Department of Agriculture in adjudicatory proceedings listed in 7 C.F.R. § 2.35.

Strategic Plan

As a prospective agency, the Office of Hearings and Appeals has not yet developed an integrated strategic plan.

Information about OJO and OALJ can be found on the USDA Departmental Management Website at http://www.dm.usda.gov/

NAD’s strategic plan is based upon the core values of transparency, listening and learning, fairness, reaching the right decision for the right reason, judicial independence, accountability, and excellence: https://www.nad.usda.gov/about_stratplan.html.
Goals and Objectives

Through proceedings conducted by NAD, OALJ, and OJO, the OHA goals and objectives are to issue timely, fair, clear, and well-reasoned final United States Department of Agriculture decisions that are consistent with law and United States Department of Agriculture policy. All three offices emphasize the timeliness and quality of proceedings and written decisions. As it becomes operational in FY ‘17, OHA will develop consolidated goals and objectives that will be integrated into a strategic plan.

As a separate organization, NAD has established the following goals in its strategic plan:

Goal 1: Conduct hearings and issue determinations within applicable statutorily mandated time frames.

Objective 1: Meet the performance measurement of 85% of determinations issued within time frames.

Goal 2: Issue quality written determinations.

Objective 1: Establish and maintain writing standards for evaluating written determinations.

Initiatives:

Initiative 1: Engage employees to transform NAD.

Initiative 2: Provide Civil Rights services to NAD employees and customers.

Initiative 3: Expand outreach efforts to underrepresented farmers and ranchers to increase access to NAD services.

Initiative 4: Level NAD human resources to recruit and hire skilled, diverse employees.

Initiative 5: Optimize information technology policy and applications.
Key mission delivery performance measures

In FY ’17, OHA will develop performance measures that track goals, indicators, and trends.

The following performance measures target the timeliness and quality of NAD hearings and appeal determinations. These measures are driven both by statutory guidelines and the needs of farmers and ranchers to receive thoughtful, legally correct, and timely decisions to make risk-based decisions about their farming enterprises.

Organization’s History

OHA:

In FY 2016, the USDA Secretary proposed the realignment and consolidation of NAD, OALJ, and OJO, the three offices that conduct two-step administrative adjudications at USDA. This reorganization would remove OALJ and OJO from Departmental Administration and consolidate with NAD under a new administrative umbrella, which would establish OHA. The new Headquarters of OHA would provide administrative support, including budget, personnel, information technology, and strategic planning for the three entities. USDA will implement the consolidation in FY ’17.

The entities that will be consolidated have independent organizational histories, mainly derived from the origins of their statutory authorities or USDA delegations:

OALJ:

OALJ conducts formal regulatory and rule making hearings under the Administrative Procedure Act (APA)¹ and under specific delegation of authority from the Secretary of Agriculture, set forth at 7 C.F.R. §2.27. ALJs are granted adjudicatory independence by the APA and are appointed after rigorous testing by the Office of Personnel Management (OPM). Although USDA’s ALJs are employees of the

---

Department, they are not subject to performance reviews, cannot be assigned duties inconsistent with their position, and may be removed only for cause.

NAD:
NAD was established by the Secretary of Agriculture on October 20, 1994 by Secretary's Memorandum 1010-1, pursuant to the Federal Crop Insurance Reform and Department of Agriculture Reorganization Act of 1994 (P. L. 103-354, section 271 et seq. (October 13, 1994). The Act consolidated the appellate functions and staffs of several USDA Agencies to provide for independent hearings and reviews of adverse Agency decisions. NAD's organizational structure was approved by the Secretary on May 14, 1996, and interim final regulations governing NAD appeals were published on December 29, 1995.

OJO:
The history of the Judicial Officer (JO) traces back to the The Schwellenbach Act, 54 Stat. 81 (1940) (now codified at 7 U.S.C. §450c–450g), which authorized the Secretary to delegate "regulatory functions." The delegation of the JO’s authority was initially established within the Office of the Secretary under the title of the Assistant to the Secretary. The title was changed to Judicial Officer in a Departmental reorganization in November of 1945. The specific delegation of authority is found in 7 C.F.R. §2.35.
Biographies of career staff in key leadership positions

Office of Hearings and Appeals

Steven C. Silverman
Director
703-305-2708, steven.silverman@nad.usda.gov

(Also serves as the NAD Director)

Steven C. Silverman began his legal career as an Honors Lawyer at the Environmental Enforcement Section of the U.S. Department of Justice in 1987. He served as a law clerk in the United States District Court for the Central District of California after graduating with Distinction from Stanford Law School. Mr. Silverman earned his undergraduate degree from Princeton University, where he graduated summa cum laude with a major in public policy from the Woodrow Wilson School of Public and International Affairs. Mr. Silverman is a native of Des Moines, Iowa.

Mr. Silverman was appointed as Director of the National Appeals Division in September of 2014. (By statute, the National Appeals Division Director serves a six-year term of office and is eligible for reappointment.) Mr. Silverman has spent his entire career in public service. Prior to being named Director of the National Appeals Division, Mr. Silverman served for two and a half years as the Deputy Assistant Attorney General at the Environment and Natural Resources Division of the United States Department of Justice.

National Appeals Division

Steven C. Silverman (see biography above)
Director

James Murray
Deputy Director
703-305-1164, James.Murray@nad.usda.gov

Jim Murray has been involved in the field of administrative hearings and appeals since 1979. He came to the National Appeals Division in July of 2011 from the Maryland Office of Administrative Hearings (OAH). While at the OAH, ALJ Murray served as a line administrative law judge, a mentor, a team leader, Deputy Director of Operations, and Director of Operations. Mr. Murray was principle author of the OAH Rules of Procedure in 1993. Mr. Murray also conducted hearings in nearly every type of administrative case a state might be responsible for, including cases requiring the application of federal law. In addition to holding hearings and deciding appeals, he provided mediation services and gave lectures on the appeals process and other matters to agency and customer groups, practicing attorneys, and law students. He was on the faculty of the Maryland Institute for Continuing Professional Education for Lawyers, and was an adjunct faculty member of the Johns Hopkins University.

**Key Vacancies:** None

**Office of Administrative Law Judges**

**Bobbie J. McCartney**  
*Chief Judge*  
202-690-4643, bobbie.mccartney@dm.usda.gov

Chief Judge Bobbie J. McCartney joined the United States Department of Agriculture's Office of Administrative Law Judges (USDA OALJ) in April of 2016. Prior to joining USDA, Judge McCartney served as the Deputy Chief Judge with the Federal Energy Regulatory Commission (FERC), where she adjudicated some of the most complex cases referred to the FERC for hearing under the Federal Power Act, the Natural Gas Act, the Interstate Commerce Act and the Energy Policy Act of 2005. Prior to joining FERC, Judge McCartney served as the Deputy Chief Judge of the Office of Hearings and Appeals for the Social Security Administration (SSA), sharing full responsibilities with the Chief Administrative Law Judge for managing its nationwide operation of over 1100 ALJ's in 140 Hearing Offices throughout the United States. Prior to her appointment to that position, Judge McCartney served as the Hearing Office Chief Judge of the Billings, Montana Hearing Office and later as the Hearing Office Chief Judge of the New Orleans, LA Hearing Office.

Judge McCartney also has extensive and diverse litigation experience having served as a senior trial attorney with the United States Department of Labor's Office of the Solicitor's Regional Office in Dallas, Texas for almost 15 years where she received numerous Exceptional Achievement Awards for her work. In addition, she served in that office as the Counsel for Employment Standards Administration, a supervisory trial attorney position, before becoming a United States Administrative Law Judge in 1994.
Judge McCartney obtained her BA from Lamar University in Beaumont, Texas, her JD from the University of Houston and her LLM from Southern Methodist University. She has also attended classes at the Universities of Oxford and London. She is a member of the Texas and Colorado Bars and has been admitted to practice before numerous state and federal courts as well as the United States Supreme Court.

Other Key OALJ Personnel

**Judge Jill S. Clifton**  
202-720-8162, jill.clifton@dm.usda.gov.

**Judge Channing D. Strother**  
202-720-8423, channing.strother@dm.usda.gov.

**Renee Leach-Carlos**  
Hearing Clerk  
202-720-2773, Renee.Leach-Carlos@dm.usda.gov

**Office of the Judicial Officer**

**William G. Jenson**  
Judicial Officer  
202-720-4764, william.jenson@dm.usda.gov.

Mr. Jenson is a career employee who has been employed by the United States Department of Agriculture for over 40 years. Mr. Jenson was employed in the Office of the General Counsel for 20 years and then in the Office of the Judicial Officer. Prior to his employment with the United States Department of Agriculture, Mr. Jenson served in the United States Army.

*Budget figures for The Office of Administrative Law Judges (OALJ) and the Office of the Judicial Officer (OJO) reflect FY expenditures through FY 2016. OALJ and OJO received allocations from Departmental Administration through FY 2016. Congress will provide budget authority to the new Office of Hearings and Appeals beginning FY 2018.

Budget Highlights:

- Although NAD receives budget authority from Congress, OJO and OALJ receive allocations from appropriations to Departmental Administration. It will not be until FY ’18 that budget authority is provided to the new Office of Hearings and Appeals.
- Excluding the years affected by sequestration, budgets and expenditures for NAD, OALJ, and OJO have been relatively flat.
- Over 85% of funding for the combined entities is for personnel-related costs.
- In FY ’17, OALJ will be fully staffed for ALJ’s and legal and administrative support personnel, which will increase budget requirements from previous years by approximately 18%.

Enterprise Workforce Data

*Includes combined HQ’s of OJO, OALJ, and NAD. OJO and OALJ have no field offices.
The OHA workforce data below reflects the three separate entities. After consolidation becomes effective, eight administrative employees from NAD will move to the OHA Headquarters to perform administrative duties for the new combined entity.

**NAD**
- NAD employs a workforce of 83 permanent full-time employees.
- During the summer months, NAD employs two or three law students as summer interns.
- Of the total NAD workforce, 34 percent are eligible to retire within the next year.
- Seventy-nine percent of NAD employees are union eligible.
- NAD’s headquarters is located in Alexandria, VA, which houses 30% of the NAD workforce.
- NAD has three regional offices. The offices are located in Indianapolis, IN, Cordova, TN and Lakewood, CO.
- There are 34 Administrative Judges located in field offices throughout the United States that adjudicate first-level appeals.
- There are eight employees on the Director’s review staff who review administrative judge determinations and draft second-level Director Review Determinations.
- There are 41 administrative employees that perform general administrative duties, as well as legal administration of case docketing and processing.

**OALJ**
- OALJ employs a full-time staff of 12 in Washington DC.
- The Chief Judge’s Office is comprised of three Administrative Law Judges, an attorney-advisor, an Executive Assistant to the Chief Judge, and a Legal Assistant to the Judges.
- The Hearing Clerk’s Office is comprised of the Hearing Clerk, an Assistant Hearing Clerk and 4 legal tech positions.

**OJO**
- The Office of the Judicial Officer has two employees: the Judicial Officer and a legal assistant in Washington DC.

**II. Policies and Regulations**

NAD, OALJ, and OJO perform administrative adjudication functions for the Secretary. OALJ and the OJO primarily adjudicate regulatory matters, whereas the National Appeals Division handles eligibility and/or entitlement to benefit issues. The procedures of all three are governed by the provisions of the APA, and currently each has its own Rules of Practice, with those of OALJ and the OJO being found at 7 C.F.R. §1.130, *et seq.* and those of NAD at 7 C.F.R. §11.1 *et seq.* Most decisions of the OALJ are reviewed by the Judicial Officer (JO). The decisions of the Administrative Judges within NAD are reviewed by the NAD Director. The decisions of the
JO and the NAD Director are judicially reviewable by Federal Courts. Depending upon the statute involved, appeals of the JO’s decisions may be to either a United States District Court or a United States Court of Appeals for one of the Circuits. Those from the Director of NAD are reviewed by the District Courts of the United States.

As the consolidation removes OALJ and OJO from Departmental Administration, the new Office of Hearings and Appeals will require a revision to the Secretary’s delegated authority from the Assistant Secretary of Administration to the USDA Office of Hearings and Appeals to reflect the removal of that administrative oversight for the OALJ Hearing Clerks Office and other OALJ administrative functions. The change of delegations will also reflect that the Secretary shall select the Chief ALJ or may delegate that selection to the Deputy Secretary, the Chief ALJ shall select the ALJ’s, and the Secretary shall select the JO.

**Statutory Authorities**

NAD Enabling Statute: Public Law 103-354: This is the public law that transfers to NAD all functions and administrative appeals established by various agriculture acts, farm programs, and crop insurance program. It also establishes NAD and provides some basic jurisdictional information applicable to NAD appeals.

Farm Security & Rural Investment act of 2002: Public Law 207-171 Section 1613 7 U.S.C. 6991 et seq. This law amends the enabling statute and provides additional information about NAD’s authority in the appeals process.

Administrative law judges, while employees of the Department, are appointed under 5 U.S.C. §3105 and are afforded judicial independence, are not subject to performance reviews, cannot be assigned duties inconsistent with their position, and may be removed only for cause.

The Perishable Agricultural Commodities Act of 1930, as amended, 7 U.S.C. §499a, et seq. and the Packers and Stockyards Act of 1921, as amended, 7 U.S.C. §309: Provides the Judicial Officer authority to approve cases for these programs.

**Important Policies and Regulations**

7 C.F.R. Part 11: This regulation implements the NAD enabling law and provides procedural rules and details about the NAD appeals process.

National Appeals Division Rules of Procedure: These rules and procedures provide detailed information to the public about NAD, general definitions, and the appeals process.
Seven C.F.R. §2.27: This is the specific delegation of authority from the Secretary to the Judicial Officer for regulatory functions.

Seven C.F.R. §2.24(a)(12)(iii): Gives OALJ responsibility for the direction of the functions of the Hearing Clerk and his staff as set forth in the Overview of the policy/regulation review process.

**GAO and OIG Audits**

No GAO or IG Audits for the three entities.

**III. External Stakeholder Information (Employee Collective Bargaining Information)**

NAD employees are represented by AFSCME, Local 302. Presently the NAD Collective Bargaining Agreement is scheduled to expire in October, 2017. OALJ and OJO have no collective bargaining affiliation.

**IV. Top Issues/Hot Topics**

From June 20, 2017 through June 30, 2017, the newly formed Office of Hearings and Appeals (OHA) will implement the administrative steps to consolidate fully the National Appeals Division (NAD), the Office of the Administrative Law Judges (OALJ), and the Office of the Judicial Officer (OJO). In this respect, FY ‘17 reflects a transitional year, as OHA begins to establish practices that begin to promote fairness, transparency, uniformity, and efficiency of two-step USDA appeals and proceedings. One priority in implementation is to integrate OALJ and OJO activities into NAD’s electronic case tracking system.

**Timeline**

*November 2016:*
Establish personnel organizational structure and funding codes for OHA.
New OHA website.

*January 2017:*
Submit request for technical and cost proposal for case tracking system to track OJO and OALJ case activities.

*February 2017:*
Award Phase I for enhancement to existing case tracking database. (Budget permitting.)
March 2017: Complete final draft of new Rules of Procedure, integrating common legal practices of the NAD, OJO, and OALJ.

June 2017: Final decision on NAD Headquarters’ move from Park Center in Alexandria. Further background: NAD subleases space from the USDA Food and Nutrition Services (FNS) at Park Center, Alexandria. The FNS lease expires in FY-17. USDA and FNSA are currently analyzing documentation for a new lease award in another location and an extension for the Park Center lease. New occupancy is projected to be from June 2017 to May 2018, so there are still some timing uncertainties associated with the NAD decision.

Mission Area Issues

In the coming year, OHA will immediately confront two cross-cutting issues that derive from the advantages achieved in the new consolidation. The first issue will be the development and issuance of a new procedural rule that will integrate current common legal practices of the NAD, OALJ, and the OJO. This rule will be a lengthy process that will require extensive legal analysis and input from USDA stakeholders and the public engaged in OHA proceedings. The new procedural rule fosters uniformity, clarity, and fairness for USDA customers in these proceedings.

The second issue will be to extend the current NAD electronic case tracking system to OALJ and OJO. A consolidated case tracking system will foster performance management and transparency for OHA employees and customers. This strategy economizes on database infrastructure already in place at NAD, and, thus, is a good example of economies achieved through consolidation.

OHA has no issues that require White House involvement, cyber security issues, or issues that have arisen from recent legislation.
I. **Overview**

The White House Rural Council was established via Executive Order in 2011 to ensure that the Federal government makes the most positive impact possible in rural communities by enhancing collaboration across Executive agencies. Chaired by the Secretary of Agriculture, the Council members include nearly every member of the Cabinet as well as senior White House staff. The Council also engages and convenes stakeholders to address issues and develop partnerships in support of rural communities. Finally, the Council provides rural expertise to other White House components on regulatory and policy development, as well as coordinating with external rural stakeholders.

The Secretary of Agriculture serves as the Chair of the Council.

The membership of the council includes the heads of the following executive branch departments, agencies, and offices:

- Department of the Treasury
- Department of Defense
- Department of the Interior
- Department of Commerce
- Department of Labor
- Department of Health and Human Services
- Department of Housing and Urban Development
- Department of Transportation
- Department of Energy
- Department of Education
- Department of Veterans Affairs
- Department of Homeland Security
- Environmental Protection Agency
- Federal Communications Commission
- Office of Management and Budget
- Office of Science and Technology Policy
- Office of National Drug Control Policy
- Council of Economic Advisors
- Domestic Policy Council
- National Economic Council
- Small Business Administration
- Council on Environmental Quality
- White House Office of Public Engagement and Intergovernmental Affairs
- White House Office of Cabinet Affairs
Additional information can be found here:
https://www.whitehouse.gov/administration/eop/rural-council

USDA and the White House Domestic Policy Council have contributed staff and resources to administer the day to day responsibilities of the council.

Biographies of Political Staff in Leadership Positions

Doug O’Brien
Senior Policy Advisor for Rural Affairs and lead staff for the White House Rural Council
Doug.O’Brien@osec.usda.gov
Doug O’Brien has served as DPC Senior Policy Advisor since January 2015. In this role, Doug manages the Council staff, corresponds with USDA and White House leadership, and coordinates the development and implementation of the Council’s priorities. Mr. O’Brien joined the council after serving as Acting Under Secretary for Rural Development at USDA. O’Brien is a political appointee who is “assigned” to the White House from USDA.

Chad Maisel
Senior Policy Advisor
cmaisel@omb.eop.gov
Chad Maisel has worked part-time on the White House Rural Council since February 2015, leading the design and implementation of several Rural Council policy efforts, including the Rural IMPACT Demonstration. He also serves as staff on the National Economic Council and Office of Management and Budget. Prior to joining the White House, Chad held positions at USDA and White House Cabinet Affairs.

Yaesul Park
Policy Assistant, White House Domestic Policy Council
Yaesul_R_Park@who.eop.gov
Yaesul Park serves as a Policy Assistant for the WHRC, overseeing and staffing issues related to child poverty including the Rural Impact County Challenge. Yaesul has served in the Obama Administration since 2012 in various capacities and offices including the USDA Office of Deputy Secretary, Under Secretary, and the Office of Cabinet Affairs at the White House.

Sanah Baig
Advisor to the Secretary at USDA
Sanah.Baig@osec.usda.gov
Sanah serves as the main POC and staffer on WH Rural Council issues at USDA. She has served as policy advisor in a number of components at USDA since 2011 including in the Rural Opportunity Investment initiative, Marketing and Regulatory Programs mission area, and White House Liaison Office.
United States Department of Agriculture
2016 Presidential Transition
White House Rural Council (WHRC)

Biographies of Career Staff in Leadership Positions

Doug McKalip
Senior Advisor at USDA Agricultural Marketing Service
Doug.McKalip@ams.usda.gov
McKalip was integral in the formation of the WH Rural Council and served as the lead staffer at DPC for four years. McKalip is a career civil servant and will continue to serve at USDA in the new Administration.

Bert Wyman
Policy Advisor
bwyman@ceq.eop.gov
Wyman serves as a Policy Advisor at the Council where he supports the work of the Council and leads several interagency priority projects of the Council. Prior to joining the Council, Bert was a Policy Analyst at the Office of Management and Budget where he worked on place-based and data transparency programs. Bert is a career Presidential Management Fellow at OMB, and will continue to serve at OMB in the new Administration. He will be a ready resource for WH Rural Council questions.

Overview of Agency Programs and Operations

The White House Rural Council fosters interagency collaboration on policy and program development and implementation as well as engagement with key external partners to support rural communities. To carry out these functions, the Council coordinates programs and initiatives that cut across agency silos. These initiatives are designed to provide tailored resources to meet the specific needs of rural communities and advance their goals. For example, the Council has led several initiatives to expand opportunity in rural communities, including: the Rural Integration Models for Parents and Children to Thrive (Rural IMPACT) Demonstration, a “two-generation” approach to address rural child poverty by targeting programs and services to both children and their parents; and the Rural IMPACT County Challenge (RICC), a partnership between the Rural Council and the National Association of Counties through which 100+ self-selected rural counties focused on tackling rural child poverty receive tailored technical assistance and peer learning opportunities. The Council has also supported the Local Foods, Local Places initiative, an interagency effort that has helped 53 rural communities create economically vibrant communities through the development of local food systems.

In the past, the Council has worked on increasing jobs and economic opportunity in rural towns. For example, the Rural Jobs Innovation Accelerator (RJIA) initiative coordinated interagency resources to support regional economic development strategies. Additionally, the Council worked with several agencies to host “Made in Rural America” forums in over 60 communities to inform rural manufacturers and service providers of Federal programs that would support their expansion into new export markets.
Additionally, the Council has organized several convenings with private and philanthropic partners to support rural America. In 2011, the President convened a White House Rural Summit in Peosta, Iowa, to launch the White House Rural Council. In 2014, the Rural Opportunity Investment (ROI) Conference at the EEOB brought together over 600 industry and government stakeholders to discuss how the public and private sectors can work together to benefit rural and agricultural economies. As a result, USDA launched a public-private partnership with CoBank, which committed up to $10 billion to lend and co-lend in support of infrastructure projects in rural communities. The Council and ROI held a follow-up conference in 2015 (Washington, D.C.) and two conferences in 2016 (Memphis, TN, and Washington, D.C.). In 2016, the Council also partnered with the NACO to convene a major conference on rural child poverty where 400 rural leaders came together and where Rural IMPACT and RICC (discussed above) were launched. Finally, in fall 2016 the Council organized a White House Rural Summit in State College Pennsylvania, which brought nearly 200 policy leaders, researchers and rural stakeholders together to consider priority issues for the future of rural communities.

II. Top Issues/Hot Topics

Staffing

Assigning staff for the Council will be an immediate priority as the current staff include political appointees who will have transitioned out of the Administration, with the exception of Bert Wyman who will return to the Office of Management and Budget.

Rural Child Poverty

In April 2015, Secretary Vilsack launched Rural Impact as a comprehensive effort bringing together federal agencies and public and private resources to address the challenge of rural child poverty. For the final 18 months of the Obama Administration, the Rural Council has led several efforts under this banner, with significant interagency and stakeholder engagement. The Rural Impact initiative is somewhat distinct from previous Rural Council efforts in that it provided a platform for a relatively new set of agencies to focus on rural issues, including USDA-FNS, HHS-ACF and -HRSA, Department of Education, and Department of Labor. Outside organizations - in particular the Annie E. Casey Foundation, Aspen Institute, and Kellogg Foundation - have been keenly interested and supported different parts of this work. Several initiatives are ongoing and present the next Administration with opportunities to continue and accelerate progress. Through the Rural IMPACT Demonstration Project, Federal agencies, nonprofits, and philanthropic partners provide technical assistance and other resources to 10 competitively-selected communities to address the needs of both vulnerable children and parents, with a goal of increasing parents’ employment, education, and child and family well-being. Day-to-day administration of the demonstration project is led by a staffer at HHS, with the support of an interagency team that convenes regularly to track progress and troubleshoot
United States Department of Agriculture
2016 Presidential Transition
White House Rural Council (WHRC)

barriers. The next Administration can supercharge progress by identifying additional resources for site-level implementation and by shining a spotlight on the innovative strategies deployed in many of the sites.

In a separate initiative, the Rural Impact County Challenge created a platform for local elected officials to focus on child poverty in rural America. Over 100 counties have committed to become part of RICC. Federal agencies, private sector, and academic institutions have come together to provide targeted technical assistance and platforms for peer learning. In addition, the Robert Wood Johnson Foundation has offered private-sector technical assistance including community coaches for 12 counties to help set and meet tangible goals in creating opportunities for the next generation. The next Administration has a unique opportunity to continue the work of child poverty through RICC. The currently-existing 100+ county leaders are self-selected local officials who are doing or want to do more work on child poverty, and NACo serves as an excellent outside partner in the work.

**Combatting the Opioid Epidemic in Rural America**

In January 2016, President Obama tapped Agriculture Secretary and White House Rural Council Chair Tom Vilsack to lead an interagency Federal effort focused on the rural heroin and prescription opioid crisis. Throughout 2016, the Council and Secretary Vilsack hosted a series of rural town halls in communities across the country, including New Hampshire, Missouri, Appalachia, and Nevada, to hear from stakeholders and to build support at the local, state, and regional levels for addressing the opioid epidemic. The White House Rural Council also partnered with USDA FSA and RD State Directors in Colorado, Connecticut, Maryland, North Carolina, Oregon, and Wisconsin to host state-level convenings to discuss local solutions to the crisis. These events raised awareness of the epidemic in rural areas and also educated rural stakeholders on resources available through USDA programs.

The White House Rural Council worked closely with the USDA to ensure the Department’s efforts complemented the public health, prevention, and training efforts carried out by partner agencies such as HHS and DOJ. In 2016, USDA announced that the Rural Health and Safety Education (RHSE) grant program would be expanded to include extension work that addresses substance use orders. USDA Rural Development also took steps to target its Community Facilities and Distance Learning & Telemedicine programs to finance new wraparound treatment centers and equipment to strengthen mental health and substance use disorder treatment programs in rural areas. In August 2016, Secretary Vilsack launched a transitional housing initiative through the Rural Housing Service to help fill the need for affordable rural housing options for people in long-term recovery from substance use disorders.

**Rural Opportunity Investment Initiative (ROI)**

With the support of the White House Rural Council, USDA launched the Rural Opportunity Investment Initiative (ROI) in 2014 to expand private sector investment in rural communities. Rural communities have significant infrastructure needs, limited access to credit, and an
abundance of investment opportunities. ROI is working to identify opportunities for private investment in rural water, energy, and broadband projects, reduce barriers to investment, and connect projects with investors. Consistent with efforts at other agencies, USDA hired four new career staff members to join the team. These Financial Investment Specialists work directly with the Rural Development mission area’s program agencies – Rural Business-Cooperative Service, Rural Housing Service, and Rural Utilities Service – and report directly to the office of the Under Secretary for Rural Development. Their mission is to build and expand on the work of ROI by engaging with the private sector to recruit investment to rural America. ROI has two current active initiatives, both of which are discussed in the Rural Development section of this document: the Rural Water Fund and Rural Business Investment Companies.
I. **Farm and Foreign Agricultural Services (FFAS)**

**Farm Service Agency (FSA)**

*Hispanic and Women Farmers Claims Process (HWFCP)* – In 2000, women and Hispanic farmers and ranchers filed litigation alleging FSA discriminated against them in connection with loans and loan servicing in the 1980s and 1990s. Class certification was denied in the Garcia and Love cases. USDA has developed a voluntary administrative claims process for individual farmers to resolve their claims. The claims administrator provided USDA with the list of prevailing claimants, and all approval and denial letters in the program have been mailed by the claims administrator. Over 3,200 claimants prevailed in the process, and the Judgment Fund and USDA will provide over $200 million in cash awards, debt relief, and tax relief. All successful claims must be screened through the Treasury Offset Program database to identify outstanding non-farm debts to the US prior to payments.

**Status**: As of 9/28/16, a total of 3,153 of the approved claims have been paid, and another 39 claims are currently in process. There are 33 successful estate claims for which the Administrator has requested, but not yet received, additional documentation. The Claims Administrator mailed reminder letters to the remaining Estate claimants and to claimants who have not yet negotiated their checks. The Garcia case was closed by the District Court Judge on 2/16/16. Following the Appellate Court’s ruling in Cantu, the Love Plaintiffs, who signed releases as conditions of participating in the HWFCP, filed a motion to reinstate claims that allege the HWFCP is discriminatory. The motion has been fully briefed and USDA is awaiting a decision from the Court. Several challenges to the results of the HWFCP have been filed by late-filing claimants, individuals denied on the merits, participants in Pigford, and by a class of African-American male farmers alleging that African-American male farmers were unfairly excluded from the process. All but one of the collateral cases have been dismissed by numerous federal district courts. The African American male farmer suit is still pending.

*Keepseagle* — This is a class action filed by Native American farmers alleging FSA discriminated against them in connection with loans and loan servicing. Class Counsel wanted to modify the settlement agreement, which required USDA’s consent, to change the provisions pertaining to how the cy pres fund was to be distributed. The parties agreed that amendment of the distribution approach was appropriate because about $390 million of the $680 million settlement amount remained in the cy pres fund after all prevailing class members were paid their awards. The parties agreed to require Class Counsel to make an initial disbursement of the cy pres funds and to permit Class Counsel to create a 501(c)(3) trust to distribute the rest of the money within 20 years. The parties also agreed to an initial disbursement of $38 million shortly after the trust was established to beneficiaries that Class Counsel selects after consultation with Native American leaders. On 7/24/15, the Court denied motions by both Class Counsel and the Keepseagles to modify the settlement agreement, and urged the parties to re-negotiate. On 10/22/15, the parties reached an agreement in principle for distribution of the cy pres funds. On 12/14/15, Class Counsel filed its motion to modify the cy pres provisions of the settlement agreement. On 4/20/16, the Court granted Class Counsel’s motion to modify the cy pres provisions to provide a supplemental payment to prevailing claimants and to create a trust.
Status: On 4/20/16, the Court granted Class Counsel’s motion to modify the cy pres provisions to provide a supplemental payment to prevailing claimants and to create a trust. Class Counsel is managing the distribution of the cy pres fund – USDA does not have any involvement. One prevailing claimant, [b] (6) [b] (6), filed a putative class complaint against DOJ in District Court on 2/3/16. The putative class seeks a declaration that the Keepseagle cy pres distribution is illegal. On 5/10/16, the Government filed its motion in opposition to class certification and on 5/24/16, Plaintiff filed its reply. Plaintiff has not sought an injunction. Class Counsel is proceeding with notification and evaluation of applications for the Keepseagle Fast Track Fund. Class Counsel is waiting until the conclusion of the appeals to implement the updated settlement provisions. On 6/20/16, one of the Class Representatives, Keith Mandan, filed a Notice of Appeal of the order granting Class Counsel's unopposed motion to modify the cy pres provision of the Settlement Agreement. On 6/22/16, class member, Donivon Craig Tingle, also filed a pro se Notice of Appeal of the order. In his Statement of the Issues, he alleges that all settlement funds should have been distributed to the class, and that Class Counsel and the Court breached their fiduciary duties to the unnamed class members. Appellants' briefs are due 10/24/16, Class Counsel's and USDA's briefs are due 11/23/16, and Appellants' replies are due 12/7/16. The creation of the 20 year trust is on hold. However, Class Counsel is continuing to accept and evaluate applications for the Native American Agriculture Fast Track Fund, and plans to submit its recommendations to the Court by the current deadline, 10/17/16.

Pigford 2 – This is a class action filed by African American farmers who tried to participate in the Pigford I administrative claims process. Final settlement of the matter was approved by the Court in November 2011. On 7/15/2013, the Court issued an opinion awarding attorneys’ fees and expenses in the amount of 7.4% of the common fund: $90,835,000. The adjudication process is complete. All known claimants who submitted timely and complete claims have received determinations. Of a total of 42,131 claims, 18,310 were approved and 23,821 were denied, late, duplicative or withdrawn.

Status: As of 7/15/16, the claims administrator reported 18,310 checks were sent out to successful Track A claimants, totaling roughly $870 million. Of that number, 18,241 checks were presented for payment. The absolute deadline for settlement checks to be negotiated was 5/31/15. There were approximately 5,191 prevailing claims for estates. Of that number, 5,069 people provided the necessary proof of legal representation. Two (2) of the 98 prevailing claims for claimants with a physical or mental limitation failed to provide the necessary proof and forfeited their claims. 463 checks had been issued to both an estate and a living person, of which 455 have been presented for payment. The proposed amount of the cy pres fund is $9.5 million. The Court will enforce the cy pres provision to organizations meeting specific criteria as agreed to by the parties in the settlement agreement. The Court will issue an order explaining its rationale in due course.
Risk Management Agency (RMA)

*Adkins, et al. v. Vilsack, et al., No. 1:15-cv-00169-P-BL (N.D. Tex.)* – Plaintiffs filed this matter seeking judicial review under the Administrative Procedure Act (APA) of the final National Appeals Division’s (NAD) determination in the Stewart Farms case. The NAD decision concerns a challenge to the decision in the Federal Crop Insurance Program to implement the yield exclusion provisions authorized in section 11009 of the Agricultural Act of 2014 beginning with certain spring planted 2015 crops. Plaintiffs are winter wheat producers who were not eligible for the yield exclusion option for their 2015 fall planted crop. Plaintiffs allege the amendments to the Federal Crop Insurance Act in section 11009 were self-executing and should be available for 2015 winter wheat producers. RMA has maintained the amendments are not self-executing and require actuarial work to more clearly define the terms under which this option would be available and ensure the premiums policies affected were actuarially sound. Plaintiffs filed the complaint on 9/8/15 and USDA filed its answer on 11/10/15.

**Status:** Plaintiffs filed their brief on 3/14/16. USDA filed its brief on 4/18/16. Plaintiffs filed their reply brief on 4/25/16. On 10/6/16, the Magistrate Judge issued a Report and Recommendation in favor of the Plaintiffs. The Magistrate Judge's recommendation states that USDA should have no discretion to determine the timing of implementing the provisions of the Agricultural Act of 2014, and does not undertake a Chevron analysis of what, if any, deference should be afforded USDA's regulatory action. USDA has until 10/20/16 to file objections with the District Court.

*Standard Reinsurance Agreement Litigation (ACE American Insurance Company, et al. v. FCIC, Civ. No. 14-1992 (RCL) (D.D.C.))* – In August 2012, the Approved Insurance Providers (AIPs) filed a complaint before the Civilian Board of Contract Appeals (CBCA) regarding FCIC’s decision to reduce the premium rates for corn and soybeans insurance policies based on several rate studies and actuarial experience. The companies believe the lower rates would reduce their returns and thus would require a renegotiation of the Standard Reinsurance Agreement (SRA). The case involved claims of up to $500 million against FCIC. On 11/3/14, the CBCA granted FCIC’s motion for summary judgment. The motion argued the rate making process by RMA and the negotiation process of the SRA are independent from each other and have been treated as such by the parties in their course of dealing. On 11/25/14, the AIPs filed their appeal of the CBCA’s decision in the district court for the District of Columbia. The agency record was lodged 4/20/15.

**Status:** On 9/20/16, the Court issued an order granting USDA’s motion to dismiss on all seven counts in the AIPs complaint. The AIPs did not file an APA claim, rather they sought de novo review of the FCIC decisions by the District Court. The Court found that these seven counts either restated issues before the CBCA, which could not be subject to de novo review, were claims not all applicable to the plead facts, or were so poorly plead as to not merit further review by the Court. So far, FCIC has prevailed unanimously before the CBCA and now before the District Court.
II. Food, Nutrition and Consumer Services (FNCS)

Food and Nutrition Service (FNS)

Argus Leader v. USDA, No. 4:11-CV-04121-KES (D.S.D.) – On 2/1/11, the Argus Leader made a FOIA request for data regarding stores authorized to participate in SNAP. Data requested included: store identifier numbers, store names, store addresses, store types, and annual redemption amounts for individual stores from 2005-2010. USDA disclosed only a list of stores with addresses and the Argus Leader filed suit. On 9/27/12, the District Court ruled for USDA. On 1/28/14, a unanimous panel of the Eighth Circuit reversed the decision, holding that the data could not be withheld pursuant to FOIA Exemption 3. On remand, USDA asserted the withheld information was exempt from disclosure under FOIA Exemption 4 and Exemption 6. On 7/17/14, USDA published a Request for Information (RFI), a precedent step for invoking Exemption 4. USDA received more than 500 comments, several from large retailers and retailer organizations objecting to the release. USDA filed a motion for summary judgment, and on 9/30/2015, the District Court denied USDA’s motion. USDA then decided to await a judgment compelling the Department to produce the records. However, Plaintiff did not file its own summary judgment motion.

Status: The matter went to trial from 5/24/16 to 5/25/16 to determine whether Exemption 4 to FOIA applied. The Court directed the parties to file post-trial briefs on the issue of whether the information contained in the Store Tracking and Redemption System (STARS) database was “obtained from a person.” USDA filed its post-trial brief on 6/22/16. Plaintiff filed a response on 7/20/16. On 7/26/16, USDA filed a final reply brief. Without leave of the Court, Plaintiff filed a “clarification” on 7/28/16.

Bread for the City, Inc. v. USDA, et al., No. 1:15-cv-01591 (D.D.C.) – This litigation involves the FNS TEFAP program and a dispute about the reading of an amendment made by section 4027 of the Agricultural Act of 2014 to section 27(a) of the Food and Nutrition Act of 2008. Plaintiff filed its complaint on 9/30/15, contending that USDA is underfunding the TEFAP program by approximately half the amount required in the Agricultural Act of 2014 (or $275 million in FY 2015). Plaintiff seeks a Writ of Mandamus, 28 U.S.C. § 1361 and Declaratory and Injunctive Relief under the APA.

Status: On 12/15/15, USDA filed a motion to dismiss this case primarily on the grounds that section 27(a) of the Food and Nutrition Act of 2008 does not support Plaintiff’s claim that USDA did not provide the required funds to TEFAP. On 9/30/16, the Court granted USDA's motion to dismiss, holding that USDA's interpretation of the statute was correct.

Gerber v. Vilsack, et al., No. 1:16-cv-01696 (D.D.C.) – This case is a challenge to the infant formula rebate bid solicitation for the WIC program in Virginia. On 2/8/16, Virginia Department of Health (VDH) instituted a procurement process for bids for infant formula rebates. Of the three submitted bids, Plaintiff Gerber Products Company, d/b/a Nestle Infant Nutrition (Gerber), provided the lowest bid. VDH gave Plaintiff a Notice of Intent to Award the contract on 3/25/16, which was publicly posted on 4/1/16. A competitor of Plaintiff, Abbott
Labs, filed a protest of the Intent to Award on 4/4/16, arguing that Plaintiff was not the lowest bidder because VDH’s procurement evaluation used incorrect numbers to calculate the lowest price. On 4/11/16, VDH posted a Notice of Cancellation of Intent to Award. Plaintiff filed a protest challenging the cancellation and subsequently filed a complaint in the Circuit Court of the City of Richmond against VDH. The Circuit Court sustained VDH’s demurrer and ruled against Plaintiff, finding that since the award was rescinded, Plaintiff had no right to protest an award that did not exist. In response to the ruling by the Virginia Circuit Court, the State of Virginia re-solicited the infant formula contract and provided a bid closing date of 8/31/16. On 8/18/16, Plaintiff filed a complaint in federal court, adding the federal defendants as named parties. Plaintiffs seek a temporary restraining order, preliminary and permanent injunctions, declaratory judgment and mandamus against USDA and the VDH regarding the awarding of the infant formula contract.

Status: On 9/9/16, the District Court ruled for the Government and denied Plaintiff's motion for a temporary restraining order on the grounds that it lacked standing to sue USDA because USDA did not order VDH to re-solicit the bid. The Court also held that it lacked jurisdiction over VDH. The re-solicited bid was awarded by VDH to Abbott. Plaintiff requested the Court allow it to amend and refile its complaint against solely USDA. On 9/23/16, the Court ordered that Plaintiff must file its amended complaint by 10/21/16 and the Government must answer by 12/20/16.

Physicians Committee for Responsible Medicine, et al., v. Vilsack and Burwell, Civ. Action No., 16-00069-LB (N.D. Calf.)—Plaintiff Physicians Committee for Responsible Medicine ("PCRM") filed suit on 1/1/16 under the Federal Advisory Committee Act ("FACA") and the Administrative Procedure Act ("APA") challenging the operations of the 2015 Dietary Guidelines Advisory Committee ("DGAC") administered by both USDA and HHS. PCRM challenges recommendations offered by the DGAC relating to dietary cholesterol and serum cholesterol. PCRM alleges AMS’s American Egg Board (AEB) submitted names of individuals to serve as members of the DGAC, in violation of the statutory prohibition against using AEB funds to influence federal policy. PCRM alleges the DGAC included one AEB nominee and another person who works at a research center that receives funding from the AEB. PCRM alleges DGAC used the research and findings of the AEB rather than the best scientific evidence.

Status: The Court held a hearing on the Government’s motion to dismiss on 8/25/16. The Government argued that Plaintiffs’ claims are non-justiciable because the Court lacks a meaningful standard to apply to determine whether USDA and HHS failed to establish appropriate provisions to ensure that the DGAC’s advice will not be improperly influenced. The Government also contended that Plaintiffs failed to set forth a standard that the Court is to apply for determining: 1) what makes an “interest” “special” under Section 5(b)(3) under the FACA; 2) when an “influence” becomes “inappropriate” for the purposes of FACA; and 3) how an agency is supposed to design appropriate provisions to guard against inappropriate influence by special interests. At the hearing, the Court wanted to focus on the parties’ arguments on whether Plaintiffs’ claims are justiciable. The Court also observed that it appeared Plaintiffs...
were seeking a copy of the administrative record relating to the DGAC, but the Court suggested that Plaintiffs should seek a copy of that record through FOIA.

*Angela Smith v. USDA, et al., Case No. 15-cv-04497-DMR, (N.D. Cal.)* – On 9/30/15, Plaintiff filed a complaint against USDA and the California Department of Social Services on behalf of herself and a class of all SNAP recipients to stop defendants from changing SNAP benefits if Congress is unable to pass an appropriations bill for FY 2016. Despite the enactment of the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriation Act, 2016, Plaintiff still pursued the class action litigation.

**Status:** On 8/8/16, the Court granted USDA’s motion to dismiss the case on the grounds that the enactment of the Appropriations Act for FY 2016 makes the matter moot. Plaintiff has until mid-October to file an appeal.

*Wisconsin v. Vilsack, No. 2:15-cv-00855-CNC (E.D. Wis.)* – On 7/14/15, Governor Scott Walker signed legislation requiring drug testing of certain SNAP recipients. The State of Wisconsin filed this case alleging USDA is improperly prohibiting the state from requiring drug tests of certain SNAP recipients as a condition to participate in its SNAP Education and Training Program. The core of the case concerns whether the State is correct in interpreting the term “welfare recipient” in section 902 of the Personal Responsibility and Work Opportunity Act of 1996 includes SNAP recipients. Section 902 allows states to require welfare recipients to take and pass drug tests as a condition of receiving benefits. USDA believes the State’s interpretation of section 902 is incorrect.

**Status:** On 12/1/15, USDA filed a motion to dismiss based on Plaintiff’s failure to exhaust administrative remedies and that FNS has not issued a Final Agency Determination (FAD) upon which to conduct an Administrative Procedures Act (APA) review. On 9/28/16, the District Court issued an order granting USDA's motion to dismiss because the Court found the case was not ripe, no case or controversy exists and the Court lacks subject matter jurisdiction. The Court also concluded that there is no harm to the State in requiring the State to exhaust its administrative remedies. This decision does not address the merits of Wisconsin’s claim that section 902 of PRWOA gives the State authority to require drug testing in SNAP. According to the Court’s decision, that is a matter that cannot be taken up by the Federal courts until Wisconsin tries to implement its state statute and USDA opposes such actions after the State exhausts administrative remedies.

### III. Office of Food Safety

**Food Safety and Inspection Service (FSIS)**

(APA). Plaintiffs allege the line speeds permitted under the NPIS are too fast to allow for an organoleptic inspection of the entire carcass, including the viscera, by a federal inspector. They also allege the rule violates the PPIA by allowing plant employees (rather than federal inspectors) to condemn carcasses and by allowing plant employees to reprocess carcasses without adequate supervision by a federal inspector. Plaintiffs allege the rule violates the APA because they were denied the opportunity to present oral views at a meeting of the National Advisory Committee for Meat and Poultry Inspection and because the final rule varied greatly from the proposed rule. On 10/20/14, AFGE filed a complaint with virtually identical claims. On 2/9/15, the District Court dismissed the FWW case, holding the individual plaintiffs do not have standing because they did not demonstrate the NPIS will result in any increased risk of adulterated poultry products, let alone the required “substantial increase” in the risk of harm. The Court also disagreed with the Plaintiffs’ assertion that the rule was improperly promulgated under the APA and the PPIA. Plaintiffs filed a notice of appeal on 2/13/15.

Status: On 12/22/15, the D.C. Circuit Court of Appeals affirmed the District Court's dismissal of the FWW Plaintiffs’ challenge to NPIS. Although finding the District Court had applied an incorrect standing standard, the Circuit Court still found Plaintiffs' had failed to show a cognizable injury sufficient to establish standing. On 2/4/16, FWW filed a Petition for panel rehearing and rehearing en banc. On 2/25/16, USDA filed a response opposing FWW’s petition. On 3/23/16, the Court denied FWW’s petition for rehearing and rehearing en banc. FWW had until 6/22/16 to file a petition for certiorari, but it failed to do so by the deadline. On 7/31/15, the District Court dismissed AFGE’s complaint based on standing. On 9/21/15, AFGE filed a notice of appeal. On 1/28/16, USDA filed its summary affirmation motion. On 5/5/16, the Court of Appeals denied USDA’s motion for summary affirmance. Appellant filed its opening brief on 6/20/16. USDA filed its appeal brief on 7/20/16. Appellant filed its reply brief on 8/3/16. Oral argument is scheduled for 10/19/16.

IV. Marketing and Regulatory Programs (MRP)

Agricultural Marketing Service (AMS)

Burnette Foods, Inc. v. USDA, No. 16-cv-00021 (W.D. Mich.) – Plaintiff is a handler of tart cherries and is subject to the Tart Cherry Marketing Order (the Order). On 8/3/11, the Plaintiff filed a petition with USDA to be exempt from the Order and to modify certain provisions of the Order under section 15 (A) of the Agricultural Marketing Agreement Act of 1937 (AAMA). Plaintiff alleged the Cherry Industry Administrative Board (CIAB) improperly excludes imported cherries from the Optimum Supply Formula (OSF) which determines what, if any, volume restrictions the CIAB recommends to the Secretary. Plaintiff also requested canned cherries be exempt from the Order because of its shelf life. Finally, Plaintiff alleged the CIAB is improperly constituted because it includes CherrCo, which the Plaintiff argued is a sales constituency and therefore barred from representation on the CIAB. The ALJ determined CherrCo was not a sales constituency and the CIAB was not improperly constituted. However, the ALJ decided it was arbitrary and capricious that imported cherries were not included in the OSF. On appeal, the Judicial Officer (JO) reversed the ALJ’s decision with regard to imported and canned cherries and denied
Plaintiff all relief. Plaintiff sued USDA in federal court seeking judicial review of the JO's final decision. Plaintiff also seeks a declaratory judgment that the application of the volume control regulations to its cherries is a Fifth Amendment takings.

**Status:** On 3/31/16, USDA filed a motion to dismiss for lack of subject matter jurisdiction and failure to state a claim. On 9/9/16, the Judge granted USDA's motion to dismiss on all counts except one. The only remaining count addresses whether the CIAB is properly constituted. USDA filed an answer regarding the remaining count on 9/23/16.

**Center for Food Safety, et al. v. Vilsack, et al., No. 3:15-cv-01690-JSC (N.D. Cal.) (“Green Waste Case”)** – Plaintiffs’ complaint alleges USDA violated the Administrative Procedure Act (APA) by issuing National Organic Program (NOP) 5016 (Allowance of Green Waste in Organic Production Systems) as a guidance document instead of through notice and comment rulemaking. They contend the document is a legislative rule because it allowed “contaminated compost materials that were previously not allowed.” The Plaintiffs seek declarative and injunctive relief vacating this guidance and enjoining USDA from allowing the use of the prohibited substance. They also seek attorney’s fees under the Equal Access to Justice Act (EAJA).

**Status:** The Court denied USDA’s motion to dismiss on 9/29/15, ruling that Plaintiffs established standing and alleged a cognizable injury in fact. USDA filed its answer to the complaint on 10/13/15. USDA filed the administrative record on 12/9/15. On 6/20/16, the Court granted Plaintiff’s motion for summary judgment and denied USDA’s cross motion for summary judgment. The Court ruled that the guidance was a legislative rule and USDA violated the APA in promulgating it without notice and comment. The Court vacated the guidance effective 8/22/16 and grandfathered compost with green waste bought and used prior to that date. USDA decided not to appeal the ruling. On 9/19/16, USDA executed a settlement agreement with the Plaintiffs for EAJA fees, which are to be paid in 45 days. On 9/21/16, the Court granted the parties' joint request to stay the case while the payment of fees are being processed. AMS is initiating a rulemaking on allowance of green waste in organic production. OMB has determined that the rule is significant.

**Center for Food Safety, et al. v. Vilsack, et al., No. 3:15-cv-1590 (N.D. Cal.) (“Sunset Process Case”)** – On 4/7/15, the Center for Food Safety and several other plaintiffs filed this complaint seeking declaratory and injunctive relief alleging USDA violated the Administrative Procedures Act (APA) and Organic Foods Production Act (OFPA) in developing and promulgating the September 16, 2013, Federal Register Notice, National Organic Program – Sunset Process (Sunset Notice), 78 FR 56811. The Sunset Notice describes a new sunset review and renewal procedure for OFPA’s National List that allows the Secretary to renew a substance without engaging in informal rulemaking. Plaintiffs allege the Sunset notice is a substantive rule, and as such, USDA violated the APA by publishing the notice in the Federal Register without following informal rulemaking procedures that require advance notice and a public comment period.

8
Status: The Plaintiffs filed their amended complaint on 10/30/15. USDA filed its motion to dismiss on 12/10/15. Plaintiffs filed its opposition on 1/21/16 and USDA filed its reply on 2/4/16. The Court will make a decision based on the submissions. On 9/13/16, the parties filed a joint case management statement informing the Court that the parties are exploring settlement, and requested that the Judge issue an order requiring the parties to file a status report on 10/11/16, advising of the settlement discussions progress and proposing next steps.

Cornucopia Institute, et al., v. USDA, Civ. Action No., 16-00246-SLC (W.D. Wis.) – On 4/18/16, Plaintiffs filed this lawsuit under the Organic Foods Production Act of 1990 (“OFPA”) and the Federal Advisory Committee Act (“FACA”) by the Cornucopia Institute and two applicants to the National Organic Standards Board (“NOSB”). Plaintiffs challenge the NOSB appointment process and USDA’s administration of the NOSB. Plaintiffs allege the appointment of two NOSB members were in violation of the OFPA because the positions were reserved for owners or operators of organic farms and the members were unqualified at the time of their appointments. Plaintiffs also allege the appointment violated Section 5(b) of FACA, which requires an agency to ensure an advisory committee is fairly balanced in terms of the points of view represented. Plaintiffs further allege USDA exercised inappropriate influence over the NOSB by: a) disbanding the NOSB’s Policy Development subcommittee; b) removing the ability of the NOSB to develop its own work plan; and c) altering the sunset review rules without providing an opportunity for notice and comment. Lastly, Plaintiffs claim USDA exercised improper influence when the Deputy Administrator of the NOSB allegedly appointed himself as the Chairperson of the NOSB.

Status: On 8/15/16, USDA filed a dispositive motion requesting the Court dismiss Plaintiffs’ case. USDA asserted several arguments, including the Court lacks subject matter jurisdiction because FACA contains no provision for judicial review; Plaintiffs lack standing to bring their claims; Plaintiffs failed to show how their alleged injuries were caused by a FACA violation or how a favorable decision would redress their purported harms; and Plaintiffs have no right to an appointment to the NOSB.

Humane Society of the US v. Vilsack, No. 1:12-1582 (D.D.C) (“Pork. The Other White Meat Litigation”) — On 9/24/12, the Humane Society of the United States (HSUS) and an independent pig farmer filed suit in the U.S. District Court for the District of Columbia, challenging USDA and the National Pork Board (NPB) for using checkoff funds to purchase the slogan “Pork. The Other White Meat,” from the National Pork Producers Council (NPPC). Payment is in 20 annual installments of $3 million. The complaint alleges the purchase price was inflated and, among other things, the purchase violates various statutes and USDA Guidelines in that it evades Federal restrictions against the Board and the NPPC influencing legislation and government policy. On 9/25/13, the District Court granted USDA’s motion to dismiss for lack of jurisdiction. Plaintiffs appealed the ruling to the DC Circuit on 9/26/13. On 8/14/15, the DC Circuit reversed the District Court’s dismissal for lack of standing. On 12/23/15, the parties stipulated that USDA would review the contract to determine whether to continue payment under the terms of the contract and Plaintiffs in turn agreed to dismiss the parts of the complaint relating to retroactive relief. On 4/20/16, AMS issued its decision to approve continuing the $3 million annual payments under the contract based on submissions.
provided by both NPPC and Plaintiff, and an independent valuation provided by Stout Risius Ross (SRR) concluding the investment value of the trademarks is between $113 and $132 million.

Status: On 5/5/16, the Court granted NPPC’s motion to intervene and directed the parties to consult with NPPC on any proposed briefing schedule. On 6/10/16, the Court ordered a briefing schedule, which included the following: NPPC’s combined opposition and cross-motion for summary judgment is due by 10/20/16; Plaintiffs’ combined reply in support of their motion for summary judgment, and opposition to USDA's and NPPC's cross-motions for summary judgment, including opposition to any jurisdictional issues raised by defendants, is due by 12/15/16; USDA’s reply is due by 1/12/17; and NPPC’s reply is due by 2/2/17. USDA filed the administrative record on 6/29/16 and filed supplemental records on 8/24/16.

Physicians Committee for Responsible Medicine, et al., v. Vilsack and Burwell, Civ. Action No., 16-00069-LB (N.D. Calf.) – Plaintiff Physicians Committee for Responsible Medicine (PCRM) filed suit on 1/1/16 under the Federal Advisory Committee Act (FACA) and the Administrative Procedure Act (APA) challenging the operations of the 2015 Dietary Guidelines Advisory Committee (DGAC) administered by both USDA and HHS. PCRM challenges recommendations offered by the DGAC relating to dietary cholesterol and serum cholesterol. PCRM alleges AMS’s American Egg Board (AEB) submitted names of individuals to serve as members of the DGAC, in violation of the statutory prohibition against using AEB funds to influence federal policy. PCRM alleges the DGAC included one AEB nominee and another person who works at a research center that receives funding from the AEB. PCRM alleges DGAC used the research and findings of the AEB rather than the best scientific evidence.

Status: The Court held a hearing on the Government’s motion to dismiss on 8/25/16. The Government argued that Plaintiffs’ claims are non-justiciable because the Court lacks a meaningful standard to apply to determine whether USDA and HHS failed to establish appropriate provisions to ensure that the DGAC’s advice will not be improperly influenced. The Government also contended that Plaintiffs failed to set forth a standard that the Court is to apply for determining: 1) what makes an “interest” “special” under Section 5(b)(3) under the FACA; 2) when an “influence” becomes “inappropriate” for the purposes of FACA; and 3) how an agency is supposed to design appropriate provisions to guard against inappropriate influence by special interests. At the hearing, the Court wanted to focus on the parties’ arguments on whether Plaintiffs’ claims are justiciable. The Court also observed that it appeared Plaintiffs were seeking a copy of the administrative record relating to the DGAC, but the Court suggested that Plaintiffs should seek a copy of that record through FOIA. On 10/12/16, the District Court issued its order dismissing the case, holding that FACA and the National Nutrition Monitoring and Related Research Act do not provide a “meaningful standard” to decide whether the Advisory Committee members exercised inappropriate influence, and therefore the matter was not justiciable.

Raisin Compensation Cases (Lion Farms v. United States, No. 15-915 (Fed. Cl.); Ciapessoni, et al. v. United States, No. 15-938 (Fed. Cl.); Boyajian v. United States, No. 15-1574C (Fed. Cl.)) – On 8/21/15, Plaintiff Lion Farms, LLC, a raisin producer in California, filed action in the
Court of Federal Claims seeking just compensation under the Fifth Amendment Takings Clause pursuant to the Supreme Court’s decision in Horne v. USDA, for raisins that were reserved by raisin handlers under the Raisin Marketing Order during Crop Years 2006-2009. On 8/26/15, the Ciapessoni Plaintiffs filed a putative class on behalf of themselves and others similarly situated seeking just compensation under the Takings Clause. The Ciapessoni Plaintiffs alleged the class consists of approximately 3,000 California raisin growers. On 12/28/15, Plaintiff Boyajian filed a class action suit on behalf of himself and the same class identified in Ciapessoni and raised similar arguments as Ciapessoni.

**Status:** On 12/7/15, the Court denied USDA’s motions to consolidate these matters. On 12/16/15, USDA filed an answer to both complaints. USDA also filed motions to dismiss Plaintiff’s Fifth Amendment takings claims for crop years 2006 through 2009, or in the alternative, a motion for summary judgment. Additionally, USDA filed a motion to defer response to Plaintiffs’ motion for class certification in the Ciapessoni case. Plaintiffs’ agreed not to oppose the motion on the condition that USDA would not oppose Plaintiffs’ motion for class certification for 2009-2010: USDA agreed to Plaintiffs’ condition. On 1/12/16, USDA filed a motion to coordinate and consolidate these three cases. On 1/13/16, the judges in the Ciapessoni and Boyajian cases transferred these cases to the judge presiding over the Lion Farms case. Plaintiffs in Ciapessoni opposed consolidation, but not coordination. Plaintiffs submitted their briefs on 5/6/16. USDA filed its reply briefs on 8/5/16. On 8/12/16, the judge, at the Plaintiffs’ request, ordered oral arguments on the motions. The date of the hearing is to be determined. Plaintiffs filed a motion to substitute Ray Hickman as the class representative. USDA did not oppose the substitution.

**Ranchers-Cattlemen Action Legal Fund (R-CALF) v. Vilsack, No. 4-16-cv-00041-BMM-JTJ (D. Mont)** – On 5/2/16, Plaintiff filed a complaint alleging that certain speech paid by assessments collected under the Beef Promotion and Research Act of 1985 (Beef Act) and the Beef Promotion and Research Order (Beef Order) violated its Montana members' First Amendment rights. Under the Beef Act and Beef Order, up to 50 cents of the $1 dollar per head assessment may be directed to qualified state beef councils (QSBC). Some QSBCs are required to collect assessments for a State research and promotion order authorized under State law. QSBCs in states that do not have a State order may keep up to 50 cents of the assessments for local research and promotion activities or may direct the full $1 to the national board, the Cattlemen Beef Board (CBB). Montana does not have a State order and the Montana QSBC is a private entity that keeps the assessments to pay for local research and promotion activities. Plaintiff alleges that, since Montana does not have a state program and the Montana QSBC is a private entity, the assessments directed to the Montana Beef Council is funding compelling private speech, not government speech. Plaintiff disagrees with the Montana Beef Council's promotional activities, which promotes beef generically and not U.S. beef. Thus, according to Plaintiff, requiring R-CALF members to fund Montana Beef Council's activities is a violation of their First Amendment rights.

**Status:** On 7/15/16, USDA published a proposed rule that would permit producers to redirect their entire assessments to the Cattlemen Beef Board (CBB) in certain states. This rulemaking will likely address the underlying issues in this litigation. While the rulemaking is underway,
CBB will issue a memorandum to QSBCs reminding them that they must honor producers’ request to direct the full amount of their checkoff assessments to CBB unless there is a state law requiring assessments for state checkoff programs. On 8/4/16, USDA filed its motion to dismiss, or alternatively stay the litigation pending the rulemaking. On 8/22/16, Plaintiff sought USDA’s agreement on a consent decree whereby Montana Beef Council would be prevented from obtaining or using Beef Checkoff funds without first obtaining the producer’s affirmative consent. USDA rejected this offer. On 8/25/16, the Plaintiff filed its opposition to USDA’s motion, its motion for summary judgment, or alternatively a preliminary injunction. On 9/12/16, Plaintiffs filed a motion for a temporary restraining order (TRO) to prevent the Montana Beef Council from keeping 50% of the assessments it collects from producers under the Beef Order. The Plaintiffs allege that the upcoming cattle sales would result in a quarter of a million dollars being retained by the Montana Beef Council. On 9/28/16, USDA filed opposition to the TRO and reply in support of its summary judgment motion.

*Resolute Forest Products v. Vilsack, No. 14-2103 (D.D.C.)* – This action arises from a USDA administrative proceeding that concluded with the Judicial Officer denying Resolute Forest Product’s (Resolute) petition seeking to invalidate the softwood lumber order under the Commodity Promotion, Research and Information Act of 1996 (Act), or alternatively to determine that Resolute is not subject to the order. Resolute filed this action against USDA challenging the constitutionality of the Act and the Secretary’s promulgation of the softwood lumber order under the Act. Resolute filed its complaint seeking review of the matter in the District Court on 12/12/14.

**Status:** On 9/9/15, the District Court granted USDA’s motion for summary judgment on all counts except the Court found that USDA did not sufficiently explain the basis for the de minimis threshold in the order. The Court remanded without vacatur to USDA “for a reasoned and coherent treatment of the decision to select a 15 million-board-feet-per-year exemption as the ‘de minimis quantity’ exemption in accordance with 7 U.S.C. § 7415(a)(1).” On 11/6/15, USDA filed a memorandum by AMS Associate Administrator that provided further explanation of the basis for the de minimis threshold. On 5/17/16, the Court granted Plaintiff’s motion for summary judgment and denied USDA’s motion for summary judgment. The Court ruled that the de minimis threshold in the Softwood Lumber order was arbitrary and capricious and declared the order unlawful. The Court based its ruling on the inadequacy of the record, which contained incomplete and seemingly contradictory information and analysis. The Court ordered the parties to file briefs on remedies. USDA filed its brief on 6/30/16, and Plaintiff filed its response on 7/20/16. USDA’s filed its reply on 8/24/16. On 9/1/16, Plaintiffs provided the Court with a copy of the AMS 8/30/16 interim rule and filed a notice of supplemental authority. Pursuant to the interim rule, USDA must hold a referendum on the continuance of the Softwood Order within 7 years rather than five years as previously required. On 9/15/16, USDA filed a response to Plaintiffs’ notice of supplemental authority and asserted that the delay would not affect the Court’s resolution because the process of re-promulgating the de minimis threshold would proceed independently and prior to the continuance referendum.
United States Department of Agriculture  
2016 Presidential Transition  
Appendix B: USDA Litigation Summary

Sun-Maid Growers of California v. USDA, No. 1:15-cv-00496 (D.D.C) – On 11/17/14, Sun-Maid filed a petition to revise the marketing order for raisins to remove the volume control regulations. The petition cited several arguments in support of such an amendment, including significant changes in the raisin industry since the issuance of the marketing order in 1949. On 1/7/15, USDA denied the petition. On 4/6/15, Sun-Maid filed this complaint seeking declaratory relief and remand to USDA for further consideration of its petition for rulemaking. Sun-Maid alleges USDA was arbitrary and capricious, in violation of the Administrative Procedure Act (APA), in denying the petition without providing an explanation that demonstrates that USDA engaged in reasoned decision making. Sun-Maid seeks a remand to USDA for further consideration of its petition and an explanation of USDA’s decision that meets the requirements of the APA.

Status: In light of the Supreme Court’s Decision in Horne v. USDA, AMS sent a letter to Sun-Maid stating that it will not approve a reserve program for the foreseeable future and is granting Sun-Maid’s petition to initiate a rulemaking to consider amending the reserve requirements in the raisin marketing order. USDA moved to dismiss based on mootness on 8/28/15. Sun-Maid filed its opposition on 9/28/15. USDA filed its reply on 10/23/15. On 11/6/15, Sun-Maid filed a motion for leave to file a sur-reply in support of its opposition and the proposed sur-reply. On 11/19/15, USDA filed a declaration by the Deputy Administrator for AMS Specialty Crops Programs describing its efforts to move forward with the formal rulemaking including a draft document that described the proposed changes to the order to effectuate removal of the reserve requirements. On 3/9/16, the Court granted Sun-Maid’s motion for a stay pending the outcome of USDA’s formal rulemaking to amend the raisin marketing order. On 4/22/16, AMS published the notice of the rulemaking hearing. During 5/3/16 to 5/4/16, AMS conducted a formal rulemaking hearing in Fresno, CA.

Animal and Plant Health Inspection Service (APHIS)

Center for Biological Diversity, Maricopa Audubon Society, Dr. Robin Silver v. Tom Vilsack, et al., No. 2:13-cv-01785 (D. Nev.) – This lawsuit relates to the saltcedar Tamarisk beetle biological control (biocontrol) agent program. Plaintiffs’ primary complaint is that the beetles released by the program destroyed the habitat for the endangered Southwestern willow flycatcher (“flycatcher”). Plaintiffs allege APHIS and ARS violated the ESA and NEPA by failing to implement mitigation measures to (1) ensure against jeopardizing the flycatcher or impairing its critical habitat and (2) conserve the flycatcher, despite the fact that the saltcedar biocontrol program has been terminated. Plaintiffs also allege APHIS, ARS, and FWS failed to comply with the ESA consultation requirements concerning APHIS’s termination of its beetle release program.

Status: On 3/31/16, the Court issued a minute order granting in part and denying in part both Plaintiffs’ and Defendant’s motions for summary judgment. However, the Court has not yet issued its opinion. The Court scheduled a hearing for 5/3/16 on the issue of injunctive relief, and subsequently requested an additional briefing on injunctive relief. Plaintiff’s brief was filed on 5/24/16. USDA filed its response brief on 6/21/16. Plaintiff’s reply brief was filed on
7/5/16. USDA filed objections to the evidence submitted by Plaintiffs on 7/22/16. On 7/27/16, Plaintiffs filed a response to USDA’s evidentiary objections.

Center for Food Safety, et al. v. APHIS, et al., No. 1:15-cv-01377-BAH (D.D.C.) (“FOIA Case”) – On 8/25/15, Plaintiff filed suit against APHIS under the Freedom of Information Act (FOIA) regarding a request filed on 12/3/14 regarding, inter alia, a planned withdrawal of a proposed update to Genetically Engineered (GE) regulations. APHIS allegedly last responded to Plaintiff in July 2015 with the volume of responsive records, but no date as to when release would be made. Plaintiff alleges APHIS has made a pattern, practice, or policy of violating FOIA, citing to 34 FOIA requests related to GE issues dating back to 2002 that were responded to late, only responded to after litigation, acknowledged but never responded and presumably still pending, acknowledged and responded to only partially, or never acknowledged at all. Plaintiff seeks an immediate response to the outstanding FOIA requests, an injunction against the alleged pattern, practice, or policy, and changes to APHIS handbooks or policies to require timely responses to FOIA requests. Plaintiff also requests for the Court or a Special Master to exercise close supervision over APHIS as it complies with injunctive relief and for attorneys’ fees.

Status: APHIS has collected approximately 75,000 pages of responsive records; however, this number includes duplicate records which the agency plans to process using the Clearwell document review tool. Given that the responsive records pertain to a rulemaking, it appears some of the contents may be protected by Exemption 5, deliberative process privilege. Also some of the records were submitted to the Office of General Counsel for legal sufficiency review, and therefore, the attorney-client privilege may apply. APHIS made an initial production of 3,000 records on 11/20/15. On 2/23/16, the Court issued an order: a) compelling APHIS to process the remaining records in accordance with a production schedule; b) requiring the parties to submit a status report every 60 days about the processing of the responsive records; and c) holding in abeyance the Court’s prior order requiring APHIS to respond to the complaint until the agency has processed the responsive records and submitted a final status report. Per the Court’s orders, the parties filed joint status reports on 4/20/16 and 7/20/16 summarizing APHIS’ document production. The Court ordered the parties to file a subsequent status report in October.

Contender Farms, LLP, et al. v. USDA, No. 4:16-cv-00163 (N.D. Tex.) – Contender Farms, LLP, Lee McGartland, Mike McGartland and SHOW, Inc. are seeking declaratory and injunctive relief regarding APHIS’s enforcement of the Horse Protection Act (HPA). Plaintiffs assert that no penalty should be imposed against horse exhibitors except on order of the Secretary after notice and hearing, and that therefore, APHIS administrative enforcement policies, including the Foreign Substance protocol, IES Investigation and Enforcement process, and the issuance of official letters of warning, are unlawful. Additionally, Plaintiffs allege that there is no statutory provision or regulation that permits the “sanction by public remand” that APHIS employs in publishing on APHIS’s website lists and reports identifying individuals as violators of the HPA. Finally, Plaintiffs allege that APHIS violated SHOW’s Fourth Amendment rights by demanding its records regarding its internal ticketing and penalty activities.
Status: On 4/18/16, USDA filed a motion to sever the claims of Contender Farms et al. and SHOW. On 6/14/16, Plaintiffs filed a motion to compel discovery. The pending motions were referred to a magistrate. On 9/6/16, the Magistrate Judge issued a report and recommendation denying USDA’s motion to sever, granting Plaintiffs leave to amend the complaint, and delaying ruling on the motion to compel discovery. USDA filed an appeal of the denial of the motion to sever on 9/19/16. APHIS is currently working on publication of a System of Records Notice (SORN) that will cover the routine uses for which information is made available on its website. Although this work is independent of the lawsuit, it will assist in addressing Plaintiff’s challenge to the publication of this information.

Keith McSwain et al v. USDA, 1:16-CV-1234-RWS (N.D. Ga) - Plaintiffs filed a complaint for equitable relief against USDA seeking declaratory judgments and preliminary and permanent injunctive relief. Plaintiffs are the owners of a horse known as “Honors,” which has been disqualified by an USDA Veterinary Medical Officer (VMO) from four (4) horse shows since 2013 based on violations of the Horse Protection Act (HPA). Plaintiffs claim that pre-show disqualifications of horses without a hearing is a violation of the Due Process clause and seek declaratory and injunctive relief because of USDA’s alleged (1) “failure to afford due process to those affected by [USDA’s] deprivation of property while acting under the color of federal law; (b) failure to abide by their own rules, regulations, and procedures related to the Horse Protection Act, and; (c) acting contrary to and in excess of the authority delegated to them by Congress.” Additionally, Plaintiffs request that the Court reverse and set aside the Scar Rule disqualifications for “Honors” and award attorney fees.

Status: On 5/25/16, the Court issued a Preliminary Injunction enjoining USDA from disqualifying Honors for violation of the Scar Rule as a result of a pre-show inspection by a VMO during the nine shows in which Plaintiffs indicated they intended to show him. Honors did not show at the Fun Show during Memorial Day weekend, the first of nine shows to which the PI applies. Honors, however, has shown and won subsequent shows covered by the injunction at which APHIS VMOs found him to be sored. On 9/2/16, the Court ordered USDA to submit the Administrative Record within 60 days of the date of the hearing. Plaintiffs will then be permitted 30 days to file objections to the scope of the record. If the Plaintiffs wish to supplement the record or engage in additional discovery, it must be done within the thirty day time period.

V. Natural Resources and Environment (NRE)

Forest Service (FS)

Active Network, LLC v. US, No. 16-1071C (Fed. Cl.) – On 8/26/16, Plaintiff filed a lawsuit with the Court of Federal Claims challenging the Forest Service’s (FS) award of a contract to another vendor to provide Recreation One Stop (“R1S”) Support Services, which includes the administration of Recreation.gov. The FS, in partnership with 11 other Federal agencies, runs Recreation.gov, a national trip planning and online reservation system for U.S. parks, national forests, museums, and other recreational destinations. Operation and maintenance of Recreation.gov is currently being performed by Plaintiff. Plaintiff initially filed a protest of the award with the Government Accountability Office (GAO) on 5/23/16, triggering a Competition
in Contracting Act (CICA) stay of the award. Active withdrew its protest on 8/25/16, one week before the statutory deadline for GAO’s decision in the protest.

**Status:** During the initial scheduling conference on 8/30/16, the parties agreed upon the following schedule for the protest: Plaintiff’s motion for judgment on the administrative record (MJAR) due on 11/2/16; USDA’s response to MJAR, cross-motion for judgment on the administrative due on 12/2/16; Plaintiff’s reply in support of its MJAR and response to USDA’s cross-motion due on 12/23/16; USDA’s reply in support of its cross-motion due on 1/13/17; and Oral arguments on the parties’ cross-motions for judgment on the administrative record due on 1/24/17.

*Alaska v. USDA, No. 1:11-cv-01122 (RJL) (D.D.C.)* – This is the State of Alaska’s facial challenge to the 2001 Roadless Rule. The District Court dismissed the complaint as time-barred, citing the six-year statute of limitations, which the Court found to be jurisdictional. The State of Alaska appealed. On 11/7/14, a unanimous panel reversed and remanded. The DC Circuit held that a new right of action accrued in 2006 when the District Court for the Northern District of California reinstated the repealed 2001 Roadless Rule. The DC Circuit held that it made no difference whether the Rule’s reinstatement was the result of agency action or a court order, and therefore, the State of Alaska’s 2011 challenge was timely filed.

*Albert Pike Tort Litigation (Roeder v. United States) (WD-Ark.)* – Originally, twenty-five tort claims, seeking a total of over $500 million in damages, were filed with the FS between 2010 and 2012 based on the 6/10/10 flood at the Albert Pike Recreational Area in Arkansas. Out of those, 11 tort lawsuits were filed in Federal district courts in Texas, Louisiana, and Arkansas. DOJ consolidated the lawsuits in Arkansas. Under the Federal Tort Claims Act (FTCA), the Federal Government waives sovereign immunity only to the extent that a private citizen would be held liable under state law for a negligent or wrongful act. Thus, effectively, state law is determinative on liability. USDA filed motions to dismiss in all of the pending lawsuits, and the court stayed the proceedings pending the opinion of the Arkansas Supreme Court on how to interpret state law. On 4/10/14, the Arkansas Supreme Court issued its opinion on a question certified to it by the district court, concluding that “malicious” conduct under Arkansas law includes conduct in “reckless disregard of the consequences from which malice may be inferred.” Following the Arkansas Supreme Court’s ruling, the district judge lifted the stay and permitted limited discovery on USDA’s motion to dismiss based on a lack of subject matter jurisdiction.

**Status:** On 7/2/14, USDA filed a renewed motion to dismiss. Plaintiffs filed their opposition brief on 4/15/15. USDA filed its reply brief on 6/15/15.

United States Department of Agriculture  
2016 Presidential Transition  
Appendix B: USDA Litigation Summary

several other environmental groups have filed three separate lawsuits under the APA concerning the Tongass National Forest: a facial challenge to the 2008 Tongass Forest Plan, a challenge to the Big Thorne Timber Sale, and a case challenging both the 2008 Plan and the Big Thorne Sale. Plaintiffs’ claims are based on both the National Forest Management Act (NFMA) and the National Environmental Policy Act (NEPA). On 3/23/15, the District Court issued a final judgment on the merits in the consolidated cases, ruling in favor of the Forest Service in all respects. On 3/26/15, Plaintiffs in each of the pre-consolidated cases filed a notice of appeal.

Status: Appellants’ briefs were filed on 7/2/15 and 7/6/15. USDA, the State of Alaska, and other intervenors’ briefs were filed on 8/20/15. Appellants’ replies were filed on 9/3/15 and 9/8/15. On 1/6/16 the US Fish & Wildlife Service (FWS) determined the Tongass wolf does not warrant listing under the Endangered Species Act. On 1/8/16 Appellants filed a motion requesting the Court take judicial notice of their interpretation that the FWS determination found continued timber harvesting is resulting in declines of the wolf population in the Big Thorne sale area. On 1/13/16, USDA opposed, pointing out that FWS does not blame continued logging. The Ninth Circuit heard oral argument on 2/3/16. While the three-judge panel did seem concerned about the viability of the wolf population in this part of the Tongass, it was pointed out that wolf viability is not in issue, just whether a hard limit for viability is required.

Center for Biological Diversity v. Tidwell, et al. (“Spotted Owl FACA Case”), No. 15-2176-CKK (D.D.C.) – Plaintiff filed suit on 12/15/15 under the Federal Advisory Committee Act (FACA) and the Administrative Procedure Act (APA) challenging the Forest Service’s administration of the “California Spotted Owl Conservation Strategy Team.” Specifically, Plaintiff contends the FS violated FACA by forming and using this team (or group). Plaintiff alleges the FS violated FACA because non-federal members served on this team and the team’s meetings were closed to the public. Plaintiff also asserts the strategic team was not “fairly balanced.”

Status: On 3/22/16, USDA filed a motion to dismiss based on standing and ripeness. USDA argued that Plaintiff is unable to point to any particularized harm because the FS had not taken any final agency action. USDA also argued the claim was moot since the roster of the group changed to include only federal employees, and thus is not subject to FACA requirements. Plaintiff filed its opposition brief and USDA filed a reply brief and a declaration regarding the fact that the FS had made available to the public notes from a November 2015 strategic team meeting, which further demonstrated that the case is moot. On 6/9/16, Plaintiff filed a motion for leave to file a sur-reply, asserting that it needed to address the Strategy Team’s composition and the public disclosure of records made by the FS. On 6/20/16, USDA filed a response objecting to this motion in part. On 7/20/16, Plaintiff filed a sur-reply arguing USDA did not release the full scope of records requested under FACA—e.g., copies of emails exchanged between Strategic Team members. On 8/16/16, USDA filed a motion for leave to file a response to Plaintiff’s sur-reply together with a proposed response brief.

Center for Biological Diversity, Story of Stuff Project, and Courage Campaign Institute v. US Forest Service, et al., No. 5:15-cv-2098 (C.D. Cal.) – Environmentalist groups brought this action against the Forest Service alleging it improperly has allowed Nestle to draw water from
the San Bernardino Mountains on a permit that expired 25 years ago, and the FS’s continued acceptance of payments from Nestle for the expired permit constitutes an “illegal license.”

**Status:** Plaintiffs filed their complaint on 10/13/15. The parties have filed cross-motions for summary judgment that have been briefing fully. On 4/20/16, the Court issued an order directing the parties to file supplemental briefs, which they did. The Court also granted Nestle Waters North America, Inc. (“Nestle”) leave to file an amicus curiae brief, and the Plaintiffs filed a brief in opposition to Nestle’s amicus filing. On 6/24/16, the parties and Nestle filed supplemental briefs on an additional question presented by the Court. Plaintiffs filed a further reply brief and USDA submitted supplemental authority on 7/6/16. On 7/10/16, Plaintiff replied to the additional USDA authority, which appears to have concluded briefing on the question posed by the Court.

*Cottonwood Environmental Law Center v. USFS, No. 15A906 (S. Ct.), Nos. 13-35624, 13-35631 (9th Cir.)* – In 2000, the Fish and Wildlife Services (FWS) listed the Canada lynx as a threatened species under the Endangered Species Act (ESA). The FWS designated critical habitat for the Canada lynx in 2006, but did not include any National Forest System land. Subsequently, the FS proposed the Lynx Amendments, standards and guidelines for land management activities on National Forest System land that responded to the FWS’s listing and designation decisions. The FS initiated consultation on the adoption of the Lynx Amendments with the FWS under Section 7 of the ESA, and the FWS determined the FS’s standards and guidelines did not jeopardize the Canada lynx. Shortly after completing the consultation process, the FWS discovered its decisions relating to the designation of critical habitat for the Canada lynx was flawed, and as a result, FWS designated extensive National Forest System land as critical habitat. The FS did not reinitiate consultation on the Lynx Amendments. The Plaintiff filed suit in the district court, alleging the FS’s decision not to reinitiate consultation violated the ESA. The district court agreed. The FS appealed, and on 6/18/15, the Ninth Circuit affirmed the district court’s decision, holding that 1) the Plaintiffs had Article III standing to bring a programmatic challenge against the Lynx Amendments; 2) the Plaintiff’s claims were ripe; and 3) the FS violated the ESA when it did not reinitiate consultation. The Ninth Circuit denied the FS’s petition for rehearing en banc on 12/17/15.

**Status:** On 5/13/16, the Solicitor General filed a petition for certiorari. Plaintiff received an extension until 7/13/16, to file its opposition brief. On 6/10/16, the American Forest Resource Council filed an amicus brief in support of USDA’s petition. Plaintiff filed its response brief on 8/8/16. On 8/24/16, the Solicitor General filed a reply brief. On 10/11/16, certiorari was denied.

*Forest Service Employees for Environmental Ethics (FSEE) v. USFS (E.D. Wash.)* – Plaintiff filed this lawsuit alleging violations of NEPA and the APA related to the communication protection line (CPL) built near the 2015 Wolverine Fire on the Okanogan-Wenatchee National Forest in Washington. Plaintiff also raises a facial and as-applied challenge to 36 C.F.R. § 220.4(b) “Emergency responses,” alleging violations of NEPA and the APA in promulgation of the regulation and its application at the Wolverine Fire. Plaintiff alleges FS built an unnecessary 50 mile long, 300 foot wide CPL after the fire had stopped moving in August 2015, without NEPA analysis.
**Status:** The initial complaint was filed on 8/16/16.

*FS Employees, et al v. USDA (EEOC)* - filed an informal putative administrative class action alleging FS’s Region discriminates against female firefighters in reassignments, hiring, promotions, details, fire assignments, misconduct inquiries, performance, training, qualifications, creating a hostile work environment, and reprisal. After several complainants filed requests to have their individual complaints (and complaints already resolved or disposed of) converted to a class action, USDA filed motions alerting the respective EEOC Administrative Judges that an informal class complaint had been filed and some of these individual complaints or claims might be subsumed if a formal class complaint was filed. On 9/27/14, the EEOC issued a consolidated response that all of the complaints would be stayed until there was further information from USDA. Three putative class agents filed formal class complaints, around 12/17/14, which were later accepted and subsumed into a single class complaint. On 11/30/15, the Supervisory EEOC Administrative Judge inquired with the parties as to the status of the class complaint. On 12/1/15, USDA filed a status report, explaining that no Administrative Judge has been assigned to the putative class action yet, and renewed its pending motion to schedule a teleconference for purposes of clarifying the issues. The Judge prompted the parties to attempt to clarify the issues. On 12/4/15, USDA sent a letter to the Class Representative, requesting clarification of the issues.

**Status:** On 1/23/16, the Supervisory EEOC Administrative Judge inquired as to the location of the class action (before EEOC or EEOC) and whether the parties had clarified issues. Both parties explained their preference for the case to be before the EEOC’s District Office. USDA also notified the Supervisory Administrative Judge that the class representative had not yet responded to USDA’s requests for clarification of the issues. On 7/14/16, OGC filed a motion for a teleconference to clarify the claims, which included an explanation of the Agency’s subsumption criteria. The Judge reiterated her position that the parties should clarify the claims without EEOC involvement.

**Litigation and Contempt Proceeding Against FS and BLM Employees (D. Nevada)** – In 2007, Bureau of Land Management (BLM) and the FS filed an affirmative trespass case against in U.S. District Court in Nevada, which was tried to the bench in 2012. At the conclusion of the trial in June, Judge Jones ordered a BLM employee and FS District Ranger to show cause why they should not be held in contempt for continuing to issue trespass notifications to other ranchers while the case was pending. On 8/31/12, Judge Jones ruled from the bench that both the BLM employee and were in contempt, although both men were acting within the scope of their employment and no court order prohibited their activity. The Judge told the men to have the agencies to pay about $34,000 to and to pay it themselves if the agencies do not. The Judge ordered DOJ to prepare a proposed contempt order, with input from Plaintiff. On 5/24/13, the Court issued its order in favor of Defendants in a 104-page opinion. USDA filed an appeal of the Court’s underlying decision and a Notice of Appeal on behalf of the employees of the contempt order. On 4/8/14, the Ninth Circuit granted the government’s motion to be realigned as appellant in the contempt appeal and to relate the two cases, which will now be calendared together.
Status: On 1/15/16, the Ninth Circuit reversed the District Court’s judgment against USDA as well as its contempt rulings against the individual employees, and remanded the case for the limited purpose of quantifying damages. (b)(6) did not seek rehearing en banc, and the Court issued its mandate on 3/9/16. On 4/7/16, the District Court vacated the contempt order against and gave the parties 21 days to brief the computation of damages owed to the United States. On 4/14/16, the (b)(6) filed a petition for certiorari with the U.S. Supreme Court on the substantive trespass ruling. On 5/20/16, the United States waived its right to respond to the petition. On 6/13/16, the U.S. Supreme Court requested that the United States file a response to (b)(6) petition. The U.S. filed its response on 9/12/16. DOJ believes the Supreme Court’s decision on the petition will occur in October. On 6/23/16, the District Court entered judgment for the United States on the affirmative trespass claims, ordering (b)(6) to pay $566,831.84 in damages to the United States. The District Court stayed payment until the Supreme Court issues its first dispositive ruling, contingent on posting a bond based on the number of his cattle remaining on public land. Most of the damages will go to the BLM, with the FS receiving $11,791.34. The District Court also dismissed (b)(6) counterclaims against the United States. As of 8/29/16, (b)(6) has not yet posted his bond. However, he has requested guidance from the Court as to how procedurally this should be done.

*Jarita Mesa Livestock Grazing Assn, et al v. USFS, No. 1:12-cv-00069-JB-KBM (D. New Mexico)* — The Jarita Mesa Livestock Grazing Association challenged a FS decision under NEPA to limit the number of cattle allowed on Plaintiffs’ grazing allotments because drought in the area has reduced the amount of forage. The Plaintiffs included a Bivens claim against the District Ranger in her personal capacity, claiming that she limited their permit in retaliation for their exercise of their First Amendment rights (criticizing her management decisions). DOJ approved representation for the District Ranger in her personal capacity, and an AUSA, acting as her personal lawyer, moved to dismiss the Bivens claim on the ground that NEPA provided an adequate alternative remedy. The Court initially issued a mixed ruling on the motion to dismiss, dismissing the personal capacity claims, but retaining a First Amendment retaliation claim against the District Ranger in her official capacity. On 9/30/13, the Court issued an order granting the district ranger’s motion for reconsideration and dismissed the First Amendment claims, thus dismissing the District Ranger. On 9/30/15, the Court issued a 122-page order dismissing all but two of Plaintiffs’ remaining claims against the FS. The two claims that remain for further litigation are Claim 2 (alleging that the FS failed to properly analyze the environmental impact of the decision to limit grazing), and Claim 5 (alleging that the District Ranger failed to consider the findings of the environmental analysis when she issued her decision notice).

Status: The parties conducted a mediation before a federal magistrate judge on 4/21/16, but unfortunately the mediation did not result in a settlement. Plaintiffs filed their opening brief on 9/30/16. USDA must file its answering brief by 11/8/16, and Plaintiffs must file their reply brief by 12/8/16.

*Juliana, et al., v. United States, et al., No. 6:15-cv-1517-TC (D. Or.)* – A group of 21 young people, former NASA climate scientist Dr. James Hansen (on behalf of future generations), and Earth Guardians filed a complaint alleging President Obama, the Office of the President,
USDA, the Department of Energy, the State Department, the Department of the Interior, the Department of Transportation, the Department of Commerce, and the Environmental Protection Agency have violated Plaintiffs’ constitutional rights by failing to address climate change and by promoting and approving fossil fuel development that has increased atmospheric CO2. Plaintiffs assert that Defendants’ actions have violated their Fifth Amendment rights to life, liberty, and property, due process, the Ninth Amendment, and the public trust doctrine. The complaint alleges USDA’s large-scale logging, farming and agricultural practices, and fossil fuel extraction and use contributed to climate change. The complaint also alleges that Department of Energy’s order authorizing the export of liquefied natural gas (LNG) from the proposed Jordan Cove LNG terminal in Coos Bay, Oregon contributes to CO2 emissions, and they ask the court to set it aside. The proposed LNG pipeline will cross three National Forests, and the Forest Service is a cooperating agency on FERC’s EIS for the terminal and pipeline.

Status: The Government filed a motion to dismiss all claims for failure to state a claim and for lack of jurisdiction on 11/17/15. On 1/14/16, the court allowed industry groups to intervene. On 4/8/16, the magistrate judge issued findings and recommended the district court deny the motions to dismiss. The magistrate found that Plaintiffs have standing, the complaint did not allege political questions, Plaintiffs had sufficiently alleged substantive due process claims, and the public trust doctrine claim could proceed. The Government’s and defendant-intervenors’ objections were filed on 5/2/16, and Plaintiffs responded to both objections on 5/16/16. A hearing on the objections was held on 9/13/16. The court took the matter under advisement and encouraged the parties to mediate the dispute.

Organized Village of Kake, et al., v. USDA, No. 11-35517 (9th Cir.) – Plaintiffs challenged USDA’s 2003 regulation exempting the Tongass National Forest from the requirements of USDA’s 2001 Roadless Area Conservation Rule (Roadless Rule). Plaintiffs prevailed in District Court, rendering the Tongass subject to the 2001 Roadless Rule’s travel restrictions. The State of Alaska, as intervenors, pursued the appeal before the Ninth Circuit without USDA’s participation. In a split opinion on 3/26/14, a three-judge panel of the Ninth Circuit overturned the District Court ruling that set aside the Tongass Exception Rule to the 2001 Roadless Rule. On 7/29/15, the Ninth Circuit sitting en banc reversed the panel and affirmed the District Court’s decision finding that the promulgation of the Tongass National Forest Exemption to the Roadless Rule violated the Administrative Procedure Act. The Ninth Circuit vacated the Tongass Exemption and reinstated application of the Roadless Rule to the Tongass National Forest in Alaska. The State of Alaska filed a petition for a writ of certiorari from the Supreme Court on 10/12/15.

Status: USDA filed a brief in opposition to the petition on 2/19/16. While disagreeing with the Ninth Circuit’s en banc decision on the merits, USDA’s brief argued the case is not worthy of certiorari because, inter alia, the Forest Service is developing new policies to govern the Tongass and is amending the Tongass Land and Resource Management Plan to reflect those policies, which includes, on 11/20/15, the publication in the Federal Register of a draft environmental impact statement for the proposed plan amendment. The U.S. Supreme Court denied certiorari on 3/28/16. Thus, the Tongass National Forest remains subject to the Roadless Rule, under the terms provided in the final judgment of the District Court in Alaska. However, the State of Alaska’s separate case against the Roadless Rule remains pending in the U.S.
District Court for the District of Columbia. Plaintiffs filed an application for attorneys’ fees under the Equal Access to Justice Act totaling nearly $700,000. However, the parties have agreed to stipulate to a total payment of $250,000 in fees and costs. On 9/2/16, the District Court redistributed its judgment reflecting the parties’ stipulation on attorney’s fees and costs.

Otero County Litigation – Early in 2012, USDA filed an action against Otero County and the State of New Mexico seeking to invalidate a New Mexico statute that purports to permit counties to assert jurisdiction and conduct treatment activities on FS lands, and an Otero County resolution adopted in reliance on that statute. Otero County argued its intended actions are authorized by the Tenth Amendment and that the Property Clause does not preclude this exercise of its police powers. On 9/30/15, in a 66-page order, the court denied the county’s summary judgment motion and granted summary judgment to USDA, holding that the county’s resolution and the state’s statute conflicted with Federal law and violated the Supremacy Clause of the U.S. Constitution. Otero County filed its notice of appeal to the Tenth Circuit on 11/23/15.

Status: Otero County filed its opening brief on appeal on 1/19/16. Pacific Legal Foundation filed an amicus brief on 1/27/16. USDA filed its responsive brief on 3/14/16. The 10th Circuit heard oral arguments on 9/21/16.

Ozark Society v. USFS, et al., No. 16-1952 (8th Circuit, USCA) – This case involves an appeal of a summary judgment granted to the Federal defendants regarding Plaintiff’s claims challenging a forest plan as it relates to natural gas development on the Ozark National Forest in Arkansas, and challenging the authorization of a particular gas well. The District Court determined that: (1) the Forest Service was not required to update the Environmental Impact Statement (EIS) for the forest plan when the Bureau of Land Management indicated that more gas wells would likely be drilled than the Environmental Impact Statement had considered; (2) the Supplemental Information Report the Forest Service prepared to examine whether it should update the EIS was not a final agency action within the meaning of the Administrative Procedure Act (APA); (3) the challenge to the authorization for the individual well became moot after the drilling of the well was complete; and (4) in any event, the individual well authorization was not arbitrary or capricious.

Status: District Court ruled in favor of the government defendants. The government Appellees defended the decision on appeal and also argued that the Ozark Society failed to show that it had constitutional standing to challenge either the forest plan or the individual well authorization. On 7/28/16, the Government filed its brief and on 8/26/16, Plaintiff its reply brief.

Status: These cases represent the lawsuits on behalf of all but one of the 15 claimants, filed on 12/15/15, 12/17/15, and 12/21/15, respectively. The statutory deadline for filing claims in the District Court expired on 12/23/15. Based on the joint request of the parties following the Rule 26(f) planning meeting on 4/20/16, the Court consolidated all the cases, designating [5(b)] as the lead case, and ordered USDA to file its motion to dismiss based on the discretionary function exemption in the Federal Tort Claims Act. USDA filed its motion to dismiss on 5/27/16. On 7/26/16, Plaintiffs and DOJ agreed on a consent order allowing for limited discovery related to U.S.’ assertion of the discretionary function exception. Plaintiffs submitted written interrogatories and requests for production on 8/8/16. On 9/23/16, USDA provided its responses to Plaintiff’s first set of interrogatories and requests for production. Plaintiff is scheduled to depose key FS witnesses on 11/18/16.

_Petro-Hunt v. United States, No. 16-1981 (Fed. Cir.)_ – Petro Hunt, LLC, Hunt Petroleum Corporation and Kingfisher Resources, Inc. filed a civil suit in U.S. District Court in 2000, requesting a Declaratory Judgment quieting title to 180,021.31 acres of mineral rights under lands administered by the Kisatchie National Forest in Louisiana and seeking to have all leases granted by the U.S. be null and void. Petro-Hunt claimed that the United States, acting through the Forest Service, committed both temporary and permanent takings of mineral servitudes when it asserted ownership of the servitudes by operation of Louisiana state law. Petro-Hunt also alleged a variety of contract causes of action. Prior District and Appellate court rulings held that the United States owned 90 of 96 contested servitudes. Petro Hunt subsequently filed this Federal Claims Court action re-alleging the prior allegations plus a judicial takings claim. As the case developed over time, the Court of Federal Claims issued decisions in 2009, 2012, and 2016, eventually dismissing all claims for lack of jurisdiction on three grounds: statute of limitations; 28 U.S.C. § 1500, and lack of jurisdiction to review the Fifth Circuit decisions underlying the judicial takings claim. On 11/6/09, the Court issued a decision dismissing all of Petro Hunt’s claims except a judicial takings claim. A decision was issued 2/29/16, with regard to the judicial takings claim in favor of the United States.

Status: Petro Hunt filed an appeal on 5/4/2016. The case is currently before the Court of Appeals for the Federal Circuit. The Government’s opening brief is due to be filed the week of 10/10/16.

_Resolution Copper Litigation, Concerned Citizens and Retired Miners Coalition v. Forest Service, No. 2:16-cv-3115 (D. Ariz.); San Carlos Apache Tribe v. Forest Service, No. 2:16-cv-3125 (D. Ariz.)_ – These related cases concern a planned copper mine on the Tonto NR in Arizona. The mine would be located on land that is both environmentally sensitive and sacred to the Apache Tribe. Congress ordered the Forest Service (FS) to transfer the land to Resolution Copper for its mine site, but did not order the FS to transfer additional land that would be needed for a tailings facility. Resolution Copper must obtain a FS permit for the tailings facility, and the FS must conduct an environmental analysis before granting the permit. The Plaintiffs in these two cases filed complaints on 9/15/16, each challenging the adequacy of the FS environmental analysis for the Resolution Copper Mining Baseline Hydrological and Geotechnical Data Gathering Activities Plan of Operation. In addition, the Apache Tribe
alleges that the FS failed to consult with the Tribe or State Historic Preservation Officer under the National Historic Preservation Act.

Status: USDA's responsive pleadings are due on 11/22/16.

VI. Research, Education and Economics (REE)

Agricultural Research Service (ARS)

*Center for Biological Diversity, Maricopa Audubon Society, Dr. Robin Silver v. Tom Vilsack, et al., No. 2:13-cv-01785 (D. Nev.)* – This lawsuit relates to the saltcedar Tamarisk beetle biological control (biocontrol) agent program. Plaintiffs’ primary complaint is that the beetles released by the program destroyed the habitat for the endangered Southwestern willow flycatcher (“flycatcher”). Plaintiffs allege APHIS and ARS violated the ESA and NEPA by failing to implement mitigation measures to (1) ensure against jeopardizing the flycatcher or impairing its critical habitat and (2) conserve the flycatcher, despite the fact that the saltcedar biocontrol program has been terminated. Plaintiffs also allege APHIS, ARS, and FWS failed to comply with the ESA consultation requirements concerning APHIS’s termination of its beetle release program.

Status: On 3/31/16, the Court issued a minute order granting in part and denying in part both Plaintiffs’ and Defendant’s motions for summary judgment. However, the Court has not yet issued its opinion. The Court scheduled a hearing for 5/3/16 on the issue of injunctive relief, and subsequently requested an additional briefing on injunctive relief. Plaintiff’s brief was filed on 5/24/16. USDA filed its response brief on 6/21/16. Plaintiffs’ reply brief was filed on 7/5/16. USDA filed objections to the evidence submitted by Plaintiffs on 7/22/16. On 7/27/16, Plaintiffs filed a response to USDA’s evidentiary objections.

*Public Employees for Environmental Responsibility v. USDA, No. 1:15-cv-02023-CRC (D.D.C)* – On 11/19/15, Public Employees for Environmental Responsibility (PEER) filed an Administrative Procedures Act (APA) action seeking judicial review of USDA’s denial of its rulemaking petition to: revise the internal Departmental Regulation (DR) that established USDA’s internal scientific integrity review process; require USDA to undertake notice and comment rulemaking; and to strike one provision of the DR as a violation of the First Amendment’s free speech clause. PEER alleges associational standing to sue through its members, including Dr. Jonathan Lundgren, a former ARS entomologist who had complained of agency interference with publication and speaking engagements related to his research on the effects of certain pesticides on honeybees in violation of USDA’s scientific integrity policy.

Status: PEER filed the complaint on 11/19/15. USDA was served on 12/7/15. USDA filed a motion to dismiss on 4/1/16, based in part on the fact that PEER has no associational standing because Dr. Lundgren resigned from ARS in March 2016. PEER filed its response on 4/15/16 arguing that PEER maintains standing because the DR applies to contractors, grantees, cooperators, etc. and that Dr. Lundgren will continue to be subject to the policy because he has
and will continue to apply for grants. On 7/15/16, the Court granted USDA's motion to dismiss, finding that 1) PEER lacked associational standing to have the Scientific Integrity Policy (SIP) set aside or to force USDA to reissue the policy using notice and comment because Dr. Lundgren is no longer employed by USDA, his future potential grantee status was speculative, and PEER had not shown that any other members would have standing to sue; and 2) the SIP would not apply to grantees in the manner argued by PEER. PEER's complaint was dismissed without prejudice so that it can allege that it has other members who are subject to the policy, and thus establish associational standing. On 8/12/16, PEER filed a motion for reconsideration arguing that dismissal for lack of standing was in error. On 9/2/16, USDA filed a response to Plaintiff's motion for reconsideration. On 9/9/16, Plaintiff filed a response to the motion opposing their request for reconsideration.

VII. Rural Development

No matters provided.

VIII. Departmental Management

*USDA Employees v. USDA (EEOC)* – A group of USDA employees filed a formal putative class action, alleging the Agency discriminated against deaf employees in the National Capital Area based on physical disability (hearing impaired) when on 5/19/14, the sign language interpreting services for deaf and hard of hearing in USDA’s National Capital Region were decentralized.

**Status:** On 12/7/15, an EEOC Administrative Judge issued an order requiring the Class Agent to produce seven enumerated types of information about the class claims, and requiring USDA to brief the issue of certification and provide any relevant information. USDA filed a motion to dismiss and brief opposing class certification on 1/22/16. The parties responded to each other’s briefs. The certification issue is fully briefed and is pending before the EEOC Administrative Judge.

IX. Government-Wide

*Martin v. United States, Civil Action No. 13-834C (Court of Federal Claims)* – The Martin case is a government-wide class action which involves all government employees who were Fair Labor Standards Act ("FLSA") non-exempt and worked during the furlough of October 2013, from October 1-5 2013, and were not paid timely. USDA has seventeen sub-agencies who employed potential class members and USDA served Notice to over 10,000 potential class members who were current and former employees. At this time, government-wide, there are approximately 25,000 class members.

**Status:** The parties completed briefing on the liquidated damages issue at the beginning of July 2016 and are waiting for the Court to set a date for oral argument.
On February 13, 2009, President Obama established the current iteration of the National Security Council (NSC) System. The NSC is the principal forum for consideration of national security policy issues requiring Presidential determination. The United States Department of Agriculture (USDA) does not have a formal seat on the actual NSC, however, USDA is involved in a large number of policy committees that ultimately report to the NSC. In cases where USDA has equities, the Secretary and Deputy Secretary are asked to join Principals and Deputies Committees meetings (see below).

The **NSC Principals Committee** (NSC/PC) is the senior interagency forum for consideration of policy issues affecting national security, as it has been since 1989. The National Security Advisor serves as Chair. The Secretary of Agriculture attends these meetings when USDA is invited.

The **NSC Deputies Committee** (NSC/DC) reviews and monitors the work of the NSC interagency process (including Interagency Policy Committees). The NSC/DC also helps ensure that issues being brought before the NSC/PC or the NSC have been properly analyzed and prepared for decision. The NSC/DC shall focus significant attention on policy implementation. The NSC/DC is responsible for day-to-day crisis management, reporting to the National Security Council. The Deputy Secretary of Agriculture attends these meetings when USDA is invited.

Management of the development and implementation of national security policies by multiple agencies of the United States Government is accomplished by the **NSC Interagency Policy Committees** (NSC/IPCs). The NSC/IPCs are the main day-to-day entities for interagency coordination of national security policy. They provide policy analysis for consideration by the more senior committees of the NSC system and ensure timely responses to decisions made by the President. The NSC/IPCs convene on a regular basis to review and coordinate the implementation of Presidential decisions in their policy areas. The Assistant Secretaries, Under Secretaries, Deputy Assistant/Under Secretaries, Agency Heads, or their designees attend these meetings when USDA is invited.

At USDA, the Office of Homeland Security and Emergency Coordination (OHSEC) serves as the Department’s principal conduit to the NSC. OHSEC coordinates IPC and sub-IPC attendance across USDA, and assists in briefing the Deputy and Secretary for NSC PC/DC meetings.

**For Emergencies Anywhere in the U.S. or U.S. Territories**

**Emergency Response Plan:**
USDA agencies provide a wide range of response and recovery capabilities related to incidents. In preparing and responding to incidents, USDA agencies operate under their established incident response policies and the National Response Framework (NRF) with support from USDA.

---

1 Note: This section will be inserted into the master binder to address Crisis Management and Emergency Response
OHSEC is the coordinator for mitigation, preparedness, response, and recovery activities at USDA.

This section provides an overview of the incident response and recovery process, but does not include detailed information on agencies/offices. USDA agencies and offices should ensure that they have current procedures in place to provide guidance on how they will prepare for and respond to incidents. The information provided in this part provides more detailed guidance and support for the national response structure. To carry out incident management responsibilities during or following an incident, the Secretary of Agriculture will utilize individual agency/office policies and the NRF and National Incident Management Systems (NIMS).

In accordance with Part 2 of Executive Order 12656, the Secretary of Agriculture has appointed the OHSEC Director to serve as the USDA Emergency Coordinator. USDA will use present authorities and existing legislation to adjust and operate agricultural programs following incidents and natural disasters.

At the national and regional levels, USDA works with DHS and FEMA officials as well as other applicable Federal departments and agencies, including the Department of Defense and the U.S. Agency for International Development (USAID). FEMA, in accordance with the NRF, coordinates the overall Federal response when a disaster declaration is issued in accordance with the Stafford Act. In these instances, the State Emergency Boards (SEBs) and the County Emergency Boards (CEBs) would provide assistance and support to the regional coordinators, as needed.

A high level of structured coordination among the USDA Agencies is essential to preparedness and response to incidents. Multi-agency Coordination (MAC) systems provide the architecture to support coordination for incident prioritization, critical resource allocation, communications systems integration, and information coordination. The elements of MAC systems include facilities, equipment, personnel, procedures, and communications. These systems assist agencies and organizations responding to an incident. MAC Groups formulate and execute Departmental policies, identify and allocate critical resources, and identify and resolve issues that are common to all participating agencies to guide USDA’s implementation of the President’s Direction and Strategies and supporting Federal protocols for interagency collaboration.

The USDA MAC Group provides a forum to discuss actions to be taken to ensure that an adequate number of resources are available to meet anticipated needs, and to allocate those resources most efficiently during periods of competition for limited resources. The USDA MAC Group will provide for:

- Situation assessment
- Incident prioritization
- Resource acquisition and allocation
- Departmental rapid response coordination
- Accurate factual information for use by the MAC Group and agency heads to successfully attain objectives in emergency response and media communication
- Identification and resolution of issues common to all parties
In consultation with the OHSEC Director, the Secretary will issue a memorandum activating the USDA MAC Group and providing appropriate delegation of authority to the MAC Group members. The Secretary also identifies a MAC Chair who is normally selected from a pre-trained cadre of Mission Area leadership (usually appointees at the Mission Area Chief of Staff level or higher).

Agency Administrators and Chiefs, by virtue of the executive positions they occupy in their respective agencies, have the authority to support an emergency declared or actions undertaken by the Secretary of Agriculture. They may direct the movement of personnel and equipment under their jurisdictions to maximize the strategic response functions of detection, control and containment of an event.

Multi-agency coordination for wildland fires will be handled by the National MAC Group for wildland fires and associated geographical MAC Groups (separate from this process). If necessary, any communications and coordination regarding wildland fires with the USDA MAC Group will be managed by the Forest Service.

A MAC Group usually meets prior to each operational period during an incident. After analyzing current situational information, the group establishes priorities and disseminates this information for implementation in operational plans. In emergencies that are more complex, the MAC Group may choose to establish support positions that work for the MAC Group Coordinator, and in some cases under the direction of the MAC Group Chair.

For each meeting of the USDA MAC Group, a set of objectives should be developed. The following objectives can be used as a guideline.

- Identification and resolution of issues (proactive)
- Establishment of priorities
- Allocation and re-allocation of scarce or limited resources
- Provide and recommend direction to subordinate MAC Groups if applicable
- Determine the need for Contingency Plans as appropriate.

Depending on the type of incident for which the USDA MAC Group was activated, any of the following decision models may be used and selected.

- Make a collaborative decision and assign responsibility/expectation (estimated date).
- Delegate a decision with expectations to a MAC Group member, the Coordinator, or member of the staff.
- Defer decision for consideration at a later date (e.g. defer for more information or defer for further development of fire situations).
- Determine that the issue is outside the scope of our responsibility. Defer issue to appropriate organization or individual.
Roles/Responsibilities:

A. **The Private Sector:**
Private-sector organizations play a key role before, during, and after an incident. USDA will work with members of the private sector including, but not limited to, farmers, ranchers, and private land owners; as well as owners and operators of facilities that process meat, poultry and egg products. Interaction may occur at county/parish level service centers, processing facilities, or at incident response locations.

B. **Nongovernmental Organizations (NGOs):**
NGOs play enormously important roles before, during, and after an incident. For example, NGOs provide sheltering, emergency food supplies, counseling services, and other vital support services to support response and promote the recovery of incident victims. These groups often provide specialized services such as establishing animal shelters following an incident. USDA agencies should work closely with NGOs to better utilize resources following an incident during response and recovery activities.

C. **Local Governments:**
The responsibility for responding to incidents, both natural and manmade, begins at the local level—with individuals and public officials in the county, city, or town affected by the incident. Local leaders and emergency managers prepare their communities to manage incidents locally. When a disaster occurs that exceeds the capacity of the local government, or when local resources are not adequate, the State government supplements and facilitates local efforts. If the disaster exceeds the capacity of the State Government to assist the local government, the Governor can request a presidential declaration invoking the Stafford Act. County Executive Boards (CEBs) and USDA employees working in service centers at the local level will interface with local leaders and emergency managers to assist with planning for response activities as well as assisting with response and recovery efforts.

D. **States, Territories, and Tribal Governments:**
A primary role of State government is to supplement and facilitate local efforts before, during, and after incidents. The State provides direct and routine assistance to its local jurisdictions through emergency management program development and by routinely coordinating in these efforts with Federal officials. Under the NRF, the term “State” and discussion of the roles and responsibilities of States typically also include similar responsibilities that apply to U.S. territories and possessions and tribal governments. The United States has a trust relationship with Indian tribes and recognizes their right to self-government. As such, tribal governments are responsible for coordinating resources to address actual or potential incidents. When local resources are not adequate, tribal leaders seek assistance from States or the Federal Government.

For certain types of Federal assistance, tribal governments work with the State, but as sovereign entities they can elect to deal directly with the Federal Government for other types of assistance.
The State Emergency Board (SEB) should interface with State governments to ensure coordination of resources for response and recovery efforts. State departments of agriculture are usually the primary State agency that work with USDA or its agencies or offices to prepare for or respond to incidents. State departments of agriculture may also work with USDA agencies such as Farm Service Agency (FSA) during the recovery phase following an incident when financial assistance programs may become available.

**E. Federal Government:**

When an incident occurs that exceeds or is anticipated to exceed local or State resources—or when an incident is managed by Federal departments or agencies acting under their own authorities—the Federal Government typically follows the guidance provided in the NRF and its annexes to involve necessary Federal department and agencies, organize the response, and ensure coordination with other response partners.

**F. USDA:**

For the majority of incidents, USDA will provide assistance in accordance with the provisions of the NRF, as appropriate. Some incidents such as the outbreak of a foreign animal disease may not invoke a Presidential declaration for Federal assistance via the Stafford Act. For these types of incidents, USDA may provide direct Federal-to-Federal assistance to other agencies in accordance with the Financial Management Support Annex of the NRF. USDA may also directly assist State and local governmental entities without involving other Federal agencies. The size and complexity of an incident will determine the level of involvement for USDA and its offices and agencies. For example, some small incidents may be handled completely by a State department of agriculture without USDA assistance being provided.

---

**For Emergencies in the National Capital Region**

1. **Critical Decisions Framework:**

The Critical Decisions Framework is a series of questions that leadership will be required to answer if an emergency/homeland security incident occurs. The purpose of this document is to frame these critical decision points to better facilitate the decision-making process with USDA senior leaders during an incident in the National Capital Region (NCR). The framework outlines four general types of incidents to span the spectrum of national security, man-made, naturally occurring, and facility incidents. The all-hazards critical decision-making key questions section outlines a series of common questions that apply to all types of incidents, but require unique decisions depending on the situation.

---

2 The Office of Operations maintains responsibility for security, facility, and safety operations in the NCR. OHSEC is the overarching security policy leader and Departmental Security Officer for all USDA locations worldwide.
Types of Incidents:
- National Security Incident in NCR (e.g., State Actor Aggression, Terrorism)
- Man-made Incident Impacting USDA Personnel and/or Facilities (e.g., Active Shooter, Bomb Threat)
- Naturally Occurring Incident (e.g., Blizzard, Pandemic)
- Facility Incident (e.g., Building Fire, Sewage Leak)

All-Hazards Critical Decision-making Key Questions (include, but not limited to):
- How does the incident impact USDA personnel, facilities and mission capabilities?
  - Initial assessment/ongoing situational awareness
  - Accountability of USDA personnel and facilities
  - Reporting Requirements for USDA Agencies and Staff Offices
  - Interagency coordination across Federal Departments and Agencies
- Who should be initially notified? (Considerations: Close hold or mass employee notification)
  - Internal notifications
  - External notifications
- Who is responsible to manage the incident?
  - Designate incident commander
  - Implement type of incident management structure (e.g., Incident Management Team)
- What options are available to manage the incident? What are the authorities to act?
  - Facility Closures
  - Continuity of Operations (COOP) Plan activation (COGCON Level Change)
  - Deploy to Emergency Relocations Facilities (ERFs)
  - Devolve USDA Operations Center to Kansas City
  - Convene Emergency Coordinators
  - Recommend activation of the Secretary’s Multi-Agency Coordination (MAC) Group
  - Additional security and preparedness measures
  - OHSEC Authorities: 7 CFR 2.95; DM-1800-001
- What should USDA employees be instructed to do to save lives, protect property and the environment, and meet basic human needs?
  - Shelter-in-place order
  - Evacuation order
  - Early Release/Delayed Arrival/Telework/Administrative Leave
- How to disseminate information to USDA Agencies/Staff Offices after the decision has been made?
  - Should a message be drafted for the Secretary’s office to inform USDA employees?
  - DM department-wide email
  - OO and OHSEC notification
Internal agency/office notifications

- Who from USDA is responsible for notifying USDA employees’ emergency contacts if they are injured or killed during an incident?

- At what point does USDA activate the Employee Assistance Program (EAP) to provide on-site EAP services during or after a traumatic incident?

- Should an incident communications plan be developed to manage national media interest?

- What are the financial considerations for the incident?
  - Funding sources
  - Supplemental funding to support response activities

- What are the economic considerations for the incident?
  - Loss of services
  - Impact on U.S. agriculture and USDA stakeholders

- When to activate demobilization plan (i.e., phase down of response operations)?

- When to activate the USDA HQ reconstitution plan?

Additional USDA Staff Offices to Consult:
- Office of Communications
- Office of Operations
- Office of Procurement and Property Management
- Office of the General Counsel
- Office of the Chief Financial Officer
- Office of the Chief Economist
- Office of Human Resources Management
- Office of Budget and Program Analysis
- Executive Protective Operations
- Any additional USDA Agency/Staff Office, as appropriate

II. Continuity of Operations (COOP) Information:

The USDA continuity program provides a flexible approach to addressing continuity incidents that could disrupt operations at the HQ primary operating facility. The *USDA HQ COOP Plan*, in conjunction with the *USDA HQ Devolution Plan* and the *USDA HQ Reconstitution Plan*, ensures that USDA has identified the facilities, personnel, and resources necessary to safeguard the continued performance of Mission Essential Functions (MEFs) and Primary Mission Essential Functions (PMEFs) in support of the NEFs. To the extent possible, the Department maintains normal organization, roles, responsibilities, and
leadership authorities during a continuity incident. For planning considerations, and to ensure the smooth implementation of continuity operations, COOP related activities are organized into four phases:

**Readiness and Preparedness Phase**

USDA participates in the full spectrum of readiness and preparedness activities to ensure its personnel can continue performance of essential functions and reconstitution operations in an all-hazards environment. There are two key areas of readiness and preparedness activities.

*Organizational Preparedness:*

During the readiness and preparedness phase, USDA continuity planners develop and/or update continuity plans including the USDA HQ COOP Plan, the USDA HQ Devolution Plan, and the USDA HQ Reconstitution Plan. In addition, agency and staff office planners develop and/or update their agency or staff office COOP plans.

USDA HQ preparedness incorporates guidance from several key organizations into its COOP planning and response activities such as the COGCON alert system for organizations in the National Capital Region (NCR), the Department of Homeland Security (DHS) National Terrorism Advisory System (NTAS), Office of Personnel Management (OPM) guidance, and Federal Executive Board (FEB) postings.

USDA also incorporates human capital guidance from USDA’s Office of Human Resource Management (OHRM) when updating continuity and/or emergency plans. The designated OHRM Emergency Response Group (ERG) Senior Leadership member will provide OHRM guidance.

All designated USDA continuity personnel will be informed in writing of their COOP role. Continuity personnel will voluntarily accept, in writing, their designated continuity roles and responsibilities using the USDA Annual Continuity Certification form. Signed and completed, USDA Annual Continuity Certifications are submitted to the Chief, CPD.

The HQ COOP Test, Training, and Exercise (TT&E) program helps to ensure organizational continuity readiness and preparedness by testing and exercising continuity plans periodically to demonstrate viability and interoperability. Continuity plan gaps identified by a TT&E event are documented and forwarded to USDA continuity planners for resolution as part of the Corrective Action Program.

*Individual Preparedness:*

All USDA continuity personnel should take steps to prepare themselves and their families for emergencies and incidents that may cause the implementation or activation of continuity plans or procedures. In addition, continuity personnel should be prepared for incidents occurring during both duty and non-duty hours. General Annex A of the HQ COOP Plan – Personal and Family Preparedness contains templates and guidance for developing personal
and family preparedness plans. Continuity personnel should, at a minimum, address the following preparedness activities:

- Prepare for continuity deployment by developing a family emergency plan;
- Create an emergency supply kit containing sufficient supplies to sustain all family members, and pets for three days;
- Prepare and maintain a personal “drive-away kit” containing supplies needed to support immediate deployment from home or work; and
- Discuss what to do when disaster strikes.

USDA also uses its TT&E program to ensure employees are prepared to carry out their roles and responsibilities during a continuity incident. All USDA personnel are required to complete annual continuity awareness training. Continuity awareness training consists of live training sessions and briefings as well as computer-based training modules found on sites such as AgLearn or the Federal Emergency Management Agency (FEMA) Emergency Management Institute (EMI). The TT&E program delivers position specific and role based training to members of the ERG Senior Leadership, ERG Support, Devolution Emergency Response Group (DERG), and Reconstitution Team.

Implementation or Activation and Relocation Phase

*Implementation* is the performance of COOP preparedness measures that ensure a seamless transition to activation. Implementation activities are typically associated with changes in the COGCON level short of activation (i.e., COGCON levels 4-2, see “Implementation and Activation Process” below). It is assumed that implementation triggers are active triggers, which indicates that an authorized entity has directed the performance of the preparedness measures.

*Activation* is the ability to commence essential function performance or management from the Emergency Relocation Facility (ERF) or Devolution Site no later than 12 hours after notification of COGCON level 1. Activation triggers can be active or passive.

*Active triggers* are those where an authorized entity has directed the performance or management of essential functions from a continuity facility or via remote access.

*Passive triggers* are those triggers where activation is assumed based on the type or scale of the incident. Passive triggers tend to be associated with a without warning devolution activation.

**Implementation or Activation Process:**
The primary interagency and organizational mechanism for COOP implementation or activation is the COGCON system. The White House established the COGCON system for
federal Departments and Agencies to provide a flexible, scalable, and coordinated approach to continuity readiness capabilities. COGCON starts at the lowest level, COGCON 4, and increases to the highest level, COGCON 1. COGCON changes typically are executed in advance of a formal COOP activation. Incident type and scope may result in non-sequential level changes in advance of activation. USDA has identified specific readiness and preparedness actions for each COGCON level. Functional Annex II – USDA HQ COGCON Procedures aligns USDA activities to changes in the COGCON level. Note that while the COGCON system applies to all federal Departments and Agencies it is geographically focused on the NCR. The USDA HQ COOP Plan is implemented or activated by one of the following methods:

Presidential Implementation or Activation

The Executive Office of the President instructs, via the COGCON level, federal executive Departments and Agencies to implement or activate continuity plans based on an incident or threat that does or could affect the NCR. The FEMA Operations Center (FOC) sends out changes in the COGCON level to federal Departments and Agencies. The USDA Operations Center (OpsCenter) receives this information and distributes it to appropriate USDA senior leaders and continuity personnel.

Secretarial Implementation or Activation

The Secretary, Deputy Secretary, or a successor to the Secretary serving as the Acting Secretary, is authorized to implement or activate USDA HQ continuity plans based on an incident or threat specifically directed at the Department. Prior to implementation or activation, the Secretary, in coordination with OHSEC and other resources, will carefully consider the incident or threat and the appropriate response. The decision to implement or activate USDA HQ continuity plans and the corresponding actions are tailored to the specific situation. As the decision-making authority, the Secretary will be kept informed of the threat environment using all available means, including official government intelligence reports, national and local reporting channels, and news media. The Secretary and his or her advisors will evaluate all available information relating to:

- Direction and guidance from higher authorities
- The health and safety of personnel
- The ability to perform essential functions
- Changes in readiness or advisory levels
- Intelligence reports and strategic information
- The potential or actual effects on communication systems information systems, facilities, and other vital equipment
- The expected duration of the incident and its resulting impacts.

If implementation or activation is required, the Secretary will decide which plan to implement or activate. Implementation and activation activities will be consistent with the
appropriate COGCON level at the appropriate continuity site. The OpsCenter will notify the
FEMA Operations Center (FOC) and appropriate USDA continuity personnel.

Alert and Notification Procedures:
OpsCenter personnel monitor emergency advisory information sources such as COGCON,
National Terrorism Advisory System (NTAS), OPM, Federal Executive Board (FEB), and
Federal Government Response Stages for Pandemic Influenza for impacts to USDA. If an
incident interrupts USDA HQ operations or appears imminent, the Secretary will direct
communication of the organization’s operating and continuity status to management, staff,
and stakeholders.

Deployment Process:
In general, USDA HQ continuity personnel are responsible for their own transportation to the
ERF. Limited government vehicles are available for deployment. Transportation options
include the use of personally owned vehicles, pre-arranged alternate transportation methods,
or carpoools. Compensation for authorized travel expenses will occur through normal travel
reimbursement processes.

The Director, OHSEC, and the Secretary will assess the scale or type of incident to determine
anticipated travel time to the ERF. The Secretary may activate interim devolution to ensure
continued performance of essential functions while ERG members are in transit.

Devolution Process:
USDA HQ is prepared to transfer the performance or management of all essential functions
and responsibilities to the DERG located at the Devolution Site either as an interim measure
to allow for relocation of the ERG or as a sustained measure if the ERF is not operational.
The USDA HQ Devolution Plan contains specific procedures for devolution operations and
deployment. Interim devolution is cancelled once ERG members have arrived at the HQ
ERF, tested all communication capabilities, and assumed performance or management of
essential functions. The USDA HQ Devolution Site will remain in a standby posture,
monitoring continuity operations and ready to assume operations if necessary.

Non-Continuity Personnel:
During continuity plan activation, non-continuity personnel will receive instructions and
guidance from their supervisor, the OpsCenter, or other appropriate USDA entity. In the
absence of OPM guidance, the Assistant Secretary for Administration (ASA) or the Director,
OHRM will direct USDA non-continuity personnel in accordance with DR 4060-630-002 to
work from other specified safe locations, to telework as appropriate, or to use administrative
leave. Non-continuity personnel should check in with their supervisor daily or as otherwise
instructed.
Depending on the duration, scale, or type of incident, USDA continuity facilities may require supplemental or replacement personnel. USDA non-continuity employees may be requested to augment or replace continuity personnel during a continuity activation.

### Continuity Operations Phase

**Preparation of Continuity Facilities:** ERG Advance Team will deploy to the ERF upon notification that USDA may implement or activate the USDA HQ COOP Plan. Upon arrival, the ERG Advance Team and the Site Support Manager will prepare the ERF in accordance with the site support plan. Site Support Manager at the Devolution Site will prepare for continuity operations upon notification that USDA may implement or activate the USDA HQ Devolution Plan in accordance with the appropriate COGCON level.

**Initiating Operations:**
Upon activation of the COOP or devolution plan, the appropriate continuity facility will assume responsibility for ensuring the performance of USDA HQ essential functions. The USDA HQ Devolution Plan contains specific procedures for operations conducted at the Devolution Site.

**Personnel Accountability:** Each USDA agency and staff office must account for their personnel likely affected by the incident and report their status via the COOP Readiness Report, to the OpsCenter (opscenter@dm.usda.gov). Agencies and staff offices will maintain normal accountability standards for personnel not affected by the continuity incident unless additional information is necessary. Tools to account for personnel include, but are not limited to; call down telephone trees, 1-800 numbers, websites, or automated notification systems with receipt confirmation.

**Continuity Reporting:** During continuity operations, all agencies and staff offices will assess and report their continuity capabilities including operating location, personnel information, and ability to perform essential functions via the COOP Readiness Report. Agencies and staff offices will submit completed COOP Readiness Reports to the OpsCenter (opscenter@dm.usda.gov). The USDA ERG Support members will consolidate agency and staff office reports into a single departmental continuity dashboard and Situation Report (SITREP).

The Reconstitution Manager will report the status of affected facilities to leadership in accordance with the USDA HQ Reconstitution Plan.

ERG Support members will submit USDA’s Continuity Status Report (CSR) to FEMA and the OpsCenter will notify the FOC.

**Continuity Status Calls:** Operations at all USDA continuity facilities are coordinated through regular Continuity Status Calls. Continuity Status Calls provide a forum for ensuring a common operating picture, providing consistent executive direction, and discussing shared challenges. Upon activation of the USDA HQ COOP Plan, the ERG Support Coordinator or
Deputy ERG Support Coordinator will determine the time of the initial Continuity Status Call based on the ongoing situation and activities. The OpsCenter will send a notification message to the USDA COOP Points of Contact (POCs) as well as agency and staff office Site Support Managers requesting their participation on the call. The notification message will include the time for the call, the conference line number, and the participant code. Those units present at the HQ ERF may join the call in person.

Emergency Procurement: USDA HQ may need to acquire contract support, equipment, or supplies on an emergency basis to sustain continuity operations until normal operations resume. Appropriate members of the ERG Support, the DERG, or the Reconstitution Team can make emergency procurements.

Reconstitution Phase
Reconstitution involves assessing, salvaging, restoring, and/or recovering the USDA HQ primary operating facility(ies). Reconstitution efforts should commence within 24 hours of the start of Phase III: Continuity Operations assuming that the incident has stabilized or recurrence will not jeopardize USDA personnel. The Reconstitution Manager will manage and execute USDA HQ reconstitution in accordance with the USDA HQ Reconstitution Plan.

The USDA HQ Reconstitution Team, under the leadership of the Reconstitution Manager, will assess the status of all USDA HQ facilities located in the NCR. The Reconstitution Manager will then report the assessment findings to leadership and will provide an estimate of the time and resources required to restore these facilities or acquire new facilities if necessary. USDA leadership will make the final determination of whether new facilities should be acquired or if current facilities should be restored to support normal operations. The resumption of operations will include a phased return of personnel and transfer of essential functions to the new or reconstituted facilities.

III. Security Clearance Information

Departmental Regulation 4600-001 establishes policies and procedures for the efficient, effective, and consistent management of the personnel security clearance program within all agencies and staff offices of USDA.

This regulation applies to all USDA employees, as defined in Executive Order 12968 “Access to Classified Information,” (hereafter, E.O. 12968), and applicants for employment with USDA (referred to hereafter in this regulation as the Department), contractors, guest researchers, collaborators, advisory committee members, students, trainees, non-employee affiliates of the Department, and other persons designated by the Secretary of Agriculture who require access to classified national security information (hereafter, classified information).

USDA’s OHSEC, Personnel and Document Security Division (PDSD), is the sole entity within USDA that may grant access to classified information. No access shall be granted unless the person has a demonstrated foreseeable need for access to classified information to perform his or her official duties; the required background investigation has been completed and favorably adjudicated; and he or she has signed a classified information non-disclosure agreement. In exceptional circumstances, PDSD may grant temporary or “interim” security clearances, consistent with Government regulations and program needs.

OHSEC shall determine an individual is eligible for access to classified information only when the facts and circumstances indicate that access is clearly consistent with the national security interests of the United States. Any doubt shall be resolved in the favor of national security.

USDA shall afford fair, impartial, and equitable treatment to all USDA employees and applicants through consistent application of personnel security standards, criteria, and procedures as specified in applicable laws and regulations. The Department shall not use the denial of access to classified information as a substitute for appropriate adverse suitability determinations or disciplinary actions.

USDA agencies and staff offices have an affirmative responsibility to notify OHSEC of any information about any Departmental employee or individual associated with the Department that could adversely affect the individual’s initial or continued eligibility to access classified information. OHSEC shall be notified as soon as possible after the information becomes known.

Additional information on the process required for security clearance processing may be found in the attached slides.
IV. **Primary Points of Contact (with email and phone number)**

**Director:** Mr. Todd H. Repass, Jr.; todd.repass@dm.usda.gov; 202-720-2582

**Deputy Director:** Mr. Josh Bornstein; josh.bornstein@dm.usda.gov; 202-690-0822

**Associate Director:** Mr. Mike O’Connor; mike.oconnor@ocio.usda.gov; 202-205-3609

Note: All of these contacts may be reached 24/7 via the USDA Operations Center, 202-720-5711.
Includes:

USDA Federal Act Committee Act (FACA) Advisory Committees (Mission/Policy Area) = 25
U.S. Forest Service advisory committees = 25
U.S. Forest Service secure rural schools research advisory committees = 117
Agricultural Marketing and Promotion Boards = 24

For additional information on USDA’s FACA Advisory Committees, please access the FACA Database at [https://database.faca.gov/committee/committees.aspx?aid=171](https://database.faca.gov/committee/committees.aspx?aid=171). Although centrally supported by the General Service Administration’s (GSA) Committee Management Secretariat, the database represents a true "shared system" wherein each participating agency and individual committee manager has responsibility for providing accurate and timely information that may be used to assure that the system's wide array of users has access to data required by FACA. Under Agencies, the Department of Agriculture listing of advisory committees will provide each advisory committee’s charter documents, general committee information such as the Designed Federal Officer assigned to each committee, as well as committee meetings, members, reporting, recommendations, performance measures, costs, and committee history.

For the Agriculture Marketing Service (AMS), the Research and Promotion (R&P) Programs Board listing and information pertaining to each program may be found through the AMS website at [https://www.ams.usda.gov/rules-regulations/research-promotion](https://www.ams.usda.gov/rules-regulations/research-promotion). The R&P programs are authorized by Congress and are requested, funded, and driven by industry. The programs establish a framework to pool resources to develop new markets, strengthen existing markets, and conduct important research and promotion activities. AMS provides oversight, ensuring fiscal responsibility, program efficiency, and fair treatment of participating stakeholders.
Definitions:
**Statutory** (Congress Created) is non-discretionary establishment authority specifically mandated in law. **Authorized by Law** and **Agency Authority** are both discretionary establishment authorities, either pursuant to law, or by the decision of the agency head, respectively. **Presidential** means established by Executive order or other direction by the President, and is non-discretionary. Negotiated rulemaking ("Reg-Neg") committees and labor-management partnership committees (EO 12871) are considered Presidential. The authority is displayed based on decisions made when a committee was established.
Note: **Statutory Inactive** - Advisory Committees identified as Statutory but administratively inactive and can only be terminated by an authority/act of Congress

WHO WE ARE: OUR MISSION AREA

DM's mission is to provide management leadership to ensure that USDA’s administrative programs, policies, advice, and counsel meet the needs of USDA program organizations, consistent with laws and mandates. DM is also tasked to provide safe and efficient facilities and services to customers.

WHO WE ARE: OUR WORKFORCE

- OES 24 employees
- OHRM 130 employees
- OHSEC 65 employees
- OPPM 115 employees
- OSDBU 8 employees
- OCIO 998 employees
- OO 198 employees
- Office of the Assistant Secretary 9 employees

WHO WE SERVE: OUR CONSTITUENTS

DM is the central administrative management organization, serving all USDA employees.

KEY UPCOMING DECISIONS

South Building and GWCC Modernization

To address the many life safety and accessibility deficiencies as well as the failing operational systems, USDA has developed a strategy to modernize the South Building and George Washington Carver Center.

The project has an estimated cost of $776.15 million in today’s dollars and would take five years to complete.

BUDGET HIGHLIGHTS FY 2016

- Overall Budget Authority $659,789
- 24.2% Direct
- 0.4% Mandatory
- 68.5% Working Capital Fund
- 6.9% Reimbursements

FY 2016 Budget Authority
I. Organizational Overview

Organizational Chart

Departmental Management is a subcabinet level office led by the Assistant Secretary for Administration. The Office of the Assistant Secretary for Administration (OASA) is the immediate office for Departmental Management. OASA consists of the Assistant Secretary for Administration, two Deputy Assistant Secretaries for Administration, the OASA Chief of Staff, and the Senior Advisor to the Assistant Secretary for Administration as well as administrative support staff. Of the four leadership positions within OASA, three are political positions and one is career. The Deputy Assistant Secretary for Administration and administrative support staff are career positions for OASA.
Biographies for career and political staff in key leadership positions

Political:

Dr. Gregory L. Parham  
Assistant Secretary for Administration  
202-720-3291, Gregory.Parham@osec.usda.gov

Dr. Gregory L. Parham was appointed Assistant Secretary of Agriculture for Administration in June 2013. Prior to this appointment, he was designated Acting Assistant Secretary, and served as the Administrator of the U.S. Department of Agriculture's (USDA) Animal and Plant Health Inspection Service (APHIS).

Previously, Dr. Parham served as APHIS' Associate Administrator and as the Deputy Administrator for Marketing and Regulatory Programs - Business Services, after joining APHIS as the agency Chief Information Officer. He began his Federal career as an Epidemic Intelligence Service Officer with the Public Health Service at the Centers for Disease Control. He joined USDA in 1982, and has worked for several USDA agencies including: the Food Safety and Inspection Service, the Extension Service, the Cooperative State Research, Education and Extension Service, and the Office of the Chief Information Officer.

Dr. Parham holds a master’s degree from the Johns Hopkins University in administrative science and doctorate and bachelor degrees from The Ohio State University in veterinary medicine and microbiology

Yeshimebet Abebe  
Deputy Assistant Secretary for Administration  
202-720-3291, Yeshimebet.Abebe@osec.usda.gov

Yeshimebet Abebe serves as the Deputy Assistant Secretary in the Office of the Assistant Secretary for Administration effective May 16, 2016. Prior to her current role, she served as the Chief-of-Staff for Research, Education and Economics. She has also served as an Advisor to the Secretary for Special Projects, Special Assistant in the Office of the Under Secretary for Rural Development, and as a Special Assistant in the Rural Utilities Service.

Prior to her USDA service, Ms. Abebe practiced law and worked on the Barack Obama presidential campaign. Ms. Abebe holds a Bachelor of Science in Urban and Regional Studies from Cornell University, a Masters in International Law and the Settlement of Disputes from the United Nations Mandated University for Peace, and a Juris Doctor from the University Of Miami School Of Law.
Henry (Hank) Bennett, Director  
Office of Small and Disadvantaged Business Utilization  
202-720-7117, Henry.Bennett@dm.usda.gov

Hank Bennett was appointed as the U.S. Department of the Agriculture's Director of the Office of Small and Disadvantaged Business Utilization (OSDBU) in May of 2016.

As Director of OSDBU, Mr. Bennett is responsible for ensuring that the Department’s purchasing agencies engage small businesses - the "engines that drive the Nation’s economy" - so that USDA continues to be a leader, and one of the Federal government’s top performing departments in utilizing small and disadvantaged businesses.

Mr. Bennett has extensive experience working with a diverse range of small businesses. Prior to joining the USDA, Mr. Bennett was part of a team that started a community bank in Tulsa, Oklahoma. Among other roles, he served as the bank's Board Secretary, Community Reinvestment Act Officer, and a Senior Lender. Mr. Bennett developed and managed a large loan portfolio of which more than half of the loans were to women, minority, and veteran owned small businesses, non-profit organizations, and churches.

Mr. Bennett has also served at the Democratic National Committee, worked in several roles for Mayor Alvin Brown of Jacksonville, Florida, and served for several other Democratic legislators and organizations.

Janet Nuzum  
Director of Asian American and Pacific Islander Affairs  
202-260-8259, Janet.Nuzum@osec.usda.gov

Janet Nuzum currently serves as USDA’s Senior Advisor and Director of Asian American and Pacific Islander (AAPI) Affairs, a position she assumed in January 2016. In this role, Ms. Nuzum leads USDA’s engagement with Asian Americans and Pacific Islanders across the United States, and represents USDA on the White House Initiative on AAPIs.

Prior to her current position, Ms. Nuzum served as Associate Administrator of the Foreign Agricultural Service (FAS), overseeing the agency’s work on international agricultural trade. Ms. Nuzum’s career before USDA spanned three decades of public policy work, much of which was in the field of international trade policy and law. She has served as a Senate-confirmed Presidential appointee as Commissioner and Vice Chairman of the US International Trade Commission. Ms. Nuzum also worked on Capitol Hill in the U.S. House of Representatives on the committee staff of the House Ways and Means Committee and on the personal staff for two Members of Congress.

In addition to a Law degree from Georgetown University Law Center and a Bachelor’s degree in economics and government from Smith College, Ms. Nuzum has a graduate certificate in landscape design from The George Washington University and an executive education certificate
from the Harvard University Kennedy School of Government. Ms. Nuzum studied Japanese as an undergraduate student at Yale University and in Kyoto, Japan at Doshisha University.

**Elisabeth Reiter**  
**Senior Advisor to the Assistant Secretary for Administration**  
202-431-1034, [Liz.Reiter@osec.usda.gov](mailto:Liz.Reiter@osec.usda.gov)

Elisabeth Reiter currently serves as Senior Advisor to the Assistant Secretary for Administration. In this role, Ms. Reiter directs Secretary Vilsack's Signature Process Improvement initiative, working with each agency and staff office to successfully improve customer-facing business processes using Process Improvement tools. Previously, she served as Chief of Staff to the Under Secretary for Farm and Foreign Agricultural Services. Prior to government service, Reiter was Deputy Director of Advance for the Obama for America campaign in 2007-2008. Ms. Reiter worked previously on the successful campaigns of Virginia Governor Tim Kaine (D) in 2005 and Senator Jim Webb (D-VA) in 2006. Ms. Reiter also worked on Senator John Kerry's (D-MA) 2004 presidential bid. Reiter is a graduate of the University of Mary Washington in Fredericksburg, Virginia.

**Career:**

**Malcom Shorter**  
**Deputy Assistant Secretary for Administration**  
202-720-3291, [Malcom.Shorter@osec.usda.gov](mailto:Malcom.Shorter@osec.usda.gov)

Malcom A. Shorter has served as the Deputy Assistant Secretary for Administration since June 2013. He is an accomplished administrative and financial professional with combined expertise in government relations and operational management. Mr. Shorter retired from the United States Army in September 2003 after a distinguished military career of more than 20 years.

From January 2007 until February 2013, he served as the Democratic Staff Director for the House Committee on Veterans’ Affairs. He also served as the Director, Office of Budget, Finance and Administration, Office of the Special Trustee for American Indians, United States Department of the Interior (DOI) and as the Assistant Director for Programming and Budget, Office of Counternarcotics, United States Department of Homeland Security (DHS).

Mr. Shorter graduated from Rutgers University in 1981 with a Bachelor of Science Degree in Economics. He also holds a Master of Science Degree in Administration from Central Michigan University. His military education includes the Infantry Officer Career Course, the United States Army Command and General Staff College, and the Brookings Institute Congressional Fellowship Program.
United States Department of Agriculture
2016 Presidential Transition
Departmental Management Mission Area (DM)

Roberta Jeanquart
Director, Office of Human Resources Management and Chief Human Capital Officer
202-690-2994, bobbi.jeanquart@dm.usda.gov

Roberta “Bobbi” Jeanquart serves as Director of the Office of Human Resources Management and the Chief Human Capital Officer for USDA. She provides vision and leadership to USDA-wide human resources programs, including human resources policy, employee and labor relations, recruitment and diversity, and workforce and succession planning. In addition, she serves as the USDA representative to the Chief Human Capital Officers Council. Ms. Jeanquart was also named by the Deputy Secretary to serve as USDA’s Senior Accountable Official for implementation of the Executive Order on Improving the Senior Executive Service and also was appointed to serve on the People and Culture Workgroup that helped develop the President’s Management Agency. Ms. Jeanquart has served in a number of leadership positions since joining USDA in 2009, including Deputy Assistant Secretary for Congressional Relations and Chief of Staff for Departmental Management. She is a graduate of USDA’s Senior Executive Service Candidate Development Program. Ms. Jeanquart has 11 years’ experience working on Capitol Hill serving as an associate staff to the House Agriculture Appropriations Subcommittee. She also served for 10 years as the executive director of the National Association of Resource Conservation and Development Councils a national non-profit organization. Ms. Jeanquart is a native of Wisconsin, and holds a bachelor of arts in political science from Marquette University. Ms Jeanquart completed her graduate studies in comparative politics at the University of Toledo.

Jonathan Alboum
Chief Information Officer
202-720-8833, Jonathan.Alboum@ocio.usda.gov

Jonathan Alboum has served as the U.S. Department of Agriculture’s Chief Information Officer (CIO) since June 2015. In this role, Alboum works with stakeholders across USDA’s 17 component agencies and throughout government to formulate Information Technology (IT) strategies, and to develop policies that support IT budget formulation and execution, portfolio management, governance, IT operations, and information security.

Prior to his appointment as CIO, Mr. Alboum held several leadership positions at the USDA and the General Services Administration (GSA). He most recently served as the Program Executive for USDA's Modernize and Innovate the Delivery of Agriculture Services initiative, where he provided executive leadership for a $400+ million SAP implementation that gives farmers and ranchers the flexibility to update customer information at any Farm Service Administration (FSA) county office, enables them to more efficiently manage multiple customer records, reduces improper payments, and provides program eligibility information through a single view. Before that, Mr. Alboum served at GSA as the Associate CIO for Enterprise Governance and Planning. Mr. Alboum began his Federal government career at the USDA Food and Nutrition Service (FNS), where he served as the Deputy CIO and the CIO.
Mr. Alboum earned a MS in the Management of Information Technology from the University of Virginia's McIntire School of Commerce and a BS in Systems Engineering from the University of Virginia's School of Engineering and Applied Science.

Jean Daniel, Director  
Office of the Executive Secretariat  
202-720-6630, Jean.Daniel@osec.usda.gov

Office of the Executive Secretariat Director Jean Daniel has over 17 years of leadership and management experience in USDA. During her tenure with the Department, she served as Public Affairs Director for the Food and Nutrition Service, Special Assistant to the Food, Nutrition, and Consumer Services Under Secretary, Senior Advisor to the Deputy Administrator for Management, Director of Change Management and Organizational Engagement, and Acting Deputy Administrator for Management.

Todd H. Repass, Jr.  
Director, Office of Homeland Security and Emergency Coordination  
202-720-0272, Todd.Repass@dm.usda.gov

Todd H. Repass, Jr. serves as the Director of USDA's Office of Homeland Security and Emergency Coordination. He has served as the Director since January 2010. Mr. Repass is responsible for leading Department-wide efforts and initiatives for USDA physical security, radiation safety, emergency programs, personnel and document security, preparedness programs and policies, and Government continuity operations. In this role, Mr. Repass serves as the USDA Security Officer and Intelligence Officer.

Previously, Mr. Repass has held multiple program management, acquisition, environmental, and logistical positions throughout his twenty-five year career. Mr. Repass also worked for the U.S. Department of Defense.

Mr. Repass earned his degree in Business/Accounting from Saint Andrews College in 1989. He is married with four children.

Duane Williams  
Director of Operations  
202-720-3937, Duane.williams1@dm.usda.gov

Duane Williams currently serves as the Director for the Office of Operations in Departmental Management. Prior to accepting that position, Duane served as the Deputy Director for the Office of Operations. Prior to his appointment to the Office of Operations, he served as the Deputy Director of Human Resources for Rural Development Agency. Mr. Williams started his career with the Agricultural Marketing Service (AMS) 29 years ago as a Marketing Specialist in the Perishable Agricultural Commodities Act Branch, a regulatory program in AMS. During his time in AMS, he held multiple leadership and management positions.
Mr. Williams is a 1986 graduate of North Carolina Agricultural and Technical State University, where he earned his Bachelor of Science degree in Economics with a concentration in Transportation and Logistics. He is also a graduate of USDA’s Senior Executive Service Candidate Development Program, administered through American University’s Key Leadership Program.

Lisa M. Wilusz, Director
Office of Procurement and Property Management
202-720-9448, Lisa.Wilusz@dm.usda.gov

Lisa M. Wilusz serves as Senior Procurement Executive and Director for U.S. Department of Agriculture’s Office of Procurement and Property Management. Ms. Wilusz has over 20 years’ experience with the Federal government. She began her Federal career in 1995 as a contract specialist with USDA’s Food and Nutrition Service Agency, and worked as a procurement analyst supporting U.S. Department of Transportation’s Research and Special Programs Administration. Additionally, Ms. Wilusz has extensive experience managing enterprise level IT projects.

As a Presidential appointee, Ms. Wilusz serves as Vice Chair for the Federal AbilityOne Commission. The AbilityOne Commission oversees a $3 billion procurement program that employs more than 45,000 disabled Americans who supply services and goods to support Federal programs. Finally, Ms. Wilusz oversees the Federal BioPreferred Program, which encourages the development and use of biobased products in Federal and private sectors.

Overview of Agency Programs and Operations

Departmental Management (DM) is USDA's central administrative management organization. DM provides support to policy officials of the Department, and overall direction and coordination for the administrative programs and services of USDA. In addition, Departmental Management manages the Headquarters Complex and provides direct customer service to Washington, D.C. employees.

DM's mission is to provide management leadership by ensuring that USDA administrative programs, policies, advice, and counsel meet the needs of USDA program organizations, while complying with laws and mandates. DM is also tasked to provide safe and efficient facilities and services to customers.

DM includes seven offices led by Office Directors. The Office Directors report directly to the Assistant Secretary for Administration.

Office of the Chief Information Officer

The Office of the Chief Information Officer (OCIO) is charged with improving management, capital investment, and oversight of the government’s IT resources.
OCIO conducts planning, education, management, analysis, and governance of USDA’s annual IT investment portfolio, which in FY2016 was comprised of 32 major IT investments and 172 non-major IT investments. OCIO partners with USDA component agencies to create business relationships that support effective IT portfolio management processes and a strategic decision-making environment.

**Cyber Policy and Oversight**
The Office of Cyber Policy and Oversight provides leadership on IT security policy development, security oversight, risk management, information security training and awareness, and information security intern recruiting.

**Enterprise Network Services**
Enterprise Network Services provides oversight in the planning, operation, and management of USDA telecommunications network.

**National Information Technology Center**
The National Information Technology Center provides innovative, cost effective, and secure information technology solutions to government agencies.

**International Technology Services**
The International Technology Services program provides comprehensive, fee-for-service information technology, associated operations, security, and technical support services to end users.

**Security Operations Center**
The Agriculture Security Operations Center monitors, collects, and analyzes key data to identify patterns that indicate exploitation of vulnerabilities, intrusions, and malicious activities.

**Enterprise Applications Services**
Enterprise Applications Services manages a variety of enterprise applications services, development efforts, and integration projects, including Innovations and Emerging Technologies, Applications Engineering, and Applications Solutions, Identity, Credentials and Access Management, and Workforce Development Solutions.

**Office of the Executive Secretariat**
The Office of the Executive Secretariat (OES) manages the correspondence, documents, and records of the Secretary of Agriculture. OES is a valuable resource not just for the Secretary and immediate staff, but for the whole Department.

**Correspondence management**
OES ensures that all USDA officials are included in the process of drafting documents for the Secretary through a managed system of reviews and clearances. OES then works with other agencies to respond in an appropriate and timely manner. Additionally, OES ensures that Federal Register notices, memorandums, reports, and all other documents prepared for the
Secretary are fully vetted and prepared correctly for signature.

Maintenance of official documents
OES collects and maintains the official records of the Office of the Secretary of Agriculture.

Office of Homeland Security and Emergency Coordination

The Office of Homeland Security and Emergency Coordination (OHSEC) leads the Department’s security, preparedness, and response efforts through training, coordination, and the development and execution of policies and procedures to ensure employees and stakeholders are prepared to support the entire USDA mission.

Emergency Programs Division
The Emergency Programs Division serves as a focal point for emergency management and coordination of natural or man-made disasters within the scope of the USDA mission.

Personnel and Document Security Division
The Personnel and Document Security Division processes and adjudicates investigations for National Security and Public Trust positions at USDA.

Physical Security Division
The Physical Security Division provides physical security policy, oversight, review, and advice to the 17 USDA Agencies and 12 staff offices.

Radiation Safety Division
The Radiation Safety Division maintains safe use of radiation sources in USDA and coordinates USDA’s Radiological Emergency Response to national incidents.

Resilience and Preparedness Division
The Resilience and Preparedness Division develops, implements, and maintains emergency preparedness, emergency response, and continuity policies, plans, and procedures for the Department.

Office of Human Resources Management

The Office of Human Resources Management (OHRM) provides direction and leadership in formulating and issuing Departmental policy relating to personnel management, including recruitment and employment, employee and labor relations, compensation and performance management, payroll/personnel systems, and personnel management evaluations. OHRM has assisted the Assistant Secretary of Administration in implementing the Strategic Management of Human Capital Initiative under the President’s Management Agenda (PMA) and audits agency human capital activities.

Virtual University
This program establishes policy and provides oversight, and leadership for USDA employee
development and training in alignment of human capital goals.

Diversity, Recruitment, and Work/Life Division
The Diversity, Recruitment, and Work/Life Division provides Departmental policy guidance, oversight and leadership for the USDA Disability, Special Emphasis, Recruitment, Veterans Hiring and Work/Life programs.

Executive Resources Management Division
The Executive Resources Management Division is the centralized entity that sets policy, and provides guidance and support for USDA executive level employees, which include members of the Senior Executive Service (SES), Senior Level (SL), Scientific and Professional (ST), and political appointed employees.

Human Resources (HR) Policy Division
The Human Resources (HR) Policy Division sets policy and administers human resources policy related to classification, employment, compensation and leave, benefits, performance management, recognition and awards, and Departmental human resources directives.

Strategic Human Resources Planning and Accountability
The Strategic Human Resources Planning and Accountability Division directs implementation of the Human Capital Assessment and Accountability Framework of Title 5, Code of Federal Regulation (CFR), Part 250, which provides a systematic means for USDA to plan, implement, and evaluate performance outcomes on all aspects of human capital management policies, programs, and activities in support of the USDA Strategic Plan and the Secretary’s priorities.

Equal Opportunity Accountability Division
The Equal Opportunity Accountability Division is responsible for setting USDA policy and guidance related to equal opportunity accountability programs and initiatives.

Employee and Labor Relations
The Employee and Labor Relations Division develops, maintains, and implements Departmental initiatives related to labor and employee relations, including policies on labor-management relations, grievances, employee conduct, unacceptable performance, discipline, adverse actions, drug testing program management, employee assistance program management, workplace violence prevention program management, employee welfare and recreation associations, associations of management officials and/or supervisors, and other organizations.

Human Resources Operations Division
The Human Resources Operations Division provides services and technical advice in the areas of classification and position management, staffing, placement and recruitment, pay and compensation, payroll and processing, performance management, employee benefits, awards and recognition, employee and labor relations, maintenance of employee files and records, information systems, and personnel security. This division also oversees payroll processing and pay quality assurance efforts.
Office of Operations

The Office of Operations (OO) provides overall direction, leadership, coordination, and guidance in activities relating to facilities management, engineering and architecture, internal energy conservation, recycling, and mail and copier management programs. OO is also responsible for managing, operating, maintaining, repairing, and improving the USDA’s Headquarters’ complex as well as the George Washington Carver Center in Beltsville, Maryland.

OO provides a diverse array of support activities including: facilities operations and maintenance, engineering, architecture, design and construction oversight, space and asset management, internal energy conservation, recycling, sustainable practices, physical and technical security, parking management, executive driver services, HSPD-12 badging, occupational safety and health, occupant emergency management, accessible technology, reasonable accommodation, interpreting services, concessions/food service and child development center oversight. OO also provides centralized business services including: mail, courier, copier and duplication, general supply/equipment, excess personal property, forms and publication distribution, and warehouse services. The office also is responsible for providing executive support services to the Office of the Secretary and for the management and oversight of the USDA Visitor’s Center, which provides education and outreach to employees and the public.

Office of Procurement and Property Management

The Office of Procurement and Property Management (OPPM) provides policy, advice, and coordination for acquisitions and procurements, and management of Federal property. OPPM led the Department’s efforts in the Real Property PMA initiative. OPPM also provides oversight and policy on transportation, supplies, motor vehicles, and aircraft.

Property Management

The OPPM property management division manages leasing for the USDA and assists USDA agencies in disposing of excess buildings and structures. In addition, OPPM manages the Department’s alternative fuel use target set by Executive Order 13423.

BioPreferred

OPPM oversees the BioPreferred voluntary labeling program to increase the purchase of biobased products in the commercial marketplace. OPPM also helps to promote sustainable Federal procurement through use of the sixty-four biobased product categories.

Office of Small & Disadvantaged Business Utilization

The Office of Small & Disadvantaged Business Utilization (OSDBU) provides policy and leadership in fostering the use of small, disadvantaged, and women-owned businesses as Federal contractors. OSDBU works closely with USDA’s contracting offices to develop a comprehensive set of policies that strategically align oversight and accountability with a proactive outreach and
United States Department of Agriculture
2016 Presidential Transition
Departmental Management Mission Area (DM)

small business assistance program across USDA’s large decentralized mission area. These policies position USDA to sustain its small business accomplishments and to support and carry out the Department’s small business goals.

**Key Initiatives:**

- DM is leading a Department-wide process to review and evaluate administrative service delivery and to identify areas of improvement that would create efficiencies and improve service provided. This process, called the Administrative Solutions Project (ASP), is intended to streamline operations, eliminate or minimize redundant activities, identify process improvements, and improve customer service for program agencies and offices. The ASP is a core component of the USDA Blueprint for Stronger Service, and is focused on the functional areas of Civil Rights, Information Technology, Human Resources, Finance/Budget, Homeland Security, Procurement, and Property Management.

- DM also leads USDA’s engagement with the Asian American and Pacific Islander community and the White House Initiative on AAPIs (WHIAAPI). The focus of this portfolio, consistent with that of WHIAAPI, is to improve AAPIs’ understanding of, access to, and participation in federal (USDA) programs and services in which they may be underserved. The mission is one that cuts across the work of all USDA agencies and departmental offices, although some agencies have a larger role than others.

- Presidential Memorandum "Improving the Federal Recruitment and Hiring Process" dated May 11, 2010, established hiring reform initiatives to address major, long standing impediments to recruiting and hiring the best and the brightest into the Federal civilian workforce. Hiring Reform builds on the collaboration between OPM and Agencies to streamline the hiring process and recruit top talent, especially for mission-critical jobs. The President's initiative provides for a vigorous Government-wide recruiting effort, makes it easier for Americans to apply for Federal jobs, raises the bar on candidate quality, and provides a commonsense approach to the overall hiring process through clear objectives and detailed guidance. These steps are taken with rigorous adherence to, and respect for, the merit system principles upon which the civil service is grounded. USDA has also instituted additional hiring requirements for USDA organizations to ensure continuing progress towards transforming the hiring process. The requirements of the Presidential memorandum includes:
  1. Eliminate written essay-style questions (KSAs) at the initial stage of the application process; 2. Allow individuals to apply with resume and cover letter; 3. Use category rating; 4. Hiring manager accountability and involvement; 5. Improve the quality and speed of hiring; 6. Notify applicants about their status
In addition, within USDA have adopted best practices for hiring under an initiative called Hiring Excellence. These best practices include:

- Focus on improving our 80-day hiring timeline goal
- All hiring managers must complete the Hiring Matters: Hiring Managers Making the Hiring Process Work training in AgLearn;
- Hiring managers must consult their Human Capital Plans prior to initiating the hiring process;
- For every recruit action, there must be a Mandatory Pre-Hiring Consultation between a hiring manager and a Human Resources (HR) specialist that includes, at a minimum, a review of the position description, job analysis, and crediting plan;
- Review hiring flexibilities prior to advertising a vacancy;
- Advertise vacancies either through Delegated Examining (DE)/Demo or Merit Promotion, but not both — subject, of course, to your labor agreements;
- Vacancy announcements should be open between five to ten days;
- Limit the number of applications for those occupations you historically receive a high volume of applications;
- Continue to provide additional training to HR staff to address competency gaps and take appropriate steps to improve the overall engagement of our HR employees;
- For each stage of the hiring process, identify where there are issues to be resolved and, where appropriate, reengineer those processes;
- Extensions to certificates must not be routinely granted; and
- Hiring Managers must complete Office of Personnel Management OPM hiring manager survey.
Budget and Staffing Summary

- Approximately 20% of Office of Operations, Office of Procurement and Property Management, and the Office of Human Resources Management are eligible to retire within the next year
- OPPM has 1 key position it anticipates becoming vacant within the next 90 days
- OHRM has 3 key positions it anticipates becoming vacant within the next 90 days

OSDBU ………………………

|                | 1566 | 1607 | 1661 | 1654 | 1681 | 1661 | 1656 | 1694 |

15
II. **Top Issues/Hot Topics**

**Timeline**

**January**
- Finalize bring your own device program (OCIO)
- Determine Scope and implementation for security training for USDA workforce (OHSEC)

**February**
- Determine whether to maintain Executive Order 13522, Creating Labor-Management Forums To Improve Delivery of Government Services, and if so, whether to develop different success metrics, to continue with labor-management forums, annual labor relations climate assessment surveys, or to develop alternate methods/procedures for administering the Pre-Decisional Involvement process (OHRM)

**March**
- Obtain eBoard and GSA approval to establish NITC data center as Federal shared service provider (OCIO)
- The Biennial Allocation Request and justifications to support the allocation of new SES, SL, and ST slots is due to OPM (OHRM)
- Nominations for Presidential Rank Awards are due to OPM (OHRM)
- Executive Order 13693 “Planning for Federal Sustainability in the Next Decade” which requires vehicle petroleum reduction by 4% by the end of Fiscal Year 2017 and that all new vehicles employ telematics (OPPM)

**April**
- Certification renewal for USDA’s SL/ST performance system is due to OPM (OHRM)
- FITARA self-assessment plan, updated common baseline, and FITARA IT management maturity model verification due to OMB (OCIO)
- Eagle Horizon Exercise (OHSEC)

**May**
- USDA Enterprise Roadmap Update due (OCIO)
- USDA IT Asset Inventory Submission due (OCIO)
- Park Center Lease Expiration (OO)

**June**
- Implement new customer facing services, including eVPN2, Managed Print Services 2, and MS 0365 upgrades (OCIO)
- An approved compensation plan for the SES is due to USDA Executives by June 30, 2017. Any new or revised Departmental initiatives will need to be incorporated into executive performance plans as soon as possible, but no later than June 30, 2017, if executives are expected to be held accountable and rated on them during the Fiscal Year 2017 performance cycle (OHRM)

**Other**
- TBD- New Chairperson for the Executive Review Board needs to be appointed within 30 calendar days after the appointment of a new Secretary (OHRM)
United States Department of Agriculture  
2016 Presidential Transition  
Departmental Management Mission Area (DM)

- TBD- As soon as practical after the appointment of a new Secretary, decisions will need to be made as to whether or not to approve any new SES appointments or actions that have been suspended (OHRM)

Mission Area Issues

Office of the Chief Information Officer

FEDERAL INFORMATION TECHNOLOGY ACQUISITION REFORM ACT (FITARA)

The Federal Information Technology Acquisition Reform Act (FITARA) was enacted on December 19, 2014, and outlines specific requirements relating to the following:

- Federal Chief Information Officer authority enhancements
- Enhanced transparency and improved risk management in Information Technology (IT) investments
- Portfolio Reviews
- Expansion of training and use of IT cadres
- Federal Data Center Consolidation Initiative (FDCCI), more recently known as the Data Center Optimization Initiative (DCOI)
- Maximizing the benefit of the Federal Strategic Sourcing Initiative (SSI)
- Government-wide software purchasing programs

In order to provide more specific guidance for the implementation of FITARA, the Office of Management and Budget Memorandum M-15-14, Management and Oversight of Federal Information Technology, was issued. The objectives of M-15-14 state that covered agencies shall conduct a self-assessment that identifies current conformity with or gaps in conformity with a Common Baseline and Implementation Plan (herein known as the Common Baseline), and articulate an implementation plan describing the changes it will make to ensure that all Common Baseline and milestone and action table responsibilities are either implemented or provisioned for by December 31, 2015.

This self-assessment shall include a discussion of how Agency senior leaders and program leaders will work in partnership to facilitate the successful implementation of the Common Baseline and milestone and action table and how the Agency CIO will be enabled as a strategic partner integrated in shaping Agency strategies, budgets, and operations.

- In response to the M-15-14 mandate, the United States Department of Agriculture (USDA) developed the United States Department of Agriculture Federal Information Technology Acquisition Reform Act Common Baseline and Implementation Plan, dated November 14, 2015, which reinforces the role and authority of USDA’s CIO in establishing an inclusive, integrated governance process that manages IT as a strategic resource.
In addition, the USDA established the *Actions and Milestones Table*, which captures the progression of tasks related to the success of the common baseline. The USDA *Common Baseline* establishes a framework for USDA to implement the specific authorities that FITARA gives to the *Chief Financial Officer (CFO) Act* Agency CIOs, and builds upon the responsibilities outlined in the *Clinger-Cohen Act of 1996*. The *Common Baseline* speaks to the roles and responsibilities of other applicable senior Department officials including the CFO, the Chief Acquisition Officer (CAO), Senior Procurement Executive (SPE), the Chief Human Capital Officer (CHCO), and the Director, Office of Budget and Program Analysis (OBPA) (the USDA CIO, CFO, CAO, SPE, CHCO and OBPA Director, as a group, shall herein be identified as the CXOs).

USDA also developed FITARA scorecards in the following domains:

1. IT Security
2. IT Investment Health
3. FAC P/PM Program Manager Certification
4. Data Center Consolidation/Optimization
5. Privacy Compliance
6. Acquisition Approval Request Compliance
7. Open Data Compliance
8. Section 508 Compliance

The Scorecards are designed to evaluate and score the performance of the Agencies and Staff Offices in order to delegate authority down to the component CIOs. The USDA CIO will use these scorecards as part of his assignment plan strategy, providing empirical data to assist in assigning responsibility down to the component CIOs.

**CONTINUOUS DIAGNOSTICS AND MITIGATION (CDM)**

The Department of Homeland Security’s Continuous Diagnostics and Mitigation (CDM) Program provides federal departments and agencies with capabilities and tools that identify cybersecurity risks on an ongoing basis, prioritize these risks based upon potential impacts, and enable cybersecurity personnel to mitigate the most significant problems first. Congress established the CDM program to provide adequate, risk-based, and cost-effective cybersecurity and more efficiently allocate cybersecurity resources.

CDM is being implemented in three phases, with a fourth phase anticipated. The CDM Phases, objectives, and tools/capabilities are shown in the table below. USDA is working with DHS to implement Phase 1, and initiating the planning for Phase 2.
CDM Phases | Objective | Tools / Capabilities |
--- | --- | --- |
1 | What is on the Network? | Hardware Asset Management, Software Asset Management, Configuration Settings Management, Vulnerability Management, CDM Cybersecurity Dashboard |
2 | Who is on the Network? | Access Control Management, Security-Related Behavior Management, Credentials and Authentication Management, Privileges |
3 | What is happening on the Network? | Respond to and Mitigate Events, Audit and Monitoring Management, Risk Management, Boundary Protection |

**Key Details**

- USDA fully participated in the CDM program, and has volunteered as early adopters in Phase Two.
- We are currently implementing the capabilities of Phase One:
  - Hardware Asset Management (HWAM) solution, ForeScout, is 50% deployed. This is increasing Cybersecurity staff’s knowledge of systems on USDA networks and directly reducing exploitable cyber-attack surface by providing information about unauthorized or unmanaged devices.
  - Software Asset Management (SWAM) solution, RES ONE, is currently 15% deployed, enabling access and control of the services and technologies employees need while reducing the risk of data breaches and cyber-attacks.
  - Dashboard and Security Event Integration Management (SEIM), SPLUNK, and RSA Archer will be implemented by June of 2017. Upon implementation, USDA FISMA reporting will be streamlined through partial automation, with less human error.
- USDA is exploring options for funding out-year operations and maintenance costs after DHS funding ends after FY17.

**Office of Homeland Security and Emergency Coordination**

OHSEC is preparing to update the USDA Radiological Emergency Response Plan to conform to current FEMA guidelines for Federal Agency emergency response. OHSEC is also building a strong counterintelligence program to protect billions of dollars in research and development, science and technology, information technologies, critical infrastructures, employee information, and other sensitive information. Once risks are fully identified, the program will provide education and training to the Department’s employees.
Office of Human Resources Management

Secretary’s Executive Resources Board
Each Federal agency is required by 5 U.S.C. § 3393(b) to establish one or more Executive Resources Boards (ERB’s), the members of which shall be appointed by the Secretary. The ERB conducts the merit staffing process for career entry into the Senior Executive Service (SES) and entrants into the Presidential Management Fellow Program. Other functions relating to the management of the Department’s executive resources, as delegated by the Secretary, include the oversight of HR matters related to SES and Senior Level (SL) and Scientific or Professional (ST) employees. Departmental Regulation DR-1061-003, dated November 4, 2014, establishes the policy for USDA’s ERB. The ERB is comprised of a Chairperson, a Vice Chairperson, and a mix of SES and SL/ST employees representing their Mission Areas, Agencies, and Staff Offices. The ERB meets monthly to discuss executive resources policies and procedures impacting SES and SL/ST employees and makes recommendations to the Secretary. **A new Chairperson will need to be appointed by the incoming Secretary.** The current Vice Chairperson is a career executive and will continue the business of the Board until a new Chairperson is appointed. The current Chair is Acting Deputy Secretary Scuse.

2018/2019 Biennial Allocation Process
Pursuant to 5 U.S.C. § 3133(a), Federal agencies are required – during each even-numbered calendar year (CY), to examine their needs for SES positions for each of the two fiscal years beginning after such calendar year, and to submit to OPM a written request for each of such fiscal years. Although not expressly required by statute, Federal agencies conduct the same examination and submit a similar written request to OPM for their positions in the SL and ST systems. OPM allocates SES, SL, and ST positions to Federal Departments and in accordance with these reviews. USDA’s current allocations are:

- 399 SES slots
- 42 SL slots
- 49 ST slots

Through this process, called the biennial allocation process, OPM reviews organizational missions, plans, and structures to assess the extent to which executive resources are being used in an efficient manner. OPM conducts this process as a part of the overall strategic management of the Government’s executive resources pool. The biennial allocation process requires OHRM, Executive Resources Management Division to conduct an assessment of all USDA executive resources needs and allows Mission Areas, Agencies, and Staff Offices to submit requests for new SES, SL, and ST allocations as appropriate, based upon changing or shifting mission critical work. As part of this process, Mission Areas, Agencies, and Staff Offices are also required to review the SES position designations (career reserved or general, career, and non-career) for all encumbered and vacant positions.

The Executive Resources Management Division currently is in the process of meeting with each Mission Area, Agency, and Staff Office to determine their executive needs for the OPM data call
that is anticipated in December of 2016 for the 2018/2019 biennial. A preliminary response to OPM on USDA’s anticipated needs will be due upon the receipt of the data call. A formal justification and accompanying documentation is required to be submitted in the first quarter of calendar year 2017 if USDA intends to request any additional executive allocations.

*Land Management Workforce Flexibility Act*
This Act (PL 114-47) was signed into law on August 7, 2015, and allows certain current and former land management agency employees who are serving or have served under a time-limited appointment to compete for any permanent position in the competitive service at a Land Management Agency, or any other agency, under “internal” merit promotion procedures. Land Management Agencies include:

- U.S. Forest Service, USDA
- Bureau of Land Management, DOI
- National Park Service, DOI
- Fish and Wildlife Service, DOI
- Bureau of Indian Affairs, DOI
- Bureau of Reclamation, DOI

OHRM has issued instructions to agencies to provide implementing instructions to servicing HR offices to ensure compliance with this Act.

Per Executive Order 13522, in order to evaluate the effectiveness of labor-management collaborations in improving government efficiency, the Labor Relations Branch is responsible for leading the efforts for conducting an annual USDA Labor-Management Climate Assessment Survey for all USDA agency-level labor-management forums to measure the labor-management relationship across the entire USDA. Determining barriers for building effective partnership efforts between labor and management within USDA continues to be a hot topic.

*Affordable Care Act and Casual Employees*
USDA’s Forest Service (FS) has the authority to hire on the spot certain emergency workers to cope with sudden and unexpected emergencies related to wildland firefighting responsibilities and other hazardous incidents. In 2015, FS hired 7,212 emergency workers who are termed “casual hires.” Most of the casual hires work a few days or a few weeks, and are hired from the local area where the fire is located. However, there are occasions where the employees work for extended periods during the fire season. On October 17, 2014, OPM issued a regulatory change to 5 CFR 890 that applied the requirements of the Affordable Care Act (ACA) to temporary employees who work full time for more than 90 days. We initially believed that this change did not apply to casual hires. After consultation with Office of Personnel Management and the USDA Office of the General Counsel, it was determined that health benefits coverage must be offered under the ACA to this group of casual hires if they work more than 130 hours in a month for three consecutive months. These casual hires are paid by the Department of the Interior (DOI), who also employ casual hires. USDA collaborated with DOI to ensure all qualifying
employees were offered coverage beginning in January 2016 and throughout the summer fire season.

**Office of Operations**

*South Building and George Washington Carver Center (GWCC) Modernization Project Strategy*

USDA has been working for over 25 years (beginning with the 1995 Modernization Project) with extremely limited funding to maintain and modernize the historic USDA Headquarters Complex. With mounting deferred maintenance, aging infrastructure, long-standing life safety issues (unabated hazardous materials, lack of critical fire safety systems, outdated electrical systems, etc.), and non-compliance with contemporary building and accessibility codes, the USDA Headquarters is the only agency headquarters in Washington, D.C. that has not been modernized. The business-as-usual model of requesting modernization funds from Congress has not provided a viable means for funding the over $140 million in deferred maintenance or the funding required to complete modernization.

To address the many life safety and accessibility deficiencies, as well as the failing operational systems, USDA has developed a strategy to complete modernization. The goals and objectives of the new modernization strategy are to correct the serious deficiencies with the South Building and to achieve operating cost reductions both by reducing the footprint through the elimination of all leases in the National Capital Region and by improving energy efficiency. While continuing to reduce USDA’s real property footprint is important through elimination of leased facilities, each day that the South Building remains without proper fire protection, which would be corrected through the installation of an automatic sprinkler system, the safety of all occupants and visitors is seriously compromised. Likewise, modernization will allow the Department to achieve energy reduction goals, which will lower present operating expenses.

The USDA OO is embarking on a new business model that will utilize a hybrid funding approach. USDA would combine five (5) funding mechanisms to overcome the limitations associated with one single approach. In today’s dollars, USDA requires $776.15 million to completely modernize the South Building and GWCC. Under the hybrid option, an additional $376 million in ESPC finance fees would need to be added to the cost. The five (5) funding options under the hybrid approach include:

1. The energy savings performance contract (ESPC) – a public-private partnership tool available through the Department of Energy (DOE) which utilizes third-party financing and guaranteed energy and operational efficiency savings to pay for high-value energy conservation measures over time.
2. Non-recurring Expense Fund (NEF) – Granted to USDA by Congress with the express intent of maintaining and using unobligated balances of expired discretionary funds for projects such as facilities infrastructure and capital acquisition.
3. Annual Appropriations (over the next 5 years) – $20 million annual appropriations needed over next 5 years will be used for project requirements that cannot be funded under the ESPC or where the NEF funding has not accumulated in sufficient amounts to meet current funding needs. This includes costs incurred for payments on GSA program loans for furniture (see below), transition expenses, information technology, visual and telecommunications equipment, increased security costs for protection of construction equipment, construction delays, etc.

4. Backfill from Agency Appropriations – As agencies move into the South Building and/or GWCC from leased space, there could be an opportunity to capture some or all of the funds used for lease payments to assist with modernization funding.

5. GSA Total Workplace Furniture & Information Technology Program (FIT) - GSA’s FIT Program will be used to fund all new furniture acquisition for the South Building, with an estimated cost of $69.4 million.

People’s Garden Site Improvements and Perimeter Security Plan

The People’s Garden Initiative began in 2009 as an effort to challenge USDA employees to create agriculturally productive gardens at the agency’s facilities and the inaugural People’s Garden is located at the Whitten Building. The initiative is named in honor of President Lincoln’s description of USDA as the “People's Department.”

USDA commissioned the People’s Garden Site Improvements and Perimeter Security project to expand the People’s Garden Initiative across its headquarters’ grounds with a focus on sustainability, landscape enhancement, and education. In addition, as the only federal office building on the National Mall which also houses a Cabinet level position, USDA required a perimeter security plan. The scope of the project included the expansion of the People’s Garden theme with sustainable practices site-wide, integration of low impact development practices site-wide including bio retention swales, permeable and pervious paving, soil cells for street trees and rain gardens, integration of Level IV Perimeter Security, and a reduction of on-site parking.

The People’s Garden site improvements and perimeter security is a multi-phase project that encompasses the entire grounds of the USDA Headquarters Complex. Following presentations, USDA received conceptual approval of the site development plans from the National Capital Planning Commission (NCPC) and the Commission of Fine Arts (CFA) in July 2014. Upon approval, Federal Agencies have a 4-year approval limit to begin construction or face a new requirement to obtain approval again. OO has requested funding in the FY2018 budget for this project.

The HQ People’s Garden is OO’s Garden and the USDA flagship demonstration garden that supports public engagement in support of the Agricultural Marketing Service nationwide People’s Garden initiative.
United States Department of Agriculture  
2016 Presidential Transition  
Departmental Management Mission Area (DM)

The HQ Perimeter Site Improvement and Security Plan is the plan for improving security and sustainability around HQ buildings by incorporating mandatory security protection elements into the sustainability features of the HQ grounds in support of Executive Orders 13693 and 13508. This plan is a product of cooperation between USDA, the National Capital Planning Commission, GSA, the DC State Historic Preservation Office, and the National Park Service. Site improvements under this plan are separate and apart from the larger USDA South Building and GWCC Modernization plan.

National Liberty Memorial
The National Liberty Memorial (Memorial) was authorized on January 2, 2013, by Section 2860 of Public Law 112-239. It allows the National Mall Liberty Fund D.C. (Fund) to establish a memorial on eligible Federal land to honor the more than 5,000 slaves and free black persons who served as soldiers and sailors or provided civilian assistance during the American Revolution. On September 26, 2014, P.L. 113-176 approved the establishment of the Memorial within Area I, the area comprising the central Monumental Core of the District of Columbia and its environs. Potential sites within Area I for the Memorial includes properties under the control of GSA and Department of the Interior. The three sites include: the Interior South Triangle (Virginia Avenue/19th Street), Freedom Plaza, and the west side of the Jamie L. Whittem Building (the preferred site of the Fund given its proximity to the Washington Monument, its location along 14th Street as a gateway into and out of the city, and the high volume of pedestrian traffic the site receives). The site also has a connection to the National Museum of African American History and Culture.

GSA, as the property owner has the overall lead responsibility for this project. However, USDA has and continues to be committed to working with our partners. The next step in the process is the development of a Memorandum of Understanding (MOU) between GSA, USDA, and the Fund to include: roles and responsibilities; information on design development, and a narrative that supports and articulates the role of African Americans in the Revolutionary War and its relationship to the Department.

Park Center Lease
The lease at the Food and Nutrition Service Building, Park Center in Alexandria, VA, expires 5/31/2017. The General Services Administration (GSA) is analyzing the six Final Proposal Requests (FPRs) received September 23rd. The current time frame for occupancy of the new facility is between June 1, 2017 and May 31, 2018. An extension of the Park Center lease will likely be required. General requirements for the replacement facility include: ISC Level III security requirements; the offered space must be contiguous and accommodated in no more than one building; must be within 2,640 walkable linear feet of an existing Metrorail station. As the liaison for space in the NCR, OO has assisted FNS and GSA with developing the Program of Requirements and other logistics; however, GSA has the lead on the leasing acquisition and award.
Office of Procurement and Property Management

- USDA Category Management Hardware – A Blanket Purchase Agreement catalog offering certified hardware products (workstations, laptops, tablets, servers) at pre-competitive prices.

- USDA Enterprise-wide Managed Print Services (MPS) – An Indefinite Delivery contract for a next generation USDA MPS that enhances the existing MPS within USDA to reduce the overall cost of producing images for an environmentally sustainable MPS solution.

- OMB Reduce the Footprint update is typically due in October of each year. The goal for FY2017 is to reduce the square footage of offices by 328,045 and warehouses by 28,016.

- Executive Order 13693 “Planning for Federal Sustainability in the Next Decade” which requires vehicle petroleum reduction by 4% by the end of Fiscal Year 2017 and that all new vehicles employ telematics.

- Improving lease management practices through the establishment of LASD procedures and quality assurance review process for lease delegation requests submitted to GSA.

United States Department of Agriculture
2016 Presidential Transition
Departmental Management Mission Area (DM)

Office of Homeland Security and Emergency Coordination

- Office of Inspector General (OIG) open audit:
  o 61701-0001-21- FY 2016 Agro-Terrorism Prevention, Detection, and Response

- Government Accountability Office (GAO) open audit:
  o GAO-16-797 – Federal Disaster Assistance - 441286

Office of Human Resources Management

- 2014 (GAO-14-288) GAO “U.S. Department of Agriculture: Workforce Decisions Need Better Linkage to Missions and Use of Leading Practices” [http://www.gao.gov/products/GAO-14-288](http://www.gao.gov/products/GAO-14-288). This report examines: (1) how the workforces of USDA’s service center agencies changed from fiscal year 2003 to fiscal year 2012, (2) the extent to which USDA’s policy on supervisory ratios aligned with OPM guidance in fiscal year 2012, and (3) the extent to which USDA’s service center agencies followed leading practices when closing offices and reducing staff in fiscal year 2012. GAO recommends, among other things, that USDA take actions to revise its supervisory ratios policy; amend its policy on organizational changes to follow leading practices; and require RD and FSA to document links between various incentives and reshaping of strategic goals. USDA generally agreed with GAO's findings but disagreed with one finding and recommendation on supervisory ratios.

  GAO was asked to review workforce planning for federal veterinarians. This report examines: (1) department-wide efforts USDA and HHS have made for their routine veterinarian workforces, (2) the extent to which USDA has identified the veterinarians needed for emergency response to an animal disease outbreak, and (3) the steps OPM and other federal agencies have taken to achieve the goals of the government-wide strategic plan for the veterinarian workforce. GAO reviewed USDA, HHS, and government-wide workforce plans, and interviewed relevant officials. GAO recommended that USDA assess and address veterinarian workforce needs for emergency response to an animal disease outbreak, and that OPM review agencies’ use of direct-hire authority for veterinarians and monitor and evaluate progress and obtain leadership support for achieving government-wide veterinary workforce goals. USDA partially agreed, noting that it has taken steps to assess its emergency needs.

Office of Procurement and Property Management

Procurement Policy

- **OIG - 03/25/2016** - OPPM's Oversight of Contractor Past Performance Reporting Requirements (PDF), (Report No. 89099-0001-12, Issued March 2016)

- **OIG - 04/28/2015** - Assessment of USDA's Contracting Officer's Representatives (PDF) (Report No. 50099-0002-12, Issued March 2015)
Procurement Systems

The following audits were conducted by the USDA OIG in the last four years in which the IAS program was subjected to review as part of other OPPM audits:

- **OIG - 50901-01-13** “Review of Contractor Payments”
- **OIG - 92501-01-12** “Review of Procurement Operations”
- **OIG - 89901-0001-13** “Review of USDA Contract Databases”

The following audit was conducted by the USDA OIG in the last four years on the CCSC program:

- **OIG - 50024-0001-13** “Review of the Department’s US Bank Purchase Card and Convenience Check Data”

Procurement Systems

- **OIG - 50099-001-12** “Review of Expenditures Made by the Office of the Assistant Secretary for Civil Rights” [July 15, 2015] Completed on June 30, 2016, except for Recommendation #8. The Procurement Operations Division is awaiting submission of the Unauthorized Commitment documents from the staff of the Assistant Secretary of Civil Rights on/about September 30, 2016
- **OIG - 50601-0002-21** “Hispanic and Women Farmers and Ranchers Claim Resolution Process” [March 10, 2016] Completion of Recommendations 1 and 2 is due on December 31, 2016, and March 31, 2017, respectively

Environmental Management
- The BioPreferred Program is currently responding to the GAO’s “Sustainable Chemistry Technology Assessment Review” (GAO Engagement Notification 100398).
- In 2015, HMMP was under a GAO audit: GAO-15-35 “Agencies Should Take Steps to Improve Information on USDA’s and Interior’s Potentially Contaminated Sites”.

Office of Small & Disadvantaged Business Utilization
In late May of 2016, GAO began an audit of USDA’s OSDBU at the request of the Chair of the House Committee on Small Business. Almost all other federal departments’ and agencies’
OSDBU’s are undergoing the same audit. While this audit is not a regular, recurring occurrence, it is certainly not unusual or unexpected. Similar audits were conducted by GAO in 1995, 2003, and 2011, all at the request of the Chair of the House Committee on Small Business, and all focusing on very similar issues and objectives. The objectives of the current audit are:

- Assess whether the OSDBU director reports to the head or deputy of the head of the agency as defined in the National Defense Authorization Act revisions; and

- Determine the functions conducted by the OSDBUs at selected federal agencies.

Based on previous audits, GAO anticipates concluding the audit, and returning the report sometime during the second or third quarter of calendar year 2017. In the interim, GAO communicates with USDA’s OSDBU office for any questions, requests for additional information, and any other item or action it needs to develop their report.

In previous audits, the GAO found that USDA was not in compliance with the section of the Small Business Act that requires the OSDBU Director to report directly to the Secretary or his designee. Instead, USDA had previously designated the Assistant Secretary for Administration as the OSDBU Director, who then delegated nearly all authority to the lower-ranking Director in the OSDBU office. That lower-ranking official would report to the ASA, who would in turn report to the Deputy Secretary.

At the entrance conference for the current audit USDA clarified that it has altered the reporting structure and responsibilities to comply with the requirements of the law. The OSDBU Director now has the full authority as described in the law, and reports directly to the Deputy Secretary. USDA also discussed the various roles and responsibilities of the OSDBU office, and how they implement the various laws, statutes, and regulations related to OSDBU.
WHAT WE DO: OUR MISSION

OCIO energizes the USDA mission by providing cloud computing strategies, data center hosting, application development, enterprise email, and wide-area network services to USDA component agencies. OCIO also has direct management responsibility for IT desktop and end-user services that support the Farm Service Agency, the Natural Resources Conservation Service, Rural Development, and Departmental Staff Offices. OCIO ensures the integrity, availability, and confidentiality of USDA data and systems through management of USDA’s cybersecurity program, and manages the IT capital planning and investment control review process to ensure efficient spending across the USDA IT portfolio.

WHO WE ARE: OUR WORKFORCE

OCIO employs 998 employees working in every state in the country and at major facilities in Washington, DC, Kansas City, MO, St. Louis, MO, and Fort Collins, CO, to support USDA program delivery.

WHO WE SERVE: OUR CONSTITUENTS

OCIO partners with USDA officials through the Executive IT Investment Review Board, with agency CIOs on the CIO Council, as well as with OMB and DHS to protect USDA’s data and enable efficient and effective program delivery.

KEY UPCOMING DECISIONS

OCIO and the USDA IT community have identified four key strategic priorities that require leadership awareness and decisions:

- Cybersecurity – Determine funding strategy for Continuous Diagnostics and Monitoring Program
- Modernize Networks – Develop Concept of Operations for one USDA network
- Cloud Strategy – Determine whether USDA’s NITC data center will become a Federal-wide shared service provider
- FITARA – Develop funding strategy for FITARA implementation

BUDGET HIGHLIGHTS FY 2016

Overall budget Authority is $485.164M

- Discretionary (Policy and Cyber Security) - $44.538M
- Other Reimbursements – $11.187M
- Working Capital Fund (National Information Technology Center, Enterprise Network Services, Client Technology Services, Administrative Support) - $429.439M
I. Organizational Overview

OCIO provides USDA agencies with IT policy guidance and oversight, data center, telecommunications operational support services, and end user support services. In line with the Clinger Cohen Act, policy, operational guidance, and oversight are provided in areas such as capital planning and investment control, cybersecurity, privacy, information technology architecture, telecommunications, information management and collection, and electronic government.

OCIO is leading USDA’s efforts to transform the Department’s delivery of information, programs, and services by using integrated services that simplify citizens’ interactions with their government. OCIO is designing the Department’s Enterprise Architecture to efficiently support USDA’s move toward consolidation and standardization. OCIO is strengthening USDA’s Computer Security Program to mitigate threats to USDA’s information and IT assets and to support the Department’s Homeland Security efforts. OCIO continues to facilitate the USDA IT capital planning and investment control review process by providing guidance and support to the Department’s Executive IT Investment Review Board, which approves all major technology investments to ensure that they efficiently and effectively support program delivery.

OCIO provides data center operations, application development, and wide-area network telecommunications services funded through the USDA Working Capital Fund and appropriations to all USDA agencies through the National Information Technology Center and the Enterprise Network Services with locations in Ft. Collins, Colorado; Kansas City, Missouri; and Washington, D.C. Direct ADP services are provided to the Office of the Secretary, Office of the General Counsel, Office of Communications, and Departmental Management.

OCIO also has direct management responsibility for IT desktop and end-user services through the Client Technology Services. This includes the consolidated IT activities for the Farm Service Agency, the Natural Resources Conservation Service, and Rural Development mission area.

The OCIO Headquarters is located in Washington, D.C. As of September 1, 2016, there were 998 full-time permanent employees funded by appropriated, reimbursed, and Working Capital Funds.

USDA’s FY2017 IT Portfolio consists of 32 major investments and 172 non-major investments totaling ~$3.2 Billion. From a security perspective, USDA has 597 operational systems. 172 of these systems contain personally identifiable information.
Agency’s Mission/Strategic Plan

- USDA IT Mission Statement: We serve the public by delivering the information and technology that energizes USDA’s mission.

- USDA IT Vision Statement: Business partners creating innovative solutions for food, farms, forests, and families.

- USDA IT Strategic Goals:
  - Safeguard public trust in USDA by securing systems
  - Strengthen foundational IT systems by modernizing USDA’s network
  - Accelerate the delivery of new services by adopting Cloud
  - Invest wisely in IT by leveraging FITARA (Federal Information Technology Acquisition Reform Act)

(The above strategic goals were developed in FY16 in collaboration with OCIO and CIOs across USDA through the USDA CIO Council. The language has changed from the IT Strategic Plan most recently published. An FY17-20 USDA IT 1 page strategy document is attached for reference.)

- A copy of USDA’s IT Strategic Plan, 2014-2018 with strategic goals can be found at: https://www.ocio.usda.gov/strategic-plan.

Key mission delivery performance measures

**IT Portfolio Management**
The Office of the Chief Information Officer conducts planning, education, management, analysis, and governance of USDA’s $3.2 billion annual IT investment portfolio. In FY2016, the IT investment portfolio is composed of 32 major IT investments and 172 non-major IT investments.

OCIO partners with USDA component agencies to create business relationships that support effective IT portfolio management processes and a strategic decision-making environment.

This environment consists of three key components:
- Executive decision-making
- Creating repeatable IT Governance and Portfolio Management processes
- Supporting portfolio management tools
USDA scores major investments on a monthly basis and non-major investments quarterly based on a common set of criteria:

- Overview
- Acquisition
- Program/Project execution and Risk Management
- Performance Management and Documentation

OCIO provides guidance to the agencies in the management and reporting of the agency portfolio, and coordinates and manages the submissions of the USDA IT Portfolio Summary and Major IT Business Cases to OMB. The performance of USDA’s IT portfolio of investments is publicly available via the OMB Federal IT Dashboard, www.itdashboard.gov.

**OCIO Bi-Weekly Cyber Security Scorecard**

In 2016, OCIO created a scorecard to provide USDA leadership increased visibility into the vulnerability management process and highlight key cybersecurity metrics for each of their organizations within USDA.

Every two weeks, USDA component agency heads and component CIOs are provided with a status of key cybersecurity hygiene factors, including critical internal and external vulnerabilities, status of Authority to Operate (ATO) activities, and PIV (Personal Identity Verification) enforcement for privileged and non-privileged users. The metrics that make up the scorecard are indicators of key measures in Federal Information Security and Modernization Act of 2014 (FISMA) law, Homeland Security Presidential Directive 12 (HSPD12), and other government mandates. Good performance in these measures reduce the overall risk to USDA assets and data. OCIO aggregates the key measure indicators on the scorecard providing a bi-weekly snapshot on agency performance.
A copy of the most recent biweekly USDA cybersecurity scorecard is below.

Agency Overall Score

The Agency Overall Score column has a green, yellow, or red icon representing overall agency performance for a bi-weekly run of the scorecard. This rating is a composite score of six metric categories:

- User Accounts - % PIV Enforced
- Privileged Accounts - % PIV Enforced
- % of Plan of Action and Milestones (POA&Ms) on Schedule
- Overall Compliance Percentage
- Public Vulnerabilities
- Number of Vulnerabilities per Endpoint

Green represents that the agency is doing very well meeting their cybersecurity initiatives. Yellow represents that they are meeting the objectives but have room for improvement. Red means that they have performed poorly.

The rating in each of the categories is assigned a point value:

- 3 points for a green score
- 2 points for a yellow score
- 1 point for a red score
- Not Applicable categories have no value will not be calculated into the score

The score is determined by taking the sum of the points for the applicable categories divided by the number of applicable categories:

- Green indicates a score of 2.75 and greater
- Yellow indicates a score between 2.75 and 1.75
- Red indicates a score lower then 1.75

Metric Categories

The metric categories are measurements of an agency’s compliance and performance in a specific cybersecurity category that is either required by mandate or law.

- **User Accounts - % PIV Enforced:** Per Homeland Security Presidential Directive #12 (HSPD12), the U.S. Government is standardizing user identification and authentication to reduce fraud, enhance security, and increase efficiency. The standard produced from HSPD12 is the Personal Identity Verification (PIV) standard. The PIV standard provides a higher level of security for government systems by using a two-factor method to log on to government networks/systems and identity verification when the credential is issued. This metric is the percentage of regular accounts belonging to the general population of users that are using PIV for accessing systems. For FY16, OMB set a target that all agencies be 85% compliant with PIV enforcement. On the scorecard, Green indicates a score of 85% or higher compliance, Yellow indicates an agency has achieved at least 50% PIV compliance, and Red is anything lower than 50%.
• **Privileged Accounts - % PIV Enforced:** These accounts are for users that have elevated privileges to systems or data. This includes system administrators, network administrators, database administrators, or anyone who has some sort of administrative privileges or elevated privileges with data. Again, this metric is determining the percentage of administrative users who use PIV for performing administrative duties. For FY16, this target has been raised by OMB to 100% compliance. To achieve a Green rating, the agency must have 100% of privileged user’s access to systems using PIV. Yellow indicates a score between 99% and 95% and Red indicates a score below 95%.

• **% of POA&Ms on Schedule:** A POA&M is a Plan of Action and Milestones that is used to document weaknesses found either through an audit or assessment of the system. A POA&M is also a mechanism to document the plan to remediate the weakness outlined through milestones, and to provide the associated cost of remediating the weakness. When creating a POA&M, an agency provides the date they expect to remediate the weakness. If an agency’s POA&M has remained open beyond the completion date, it is considered delayed. This metric determines how well an agency is performing with the timely remediation of weaknesses on their systems. The calculation for the metric is the number of POA&Ms on schedule divided by the number of POA&Ms. A green score indicates 90% or more on schedule; Yellow is between 65% and 90% on schedule; Red is below 65%.

• **Overall Compliance Percentage:** FISMA mandates that government agencies use a security framework provided by National Institute of Standards and Technology (NIST) to implement cybersecurity best practices to protect government cybersecurity assets. The calculation for this metric is the Authority to Operate (ATO) Percentage score multiplied by the .25 then added to the On-Going A&A score multiplied by .75. If the agency has any infractions the score is then multiplied by .5. The normal calculation can be represented as \([\text{ATO Percentage} \times .25 + \text{On-Going Percentage} \times .75]\); when the agency has an infraction, the calculation is \([(\text{ATO Percentage} \times .25 + \text{On-Going Percentage} \times .75) \times .5]\).

• **Public Vulnerabilities:** This metric is an indicator of any critical vulnerabilities found by the Department of Homeland Security (DHS). DHS does weekly scans of all of USDA’s publicly accessible systems for known security flaws. This metric is binary: if a critical vulnerability exists, the score is Red; if no critical vulnerabilities exist, it is Green.

• **Vulnerabilities per Endpoint:** USDA also scans the network internally using tools to determine whether flaws exist on system endpoints.
(computers/servers/network equipment or other components that are part of a system) that could compromise security. The tools provide the number of vulnerabilities a system has. This metric is calculated by dividing the total number of critical vulnerabilities that exist on agency systems divided by the total number of endpoints the agencies maintain. A score of .5 or lower critical vulnerabilities per endpoint is Green; between .5 and 2 critical vulnerabilities is Yellow; Red is greater than 2 vulnerabilities per endpoint.

**Organization’s History**

The Clinger-Cohen Act of 1996 required the establishment of a Chief Information Officer (CIO) for all major Federal agencies. The Act requires USDA to maximize the value of information technology acquisitions to improve the efficiency and effectiveness of USDA programs. To meet the intent of the law and to provide a Departmental focus for information resources management issues, Secretary’s Memorandum 1030-30, dated August 8, 1996, established the Office of the Chief Information Officer (OCIO). The CIO serves as the primary advisor to the Secretary on Information Technology (IT) issues. OCIO provides leadership for the Department's information and IT management activities in support of USDA program delivery.

Office of the Chief Information Officer (OCIO)

Organizational Chart

Working Organization Reporting Structure, as of 10/03/16
Biographies of career staff in key leadership positions

Jonathan Alboum
Chief Information Officer
202-720-8833, Jonathan.Alboum@ocio.usda.gov

Jonathan Alboum was appointed the U.S. Department of Agriculture’s (USDA) Chief Information Officer (CIO) by Agriculture Secretary Tom Vilsack in June 2015. In this role, Alboum works with stakeholders across USDA’s 29 component agencies and staff offices and throughout Government to formulate IT strategies and to develop policies that support IT budget formulation and execution, portfolio management, governance, IT operations, and information security.

Prior to his appointment as CIO, Alboum held several leadership positions at the USDA and the General Services Administration (GSA). He most recently served as the Program Executive for USDA's Modernize and Innovate the Delivery of Agriculture Services initiative, where he provided executive leadership for a $400+ million SAP (Systems, Applications & Products in Data Processing) implementation that gives farmers and ranchers the flexibility to update customer information at any Farm Service Agency (FSA) county office, enables them to more efficiently manage multiple customer records, reduces improper payments, and provides program eligibility information through a single view. Before that, Alboum served at GSA as the Associate CIO for Enterprise Governance and Planning. During his tenure at GSA, he also led the creation of GSA’s consolidated IT organization and worked as the Deputy CIO for the Federal Acquisition Service. Mr. Alboum began his Federal government career at the USDA Food and Nutrition Service (FNS), where he served as the Deputy CIO and the CIO.

Alboum joined Government after working as a management consultant for both PriceWaterhouseCooper and Ventera Corporation. In these roles, he managed several large system implementations, gaining a depth and breadth of knowledge regarding how organizations use technology to transform their businesses and better serve their customers. Jonathan earned a MS in the Management of Information Technology from the University of Virginia's McIntire School of Commerce and a BS in Systems Engineering from the University of Virginia's School of Engineering and Applied Science.

Doug Nash
Deputy Chief Information Officer, Operations and Infrastructure
202-692-0060, Douglas.Nash@ocio.usda.gov

Doug Nash serves as USDA’s Deputy CIO for Operations and Infrastructure, where he is responsible for providing information technology services and solutions, technical expertise, leadership, and the strategic direction and vision essential to the effective and efficient operations of the USDA information technology enterprise.

Doug has spent his career in public service and the private sector, focusing on customer service, mission enablement, and innovation. He has worked for the federal government since 1991, and his most recent role was as Forest Service CIO. In addition, he has served
in a wide variety of senior leadership positions, including Deputy CIO, Director of Information Resources for the Eastern Region, and Director of the Information Solutions Organization. Prior to joining federal service he worked as a software engineer for TRW Space and Defense Sector, and was a senior consultant for Oracle Corporation’s Federal Services Division. He holds a Bachelor of Science degree in Management Information Systems from George Mason University, and is a retired United States Army Reserve officer.

Sue E. Bussells
Executive Officer, Enterprise Management
202-690-0064, Sue.bussells@ocio.usda.gov

Sue E. Bussells is the Executive Officer for Enterprise Management at the United States Department of Agriculture. She has more than 28 years of federal service. Most recently, she served as the USDA CIO’s Chief of Staff and key advisor. Her prior roles at USDA include a term serving as the acting CIO for USDA’s Rural Development Mission Area and five years as the Deputy CIO for the Farm Service Agency. Her federal career also includes working as the Chief Technology Officer for the Commodity Futures Trading Commission, working at the Department of Veterans Affairs where she was the Technical Infrastructure Manager, working at the U.S. Patent and Trademark Office, and serving as a project manager at the Office of Management and Budget.

Prior to coming to Washington, D.C. from Texas in 1999, Sue worked with the Department of Justice at the U.S. Border Patrol, overseeing the El Paso Sector as Senior Technology Manager. Ms. Bussells also held several project and program manager positions at the Department of Defense, responsible for a wide range of initiatives. Ms. Bussells has continued to lead her organizations through quality management, process improvements, and innovative changes, which helped one agency win the Malcolm Baldridge Quality Award for two consecutive years.

Sue is a decorated veteran and served in the United States Army as a Military Intelligence Analyst (Electronic Warfare). Ms. Bussells holds a bachelor’s degree in Computer Science (Science and Engineering Option) from Roosevelt University and a master’s degree in Computer Resources and Information Management from Webster University. She also has a Master’s Level Certification as a Chief Information Officer from the National Defense University, and she is a published author in the *International Journal of Enterprise Architecture*. In addition, she completed the Leadership for a Democratic Society Program at the Federal Executive Institute.

Chris Lowe
Chief Information Security Officer
202-590-5939, Christopher.Lowe@ocio.usda.gov

Christopher Lowe was named Chief Information Security Officer (CISO) in September, 2012. In his role, he serves as the Associate CIO leading both the Security Operations Center, and the Compliance and Program Oversight office.
Mr. Lowe joined the Office of the CIO in 2009 as the Associate CIO for Security Operations. He provides executive leadership in security operations, compliance, architecture, and risk management, and is responsible for securing USDA networks and systems by collecting, analyzing, integrating and sharing information among the USDA component services. Mr. Lowe coordinates cyber-security situational awareness, resources, and reporting for USDA organizations and personnel in order to protect USDA programs, information and assets.

Prior to OCIO, he was the Senior Agency Information Security Officer and the Associate CIO for Infrastructure and Operations at USDA’s Food Safety and Inspection Service (FSIS). He joined FSIS in late 2005, before which he spent 18 years in international federal IT consulting, most recently as a security engineer with Booz Allen Hamilton.

Mr. Lowe received a B.A. in International Studies from Wheeling Jesuit University. He also holds current professional credentials in both information security (Certified Information System Security Professional and as a Project Management Professional).

Ravoyne Payton
Associate Chief Information Officer (ACIO), Policy, e-Government and Fair Information Practices (PE&F)
202-690-0048, Ravoyne.Payton@ocio.usda.gov

Ms. Ravoyne "Ray" Payton currently serves as the Associate Chief Information Officer for Policy, e-Government and Fair Information Practices. Prior to this role she served as the Deputy Associate Chief Information Officer for Policy, e-Government and Fair Information Practices, and the acting Chief Privacy Officer (CPO). Ms. Payton joined USDA as the CPO in September 2009. She served in this role until October 2015. As the CPO, Ms. Payton reenergized the USDA Privacy Council, led an effort to bring personally identifiable training to the USDA training repository, AGLearn, and worked diligently to increase the awareness of protecting personal information entrusted to USDA. As the Acting Departmental FOIA Officer for eighteen months, Ms. Payton led the implementation and deployment of the Department’s first enterprise-wide FOIA tracking system and a public access link which allows the public to submit and track FOIAs online.

Prior to joining USDA, Ms. Payton worked at the United States Small Business Administration, Transportation Security Administration, General Services Administration, and the Defense Contract Audit Agency. Ms. Payton graduated from George Mason University with a bachelor’s in Government and Political Science. She also is a graduate of Troy State University with a Master’s degree in Public Administration with an emphasis in Information Technology.
Yvonne T. Stevenson
Associate Chief Information Officer, Information Resource Management
202-690-2118, Yvonne.Stevenson@ocio.usda.gov

Yvonne T. Stevenson is the Associate Chief Information Officer for Information Resource Management with USDA. She assists the CIO and Deputy CIO in providing leadership, strategic direction, and executive oversight of the Department’s $3.2 billion IT investment portfolio. Mrs. Stevenson establishes policy and IT governance over the diverse information technology programs across more than 29 USDA agencies and staff offices. She directly oversees IT capital planning and investment control process, enterprise architecture, and information management (records management, information collection, Directives/Regulations, etc.).

Prior to this position, Mrs. Stevenson served as the ACIO for Technology Planning, Architecture and E-Government. Mrs. Stevenson has over 30 years of Federal Government experience with the Department of Defense and the Department of Agriculture. She began her career with the Department of the Navy, Naval Facilities Engineering Command. She also served in a number of positions of increasing responsibility with the Department of the Army at the U. S. Army Missile Command (now Aviation and Missile Command). These positions included senior engineer, assistant Program Manager for Survivability for the Javelin Weapon System, and assistant PEO for Survivability and Advanced Technology for the PEO Tactical Missiles. Mrs. Stevenson was selected Product Manager for the U.S. Army Small Computer Program at Fort Monmouth, N.J. by the Acquisition Program Manager's Board. Mrs. Stevenson also served as the Acting Director and Deputy Director for Acquisition and Industrial Base Policy in the Office of the Assistant Secretary of the Army; Assistant Director for Enterprise Development in the Office of the Under Secretary of Defense for Acquisition Technology and Logistics; and Special Assistant for Energy Conservation to the Under Secretary of the Air Force. Mrs. Stevenson served as the Air Force Deputy Program Executive Officer for Combat and Mission Support prior to joining USDA.

Mrs. Stevenson is a distinguished graduate of the Army’s Senior Service College/War College Fellowship Program, the Federal Executive Institute’s Leadership for a Democratic Society, the Army’s Sustaining Base Leadership and Management Program, and the Advanced Program Manager’s Course. She is Level III certified in Program Management, Engineering, Test and Evaluation, and Production and Manufacturing. Mrs. Stevenson is a Doctoral candidate in the Doctorate of Business Administration Program at the Florida Institute of Technology.

Richard Coffee
Associate Chief Information Officer, Data Center Operations
202-690-0048, Richard.Coffee@ocio.usda.gov

Richard Coffee serves as the Associate Chief Information Officer of the National Information Technology Center (NITC), Enterprise Data Centers as of June 2014. Mr. Coffee provides executive leadership and strategic direction for 4 major USDA Enterprise
Data Centers: the NITC headquarters located in Kansas City, Missouri; the St. Louis, Missouri location for disaster recovery; the Beltsville, Maryland location for Washington, D.C. area development and test systems only; and Fort Collins, Colorado, where Enterprise Application Services are located. The NITC organization provides centralized, cutting edge shared computing technology and application services to USDA and other external federal agencies. The NITC organization provides 24x7 web-enabled technologies, offers service platforms including Infrastructure as a Service (IaaS), Platform as a Service (PaaS), Software as a Service (SaaS) and Professional Services (PS), a mainframe infrastructure with over 350 commercial off-the-shelf (COTS) products, and a secure private and public network throughout the United States with high assurances of confidentiality, integrity, and availability on all server architectures.

Mr. Coffee joined OCIO in April 2009 and served as the Senior Advisor to the Deputy Chief Information Officer providing senior level support in the coordination efforts of OCIO policy oversight and operations. Mr. Coffee then served as the Deputy Chief Information Officer for Technology Planning, Architecture and E-Government supporting the execution of an IT portfolio. In February 2011, Mr. Coffee accepted the position of the Associate Chief Information Officer for Cyber Policy and Oversight, and in August 2012, Mr. Coffee accepted the position as the Associate Chief Information Officer for Policy and Directives.

Before joining the USDA OCIO leadership team, Mr. Coffee served 10 years at the Small Business Administration as the Chief Enterprise Architect. Prior to his tenure at the SBA, Mr. Coffee served 10 years in the legislative branch of the federal government with the United States Senate Computer Center responsible for data center operations and vendor support. He also led the implementation of the U.S. Senate’s first computer–telephony integrated help desk system.

Mr. Coffee received his Bachelor of Science Degree in Information Technology Management and an Associate of Arts degree in Computer Programming from Strayer University. Mr. Coffee has also completed a graduate program in Cybersecurity Policy from the University of Maryland-University College.

Flip Anderson
FITARA Operations Officer
202-720-7649, Flip.Anderson@ocio.usda.gov

Flip Anderson has over 30 years of hands on and managerial experience in all aspects of information technology, including information management, information and physical security systems, and program management. He specializes in the development and management of Information and Knowledge Management systems with a strong background in Program Management and Systems Development.

During the past four plus years at USDA, Mr. Anderson served as the Deputy Associate Chief Information Officer for Information and Acting Associate Chief Information Officer for Information Resource Management. Mr. Anderson assists the Chief Information Officer
and Deputy Chief Information Officer in providing leadership, strategic direction, and executive oversight of the Department’s IT investments.

Mr. Anderson comes to USDA from private industry where he was a Senior Program Manager with Innovative Concepts Inc., an Elbit Systems of America Company. He was directly responsible for the development and management of the Department of Homeland Security Integrated Fixed Tower System and U.S. Department of Defense and Foreign Military Command and Control systems.

Prior to his time in private industry, Mr. Anderson served 26 years in the U.S. Army, where his last positions were as a Chief Information Officer and Product Manager of the Advanced Collaborative System.

Mr. Anderson has a Bachelor’s Degree in Psychology from Newman University, in Wichita, Kansas, a Masters in Information Technology from the University of Maryland-University College, and Chief Information Officer Certifications from the Federal Chief Information Officers University and the University of Maryland University College. His military education includes Senior Program Management Officers Course, Program Management Skills Course and Systems Acquisition Management from the Department of Defense Acquisition University, Fort Belvoir, VA where he achieved a Level III Certification in Program Management, Level II Certification in Systems Management, and certification in Army Test and Evaluation.

Biographies of political staff in key leadership positions

Joyce Hunter
Deputy Chief Information Officer, Policy and Planning
202-690-7307, Joyce.hunter@ocio.usda.gov

Joyce Hunter serves as Deputy CIO for Policy and Planning. Ms. Hunter has over 30 years of experience in the information technology industry. She has demonstrated a strong ability to build and sustain relationships with public/private stakeholders to lead innovative projects and inter-agency initiatives. Ms. Hunter previously served as the Chief Executive Officer of Vulcan Enterprises, an IT strategic planning consulting organization, where she provided executive advisory services, industry intelligence, policy evaluation and analysis, business development support, business IT alignment, and strategic business consulting.

The last 14 years of Ms. Hunter’s career have been dedicated to addressing the increasingly complex demands on the federal and commercial health community. She previously served over 10 years with Lotus Development Corporation, rising to the level of Major Account Executive and Global Account Manager. Ms. Hunter earned a BA from Villanova University, an MBA in Marketing from the University of Pennsylvania, Wharton School of Business, has a certificate in Emotional Intelligence, and is a Wharton Fellow.
Organizational Budget and Financial Management

Increases in OCIO Working Capital Fund (WCF) activity budgets from FY13 to FY14 resulted from the following customer demand:

- The Client Technology Services increase was due to customers requesting additional services such as information technology hardware refreshment.
- The National Information Technology Services increase was due to customers requesting additional services such as application development work for the General Services Administration.
- The Enterprise Network Service increase was due to the purchase of additional network capacity to meet customer demands.

1. Enterprise Network Services is the consolidation of the National Telecommunications Services Office and other telecommunications services.
2. Computer Services Unit, Telecommunications Customer Services Center, and Network Services were consolidated with Client Technology Services in FY 2015.
3. Enterprise Shared Services was consolidated with National Information Technology Center in FY 2012.
4. Administrative Support Costs are those expenses incurred by staff offices in providing services to the WCF. Before 2013, it was a WCF-wide overhead reimbursement account. Starting in 2013, it came under the WCF Treasury symbol and was reported as a separate line item.

OCIO currently employs a workforce of 1,774 staff

- Of the 1,774 staff, 998 (56%) are Federal employees and 776 (44%) are contractors.
- Of the 998 employees, the following are full-time and part-time:
  - Full-time: 998 employees
  - Part-time: 0 employees
- OCIO does not employ additional seasonal employees or temporary employees to provide support during busier months
- Of our total Federal employee workforce, 228 (23%) are eligible to retire within the next year (by 9/30/17).
- Our headquarters is located in Washington, D.C., which houses 14% of our workforce
- OCIO has staff in 294 field offices across the United States to provide information technology support to our USDA customers
- The 998 employees are information technology specialists that provide a wide range of services to USDA customers; 139 are located in headquarters and 859 are located in field offices.

II. Policies and Regulations

Statutory Authorities

Important Policies and Regulations

USDA finalized and published the following 16 IT-related Departmental directives (policies/regulations) within the past year since August 1, 2015 (directive title, directive number, directive owner, effective date):

1. Cloud Computing, DR 3650-001. Office of the Chief Information Officer (OCIO) –National Information Technology Center (NITC), 09/30/15
2. Enterprise Architecture, DR 3185-001. OCIO-Information Resource Management (IRM), 06/28/16
3. Enterprise Geospatial Data Management, DR 3465-001. OCIO-Enterprise Geospatial Management Office (EGMO), 08/05/16
4. Information System Contingency Planning and Disaster Recovery Planning, DR 3571-001, OCIO-Agriculture Security Operations Center (ASOC), 06/01/16
5. Information Technology Capital Planning and Investment Control, DR 3130-013, OCIO-IRM, 07/08/16
6. Information Technology Cost Estimating, DR 3130-012, OCIO-IRM, 03/04/16
7. Information Technology Program and Project Manager Certification Requirements, DR 3130-011, OCIO-IRM, 02/04/16
8. Management of USDA IT Enterprise Initiatives Procedures, Departmental Manual (DM) 3107-001, OCIO-EM, 05/18/16
9. Network Class of Service and Quality of Service, DR 3300-006, OCIO-Enterprise Network Services (ENS), 06/01/16
10. Non-Major Information Technology (IT) Investments, DR 3130-009, OCIO-IRM, 11/18/15
11. Records Management, DR 3080-001, OCIO-IRM, 08/16/16
12. Secure Communication Systems, DR 3300-015, OCIO-ASOC, 07/14/16
13. Secure Domain Name System, DR 3300-025, OCIO-ENS, 03/18/16
14. Telecommunications & Internet Services and Use, DR 3300-001, OCIO-ENS, 03/18/16
15. USDA Chief Information Officers Council, DR 3105-001, OCIO-EM, 04/06/16
16. United States Department of Agriculture Enterprise Information Technology Governance, DR 3130-010, OCIO-IRM, 12/03/15

USDA Departmental directives (policies/regulations) are published/listed at the following Web pages:

- https://www.ocio.usda.gov/policy-directives-records-forms/directives-categories

The number of new USDA Departmental directives (policies/regulations) released per year (on average):

- FY2014 – 28
- FY2015 – 20
- FY2016 YTD – 33
- Average – 27 per year
United States Department of Agriculture
2016 Presidential Transition
Office of the Chief Information Officer (OCIO)

USDA Departmental forms are published/listed at the following Web page:

The total number of new and revised USDA Departmental forms released per year (on average):

- FY2012 – 46
- FY2013 – 31
- FY2014 – 23
- FY2015 – 16
- FY2016 YTD – 25
- Average – 28.2 per year

The percentage of USDA Departmental forms deemed significant/economically significant by the Office of Information and Regulatory Affairs (OIRA):

- 10.2% of USDA’s Departmental forms are reviewed and approved by OIRA.

USDA Departmental Directives to be Sunset:

1. Secretary’s Memorandum (SM) 1076-011, Realignment of the Departmental Management, Office of Homeland Security and Emergency Coordination (OHSEC), Executive Protective Operations Division, OHSEC, 10/02/15 – Will sunset 10/02/16

2. SM 1076-012, Lease Accountability and Strategy Division, OPPM, 11/05/15 – Will sunset 11/05/16

3. Departmental Notice (DN) 5090-006, USDA Purchase Card Program – Mandatory, Annual Refresher Training Requirements, OPPM, 05/12/16 – Will sunset 05/12/17

4. SM 1076-014, Delegation of Authority for the Organic Certification Cost Share Programs, OSEC, 08/03/16 – Will sunset 08/03/17

5. SM 1076-016, Establishment of an Office of the Chief Risk Officer for Rural Development, OSEC, 10/05/16 – Will sunset 10/05/17

6. SM 1076-015, Realignment of the Office of Advocacy and Outreach, OES, 10/18/16 – Will sunset 10/18/17
Overview of the policy/regulation review process

USDA agencies and staff offices use the Departmental Directives System and Forms System to issue policies, procedures, guidance, and forms which have general applicability to the employees and two or more USDA agencies or staff offices of the Department. Directives that are applicable to only one agency or staff office are not part of the Departmental Directives System. The USDA currently has 332 Departmental directives in effect. The system is described in Departmental Regulation (DR) 0100-001, Departmental Directives System. For a detailed discussion of policy coordination, contents, format, and illustration requirements, see Departmental Manual (DM) 0100-001, Procedures for Preparing Departmental Directives. The Departmental Directives System is managed by the OCIO Policy, E-Government, and Fair Information Practices Office. The Policy Office also provides assistance and guidance to Offices of Primary Interest (OPIs; the policy developers, sponsors, or owners), acts as a central control point to prevent overlapping, duplication, and conflict, manages the clearance process and reports status, and serves as a mandatory clearance office for all Departmental directives and Secretary’s Memoranda. Stakeholders and affected organizational units are included in the review process. The Office of Budget and Program Analysis (OBPA), the Office of the General Counsel (OGC), and the Assistant Secretary for Administration (ASA) also serve as mandatory clearance offices for all Departmental directives and Secretary’s Memoranda.

Permanent directives are continuing directives that are in force until specifically cancelled or superseded. Temporary directives are not to exceed one year of effectiveness and they cannot be renewed. OPIs must codify material of a permanent nature that was originally issued as a temporary directive. All such material is to be codified within one year after issuance as a Departmental Regulation (DR) or a Departmental Manual (DM).

- **Departmental Regulations (DR) – Permanent directive:** DRs cover policy – they promulgate Departmental policy; delegate authority; establish responsibility; establish statutory or interagency committees; and prescribe very high-level procedures governing USDA activities and operations.

- **Departmental Manuals (DM) – Permanent directive:** DMs cover process, procedure, and standards – they are used for detailed, relatively lengthy technical guidance that is procedural in nature and Department wide in scope.

- **Departmental Notices (DN) – Temporary directive:** DNs announce policy or procedure of Department wide interest that is temporary or of a one-time nature, permanent policy or procedure that requires immediate dissemination, or delegations of authority from Assistant Secretaries or other General Officers pending publication in the Federal Register.

- **Secretary’s Memoranda (SM) – Temporary directive:** SMs establish or announce changes in major policy concerning the missions and programs of the Department, direct or implement action on these programs, or redirect or
change policy or action in these areas. Examples include actions by which law requires the endorsement of the Secretary and delegations of authority by the Secretary.

The USDA currently has 265 approved Departmental forms in effect, not including Word format, PDF format, language, or other variants. The system is described in Departmental Manual (DM) 3020-001, Departmental Forms Manual. The Policy Office also provides assistance and guidance to forms developers, sponsors, or owners, evaluates forms on the basis of their content, design, effectiveness, and alignment with the Departmental directives containing instructions for their use, checks for compliance with the Paperwork Reduction Act, privacy, Section 508, and other legal or regulatory requirements, manages and coordinates the clearance process and reports status, and serves as a mandatory clearance office for all Departmental forms. Some USDA Departmental forms also require clearance and periodic review and renewal (3-year cycle) with OMB (e.g., those that require information collection from the public).

**Integrated Information Technology Governance Framework (IITGF)**

USDA’s Integrated Information Technology Governance Framework (IITGF) is a holistic set of processes, procedures, and guidelines that assist the Office of the Chief Information Officer’s (OCIO’s) customers to improve mission delivery. It does this by providing structure around the budget formulation, budget execution, enterprise architecture, capital planning, IT security, Section 508, records management, and portfolio/project management processes.

Implementing the IITGF satisfies the following goals:

- **Provides a coherent and effective project management methodology to guide IT project management at USDA.** The methodology is intended to consistently deliver IT capabilities that provide maximum support to USDA business needs within approved cost and schedule constraints.

- **Better integrates IT project planning and execution with IT Governance, including more effective multi-disciplinary reviews of IT projects by the stakeholders and IT executive governance bodies.**

- **Enables the CIO to have insight and access to the approval process of an investment throughout the System Development Life Cycle, which includes incremental development methodologies.**

Governance decision making is differentiated at multiple levels in the IITGF. In addition, USDA has strengthened the existing governance system to ensure that the CIO actively engages with all key stakeholders involved in the governance structure graphic below. The governance system provides clear lines of authority from the Secretary and Deputy Secretary to the CIO. The CIO, or designee, will engage at the Department-level and throughout all Bureaus and Staff Offices, using existing governance bodies in the key areas of finance, budget, acquisition, and human resources. These bodies consist of Departmental
and Bureau leadership in the specific subject-matter area. The CIO will engage directly with each group, ensuring active involvement in policy decisions that are related to information technology.

**Executive Information Technology Investment Review Board (E-Board)** - Composed of the Department’s senior leaders. The Board’s responsibilities includes ensuring that proposed investments contribute to the Secretary’s strategic vision and mission requirements, employing sound IT investment methodologies, complying with Departmental enterprise architecture, employing sound security measures, and providing the highest return on the investment or acceptable project risk. The E-Board provides the Secretary with recommendations for review and decision authority.

**Integrated Advisory Board (IAB)** - The IAB is comprised of three councils and one group: Enterprise Architecture Advisory Council, Capital Planning Advisory Council, Enterprise Security Governance Council, and the Critical Partners Advisory Group. The IAB is a key component of the Integrated IT Governance Framework structure that ensures the accountability and success of IT governance objectives. The prime purpose of the IAB is to create a forum for technology leadership to ensure that all technology decisions align with Department and Agency/Staff Office level goals, strategies, objectives, and mission needs.

**Agency-level Investment Review Boards (IRBs) and Integrated Project Teams (IPTs)** - Agency-level IRBs will review and approve investments before they enter the USDA IITGF process. Agency-level IPTs assist in providing technical review and governance to proposed system development efforts. Any agency-level proposed or existing initiatives that are or become an enterprise, shared service, or major IT investment, will be submitted to the Department for review and approval by the USDA CIO, as well proceeding through the governance boards, including the IAB and E-Board.

III. Congressional Relations and Issues

Over the past year, Congress has taken an increased interest in two key areas: Federal IT system modernization and cybersecurity.

**IT Modernization**
The presence of aging IT systems in the Federal government has generated significant interest from both OMB and Congress. Outdated programming languages, old parts, hardware and software no longer supported by vendors, associated cybersecurity risks, and the increasing cost of maintaining so-called “legacy” IT systems are recognized as areas of concern. OMB recently drafted guidance requiring agencies to identify, prioritize, modernize, retire, and replace legacy systems. Congressional interest in this issue has led to several requests for information from Federal agencies, including USDA, since October 2015:

- United States Department of Agriculture, Rural Development Mission Area, Agriculture Appropriations Committee Hearing, Questions for the Record (October 2015) – Senator Udall; focused on the age of IT systems at USDA

- Congressional Letter: The Honorable Jason Chaffetz, Chairman, Committee on Oversight and Government Reform, U.S. House of Representatives (December, 2015); focused on Legacy definition that considered antiquated software, elevated maintenance costs, and security risks and costs

- Legacy IT Briefing to the Committee on Agriculture, U.S. House of Representatives (July 2016)

GAO also released report 16-468: “Information Technology: Federal Agencies Need to Address Aging Legacy Systems” in June 2016. USDA concurred with GAOs recommendations to address obsolete IT investments in need of modernization or replacement. USDA also concurred that the Secretary of Agriculture should direct the USDA CIO to identify and plan to modernize or replace legacy systems as needed and consistent with OMB’s draft guidance, including time frames, activities to be performed, and functions to be replaced or enhanced. To ensure success, USDA’s OCIO collaborates with and provides guidance to the sub agencies and staff offices in decommissioning, modernizing, and developing systems. In our efforts to improve this process, USDA plans to take the following actions.

1) We will convene a team comprised of the Enterprise Architecture Division (EAD), Capital Planning and IT Governance Division (CPIGD), the Agriculture Security
United States Department of Agriculture
2016 Presidential Transition
Office of the Chief Information Officer (OCIO)

Operations Center (ASOC), and other subject matter experts in the areas of cloud computing and shared services to collaborate on industry and federal best practices and procedures, along with those attributes that uniquely identify USDA’s footprint.

2) Develop and implement a department wide plan to review, select and prioritize the modernization of legacy systems.

With the size, complexity and elaborate missions within USDA, we recognize the challenge in addressing this initiative and the time needed to implement this plan. The team described above will utilize the most current IT Asset Inventory collected for the OMB Quarterly Integrated Data Collection (IDC), submitted in May 2016, to begin developing this Modernization plan. We will provide milestone status updates and provide a final plan once completed. As the plan is socialized, implemented, and measured, USDA will provide progress reports.

USDA has decommissioned more than two dozen legacy IT systems in the last five years. USDA has incorporated a disposition plan into the Department’s Integrated Information Technology Governance Framework (IITGF), which involves collaboration and communication between different parts of the Office of the Chief Information Officer, including Capital Planning and Investment Control (CPIC), Enterprise Architecture, and IT Security. Through this framework, OCIO will continue to implement and oversee the decommissioning of agencies and offices’ IT systems.

Two of USDA’s top three mission-critical legacy IT systems will be replaced within the next three years, including the Automated Timber Sales Accounting system (ATSA) and the Resource Ordering and Status System (ROSS), both used by the Forest Service. Our third priority for modernization is the Payroll Personnel System, which is upgraded routinely to keep it functional and secure. An evaluation of this system is underway to inform our modernization efforts. Four of USDA’s five oldest legacy IT hardware and infrastructure investments also will be replaced within the next 10 months, and the fifth is scheduled to be replaced in two years.

USDA employs a number of older programming languages in mission-critical investments. These languages, however, continue to meet USDA’s needs, and it is not clear the benefits of replacing them justify the costs. Additionally, although USDA uses some software and operating systems in which the vendor no longer provides regular support, in most cases, USDA is receiving support from vendors under extended support agreements or IT contractors under Operations and Maintenance (O&M) contracts. A number of unsupported operating systems also are being migrated to USDA’s cloud-based Virtual Data Center, which is expected to be completed by the end of 2017.

Cybersecurity
Two data breaches at the U.S. Office of Personnel Management (OPM) in 2014 and 2015 were announced publicly in June 2015. In what appeared to be a coordinated campaign to collect information on government employees, attackers extracted the personnel files of 4.2
million former and current government employees and security clearance background investigation information on 21.5 million individuals. Additionally, fingerprint data of 5.6 million of these individuals was stolen. A Congressional investigation regarding these incidents was conducted, resulting in a report released by the House Committee on Oversight and Government Reform in September 2016. Congressional interest in the topic continues. USDA’s CIO was tentatively scheduled to testify with two other agencies at a hearing with the Committee on Oversight and Government Reform in September 2016, but the hearing has been postponed until November 2016. The expectation is that this will be the first of a series of hearings focused on Federal agencies’ cybersecurity programs.

The Cybersecurity Act of 2015 requires agencies to notify Congress within seven days of a Major Incident (cybersecurity-related). In May 2016, USDA became the first Department to develop and successfully test, in coordination with DHS US-CERT, new procedures for notifying Congress.

USDA also created a scorecard this year to provide USDA agency leadership increased visibility regarding the effectiveness of their cyber hygiene programs. Building awareness of the need to make continuous improvements in our cybersecurity posture has been instrumental in the progress USDA has made, enabling the Department, for example, to raise the employee use of PIV (Personal Identity Verification) smartcards from 6 percent to over 90 percent in the last year. Every two weeks, USDA component agency heads are provided with a status of key cybersecurity hygiene factors and those areas where their organizations have opportunities to take additional steps.

On a monthly basis, USDA conducts penetration assessments to identify security vulnerabilities and then develop plans to remediate them. During FY15, USDA also created a list of High Value Assets (HVAs) and has worked with DHS to perform assessments of several over the past year.

In addition, our Agriculture Security Operations Center is proactively researching, testing, and implementing tools that USDA can use better to detect, prevent, and mitigate cybersecurity attacks. For instance, USDA is an early adopter of the DHS CDM (Continuous Diagnostics and Testing) program. Today, we are implementing the components of Phase 1, having fully deployed one of four tools while we are actively piloting the remaining three. USDA has also volunteered to be early adopters for Phase 2 of the CDM program. Similarly, USDA is fully participating in the DHS Einstein program, which improves its ability to defend federal/civilian Executive Branch agency networks from cyber threats. Just as USDA was an early adopter of Einstein 1 and 2, we were a pilot agency to test the first version of what is now known as Einstein 3A and fully implemented in October 2016.

As with Einstein 1 and 2, DHS is deploying Einstein 3 Accelerated (E3A) to enhance cybersecurity analysis, situational awareness, and security response. With E3A, DHS and USDA will not only be able to detect malicious traffic targeting federal government networks, but also prevent malicious traffic from harming those networks. This will be accomplished through delivering intrusion prevention capabilities as a Managed Security Service provided by Internet Service Providers (ISP). Under the direction of DHS, ISPs
will administer intrusion prevention and threat-based decision-making on network traffic entering and leaving participating federal/civilian Executive Branch agency networks. In an effort to support employees against the social engineering cyber-attacks they face, like email phishing, USDA has successfully explored opportunities to increase the likelihood that employees will respond appropriately to threats. Although employees are already required to train annually to recognize and respond to phishing emails, USDA recognizes that technical safeguards like warning messages are also needed to render the email phishing attacks less effective. Through an anti-phishing campaign during 2016, USDA was able to achieve a greater than 50% reduction in the click rate of simulated phishing attempts on USDA employees.

USDA annually reports its FISMA cybersecurity and privacy performance, and our cybersecurity team works diligently to ensure that the Department fulfills all its reporting obligations to OMB and Congress. USDA’s security personnel continuously update their information system inventories to ensure they are accurate, as required by FISMA law. Each year, USDA is audited by its Office of the Inspector General (OIG), which provides additional valuable findings for us to consider and address as part of a comprehensive cybersecurity strategy.

IV. Internal and External Stakeholders

Important relationships with other Federal Departments or organizations

Office of Management and Budget
The Office of Management and Budget (OMB), Office of E-Government and Information Technology (E-Gov), headed by the Federal Government’s Chief Information Officer (CIO), develops and provides direction in the use of Internet-based technologies to make it easier for citizens and businesses to interact with the federal government, save taxpayer dollars, and streamline citizen participation. OMB provides guidance on IT capital planning, E-government, cybersecurity, and IT shared services initiatives like data center optimization. OMB also collects information from USDA and other agencies on IT portfolio performance. USDA meets regularly with OMB to discuss best practices, to provide feedback on OMB proposed and existing policies, and to review the health of USDA’s major IT investments.

A program review for the NRCS Conservation Delivery Streamlining Initiative (CDSI) was conducted with OMB on September 1, 2016. Additional quarterly reviews of major investments have been put on hold until further notice.

Department of Homeland Security
The Department of Homeland Security (DHS) works with each federal civilian department and agency to promote the adoption of common policies and best practices that are risk-based and able to effectively respond to the pace of ever-changing threats. USDA works collaboratively with DHS to build and report metrics related to the Federal Information
Security Management Act (FISMA). USDA is also working with DHS to take advantage of tools to identify cybersecurity risks on an ongoing basis (see CDM hot topic) and to improve situational awareness and provide early warning about intrusion threats (see E3A hot topic).

**Department of Justice**
The Department of Justice is the Executive Agent (EA) for the Freedom of Information Act (FOIA) program. As the EA, the Department of Justice provides oversight and guidance to all federal agencies. USDA provides quarterly and annual reports to the Department of Justice, which in turn rates each agency in a FOIA scorecard. This report contains detailed statistics on the number of requests received and processed, response times, the final disposition of each request, as well as other vital statistics regarding the administration of FOIA. The FOIA Improvement Act of 2016 added three new requirements to agencies’ Annual FOIA Reports. Agencies must now also proactively make available the raw data elements used in the creation of their final Annual FOIA Reports, include the number of times a statutory exclusion was used, and include the number of records that were made available for public inspection. As of January 2013, federal agencies were also given quarterly reporting requirements. These reports capture the number of requests received, processed, and backlogged, as well as progress on the closure of the agencies’ ten oldest pending perfected FOIAs, which are then displayed on FOIA.gov. Lastly, the Attorney General’s 2009 FOIA Guidelines require the Chief FOIA Officer (in USDA’s case the CIO) to also submit to the Attorney General a narrative report detailing the steps taken by the agency to improve FOIA compliance and transparency. This Chief FOIA Officer Report then serves as the basis for the Department of Justice’s annual assessments of agency Chief FOIA Officer Reports.

**USDA National Information Technology Center (Federal Shared Services Center)**
OCIO’s Data Center Operations (DCO) provides four lines of business through the National Information Technology Center (NITC), which collectively offer world class data center hosting and services to accommodate customer requirements to ensure program and project success.

Data Center Operations (DCO) offers data center hosting services to accommodate customer requirements (i.e., federal, state and local governments) for their business goals and technology requirements. The DCO provides secure, reliable, scalable, shared, and cost effective IT hosting solutions through the Hosting business line and the Commercial Cloud Services business line. The Hosting environment meets or exceeds the federal security requirements for FISMA high, moderate, and low impact systems. In recognition of this security posture, the Federal Risk and Authorization Management Program (FedRAMP) has announced the organization as an authorized FedRAMP Compliance Cloud Services Provider (CSP), effective June 21, 2013, for Infrastructure as a Service (IaaS). DCO represents USDA’s commitment to provide a FedRAMP compliant CSP (Agency ATO) to USDA agencies, staff offices, and non-USDA customers.
Data Center Operation – Hosting Services;
Encompasses cloud, managed, and collocation data center hosting services as well as key professional and security services to provide cost-effective enterprise class hosting solutions. Cloud services include standardized software, platform, and IaaS offerings that are delivered via secure, fully managed infrastructure that include ongoing technology refresh, key inheritable operational controls, and are competitive to the marketplace.

Enterprise Application Services;
Consists of two main divisions, Applications Engineering Division and Applications Solutions Division. The Applications Engineering Division of EAS provides program management and software engineering services across USDA agencies and Non-USDA agency customers. The Applications Solutions Division (ASD) of EAS provides innovative IT solutions that support the mission of USDA to specific agencies and non-USDA agency customers.

Commercial Cloud Services (CCS);
Provides strategy support on behalf of USDA to enable agencies to assess, plan, and leverage commercially available cloud offerings. Per department cloud policy, NITC has the role of Cloud Broker.

AgLearn Training Services;
The primary services of AgLearn include application and database hosting and maintenance services, AgLearn licensing and help desk support for end users and agency AgLearn administrators. AgLearn provides support for testing and implementation of custom agency specific online training, administration and delivery of mandatory training programs such as Cyber Security, Ethics, and Civil Rights, and acquiring, integrating and promoting external training within AgLearn. AgLearn also provides training and educational services for a fee to four external federal organizations (Broadcasting Board of Governors, Defense Nuclear Safety Board, Export-Import Bank, and the Institute of Museum and Library Services).

### Stakeholder group overview

OCIO provides data center operations, application development and wide-area network telecommunications services funded through the USDA Working Capital Fund and appropriations to all USDA agencies through the National Information Technology Center and the Enterprise Network Services with locations in Ft. Collins, Colorado; Kansas City, Missouri, and Washington, D.C.

OCIO also has direct management responsibility for IT desktop and end-user services through the Client Technology Services. This includes the consolidated IT activities for the Farm Service Agency, the Natural Resources Conservation Service, and Rural Development mission area.

#### Federal CIO Council

The CIO Council is the principal interagency forum on Federal agency practices for IT management. Originally established by Executive Order 13011 (Federal Information Technology), and later codified by the E-Government Act of 2002, the CIO Council’s mission is to improve practices related to the design, acquisition, development, modernization, use, sharing, and performance of Federal Government information resources.

The CIO Council serves the following key objectives:

- Develop recommendations for the Office of Management and Budget on Federal Government IT management policies and requirements;
- Establish government-wide priorities on information technology policy and monitor their implementation;
- Assist the Federal Chief Information Officer (Federal CIO) in the identification, development, and coordination of multi-agency projects and other innovative initiatives to improve Federal Government performance through the use of IT;
- Promote collaboration and community building among Federal Agency CIOs for purposes of sharing best practices, transferring knowledge, and developing a unified approach for addressing Federal IT challenges;
- Serve as a forum for collaboration on intra-agency IT portfolio management to reduce duplicative IT investments and drive the efficient use of IT resources across agencies within the Federal Government;
- Work with the Office of Personnel Management to assess and address the hiring, training, classification, and professional development needs of Federal employees in areas related to IT management;

**Key Issues**: Topics of interest reflect administration priorities and congressional interest. Attention has been particularly focused on IT modernization, cybersecurity, implementation of FITARA, and IT workforce hiring practices, recruitment and retention. USDA’s CIO participates fully in the Federal CIO Council monthly meetings and activities.

V. **Top Issues**

**Hot Topics**

**FEDERAL INFORMATION TECHNOLOGY ACQUISITION REFORM ACT (FITARA)**

Since enactment of FITARA, the Department has been establishing a process to effectively implement the Act and ensure that USDA’s IT Governance process fulfills Congressional intent and OMB guidance. FITARA remains a hot topic as additional implementation activities are needed to improve the coordination of CXO officials engaged with IT management, including the CIO, CFO, the Chief Human Capital Officer, the Chief Acquisition Officer, and the Budget Director. Furthermore, discussions will continue as to the allocation of resources necessary to ensure that USDA has an effective FITARA governance process.
Background

The Federal Information Technology Acquisition Reform Act was enacted on December 19, 2014, and outlines specific requirements related to the following:

- Federal Chief Information Officer authority enhancements
- Enhanced transparency and improved risk management in IT investments
- Portfolio Reviews
- Expansion of training and use of IT cadres
- Federal Data Center Consolidation Initiative (FDCCI), more recently known as the Data Center Optimization Initiative
- Maximizing the benefit of the Federal Strategic Sourcing Initiative (SSI)
- Government-wide software purchasing programs

In order to provide more specific guidance for the implementation of FITARA, OMB Memorandum M-15-14, Management and Oversight of Federal Information Technology, was issued. The objectives of M-15-14 states that covered agencies shall conduct a self-assessment that identifies current conformity with or gaps in conformity with a Common Baseline and Implementation Plan (herein known as the Common Baseline), and articulate an implementation plan describing the changes it will make to ensure that all Common Baseline and milestone and action table responsibilities are either implemented or provisioned for by December 31, 2015.

This self-assessment shall include a discussion of how Agency senior leaders and program leaders will work in partnership to facilitate the successful implementation of the Common Baseline and milestone and action table and how the Agency CIO will be enabled as a strategic partner integrated in shaping Agency strategies, budgets, and operations.

Details

- In response to the M-15-14 mandate, the United States Department of Agriculture developed the United States Department of Agriculture Federal Information Technology Acquisition Reform Act Common Baseline and Implementation Plan, dated November 14, 2015, which reinforces the role and authority of USDA’s CIO in establishing an inclusive, integrated governance process that manages IT as a strategic resource.
- In addition, the USDA established the Actions and Milestones Table, which captures the progression of tasks related to the success of the common baseline. The USDA Common Baseline establishes a framework for USDA to implement the specific authorities that FITARA gives to the Chief Financial Officer (CFO) Act Agency CIOs, and builds upon the responsibilities outlined in the Clinger-Cohen Act of 1996. The Common Baseline speaks to the roles and responsibilities of other applicable senior Department officials including the CFO, the Chief Acquisition Officer (CAO), Senior Procurement Executive (SPE), the Chief Human Capital Officer (CHCO), and the Director, Office of Budget and Program Analysis (OBPA) (the USDA CIO, CFO, CAO, SPE, CHCO and OBPA Director, as a group, shall herein be identified as the CXOs).
USDA also developed FITARA scorecards in the following domains:

1. IT Security
2. IT Investment Health
3. FAC P/PM Program Manager Certification
4. Data Center Consolidation/Optimization
5. Privacy Compliance
6. Acquisition Approval Request Compliance
7. Open Data Compliance
8. Section 508 Compliance

The Scorecards are designed to evaluate and score performance of the Agencies and Staff Offices in order to delegate authority down to the component CIOs. The USDA CIO will use these scorecards as part of his assignment plan strategy, providing empirical data to assist in assigning responsibility down to the component CIOs.

**Achievements**

1. Common Baseline submitted and was the first approved by OMB – August 2015
2. Implementation plan submitted and the only one approved in December 2015
3. Developed communication and coordination plan to collaborate with the CXO’s
4. FITARA DR in final clearance
5. Adoption of the ACT/IAC maturity model
6. Development of the IT Human Capital Plan
7. Provided updated information to OMB on the USDA Common Baseline Plan and Self-assessment in April and August 2016
8. USDA plans to implement the assignment plan and scorecard process in the 1st quarter of FY17.

**FITARA Next Steps**

USDA and the Agencies and Staff Offices will be instrumental in achieving FITARA compliance in FY 17. Many of the required actions will be implemented at the component Agency and Staff Office level.

1. Improve visibility and understanding of IT-related resources and investments and their relationship to mission priorities
2. Clarify and support the CIO and IT management authorities and accountabilities at all levels of leadership and management throughout the Department
3. Work collaboratively with OMB, the CXOs, the component CIO’s, OCIO ACIO and Directors, and other agency leaders to update the FITARA Common Baseline Plan, Milestones and Actions table quarterly as required by OMB and due by April 30, August 30, and November 30, 2017.
4. Complete the FITARA Signature Process Improvement Initiative.
   a. **Strategic Goal:** Management Initiative - Improve USDA services in support of people, processes, and information. Develop and implement streamlined processes that enable sound IT investment decisions and risk management. Experience cost and time savings when processes are
optimally designed so that less time is spent resolving and clarifying policies and procedures.

b. **Strategic Objective:** To establish a streamlined effective process to ensure effective acquisition and use of technology.

c. **Performance Goals:** Reduce the length of time from policy development to process implementation with respect to IT acquisitions. Adjust processes timely.

5. Develop and Submit the FITARA CIO Assignment Plan by April 30, 2017. Publish the FITARA CIO Assignment Plan to the USDA’s public website and include in the USDA public data listing within 30 days of receiving OMB approval of plan.

7. Assist USDA agencies and Staff Offices in establishing an inclusive governance process that will enable effective planning, programming, budgeting, and execution for IT resources.

8. Implement the IT Management Maturity Model by April 30, 2017. The IT Management Maturity Model includes explicit linkages to elements of the OMB Common Baseline and OMB’s Agency Submission Review and Analysis Plan where the team believes a Department would have achieved the requirements of the Common Baseline. The USDA target is for all components to obtain a Level 2 Evolving Maturity rating by 03/31/2017, Level 3 by 12/31/2017.

9. USDA did not receive additional funding to implement FITARA. USDA will need to identify a funding strategy for full implementation in FY17.

**CYBER SECURITY -- CONTINUOUS DIAGNOSTICS AND MITIGATION (CDM)**

**Background**

The Department of Homeland Security’s CDM Program provides federal departments and agencies with capabilities and tools that identify cybersecurity risks on an ongoing basis, prioritize these risks based upon potential impacts, and enable cybersecurity personnel to mitigate the most significant problems first. Congress established the CDM program to provide adequate, risk-based, cost-effective cybersecurity, and more efficiently allocate cybersecurity resources.

CDM is being implemented in three phases with a fourth phase anticipated. The CDM phases, objectives, and tools/capabilities are shown in the table below. USDA is working with DHS to implement Phase 1, and initiating the planning for Phase 2.
<table>
<thead>
<tr>
<th>CDM Phases</th>

                           • Audit and Monitoring Management  
                           • Risk Management  
                           • Boundary Protection |

**Key Details**

- USDA fully participates in the CDM program and volunteered as early adopters in Phase Two.
- The Phase 1 capabilities are:
  - **Hardware Asset Management (HWAM)** Identify unauthorized and unmanaged devices that are likely to be used by attackers as a platform from which to extend compromise of the network.
  - **Software Asset Management (SWAM)** Identify unauthorized software on devices that is likely to be used by attackers as a platform from which to extend compromise of the network.
  - **Configuration Settings Management (CSM)** Identify configuration settings (CCE) on devices that are likely to be used by attackers to compromise a device and use it as a platform from which to extend compromise to the network.
  - **Vulnerability Management (VUL)** Identify vulnerabilities (CVE) on devices that are likely to be used by attackers to compromise a device and use it as a platform from which to extend compromise to the network.
- We are currently implementing the capabilities of Phase One:
  - Hardware Asset Management (HWAM) solution, ForeScout CounterACT is 75% deployed. This is increasing Cybersecurity staff’s knowledge of systems on USDA networks and directly reducing exploitable cyber-attack
United States Department of Agriculture
2016 Presidential Transition
Office of the Chief Information Officer (OCIO)

surface by providing information about unauthorized or unmanaged devices.

- Software Asset Management (SWAM) solution, RES ONE, is currently 15% deployed, enabling access and control of the services and technologies employees need while reducing the risk of data breaches and cyber-attacks.

- Configuration Settings Management (CSM) and Vulnerability Management (VUL) solutions, IBM BigFix, is 100% deployed, enabling hardening of security configurations of systems on the network and timely detection and remediation of vulnerabilities of systems.

- DHS Cyber Security Dashboard and Security Event Integration Management (SEIM), using RSA Archer and Splunk, respectively, will be implemented by June of 2017. The SEIM collects and aggregates data from the Phase 1 solutions, correlates the data into meaningful events, notifies USDA’s Security Operations Center (SOC) of the event’s criticality and severity, and produces reports and feeds data to the dashboard. Upon implementation, USDA FISMA reporting will be streamlined through partial automation, with less human error.

- USDA is exploring options for funding out-year operations and maintenance costs after DHS funding ends after FY17. The projected annual cost to USDA to operate, maintain, and management the CDM Phase 1 tools, people, and processes after FY17 are:

- The request for additional funds will cover new CDM Phase 1 costs. First, it will fund FTEs and contractors for Tier II and III support, and cyber security analysis using CDM Phase 1 tools, capabilities, data, and processes:

  - Provide USDA’s 34 agencies/offices with CDM subject matter expertise, direct services, assistance, and guidance, in using Phase 1 tools, capabilities, and data, and integrate DHS’ CDM CONOPS and Phase 1 management processes (for asset, configuration, and vulnerability management) into agency IT and security operations.

- Next, additional funds will cover FTEs and contractors for CDM Phase 1 tool/software systems engineers (Jr. and Sr. Levels) and Tier I Help Desk Support:

  - Provide USDA’s 34 agencies/offices with enterprise-wide access and operations and management support to CDM Phase 1 tools and capabilities, continuously administering, operating, maintaining, modernizing, and
enhancing the CDM Phase 1 tools and ancillary hardware/software, virtual environment, and SAN storage.

- Additional funds will also be used for FTEs and contractors to provide agencies/offices with direct services and support for CDM tools and processes that require OCIO and ASOC to assess, prioritize, respond, and remediate vulnerabilities in near real-time, as well as, develop and/or update USDA Continuous Monitoring policies and procedures:
  - USDA Continuous Monitoring Policies and Procedures, and CONOPS;
  - Security Products Operations, Management, and Maintenance;
  - Monitoring Security Tools, Information, Events, Threats, and Vulnerability State;
  - Triage, Analysis and Reporting; and Response and Remediation;
  - Liaising and Integration with USDA Agencies’ IT Operations, Security, and Mission/Program Processes, and
  - Promote Ongoing Assessment and Authorization of USDA IT Systems

- Finally, additional funds will be used to fund License Renewal and Vendor Maintenance and Support costs for the CDM Phase 1 tools—ForeScout CounterACT, IBM BigFix, RES Workspace Manager, Splunk, and RSA Archer, and the ancillary hardware and software (e.g. Dell and HP servers, Gigamon network taps, VMware virtualization software, etc.) for the ASOC Security Enclave environment where the CDM Phase 1 tools are hosted.

- Without the additional funds, OCIO and the Office of Information Security (OIS) will not be able to maintain, operate, and manage the CDM solutions required in OMB M-14-03, and will not be able to develop, implement, and maintain the USDA-wide CDM policies, procedures, and CONOPS for Continuous Monitoring required by DHS and the Federal CIO and OMB.

NATIONAL INFORMATION TECHNOLOGY CENTER (NITC)
Becoming a Federal-wide Interagency Shared Service Provider

**Background**

USDA has the opportunity to become an OMB/GSA sanctioned Interagency Shared Service Provider Data Center. As the business of USDA evolves, the IT infrastructure that supports the Department must change. Since 1992, the Data Center Operations (DCO) / National Information Technology Center (NITC) has an established a business model that support customers internally and externally in a shared service capacity today. NITC has successfully provided services to USDA and Federal Agency customers in varying capacities (Hosting, Application Development and Cloud technologies). The DCO/NITC has extensive experience in all aspects and a proven business model that supports service delivery in a shared service methodology. The DCO/NITC has 12 external customers that leverage NITC services which allow those customers to focus on meeting mission needs and business
delivery. The DCO/NITC has demonstrated significant value by leveraging efficiencies through the shared service model that has provided USDA with $30.1 million in savings over the past five years.

**Key Details**

The DCO/NITC service model offers several factors that contribute to OCIO’s ability to reduce rates. Offering shared services to a broader range of customers allows reduced costs through growth that leverages scalability and strategic sourcing – volume discounts. Labor costs per service/unit, as processes improve and services are centralize, can lower the unit costs offering savings through efficiencies. Shared costs (Facility, Security Governance, Customer Service, and Management) are spread over more units of production, resulting in lower unit costs per service. In addition, the automation of processes reduces manual effort and resourcing services which drives faster performance and quicker delivery of functional capabilities.

USDA Agencies will gain value for mission business functions as the DCO/NITC leverage expanded customer innovation requirements to service enable and broaden the portfolio of services and capabilities. Agencies will gain access to these services as they are made available on a broader enterprise & federal government-wide scale. They will get access to expanded service catalogs that allow them to leverage the additional capabilities to solve mission needs and deliver business value. Agencies’ IT investments for infrastructure capabilities are lowered through economies of scale. Providing a diverse portfolio of services positions the agencies to make business value decisions on their delivery of technology and innovation efforts that support transformation. Expanding customer numbers will drive value through process automation, efficiencies through expanded capabilities, and stronger experience with lessons learned that can be shared with all customers.

**Risk Consideration Factors**

The most prevalent considerations are the security risks and the DCO/NITC approach to mitigating them. The DCO/NITC has provided secure “multi-tenant” services that included Non-USDA Agencies since 1992. The DCO/NITC services are designed to segment customer’s information logically utilizing industry best practices that provides proven Cloud Provider security experience. The DCO/NITC Cloud Hosting Services includes Federal Information Security Management Act (FISMA) 800-153 Rev 4 “High” controls to protect Agencies’ systems from Cyber-attacks. The FISMA requirements call for continuous annual monitoring and auditing of system security controls. In addition, the DCO/NITC FISMA standards with additional Federal Risk Authorization Management Program (FedRamp) security controls for cloud services. We leverage industry partners to assess our security practice to validated DCO/NITC solutions receiving a clean audit for the past five years. The DCO/NITC will implement DHS mandated Continuous Diagnostics and Monitoring (CDM) Program to provide additional security assurances such as Disaster Recovery Preparedness – “USDA Insurance Program”. The DCO/NITC ensures all facets of the Disaster Recovery Infrastructure are thoroughly tested and documented for Agencies two times per year (Spring and Fall DR exercises).
United States Department of Agriculture
2016 Presidential Transition
Office of the Chief Information Officer (OCIO)

**Action Taken**
The DCO/NITC met with OCFO WCF Board on September 21, 2016, and received approval to submit an ISSP letter of interest to GSA. OCIO submitted the ISSP letter of interest on to GSA on September 30, 2016. GSA enthusiastically acknowledged receipt of USDA’s letter of interest.

**Next Steps**
The following activities are scheduled to be completed in the first quarter of fiscal year 2017:
- The DCO/NITC will seek concurrence from the EBoard to become an ISSP.
- OCIO will brief the full USDA CIO Council
- Develop business strategy - leveraging success/best practices from previous NITC experience
- If approved, OCIO will submit final ISSP Application to GSA package

WHAT WE DO: OUR MISSION
The Office of Human Resources Management (OHRM) provides overall Human Resources policy, guidance, administration and oversight for USDA Staff Offices, Mission Areas and Agencies. OHRM administers programs and policy pertaining to HR Policy, Labor/Employee Relations, Executive Resources Management, Equal Opportunity Accountability, Virtual University-Talent Management, Strategic HR Planning and Accountability, Diversity, Recruitment and Work/Life, and HR Enterprise Systems Management. OHRM Operations Division provides human resources operational support to Departmental Management and Staff Offices.

WHO WE ARE: OUR WORKFORCE
Our workforce consists of 130 employees from a variety of disciplines including HR professionals, educational, information technology and security specialists. Twenty one members of our team are remote employees located in 10 states.

WHO WE SERVE: OUR CONSTITUENTS
We provide HR guidance and IT services to all Staff Offices, Mission Areas, and Agencies. HR operational services are provided to all USDA Senior Executives, Leaders and Scientists, Political Appointees and Departmental Management and Staff Office Employees.

KEY UPCOMING DECISIONS
- Biennial requests for allocations to OPM for SES, SL and ST positions – March 2017
- Employee Engagement Strategy and goals for the next Federal Employee Viewpoint Survey – February - Survey takes place in May
- Develop and Implement a new Senior Executive Candidate Development Program – A minimum of 6 months is needed to develop, recruit and select candidates. The program takes an additional 18 months for a candidate to complete

BUDGET HIGHLIGHTS FY 2016
- Funding is mainly for salaries and comes through many funding streams. Absorbing COLA’s may require attrition.
- HR Operations was stood up this year with appropriated funds.
- HR Enterprise Systems is supported through the working capital fund for oversight and management of USDA HR IT systems.
I. Organizational Overview

The Office of Human Resources Management (OHRM) provides overall Human Resources policy, guidance, administration and oversight for USDA Staff Offices, Mission Areas and Agencies. OHRM administers programs and policy pertaining to HR Policy, Labor/Employee Relations, Executive Resources Management, Equal Opportunity Accountability, Virtual University-Talent Management, Strategic HR Planning and Accountability, Diversity, Recruitment and Work/Life, and HR Enterprise Systems Management. OHRM Operations Division provides human resources operational support to Departmental Management and Staff Offices.

OHRM, through its operating divisions, serves as a liaison between USDA, the Office of Personnel Management, Office of Management and Budget, the White House Counsel’s Office, labor organizations, employee organizations, and management/supervisor associations; and fosters innovation in all human resource areas in all disciplines throughout USDA.

Within OHRM, the Chief Human Capital Officer, the chief policy advisor on all human resources management issues at USDA, serves on the Chief Human Capital Officers Council to advise and coordinate the activities of members’ agencies on such matters as the modernization of human resources systems including the HR skills gaps as well improved quality of human resources information, and legislation affecting human resources’ operations and organizations.

Agency’s Mission/Strategic Plan

The OHRM Vision is to provide model strategic human resources management leadership, partnering with mission areas to attract and deploy a high-performing diverse USDA workforce. Our Mission is to ensure that USDA attracts and retains a high-performing workforce, well-equipped for today’s mission and well-prepared for tomorrow’s challenges. OHRM provides leadership and direction for administering USDA’s human resources programs and initiatives, and provides related analysis and advisory assistance to the Secretary, Mission Areas, Staff Offices and other policy officials to support informed decision making regarding USDA’s human resources programs.

OHRM Goals and Objectives

- Transform OHRM into a model Federal Human resources organization for effective program delivery by enhancing leadership, promoting employee engagement and focusing on improving customer and employee satisfaction.
- Develop and implement measureable statistics to continue improvement of Federal Employee Viewpoint Survey results.
- Support USDA strategic goals through the alignment of Human Capital Plans, ensuring human capital goals are linked to strategic goals and integrated into workforce planning holding USDA accountable for HR strategies, goals, management policies and programs.
Promote a diverse and high performing workforce by effectively developing human resources policies and human capital programs that support the recruitment, hiring, development, effective performance, and retention of employees.

Develop an effective Presidential Transition Program for Appointees and Executives across USDA

Key mission delivery performance measures

**USDA Strategic Goal 5:** Create a USDA for the 21st century that is high-performing, efficient and adaptable

**USDA Strategic Objective 5.1:** Develop a customer-centric, inclusive, and high-performing workforce by investing in and engaging employees to improve service delivery

**USDA Strategic Objective 5.2:** Build a safe, secure, and efficient workplace by leveraging technology and shared solutions across organizational boundaries

**USDA Strategic Objective 5.3:** Maximize the return on taxpayer investment in USDA through enhanced stewardship activities and focused program evaluations

Specific performance measures include:

- The Cultural Transformation Milestones and Metrics Report (CT) was established as part of the USDA strategy to address low morale and weak performance. Cultural Transformation is the process of creating a workplace where all employees and customers are treated with dignity and respect, and provided the opportunity for success. This transformation was accomplished through education, training, and experiential learning to establish a common philosophy and approach to the cultural transformation process. The CT report addresses issues regarding diversity and inclusion as part of a high-performance organization. The CT Report includes the following department wide goals and objectives:
  - Decrease in the veteran’s attrition rate, with the goal of eventual parity of Veteran and non-Veteran attrition rates.
    - Achieve the President’s 25% Veteran hiring goal by analyzing Veteran responses to the Federal Employee Viewpoint Survey, increasing the number of non-competitive hiring events by partnering with Veteran groups, conducting veterans listening sessions across the country, and creating Veterans mentoring programs and seminars for new veterans to USDA.
United States Department of Agriculture  
2016 Presidential Transition  
Office of Human Resources Management (OHRM)

- Number of cases ER/LR cases reviewed resulting in discipline or adverse action. Seven hundred forty-one cases reviewed against 245 individuals.
- Achieve 80 day Time to Hire for OHRM – currently at 86 days
- Certificate Use Rate – obtain 80% use rate of hiring certificates – currently at 45%
- Achieve 4% increase in hiring of persons with targeted disabilities - currently at 1.09%

- Move to a ranking of 10 in the “Best Places to Work”. USDA was ranked 11 out of 19 large Agencies in 2015. HR staff in OHRM rate USDA number 4 in terms of best places to work for HR staff. OHRM is ranked by its staff significantly above the government wide average in global satisfaction, employee engagement, and leadership.

Organization’s History

OHRM is a staff office in Departmental Management and reports to the Assistant Secretary for Administration. In addition, through its Executive Resources Division OHRM works directly with the Office of the Secretary and the White House Liaison to provide human resources support to political appointees, Senior Executives, Senior Leaders and Senior Science and Technology Service employees.

The USDA Departmental Human Resources program has had several names prior to the current organizational structure. The current OHRM was started in the fall of 2009 and provides HR oversight and administration at the department level. We also administer day to day operational HR services for the Departmental Management and certain Staff Offices while our main focus is Departmental HR policies and programs. Prior names included the Office of Human Capital Management and the Office of Personnel. Effective July 29, 2009, Secretary Vilsack established the office of Departmental Management combining several staff offices in order eliminate duplicate functions and organizational layering, improve quality of services and communications, and streamline processes and improve transparency to customers. The Office of Human Capital Management was changed to the Office of Human Resources Management (OHRM). OHRM was established to rebuild a human resource management program to meet human capital challenges at USDA. In 2012 all executive resources services were moved from the Agencies and consolidated in OHRM as part of the Administrative Solutions Project, Blueprint for Stronger Service.

The OHRM staff includes Policy, Virtual University, Diversity Recruitment and Work/Life, Executive Resources Management, HR Operations, Strategic HR Planning and Accountability, HR Enterprise Systems Management, and the Employee Relations/Labor
Relations division which includes EO Accountability. The divisions in OHRM provide a wide variety of support services for USDA.

The Policy Division prepares departmental regulations and issues guidance from the Office of Personnel Management and the Office of Management and Budget as it relates to Human Resources to include compensation, hours of duty, leave, performance management, employee recognition, employment, reorganization, classification, position management. Virtual University provides administration of USDA policy as it pertains to employee development and training programs. Diversity, Recruitment, and Work/Life Division sets departmental policy and provides leadership and oversight for diversity, Special Emphasis, recruitment for the hiring of a diverse workforce, and workplace initiatives to support employees and enhance the overall quality of life and wellness of the USDA workforce. The Executive Resources Management Division administers policy pertaining to the Department’s Executive Level employees as well as providing operational support for the Office of the Secretary and immediate organization. The Employee and Labor Relations Division develops and administers policies on labor-management relations, grievances, employee conduct, unacceptable performance, discipline, adverse actions, drug testing, employee assistance program and workplace violence and also provide operational services in these areas to Departmental Management and the Staff Offices. HR Enterprise Systems provides for execution of integrated USDA-wide human resources’ information technology systems. The HR Operations Division provides operational human resources functions for Departmental Management including all of the Staff Offices. The Strategic HR Planning and Accountability Division directs implementation of the Human Capital Accountability Framework title 5, CFR, Part 250 which provides a systematic means by which USDA monitors and analyzes performance on all aspects of human capital management policies, programs, and activities as they support the USDA Strategic Plan, USDA Strategic Human Capital Plan, and mission accomplishment and to ensure effectiveness and efficiency, and compliance with law and regulation and adherence to merit systems principles.

Organizational Chart
Biographies of career staff in key leadership positions

Roberta Jeanquart
Director, Office of Human Resources Management and Chief Human Capital Officer
202-690-2994, bobbi.jeanquart@dm.usda.gov

Roberta “Bobbi” Jeanquart serves as Director of OHRM and the Chief Human Capital Officer for USDA. She provides vision and leadership to USDA-wide human resources programs, including human resources policy, employee and labor relations, recruitment and diversity, and workforce and succession planning to name just a few. In addition, she serves as the USDA representative to the Chief Human Capital Officers Council. Ms. Jeanquart was also appointed by the Deputy Secretary to serve as USDA’s Senior Accountable Official for implementation of the Executive Order on Improving the Senior Executive Service and also was appointed to serve on the People and Culture Workgroup that helped develop the President’s Management Agency. Ms. Jeanquart has served in a number of leadership positions since joining USDA in 2009 including Deputy Assistant Secretary for Congressional Relations and Chief of Staff for Departmental Management. She is a graduate of USDA’s Senior Executive Service Candidate Development Program. Ms. Jeanquart has 11 years’ experience working on Capitol Hill serving as an associate staff to the House Agriculture Appropriations Subcommittee. She also served for 10 years as the executive director of the National Association of Resource Conservation and Development Councils a national non-profit organization. Ms. Jeanquart is a native of Wisconsin and holds a bachelor of arts in political science from Marquette University and completed her graduate studies in comparative politics at the University of Toledo.

Marsha Wiggins
Deputy Director, Office of Human Resources Management
202-690-2994, marsha.wiggins@dm.usda.gov

Marsha Wiggins currently serves as the Deputy Director for OHRM. She is responsible for providing oversight and direction to the OHRM staff responsible for activities directly affecting the delivery of Federal HR management programs, strategies and initiatives to more than 100,000 employees both national and internationally. Ms. Wiggins joined USDA in 2011 as the Chief Human Resources Officer for the Marketing and Regulatory Programs (MRP). Ms. Wiggins implemented Hiring Reform and established the MRP HR Center of Excellence. Prior to joining USDA, she spent 18 years with the US Customs Service managing global teams responsible for protecting the movement of people and goods entering and leaving the United States. She held the position of Deputy Executive Director for Human Resources Management Services in the Office of the Secretary, Department of Homeland Security. She led an HR Integrated Project Team as part of the Secretary’s Administrative Solutions Project. She is a native Washingtonian, and a graduate of George Washington University.
Karlease Kelly  
**Provost, U.S. Department of Agriculture Virtual University**  
202-720-0185, karlease.kelly@dm.usda.gov

Karlease Kelly serves as the Provost of the USDA Virtual University in OHRM. Dr. Kelly provides vision and leadership and coordinates with all USDA Training Officers and human resources professionals on employee development and training policies and programs including managing the USDA’s Senior Executive Service Candidate Development Program. She oversees USDA’s implementation of Federal training policies such as mentoring, individual development planning, details, new supervisor training, the Presidential Management Fellows program, intern training and development, and other programs to increase employee satisfaction and effectiveness. She is a member of the federal Chief Learning Officers Council, and is Deputy Chief Human Capital Officer for USDA. Dr. Kelly has over sixteen years of government service in USDA.

Patricia L. Moore  
**Executive Director, Executive Resources Management**  
202-720-8629, patty.moore@dm.usda.gov

Patricia L. Moore “Patty” currently serves as the Executive Director of USDA’s Executive Resources Management Division. She began her career with USDA over 37 years ago going through the ranks in human resources management serving in various roles to include employment, pay and leave administration, human resources policy, human resources systems and executive resources management ultimately serving as the Executive Director, Executive Resources Management Division in OHRM. Patty’s oversight and leadership were critical to the successful centralization of executive resources management into a fully functioning policy and operating division that provides guidance, oversight, and leadership to USDA Executive Level and Political employees on a USDA-Wide basis. Her management of this consolidation led to reduced costs and consistency of process throughout USDA. Patty led USDA to the first full certification of its executive performance management system.

N/A
United States Department of Agriculture  
2016 Presidential Transition  
Office of Human Resources Management (OHRM)

Organizational Budget and Financial Management

OHRM is funded through the DA Direct Appropriations account, Working Capital Fund, and through reimbursable agreements including Shared Services (greenbook) accounts.

Enterprise Workforce Data

- OHRM employs a workforce of 130 employees of which the following are full-time and part-time
  - Full-time: 130 employees
  - Part-time: 0 employees

- Of our total workforce, 20% are eligible to retire within the next year

- Our headquarters is located in Washington, D.C. which houses 85% of our workforce while the other 15% are considered remote employees. OHRM does not have any field offices; however, the “remote” employees use workplace flexibilities to work from their homes or local USDA offices.

- OHRM consists of 68% employees in the 201 and 203 series. The remainder of the employees consist of management analysts, training and development specialists, administrative support, EO accountability specialists, personal security specialists, and IT Information specialists.

II. Policies and Regulations

OHRM has lead the implementation of a number of Human Resources related legislation and Executive Orders in USDA including:

- Executive Order 13583 – Establishing a Coordinated Government-wide Initiative to Promote Diversity and Inclusion in the Federal Workforce;
- Executive Order 13518 – Veterans Employment Initiative;
United States Department of Agriculture  
2016 Presidential Transition  
Office of Human Resources Management (OHRM)

- Executive Order 13548: Increasing Federal Hiring of People with Disabilities  
- Executive Order 13164: Establishing Procedures to Facilitate the Provision of Reasonable Accommodation.

Statutory Authorities

Office of Personnel Management provides the rules that are applicable to civil service positions in the executive branch of the Government for administration of human resources policies, programs, and authorities through 5 U.S. Code, Part II, and the Title 5, Code of Federal Regulations, Parts 1-699, Parts 700-1199, and Parts 1200-End. Administration of these programs and policies is further delegated to the Secretary of Agriculture through Title 7, CFR. The Secretary has further delegated this authority to the Assistant Secretary of Administration, who has delegated the authority to administer personnel management authorities and to formulate and issue Department policy, standards, rules and regulations relating to human resources management for USDA to the Chief Human Capital Officer (CHCO)/Director, Office of Human Resources Management. The Director of OHRM hereby redelegates to Staff Offices, Mission Areas, Agencies, authority to exercise human resources authorities under Title 7 CFR § 2.91 and as prescribed in USDA’s Departmental Regulations or OHRM Advisory Notices. As noted in these directives and advisories, those non-delegable duties/authorities retained by OHRM for the various authorities described may not be further redelegated to the Mission Area Human Resources Directors. OHRM provides oversight on the use of the Human Resources authorities by the Agencies. OPM and OHRM’s Strategic Planning and Accountability Division periodically audit the human resources functions of the Agencies within USDA to ensure effective use of the authorities and to ensure adherence to merit systems principles.

Important Policies and Regulations

OHRM develops and implements a number of human resources related departmental regulations.

*Finalized within the last year:*

In addition, OHRM has established the Mission Area Human Resources Board (MAHRD) which provides a forum for Mission Area HR Directors to discuss and provide guidance on policy.

OHRM also supports the Secretary’s Executive Resources Board which develops policy and guidance for Senior Executives, Senior Leaders and the Senior Scientific and Technology Service. The board is made of representatives from each of the Mission Areas and provides recommendations to the Secretary.

**Overview of the policy/regulation review process**

OPM provides the regulations governing the administration of human resources programs for Federal departments. This authority is delegated to each Department for administration and implementation. Each Department is responsible for administering these authorities and developing implementing policy for their components. OHRM develops regulations and procedural guidance for Staff Office, Mission Area and Agency servicing HR office for implementation and administration of HR authorities. The CHCO and Deputy CHCO are the chief policy advisors on all human resources management issues at USDA and are charged with providing oversight and administration of HR activities across USDA to ensure the selection and development, training and management of a high-quality, productive workforce.

OHRM provides oversight, guidance, advice and counsel on the administration and implementation of HR policies across USDA components. This is accomplished through the OCIO Departmental Directives System. Implementing policy provisions are developed, subject to the OCIO directives clearance process, and issued for implementation as Departmental Regulations, Departmental Manuals, Departmental Notices, and Secretary’s Memoranda for implementation.

OHRM assists the Office of Personnel Management (OPM) with audits of human resources functions and reviews and provides guidance on all Agency audit responses to OPM.

**GAO and OIG Audits**

This report examines: (1) how the workforces of USDA's service center agencies changed from fiscal year 2003 to fiscal year 2012, (2) the extent to which USDA's policy on supervisory ratios aligned with OPM guidance in fiscal year 2012, and (3) the extent to which USDA’s service center agencies followed leading practices when closing offices and reducing staff in fiscal year 2012. GAO recommends, among other things, that USDA take actions to revise its supervisory ratios policy; amend its policy on organizational changes to follow leading practices; and require RD and FSA to document links between various incentives and reshaping or strategic goals. USDA generally agreed with GAO's findings, but disagreed with one finding and recommendation on supervisory ratios.

GAO was asked to review workforce planning for federal veterinarians. This report examines (1) department-wide efforts USDA and HHS have made for their routine veterinarian workforces, (2) the extent to which USDA has identified the veterinarians needed for emergency response to an animal disease outbreak, and (3) the steps OPM and other federal agencies have taken to achieve the goals of the government-wide strategic plan for the veterinarian workforce. GAO reviewed USDA, HHS, and government-wide workforce plans and interviewed relevant officials. GAO recommended that USDA assess and address veterinarian workforce needs for emergency response to an animal disease outbreak, and that OPM review agencies’ use of direct-hire authority for veterinarians and monitor and evaluate progress and obtain leadership support for achieving government-wide veterinary workforce goals. USDA partially agreed, noting that it has taken steps to assess its emergency needs.

III. Congressional Relations and Issues

Overview

- **Use of Administrative Leave.** Congress and GAO are concerned that the use of administrative leave has exceeded reasonable amounts. As a result, OHRM issued an Advisory to all Mission Areas, Agencies, and Staff Offices in October 2015 that states that no agency may not keep an employee on administrative leave beyond 30 consecutive calendar days in relation to an investigation, management inquiry, or disciplinary matter without the approval of the Director, OHRM. Agency Heads retain the authority to approve administrative leave for up to 30 calendar days, but only when an investigation or management inquiry of alleged misconduct is pending, during the notice period preceding formal discipline, or in a circumstance in which workplace safety could be compromised. Extensions of an initial administrative leave determination ultimately exceeding 30 calendar days will be considered upon submission of documentation to OHRM's Director of Employee and Labor Relations Division for review.

An agency may place an employee on administrative leave, consistent with the October 2015 Advisory, pending investigation or when the continued presence of the employee in the workplace may pose a threat or cause loss of, or damage to, government property, or services. Prior to placing an employee on administrative leave, an agency must consider other options such as an indefinite suspension, reassigning/detailing the employee, use of available leave, telework, or placing the employee on absent without leave.

Agencies may grant administrative leave to employees who cannot report to work due to: (1) an act of God, (2) a terrorist attack, or (3) another condition that prevents such employees from safely traveling to or performing work at an approved location.

Various legislative proposals have been under consideration in Congress to further limit the use of administrative leave.
Management of the Veterinary Medical Officer workforce. USDA and the Department of Health and Human Services veterinarians perform crucial work for public and animal health and for emergency response to an economically devastating or highly contagious animal disease – where USDA has a lead role. In 2009, USDA and the Department of Health and Human Services committed to department-wide efforts to address veterinarian workforce challenges, such as recruitment. In 2010, OPM issued a strategic plan for Federal veterinarians to help improve recruiting initiatives and emergency response plans. Congress asked the GAO to review workforce planning for Federal veterinarians.

Congress takes a keen interest in the organizational structure of USDA and currently requires notification of any significant reorganization in any Mission Area, Agency, or Staff Office which involves the movement of 5 people or more.

IV. Internal and External Stakeholders

Important relationships with other Federal Departments or organizations

- The Office of Personnel Management
- The Office of Special Counsel
- The Federal Labor Relations Authority
- The Merit Systems Protection Board
- Department of Interior
- Department of Labor
- The Chief Human Capital Officers Council – USDA’s CHCO serves on this Council to advise and coordinate the activities of members’ agencies on such matters as the modernization of human resources systems, improved quality of human resources information, and legislation affecting human resources operations and organizations. The Council is composed of the Director of the Office of Personnel Management (OPM), who serves as chairman, the Deputy Director for Management of the Office of Management and Budget (OMB), who acts as vice chairman, the CHCOs of the 15 Executive departments, and the CHCOs of 12 additional agencies designated by the OPM Director. Additionally, the Council has an Executive Director who coordinates and oversees the activities of the Council.
- USDA participates in the quarterly meetings of the National Council on Federal-Labor Management Relations (NCFLMR). The key issues are to develop strategies for supporting agency-level management forums and promoting partnership efforts between labor and management. The Deputy Secretary or Deputy Assistant Secretary for Administration have served as USDA designees to this council.
Stakeholder group overview

Internal USDA Stakeholders

- **HR Policy Board**, led by the Director, OHRM, and comprised of the Mission Area HR Directors. The purpose of Board is to serve as a steering group and decision-making body for key Departmental HR initiatives, policies and programs including enterprise HR information technology systems. The Board is led by the Director of the Office of Human Resources Management who serves as its Chair.

- **USDA Cultural Transformation Officer Council.** Secretary Vilsack established the Transformation Officer’s Council, comprised of SES representatives from each of the Mission Areas, Agencies, and Staff Offices, to establish annual Metrics and Milestones to measure progress toward the cultural transformation of USDA, and to monitor progress through monthly meetings and monthly reports to the Secretary. An annual end of year report is also issued.

- USDA’s Chief Learning Officer serves as the Chair of the Federal Chief Learning Officer Council. The Chief Learning Officer Council meets monthly to share best practice and maximizing the use of limited government resources to deliver effective and engaging learning and development opportunities to all Federal employees. The Chief Learning Officer Council has a Memorandum of Understanding to work with the Federal CHCOs Council.

- The Virtual University leads the USDA Training Officers Council, which meets bi-monthly to ensure there is consistency, quality, efficiency, and access throughout USDA regarding employee development and training. This group plays a vital role in addressing the human capital needs of USDA.

Federal Government Stakeholders

- **OPM Accountability Program Managers Council.** The Director for Strategic HR Planning and Accountability in OHRM co-chairs this council, which meets quarterly. The focus of the council is to improve Federal Human Capital Management.

- **OPM, Diversity and Inclusion in Government (DIG) Council.** The DIG was established in 2015 and operates under joint direction of OPM, OMB, and the Equal Employment Opportunity Commission. The DIG Council’s origins are rooted in the efforts of a 60+ Partners Working Group.
  - The DIG Council helps to develop guidance to cultivate workplaces supportive of inclusion, collaboration, employee engagement, transparency, information sharing, cognitive diversity, and equity for all Federal employees to enable the Federal Government to achieve “high-level organizational performance.”
  - Its formation fulfills Executive Order 13583, which established a coordinated government-wide initiative to promote diversity and inclusion in the Federal
workforce and provides a forum to improve senior leadership engagement and collaboration in strategic and operational diversity and inclusion priorities.

- **OPM, Office of Diversity & Inclusion (OPM ODI), 60+ Partners Working Group.** ODI hosts bi-monthly, Federal-wide meetings with Diversity and Inclusion agency staff to share best practices, information and support, and to implement Executive Orders and Presidential Memoranda.

- USDA participates in the quarterly meetings of the *National Council on Federal-Labor Management Relations (NCFLMR)*. The key issues are to develop strategies for supporting agency-level management forums and promoting partnership efforts between labor and management. The Deputy Secretary or Deputy Assistant Secretary for Administration have served as USDA designees to this council.

**External Non-Profit Groups**

*National Association of Federal Veterinarians (NAFV).* NAFV is a professional organization that serves as an advocate for member veterinarians in the Federal service. USDA meets periodically with this organization to discuss issues that impact the veterinarian profession – recruitment, retention, and training and development.

OHRM’s Diversity, Recruitment & Work/Life Division established Memoranda of Understanding (MOU) with the following external non-profit organizations that are affiliated with various special emphasis, veterans, and student interests. Each MOU directly relates to supporting an Executive Order and/or Federal regulation.

- Asian American Government Executives Network (AAGEN)
- Association of University Centers on Disabilities (AUCD)
- The American Legion
- Blacks in Government (BIG)
- Consortia of Administrators from Native American Rehabilitation Inc. (CANAR)
- Conference on Asian Pacific American Leadership (CAPAL)
- Council of State Administrators of Vocational Rehabilitation (CSAVR) and National Employment Team
- Federal Asian Pacific American Council (FAPAC)
- Federally Employed Women (FEW)
- Federal Managers Association (FMA)
- Hmong National development, Inc. (HND)
- League of United Latin American Citizens (LULAC)
- National Association of Hispanic Federal Executives (NAHFE)
- National Disability Mentoring Coalition (NDMC)
- National Image, Inc.
- National Coalition for Equity in Public Service (NCEPS)
- OPM - Pathways Programs (OPM)
- Puerto Rico Department of Economic Development and Commerce (PR DEDC)
- Society of American Indian Government Employees (SAIGE)
- Veterans Administration (VA for Vets)
Recent engagements with stakeholder groups

- The USDA Labor Relations Office has been attending NCFLMR since 2012. The reason for the engagements are to support the creation of agency-level management forums and promoting partnership efforts between labor and management. Outcomes are metric driven and reviewed annually.

V. Top Issues

Hot Topics

- **Secretary’s Executive Resources Board.** Each Federal agency is required by 5 U.S.C. § 3393(b) to establish one or more Executive Resources Boards (ERB’s), the members of which shall be appointed by the Secretary. The ERB conducts the merit staffing process for career entry into the Senior Executive Service (SES), entrants into the Presidential Management Fellow Program, and other functions relating to the management of the Department’s executive resources, as delegated by the Secretary, to include the oversight of HR matters related to SES and Senior Level (SL) and Scientific or Professional (ST) employees. Departmental Regulation DR-1061-003 dated November 4, 2014, establishes the policy for USDA’s ERB. The ERB is comprised of a Chairperson, a Vice Chairperson, and a mix of SES and SL/ST employees representing their Mission Areas, Agencies, and Staff Offices. The ERB meets monthly to discuss executive resources policies and procedures impacting SES and SL/ST employees and makes recommendations to the Secretary. **A new Chairperson will need to be appointed by the incoming Secretary.** The Vice Chairperson currently is a career executive and will continue the business of the Board until a new Chairperson is appointed. The current Chair is Acting Deputy Secretary Scuse.

- **2018/2019 Biennial Allocation Process.** Pursuant to 5 U.S.C. § 3133(a), Federal agencies are required – during each even-numbered calendar year (CY) – to examine their needs for Senior Executive Service (SES) positions for each of the two fiscal years beginning after such calendar year, and to submit to OPM a written request for each of such fiscal years. Although not expressly required by statute, Federal agencies conduct the same examination and submit a similar written request to OPM for their positions in the Senior Level (SL) and Scientific and Professional (ST) systems. OPM allocates SES, SL, and ST positions to Federal Departments and in accordance with these reviews. USDA’s current allocations are:

  - 399 SES slots
  - 42 SL slots
  - 49 ST slots

Through this process, called the biennial allocation process, OPM reviews organizational missions, plans, and structures to assess the extent to which executive resources are being used in
an efficient manner. OPM conducts this process as a part of the overall strategic management of the Government’s executive resources pool. The biennial allocation process requires OHRM, Executive Resources Management Division to conduct an assessment of all USDA executive resources needs and allows Mission Areas, Agencies, and Staff Offices to submit requests for new SES, SL, and ST allocations as appropriate, based upon changing or shifting mission critical work. As part of this process, Mission Areas, Agencies, and Staff Offices are also required to review the SES position designations (career reserved or general, career, and non-career) for all encumbered and vacant positions.

The Executive Resources Management Division currently is in the process of meeting with each Mission Area, Agency, and Staff Office to determine their executive needs for OPM data call that is anticipated in December of 2016 for the 2018/2019 biennial. A preliminary response to OPM on USDA’s anticipated needs will be due upon the receipt of the data call. A formal justification and accompanying documentation is required to be submitted in the first quarter of calendar year 2017 if USDA intends to request any additional executive allocations.

- **Certification of USDA’s SL/ST Performance System.** USDA has full certification of its SL/ST performance appraisal system, which expires October 27, 2017. To maintain this certification, USDA is required to submit a renewal request by April 27, 2017. Full certification allows USDA to pay SL/ST employees above the Executive Level III pay rate up to the Level II pay rate and have access to the higher aggregate pay limit for a period of 2-years. USDA has maintained full certification since October 28, 2011. The incoming Secretary will be required to approve the request based upon the recommendation of the ERB.

- **Executive Performance Appraisal Process.** Chapter 43 of Title 5, United States Code (USC) requires Federal agencies to provide for performance management of SES and SL/ST employees. Title 7 USC § 7657 requires the Secretary to develop a performance appraisal system for members of the Senior Science and Technology Service (SSTS). USDA has three performance appraisal systems that govern the SES, SL/ST, and SSTS employees. These are pay-for-performance compensation systems and require the Secretary's approval of all performance recommendations. USDA's performance cycle is from October 1 to September 30. For the fiscal year 2017 performance cycle, all eligible SES, SL/ST, and SSTS employees must be on established performance plans as of October 31, 2016. A fiscal year 2017 performance compensation plan and the establishment of any new or revised Departmental initiatives for fiscal year 2017 will need to be incorporated into fiscal year 2017 executive performance plans as soon as practical.

- **Moratorium on Senior Executive Service Qualifications Review Boards.** In accordance with 5 CFR 317.502(d), OPM may suspend processing of an agency’s SES Qualifications Review Board cases when the agency head departs or announces his or her departure. This is done to ensure the incoming head of the agency has the full opportunity to exercise his or her prerogative to make or approve executive resource decisions that impact the agency’s performance during his or her tenure. Upon the appointment of a new Secretary to USDA,
decisions will need to be made as to whether or not to approve any appointments or actions that have been suspended.

• **SAMMIES or Samuel J. Heyman Service to America Medals Awards.** The SAMMIES are an annual award offered by the non-provide organization Partnership for Public Service to recognize outstanding public service. The event is known as the Oscars of government service. The respected award has a rigorous selection process. It is named for the founder of the Partnership for Public Service, Samuel J. Heyman. Nominations are open in October for seven different categories of public service. Nominations close on January 15th. The status of the nominations are shared in April. Winners are invited to attend the black tie event in early Fall.

• **Cultural Transformation.** Under Secretary Vilsack, USDA initiated a Cultural Transformation effort in 2008 in response to law suits and complaints that were filed regarding program access. The purpose of Cultural Transformation is to ensure that every customer and employee is treated with dignity and respect and given an opportunity to succeed. Some of the themes associated with Cultural Transformation include effective employee communication and community outreach, process improvement, performance management, labor relations, employee development, workforce diversity and inclusion, and employee engagement. Overall, the initiative has been linked with a number of successes in making USDA a model workforce and driving high performance. An action plan has been developed annually with milestones and metrics for workforce diversity and inclusion; labor relations; leadership and employee development and accountability; training; and hiring reform.

• **Honor Awards.** The Lincoln Honor Awards Program is a non-monetary recognition program with a 66-year history. These awards are the most prestigious awards presented by USDA. The awards recognize noteworthy accomplishments that significantly contribute to the advancement of USDA’s strategic goals, mission objectives, and overall management excellence. Employees at all grade levels are eligible for recognition, as well as external organizations who partner with USDA to accomplish the mission of USDA.

• **USDA Senior Executive Service Candidate Development Program (SES CDP).** OHRM manages the SES CDP, which is governed by Federal regulation, as part of USDA’s succession planning effort. The regulation requires merit-based competition and specifies training and development. The 18 to 24 month program prepares a talented and diverse group of candidates to step into executive roles. Successful graduates of the program receive SES certification from OPM. Because they compete for entrance into the program, this certification enables graduates to be placed without further competition into executive positions. The USDA Executive Resources Board oversees the SES CDP.

• **Land Management Workforce Flexibility Act.** This Act (PL 114-47) was signed into law on August 7, 2015, and allows certain current and former land management agency employees who are serving or have served under a time-limited appointment to compete for any permanent position in the competitive service at a Land Management Agency, or any other agency, under “internal” merit promotion procedures. Land Management Agencies include:
OHRM has issued instructions to agencies to provide implementing instructions to servicing HR offices to ensure compliance with this Act.

• Per Executive Order 13522, in order to evaluate the effectiveness of labor-management collaborations in improving government efficiency, the Labor Relations Branch is responsible for leading the efforts for conducting an annual USDA Labor-Management Climate Assessment Survey for all USDA agency-level labor-management forums to measure the labor-management relationship across the entire USDA. Determining barriers for building effective partnership efforts between labor and management within USDA continues to be a hot topic.

• Affordable Care Act and Casual Employees.
USDA’s Forest Service (FS) has the authority to hire on the spot certain emergency workers to cope with sudden and unexpected emergencies related to wildland firefighting responsibilities and other hazardous incidents. In 2015, FS hired 7,212 emergency workers who are termed “casual hires.” Most of the casual hires work a few days or a few weeks, and are hired from the local area where the fire is located. However, there are occasions where the employees work for extended periods during the fire season. On October 17, 2014, OPM issued a regulatory change to 5 CFR 890 that applied the requirements of the Affordable Care Act (ACA) to temporary employees who work full time for more than 90 days. We initially believed that this change did not apply to casual hires. After consultation with Office of Personnel Management and the USDA Office of the General Counsel, it was determined that health benefits coverage must be offered under the ACA to this group of casual hires if they work more than 130 hours in a month for three consecutive months. These casual hires are paid by the Department of the Interior (DOI), who also employ casual hires. USDA is collaborating with DOI to ensure all qualifying employees are offered coverage beginning in January 2016 and throughout the summer fire season.

Timeline

December

• The Biennial Allocation Request to support the allocation of new SES, SL, and ST slots is due to the OPM by March 31, 2017.
January

- Honor Awards. Decisions are required in January/February for the fiscal year 2017 Secretary’s Honor Awards ceremony. Decision include whether to have the ceremony, the theme, and the timing of the ceremony, which usually falls in September or November.

- A new Chairperson for the Executive Review Board needs to be appointed within 30 calendar days after the appointment of a new Secretary.

- As soon as practical after the appointment of a new Secretary, decisions will need to be made as to whether or not to approve any new SES appointments or actions that have been suspended.

February

- Black History Month Observance. Observances take place in the Jefferson Auditorium. Senior-Level Appointees or the Secretary are Speakers at these events.

- No later than the end of February, determine whether to maintain Executive Order 13522, Creating Labor-Management Forums To Improve Delivery of Government Services, and if so, whether to develop different success metrics, to continue with labor-management forums, annual labor relations climate assessment surveys, and to develop alternate methods/procedures for administering the Pre-Decisional Involvement (PDI) process.

- Begin USDA Senior Executive Service Candidate Development Program (SES CDP). The recruitment, announcement and selection process to launch the program takes approximately 6 months. Candidates once selected typically complete the program in 18 months.

March

- Women’s History Month Observance.

- The Biennial Allocation Request and justifications to support the allocation of new SES, SL, and ST slots is due to OPM by March 31, 2017.

- Nominations for Presidential Rank Awards are generally due to OPM by March 31, 2017.

April

- Certification renewal for USDA’s SL/ST performance system is due to OPM by April 27, 2017.

May

- Asian Pacific American Islander Heritage Month Observance.
• The 2017 Federal Employee Viewpoint Survey (FEVS). OPM administers the FEVS annually. The FEVS includes indices that measure employee satisfaction and engagement. Employee engagement, which is defined as the willingness of employees to give discretionary effort toward reaching organizational goals, has been linked by studies to higher mission performance. The non-profit organization, Partnership for Public Service, uses results from the FEVS to produce the Best Places to Work in Government rankings every December. The FEVS is administered to a random sample of permanent full and part-time employees beginning in May. OHRM will follow the timeline and guidance established by OPM to prepare for the survey. Timeline: To be announced by OPM. The survey typically launches in May and is open for 6 weeks.

**June**

• LGBT Pride Month Observance.

• An approved compensation plan for the SES is due to USDA Executives by June 30, 2017. Any new or revised Departmental initiatives will need to be incorporated into executive performance plans as soon as possible, but no later than June 30, 2017, if executives are expected to be held accountable and rated on them during the fiscal year 2017 performance cycle.
Appendix A: Acronyms

WHAT WE DO: OUR MISSION
The Office of Operations (OO) provides leadership, direction, coordination, and guidance in activities throughout the National Capital Region relating to: facilities management, space management, engineering and architecture, physical and technical security, energy conservation, environmental sustainability and waste management, occupational safety and health, environmental compliance, and occupant emergency planning and emergency management. In addition, OO provides centralized business services including mail management, printing and duplication, a nationwide disability resource center, office supplies, shipping/receiving, warehouse and labor services, a Consolidated Forms and Publications Distribution Center and Centralized Excess Property Operations.

WHO WE ARE: OUR WORKFORCE
OO’s workforce is made up of approximately 198 on-board full-time equivalents (FTE) located in Washington, DC and Beltsville, Maryland. In addition, OO staff are supplemented by approximately 300 contract support staff.

WHO WE SERVE: OUR CONSTITUENTS
OO serves all USDA employees in the USDA Headquarters Complex and George Washington Carver Center (GWCC). OO ensures a safe and secure facility infrastructure and offers administrative services in the National Capital Region (NCR) in support of USDA Mission Areas and Agencies.

KEY UPCOMING DECISIONS
New South Building and GWCC Modernization Project Strategy: To address the many life safety and accessibility deficiencies, as well as the failing operational systems, USDA has developed a strategy to update complete modernization of the South Building.

People’s Garden Site Improvements and Perimeter Security Plan: Multi-phased project on the grounds of the USDA Headquarters Complex received National Capital Planning and Commission of Fine Arts concept approval in 2014. Upon approval, there is a 4-year limit to begin work or risk expiration of approval. Total project cost is estimated at $28M and includes critical security enhancements around the perimeter of the Complex.

BUDGET HIGHLIGHTS FY 2016
OO is funded through various streams including direct appropriations, Working Capital Fund (WCF), as well as Departmental shared cost programs (Greenbook). The Table below represents OO FY2016 funding (dollars shown in millions):

<table>

I. **Organizational Overview**

The Office of Operations (OO) provides leadership, direction, coordination, and guidance in activities throughout the National Capital Region relating to: facilities management, space management, engineering and architecture, physical and technical security, energy conservation, environmental sustainability and waste management, occupational safety and health, environmental compliance, and occupant emergency planning and emergency management. In addition, OO provides centralized business services including mail management, printing and duplication, a nationwide disability resource center, office supplies, shipping/receiving, warehouse and labor services, a Consolidated Forms and Publications Distribution Center (CFPDC), and Centralized Excess Property Operations (CEPO).

**Agency’s Mission/Strategic Plan**

Overall, OO supports USDA Strategic Goal 5 to *Create a USDA for the 21st Century that is high-performing, efficient, and adaptable*, as well as the following USDA Strategic Objectives: 5.1 – *Develop a customer-centric, inclusive, and high-performing workforce by investing in and engaging employees to improve service delivery;* 5.2 – *Build a safe, secure, and efficient workplace by leveraging technology and shared solution across organizational boundaries;* and 5.3 – *Maximize the return on taxpayer investment in USDA through enhanced stewardship activities and focused program evaluations.*

Internally within OO’s 2016-2017 Strategic Plan, OO has the following Mission Statement, Vision Statement, and Strategic Goals/Priorities. The following is a link to the plan: [http://www.hqnet.usda.gov/oo/docs/ ОО-SP%202016-2017%20%20FULL.pdf](http://www.hqnet.usda.gov/oo/docs/ ОО-SP%202016-2017%20%20FULL.pdf)

**OO Mission Statement:**
- Implement Technology & Innovation
- Deliver Customer Service
- Collaborative Marketing
- Develop People
- Model Stewardship
- Visible Leadership
- Highest Quality
- Constant Readiness

**OO Vision Statement:**

**OO Strategic Goals/Priorities:**
1. Improve Employee Engagement and Satisfaction
2. Improve Customer Satisfaction
3. Improve Services
4. Streamline Processes and Procedures
5. Reduce Operating Costs
Key mission delivery performance measures

Internally within OO’s 2016-2017 Strategic Plan, OO has established performance indicators for each of the 5 OO Strategic goals identified above.

In addition to this, OO has several key performance measures as part of the Agriculture Buildings and Facilities budget submission that support USDA Strategic Goal 5, and Objectives 5.1, 5.2, and 5.3 identified above. The following is an excerpt from the 2017 Agriculture Buildings and Facilities 2017 President’s Budget:

1/ Executive Order 13693 “Planning for Federal Sustainability in the Next Decade,” signed February 2015, mandates reduction of energy usage in Federal buildings by 2.5% per year between 2015 and 2025 to promote building energy conservation, efficiency, and management. OO is able to support this through energy conservation projects throughout USDA Headquarters Complex (South and Whitten Buildings) and GWCC. Examples in FY2016 include: installation of new ceilings and energy efficient lighting in the remaining hallways of the Whitten Building 4th floor; completion of the Whitten Building photovoltaic panel project with the installation of 320 panels estimated to produce 365,000 kilo-watts hours of power with an estimated cost avoidance of $50K.

2/ Performance measure targets are tracked against the Building Evaluation Report (BER) amount of approximately $145 million in deficiencies completed in 2014 (with escalation factored as appropriate) for any increases above the base for deferred maintenance. The BER evaluated existing conditions of the USDA Headquarters Complex and GWCC buildings, including: architectural elements, mechanical, electrical and plumbing systems, handicap accessibility, life and fire safety, elevators, structural integrity, and hazardous materials and provided a detailed reporting of deficiencies requiring repair or replacement.

Organization’s History

The Office of Operations was established January 12, 1982 under 7 CFR §2810.2. Delegations of authority to the Director, OO appear at 7 CFR 2.96 (https://www.law.cornell.edu/cfr/text/7/2.96). OO is a staff office under Departmental Management, reporting to the Assistant Secretary for Administration (ASA).
Biographies of career staff in key leadership positions

Duane Williams
Director of Operations
202-720-3937, Duane.williams1@dm.usda.gov

Duane Williams currently serves as the Director for the Office of Operations in Departmental Management. Prior to accepting that position, Mr. Williams served as the Deputy Director for the Office of Operations. He also served as the Deputy Director of Human Resources for Rural Development Agency prior to his appointment to the Office of Operations. Mr. Williams started his career with the Agricultural Marketing Service (AMS) 29 years ago as a Marketing Specialist in the Perishable Agricultural Commodities Act Branch, a regulatory program in AMS. During his time in AMS, he held multiple leadership and management positions. He is a 1986 graduate of North Carolina Agricultural and Technical State University, where he earned his Bachelor of Science degree in Economics with a concentration in Transportation and Logistics. He is also a graduate of USDA’s Senior Executive Service Candidate Development Program, administered through American University’s Key Leadership Program.

James Brent
Deputy Director of Operations
202-720-3937, James.brent@dm.usda.gov

Mr. Brent is the Deputy Director of the Office of Operations (OO). This Office is responsible for providing facilities management services, security, and operational support for agencies occupying USDA’s Headquarters complex, the GWCC and USDA leased facilities in the National Capital Region. Prior to joining OO, Mr. Brent served as USDA’s Employee Engagement Program Manager and Director of Diversity, Recruitment and Work/Life in the
Mr. Brent served as the Deputy Director of Manufacturing and Operations at the Bureau of Engraving and Printing. In this capacity, he provided leadership over the production, warehousing and shipment of approximately 4 Billion United States currency notes annually. Mr. Brent has worked at USDA since 2013 and for the Federal government for more than 26 years.

Mr. Brent has a passion for leadership development and employee engagement. He graduated from the Virginia Commonwealth University in Richmond Virginia in 1988 with a Bachelor of Science Degree in Business Administration and Management.

Tracey King
Chief of Staff/Management Analyst
202-720-3938, Traceyd.king@dm.usda.gov

Tracey King is a Management and Program Analyst with the Office of Operations and serves as the Chief of Staff providing direct support to the Director of Operations.

Ms. King joined the Office of Operations in 2001 and has an extensive knowledge of the functional responsibilities of administrative customer service oriented organizations, including finance/budget, procurement, human resources, property, and facilities management. She directs budget formulation, financial management, strategic planning activities in the Office of the Director, provides guidance and support to the OO Division Directors on managerial and administrative issues, and provides advice and guidance to the Office of the ASA on OO strategies, functions, etc.

Mrs. King started her Federal career in 1988 as a Procurement Assistant with the Naval Research Laboratory and joined USDA Rural Development where she served in various positions as a Procurement Analyst, Contract Specialist, and Management Analyst between 1993 -2001 before joining the Office of Operations.

She possesses the ability to analyze, communicate, and coordinate on a wide variety of administrative topics, crossing organizational and agency lines.

Morris Tate
Director, Program and Policy Support Staff
202-720-4134, Morris.tate@dm.usda.gov

Morris Tate serves as the Director, Program and Policy Support Staff, responsible for providing advice and assistance to Office of Operations (OO) senior management in the areas of strategic planning, oversight of OO’s management control program, and development of standard operating procedures and Departmental and OO Directives. In addition he serves as OO’s Labor Relations Officer, Telework Champion, and Management Control Officer. Morris previously served as the Chief, Washington Area Service Division, where he was responsible for operations and maintenance, repair and alterations, physical security, parking, concessions, and the USDA Child Development Center.
Prior work experience includes:

- Deputy Director, Facilities Division, Marine Corps Base, Quantico, Virginia;
- Deputy Maintenance Officer, Marine Corps Base, Quantico, Virginia;
- Facilities Maintenance Control Director, Marine Corps Air Station, Kaneohe Bay, Hawaii;
- Structural Engineer, private consulting firm, Honolulu, Hawaii
- Director of Transmission Design, Western Farmers Electric Cooperative;
- Engineering Consultant – foundations, soil mechanics, and construction materials testing, Norman, Oklahoma;
- Civil Engineer, Soil Conservation Services, Champaign Illinois, Kailua Kona, Hawaii, and Honolulu, Hawaii; and
- Laboratory Technician, Oklahoma Testing Laboratories.

Mr. Tate has a Bachelor of Science degree in Civil Engineering and a Master of Science degree in Civil Engineering from the University of Oklahoma. Mr. Tate is a graduate from the Federal Executive Institute and a licensed Professional Engineer in Hawaii and Virginia.

Carlos Casaus
Director, Materiel Management Service Center
301-394-0400, Carlos.casaus@dm.usda.gov

Carlos Casaus is the Director of the Materiel Management Service Center in Beltsville, Maryland. He oversees logistics support services to USDA and select non-USDA agencies in the Washington D.C. metro area.

Mr. Casaus came to USDA, Office of Operations, in August of 2006; and in July 2012, he was selected as Director of the Materiel Management Service Center. Prior to this selection, he served as Acting Director and was the Deputy Director of the Center. Previously, Mr. Casaus worked as a Financial Advisor in the financial services industry in Spain and Portugal. Prior to his work in financial planning, he served in the United States Air Force. During his 22-year Air Force career, Mr. Casaus served in key leadership positions such as Technical Training Instructor, Supply Superintendent, and Inspector General (IG) Supply Management Inspector. He earned numerous decorations including Defense Meritorious Service, Air Force Commendation, and Air Force Achievement, and National Defense Service medals. Mr. Casaus holds a Master’s degree from Webster University in Management, a Bachelor’s degree from Columbia College in Business Administration, and Associate degrees in Education and Logistics Management.

Thomas Hoffman
Director, Facilities Management Division
202-720-2804, Thomash.hoffman@dm.usda.gov

Mr. Hoffman joined the US Department of Agriculture, Office of Operations in 1999. He serves as the Director of the Facilities Management Division. Mr. Hoffman supervises the team that
designed and built the George Washington Carver Center (GWCC) and was responsible for the renovation of the early phases of the South Building Modernization, most recently Wing 5, through the American Recovery and Reinvestment Act (ARRA). Mr. Hoffman will continue to lead the Modernization Team in the renovation of the South Building and reconfiguration of the GWCC.

Mr. Hoffman guided the site selection team for Patriots Plaza III (PP3), which was USDA’s first major lease consolidation in the National Capital Region. He oversaw the development of the Housing Plan for PP3. He and his team coordinated the renovation of the USDA Child Development Center at the Yates Building which achieved gold certification from the United States Green Building Council. His team oversaw the design and development of the 5000 panel photo-voltaic farm at the GWCC, which provides for almost 50% of the campus’ electrical needs. A smaller installation at the Jamie L. Whitten Building was recently completed and is currently in the commissioning stage.

An Architect by background, Mr. Hoffman holds a Masters of Architecture degree from Clemson University and is licensed to practice in the District of Columbia. He also received his undergraduate degree, a Bachelor of Design, from Clemson. Throughout his career, Mr. Hoffman has championed energy conservation and sustainable design. In 2008, Mr. Hoffman became a Leader in Energy and Environment Design (LEED) Accredited Professional (AP). He graduated from the Federal Executive Institute Leadership for a Democratic Society in 2012.

Gilbert Stokes
Director, Protective Operations Division
202-720-6270, Gilbert.stokes@dm.usda.gov

Gilbert (Butch) Stokes Jr. comes with many years of operational and technical security experience, and was appointed as Director of Security for the Protective Operations Division on October 5, 2014. Mr. Stokes is a local native, and has spent almost his entire government career here at USDA, starting in 1989 as a file/mail clerk, and then joining the Office of Operations Security Staff in 1994 starting as a security assistant, and then elevating to a security specialist. Mr. Stokes left USDA in 2000 for a brief period to join the Bureau of Engraving and Printing security staff, but quickly returned in 2001. He became the Chief of the Technical Security Branch in 2003, and then became the Chief of the Security Programs Branch established in 2011.

D’Ann V. Clayton
Director, TARGET Center
202-690-0443, D'Ann.clayton@dm.usda.gov

D’Ann V. Clayton serves as the Director of the TARGET Center and oversees the nationwide operations of USDA’s Accessible Technology and Disability Resources Program.

Ms. Clayton brings a wealth of knowledge from projects in the information systems, quality management, and petroleum-chemical industries. In 2006, Ms. Clayton joined USDA, Animal and Plant Health Inspection Service (APHIS), as a Management Analyst to implement quality
assurance initiatives in Biotechnology Regulatory Services (BRS) and obtain ISO 9001:2008 certification on BRS’ permitting products.

Prior to her appointment in 2010 as the Director of the TARGET Center, Ms. Clayton served as the Special Emphasis Disability Employment Program Manager at APHIS-BRS. In 2009, she was awarded the APHIS Administrator’s Civil Rights Award for demonstrating considerable commitment and dedication to facilitating employment opportunities for persons with disabilities and increasing the awareness of disability issues throughout the organization.

Ms. Clayton holds a B.S. Degree in Chemical Engineering from Howard University, and is certified as a Project Management Professional (PMP).

**Dennis Banks**  
**Acting Deputy Director, Mail and Reproduction Management Division**  
202-720-8393, Dennis.banks@dm.usda.gov

Dennis Banks, better known as Dee, is currently the Acting Deputy Director of the Mail and Reproduction Management Division (MRMD) in the Office of Operations, US Department of Agriculture (USDA).

After serving his country in the US Army, Mr. Banks worked at the Xerox Corporation for ten years where he was trained in Total Quality Management and Lean Six Sigma. He has also been trained in Project Management at George Mason University. Mr. Banks left the Xerox Corporation to become a small business owner, where he earned a listing as an Honorable Professional of the National Directory of Who’s Who. He went on to lead major operations for such notable companies as Reprographics Technologies, Canon, and Home Depot.

Mr. Banks came to USDA after thirty plus years of success in the private sector where he mastered Business Process Re-Engineering, Finance, Work Flow Analysis, Process Improvement, and Cost Cutting Measures, which consistently helped businesses to improve their efficiency and effectiveness by 15 to 30 percent. He is in the process of using those skills to re-engineer the way that MRMD delivers services to its customers.

**Carmelnita Fossum**  
**Director, Executive Services Division**  
720-8482, Carmelnita.fossum@dm.usda.gov

Carmelnita Fossum was selected as the Director of Executive Services Division on May 15, 2016, after serving as Acting Director. As Director of Executive Services Division Ms. Fossum is responsible for providing administrative support services for the Office of the Secretary, the ASA, as well as the Under Secretaries for the USDA Mission Areas, which includes travel support. She is also responsible for customer service support activities at the George Washington Carver Center, Patriots Plaza III facility and the South Building Customer Services Office, which supports USDA’s Parking and Conference Scheduling in the South and Whitten Buildings.
Ms. Fossum is from Leavenworth, Kansas, and moved to the area to attend Howard University in Washington, DC on a Reserved Officer’s Training Corp, Quality Enrichment Scholarship in the School of Communications. Ms. Fossum started her career at USDA in October 1988 in the Office of Personnel where she worked for three years assisting with entry level employees entering the government through the Civil Service Examining Unit. In 1991, she began working in the Office of Operations where she has held many positions to include the Branch Chief of the Night Services Division, Acting Branch Chief of the Contracts Staff, and the last ten years as the Deputy Director of the George Washington Carver Center overseeing the facility, contracts, and government and contract employees.

Edward Hogberg
Director, Safety, Sustainability and Emergency Operations Division
202-720-3893, Edward.hogberg@dm.usda.gov

Ed Hogberg is the Director, Safety, Sustainability and Emergency Operations Division (SSEOD). In this capacity, he provides leadership and direction for the Office of Operations (OO) sustainability, safety and health, medical services, concessions, environmental management, and emergency management programs in USDA’s Headquarters Complex and George Washington Carver Center in the National Capital Region. Mr. Hogberg came to USDA, Office of Operations in 2003 and was selected as the Director SSEOD on October 21, 2012. Prior to his work with USDA, Mr. Hogberg was on active duty with the United States Air Force, where he served as a safety manager at Andrews Air Force Base, MD. Mr. Hogberg was on Active duty with the Air Force for ten years serving around the globe in logistics management and safety management. Mr. Hogberg holds a B.S. degree in Environmental Management from the University of Maryland University College and a Masters of Public Administration from American Military University.
Organizational Budget and Financial Management

OO is funded by the following sources, (see FY2016 Budget Highlights in the Fact Sheet for amounts totaling $88.6 million):

- **Agriculture Buildings and Facilities, Building Operations and Maintenance.** This account finances the repair, improvement, maintenance, physical security, sustainability and energy conservation activities at the USDA Headquarters Complex and the George Washington Carver Center in Beltsville, MD, including the administrative costs for the building management and support staff. Since 1984, USDA has been delegated the responsibility for managing, operating, maintaining, repairing, improving and securing the Headquarters Complex, which encompasses 14.1 acres of grounds and 2 buildings containing approximately 2.5 million gross square feet of space, as well as the USDA-owned GWCC that comprises 350,000 gross square feet, located on 45 acres.

- **Working Capital Fund (WCF).** Within OO, the WCF finances the following activity centers:
  - Materiel Management Services Center (MMSC; formerly Beltsville Service Center) – provides centralized excess property operations and consolidated forms and publication distribution.
  - Mail and Reproduction Services (MRS; formerly Mail and Reproduction Management Division) – provides mail services and copier/duplicating activities.
  - WCF Administrative Support Costs (ASC) account established for the management and oversight of WCF activities. This is a limited funding source in OO.

- **Shared Cost/Program Reimbursable (Greenbook).** This account funds OO functions/staff as follows:
  - TARGET Center - Supports the Department's workforce diversity and Federal Workforce 2001 policies and provides information on technologies to ensure equal access to electronic technologies and automated systems essential to today's jobs for people with visual, hearing, speech, mobility, or dexterity impairments. The program now includes the oversight of sign language interpreter services.
  - Medical Services - Provides preventative health measures such as health screening, nutritional principles and fitness awareness that lead to a higher quality workforce environment for employees, and contractors in the National Capital Region (includes the Headquarters complex, the George Washington Carver Center and the Patriot Plaza offices).

- **DA Direct.** Available for Departmental Administration (DA) to provide for necessary expenses for management support services to offices of the Department and for general administration, security, repairs, and alterations, and other miscellaneous supplies and expenses not otherwise provided for and necessary for the practical and efficient work of the Department. This is a limited funding source in OO and funds approximately 11 full-time equivalents (FTE) providing administrative program support, travel management, serves as liaison for coordination and management of facilities modifications and repair and alterations for the Office of the Secretary and Mission Area Under Secretaries in the NCR.
OO Budget authority for the period FY2009 through FY2016 (for all OO accounts) is shown below and included in the attached Excel spreadsheet.

¹ Beginning in 2015 GSA Rent and DHS Security were included in Agency Budgets.
² Includes Materiel Management Service Center and Mail & Reproduction Services. Beginning in 2013 includes admin support costs (ASC)
³ Includes TARGET Center/Interpreting and Medical Services. Prior to 2015, Shared Cost included USDA HQ Visitors Center and Interpreting.

Narrative for Major Budget Changes
In 2009, the Agriculture Buildings and Facilities, Building Operations and Maintenance (BOM) account was given $61,843,000, however a later sequestration order of $30,610,833 resulted in a total BOM in 2009 of $31,232,167. In addition, in 2013, BOM was provided $48,528,000 and an additional $27,906,000 for “life safety projects.” The $27,906,000 was later rescinded along with an additional $2,094,000, resulting in a total BOM of $46,434,000 in 2013.

General Services Administration (GSA) Rental Payments and Department of Homeland Security (DHS) were decentralized in 2015 and included in Agency Budgets.
Enterprise Workforce Data

Office of Operations
Workforce FY 2009-FY 2016

GS Level Distribution

WS SES, 1%

GS 13- GS 15, 33%

GS 5 - GS 7, 31%

GS 8- GS 12, 21%

Wage Grade, 15%
• OO has a workforce of approximately 198 on-board FTE located in Washington, DC and Beltsville, Maryland. Of the total positions, 2 are part-time and the remainder are full-time.
• OO has a diverse workforce with approximately 40 percent of the workforce performing warehouse, supply management, materials handling, motor vehicle, printing, copying/duplicating, and mail management functions. The remaining workforce includes positions performing architect/engineering, facilities management/operations, quality assurance, electrical and mechanical, security, emergency management, sustainability, safety/occupational health, and administrative/management/program analysis functions.
• OO does not employ seasonal employees. During the summer months, OO typically supports several paid and unpaid interns including Pathways and the Thurgood Marshall program. During FY2016, OO had one (1) Pathways student.
• During FY2015, OO employed one (1) temporary employee.
• Of our total workforce, 54 employees are eligible to retire by September 30, 2017.
United States Department of Agriculture
2016 Presidential Transition
Briefing Material Template – Agency Level

• OO has 141 bargaining unit employees.
• Our headquarters is located in Washington, D.C. with approximately 80% of staff at this location. The additional 20% are located in Beltsville, Maryland.
• OO is a headquarters based staff office and does not have any regional offices.

II. Policies and Regulations

Statutory Authorities

Delegations of Authority for OO are found at 7 CFR §2.96.

USDA has been delegated the responsibility for managing, operating, maintaining, repairing, improving and securing the Headquarters Complex buildings under the 1984 Delegation of Authority from GSA. USDA has custody and control of these facilities.

With respect to OO’s responsibility for management and operations of the USDA Headquarters Complex GWCC, and leased facilities in the NCR, USDA complies with:

• Executive Order (EO) 13693 “Planning for Federal Sustainability in the Next Decade,” signed on March 19, 2015
• OMB Memorandum M-12-12, Section 3, “Reduce the Footprint,” dated March 25, 2015
• Departmental Regulation (DR) 1620-002, “USDA Space Management Policy,” dated May 17, 2004
• Agriculture Property Management Regulations (AGPMR)

Important Policies and Regulations

OO does not have overall regulatory or departmental nationwide policy responsibilities (with the exception of the Nationwide Mail Management program). However, OO does issue USDA Headquarters policy for OO functions under its delegated authority. Within the last year, the following Departmental Regulations (DR) are underway or have been finalized:

• DR 1650-001, Physical Security Program (finalized March 3, 2016). This regulation establishes policy, standards, and responsibilities, to develop and maintain a comprehensive physical and technical security program for USDA facilities in the National Capital Region (NCR).
• DR 1633-001 Employee Parking and Ridesharing (review underway). This regulation prescribes the United States Department of Agriculture policies for implementing the employee parking and ridesharing programs for the headquarters complex.

The Office of Procurement and Property Management (OPPM), a Staff Office within DM, has overall policy responsibility for USDA’s real property nationwide and issues policy through Departmental Regulation’s supplemented by AGPMR’s. OO has overall responsibility for space
in the NCR and in coordination with OPPM, follows appropriate DR’s and AGPMR’s when working with Agencies in the NCR on space requests.

Overview of the policy/regulation review process

OO follows Departmental guidance issued by the Office of the Chief Information Officer contained in DM-0100-001 entitled “Procedures for Preparing Departmental Directives,” to ensure appropriate formatting and clearance procedures are followed when issuing and updating DR’s.

As mentioned above, with respect to real property in the NCR, OO is responsible for assigning and coordinating all space actions within the NCR and complies with policy and guidance issued through DR’s and AGPMR’s by OPPM (who has overall USDA nationwide real property responsibility).

Recently in preparation for modernization, OO, through the ASA’s office issued a Memorandum to Subcabinet Officials, Agency Heads, and Staff Office Directors on April 22, 2016, emphasizing the importance of compliance with the OMB “Reduce the Footprint” initiative, as well as DR-1620-002, and AGPMR Advisory 16-01 “Space Utilization Rate Policy,” mandating an average of 150 square feet per person or less. In addition, the Memorandum restricts construction of new private offices, satellite offices, conference rooms, kitchenettes, break-rooms, and storage rooms. Additionally, the Memorandum discussed leveraging alternate work schedules and telework strategies combined with hoteling and/or desk sharing.

GAO and OIG Audits

OO does not have any Office of Inspector General or Government Accountability Office audits.

III. Congressional Relations and Issues

Overview

USDA Headquarters Modernization

Congressional Report on Headquarters Modernization (in response to House Report 113-468) was delivered to Office of Management and Budget (OMB) and a meeting was held on September 15, 2016 between OMB, and the following USDA officials: Dr. Gregory Parham, Assistant Secretary for Administration, Todd Batta, Assistant Secretary for Congressional Relations, and Mike Young, Director, Office of Budget and Program Analysis. The meeting provided an opportunity for USDA to discuss the new South Building and GWCC Modernization project strategy (discussed in greater detail in paragraph VI a., below). A copy of the report can be provided upon request.
IV. Internal and External Stakeholders

Important relationships with other Federal Departments or organizations

OO partners and collaborates with the following Federal Departments or organizations with respect to functional responsibilities within OO including: facilities management, space management, engineering and architecture, physical and technical security, energy conservation, environmental sustainability and waste management, occupational safety and health, environmental compliance, occupant emergency planning and emergency management, centralized Departmental business services including mail management, printing and duplication, a nationwide disability resource center, office supplies, shipping and receiving, warehouse and labor services, a Consolidated Forms and Publications Distribution Center (CFPDC), and Centralized Excess Property Operations (CEPO):

- General Services Administration (GSA)
- Department of Homeland Security (DHS)
- Department of Energy (DOE)
- Federal Protective Service (FPS)
- District of Columbia Department of Transportation (DCDOT)
- National Park Service (NPS)
- National Capital Planning Commission (NCPC)
- Commission of Fine Arts (CFA)
- District of Columbia State Historic Preservation Office (DCSHPO)
- United States Postal Service (USPS)
- Government Printing Office (GPO)
- Office of Management and Budget (OMB)

For the most part, OO is a customer for major services including HR, IT, Finance, etc. The exceptions are as follows:

OO’s Materiel Management Service Center (Working Capital Fund activity) maintains a Centralized Excess Property Operation with disposition responsibility of excess property for all USDA agencies in the Washington Metropolitan Area. Serves as one of several government authorized federal surplus property Sales Centers and provides excess property support to government agencies via Memorandum of Understanding (MOU). In addition, they provide a Consolidated Forms and Publications Distribution Center to support USDA agencies nationwide as well as other government agencies through MOU’s.

OO’s Mail and Reproduction Management Division (MRMD) has more direct customer interaction with USDA employees than any other organization in USDA. MRMD is responsible for the USDA nationwide Mail Management Program, Departmental Mailing List Service, Transportation Operations, and Copier/Duplicating Services.
The Technology and Accessible Resources Give Employment Today (TARGET) Center provides resources to agencies nationwide in the areas of accessible technologies and reasonable accommodations for employees with disabilities.

**Stakeholder group overview**

Specifically, during FY2016, OO engaged in the following:

**American Federation of State, County and Municipal Employees, Local 2846:**
Approximately 141 of OO employees are bargaining unit employees represented by American Federation of State, County and Municipal Employees (AFSCME) Local 2846. A collective bargaining agreement (CBA) referred to as the 2010 Collective Bargaining Agreement effective as of September 30, 2012, is in place between the OO of the United States Department of Agriculture and AFSCME Local 2846. The following excerpts, from Sections A-C of the CBA are provided for information:

“Section A. Parties to the Agreement
The parties to this Agreement are the U.S. Department of Agriculture, Office of Operations, (OO)Washington, D.C. metropolitan area, hereinafter known as the “Agency,” “Employer,” “OO,” or “Management” and AFSCME Local 2846, hereinafter known as the “Union.”

Section B. Unit of Recognition
The unit of recognition covered by this Agreement is that unit certified by the Federal Labor Relations Authority in Case No. WA-RP-05-0054. The Employer recognizes the AFSCME, Local 2846, as the exclusive representative of all employees (hereinafter sometimes referred to as “employees” or “bargaining unit employees”) in the bargaining unit as defined below.

Section C. Bargaining Unit Coverage
This agreement covers all professional and non-professional employees employed by the USDA, OO in the Washington, D.C. metropolitan area including professional and nonprofessional employees, but excluding all guards, management officials, supervisors, employees described in title 5, United States Code (U.S.C.), Section 7112 (b)(2), (3), (4), (6) & (7).”

OO has a Labor Management Forum which meets regularly to discuss pre-decisional and other issues as they arise. The OO Forum includes representation by all OO Division Directors and all Union officers (President, Vice President, Council representative, and stewards). OO has a very harmonious relationship with the Union. In FY2016, there were no major issues.

**National Park Service:**
NPS holds ownership of USDA grounds on the North side of the Whitten Building and has parking oversight on Jefferson Drive. Therefore, OO regularly coordinates with NPS on issues impacting the grounds around the Whitten Building, including events on or around the Mall. Examples include, but not limited to: July 4th, Inauguration, opening of the Smithsonian National Museum of African American History and Culture, protests, and other events as necessary.
GSA:
OO has initiated direct discussions with GSA Executives to develop a common understanding on how both Agencies will support facility projects and initiatives of mutual interests. This effort has resulted in a significant improvement in the relationship for both Agencies and paved the way for critical discussions including modernization of the South Building, GSA requirements for USDA rent payments, and the National Liberty Memorial (to name a few). During FY2016, OO and GSA held monthly teleconferences.

Senior Executive Customer Service Advisory Council (SECSAC):
During FY2016, OO formed the SECSAC. Representative include senior leaders and/or Deputies for Management from Departmental Management, Rural Development, Agricultural Research Service, Farm Service Agency, and Natural Resources Conservation Service, whose tenure and experience at USDA will provide a myriad of benefits in support of OO’s Customer Relationship Management (CRM) Program. Members will help shape OO’s strategy to be a more customer centric organization and to be viewed by its customers as a service provider of choice. The SECSAC will guide OO in two broad objectives. First, it will focus on our service delivery standards. Second, it will advise on quality, timeliness, and the effectiveness of the services OO provides and define data and information requirements that our customers need to track delivery of services. The first meeting of the SECSAC was held during the 3rd quarter of FY2016.

V. Top Issues

Hot Topics

- **New South Building and GWCC Modernization Project Strategy**
The USDA, OO has been working for over 25 years (beginning with the 1995 Modernization Project) with extremely limited funding to maintain and modernize the historic USDA Headquarters Complex. With mounting deferred maintenance, aging infrastructure, long-standing life safety issues (unabated hazardous materials, lack of critical fire safety systems, outdated electrical systems, etc.), and non-compliance with contemporary building and accessibility codes, the USDA Headquarters is the only agency headquarters in Washington, D.C. that has not been modernized. The business-as-usual model of requesting modernization funds from Congress has not provided a viable means for funding the over $140 million in deferred maintenance or the funding required to complete modernization.

To address the many life safety and accessibility deficiencies, as well as the failing operational systems, USDA has developed a strategy to complete modernization. The goals and objectives of the new modernization strategy are to correct the serious deficiencies with the South Building and to achieve operating cost reductions both by reducing the footprint through the elimination of all leases in the NCR and by improving energy efficiency. While continuing to reduce USDA’s real property footprint is important through elimination of leased facilities, each day that
the South Building remains without proper fire protection, which would be corrected through the installation of an automatic sprinkler system, the safety of all occupants and visitors is seriously compromised. Likewise, modernization will allow the Department to achieve energy reduction goals, which will lower present operating expenses.

The Appropriations Committees have directed USDA to provide a report on Modernization activities. The report will provide information on the history of the Modernization project and may also outline options for the funding of future renovation activities. Included amongst future Modernization phases will be the development of a change management and space plan to ensure that appropriate consideration is given to the potential impacts on agency and office staff affected by construction and renovation activities. As the Modernization proceeds, OO will begin working with all the agencies and offices located in the national capital region to gather information about agency/office specific space needs, which will inform the modernization plan. The modernization plan also will require negotiations with various labor unions, which have not yet begun.

- **People’s Garden Site Improvements and Perimeter Security Plan**

  The HQ Perimeter Site Improvement and Security Plan is the plan for improving security and sustainability around HQ buildings by incorporating mandatory security protection elements into the sustainability features of the HQ grounds in support of Executive Orders 13693 and 13508. This plan is a product of cooperation between USDA, the National Capital Planning Commission, GSA, the DC State Historic Preservation Office, and the National Park Service. Site improvements under this plan are separate and apart from the larger USDA South Building and GWCC Modernization plan.

  USDA commissioned the People’s Garden Site Improvements and Perimeter Security project to expand the People’s Garden Initiative across its headquarters’ grounds with a focus on sustainability, landscape enhancement, and education. In addition, as the only federal office building on the National Mall which also houses a Cabinet level position, USDA required a perimeter security plan. The scope of the project includes the expansion of the People’s Garden theme with sustainable practices site-wide; integration of low impact development practices site-wide including bioretention swales, permeable and pervious paving, soil cells for street trees and rain gardens; integration of Level IV Perimeter Security; and a reduction of on-site parking.

  The People’s Garden site improvements and perimeter security is a multi-phase project that encompasses the entire grounds of the USDA Headquarters Complex. Following presentations, USDA received conceptual approval of the site development plans from the National Capital Planning Commission (NCPC) and the Commission of Fine Arts (CFA) in July 2014. Upon approval, Federal Agencies have a 4-year approval limit to begin construction or face a new requirement to obtain approval again. OO has requested funding in the FY2018 budget to for this project.
The HQ People’s Garden is OO’s Garden and the USDA flagship demonstration garden that supports public engagement in support of the Agricultural Marketing Service nationwide People’s Garden initiative.

- **National Liberty Memorial**
  The National Liberty Memorial (Memorial) was authorized on January 2, 2013, by Section 2860 of Public Law 112-239 (Jan. 2, 2013). It allows the National Mall Liberty Fund D.C. (Fund) to establish a memorial on eligible Federal land to honor the more than 5,000 slaves and free black persons who served as soldiers and sailors or provided civilian assistance during the American Revolution. On September 26, 2014, P.L. 113-176 approved the establishment of the Memorial within Area I, the area comprising the central Monumental Core of the District of Columbia and its environs. Potential sites within Area I for the Memorial includes properties under the control of GSA and Department of the Interior. The three sites include: the Interior South Triangle (Virginia Avenue/19th Street), Freedom Plaza, and the **west side of the Jamie L. Whitten Building** (the preferred site of the Fund given its proximity to the Washington Monument, its location along 14th Street as a gateway into and out of the city, and high volume of pedestrian traffic the site receives). The site also has a connection to the National Museum of African American History and Culture.

  GSA, as the property owner has the overall lead responsibility for this project. However, USDA has and continues to be committed to working with our partners. The next step in the process is the development of a Memorandum of Understanding (MOU) between GSA, USDA, and the Fund to include: roles and responsibilities; information on design development; and narrative that supports and articulates the role of African Americans in the Revolutionary war and its relationship to Agriculture.

- **USDA Child Development Center**
  USDA has a long history of providing child care facilities for children of its employees. Since 1991, this service has been provided at the Sidney R. Yates Building (a GSA-owned facility), located at 201 14th Street, SW, Washington, DC 20250. Prior to completion of the renovation of the Yates Building, the site was located in the basement. On September 9, 2014, USDA held a grand opening and ribbon-cutting to officially open the newly constructed state-of-the-art Child Development Center (CDC). The project (administered by GSA), was a design build contract, designed by MTFA (Michael T. Foster Architects) and constructed by Grunley. The CDC serves up to 80 toddlers and infants 6 weeks – 5 years of age, and is conveniently located on the first floor of the Yates Building near USDA leased and owned facilities in the Central Business District. The first floor location is safer and provides multiple on grade egress points. In addition, the space provides a healthier learning atmosphere with an abundance of natural light featuring green building materials. Bio based and rapidly renewable materials were utilized along with energy
efficient lighting and high performance mechanical systems. The classroom entrance vestibules were inspired by barns and the linoleum floor patterns were inspired by cultivated fields. The classroom doors mimic the original doors used in this landmark building, which is listed on the National Register of Historic Places.

The CDC playground recently reopened in early October 2016 after being closed for the GSA-managed exterior brick re-pointing project.

- **Park Center Lease**
  The lease at the Food and Nutrition Service Building, Park Center in Alexandria, VA, expires 5/31/2017. The General Services Administration (GSA) is analyzing the six, Final Proposal Requests (FPRs) received September 23rd. The current time frame for occupancy of the new facility is between June 1, 2017 and May 31, 2018. An extension of the Park Center lease will likely be required. General requirements for the replacement facility include: ISC Level III security requirements; the offered space must be contiguous and accommodated in no more than one building; must be within 2,640 walkable linear feet of an existing Metrorail station. As the liaison for space in the NCR, OO has assisted FNS and GSA with developing the Program of Requirements and other logistics; however, GSA has the lead on the leasing acquisition and award. The result of the award of the new lease will directly affect FNS and the Office of Hearings and Appeals that also has staff housed in the Park Office Center. Staff for these agencies will need to eventually be relocated to the new facility following the lease award and build out time at the new facility.

- **Implementation FY 2017 Projects**
  - Design of room S-0410 to accommodate relocation of S-100 data center (total cost $3.5 million)
  - Replacement of blue flagstone at Whitten apron terrace ($200k)
  - Replace mini-mall chiller ($295K)
  - TV studio HVAC repairs and enhancements ($200k)
  - Design and construction for GWCC Solar panels and wind turbines ($750K)
  - Perimeter Fencing at GWCC ($300K)
  - Replacement of Whitten basement floor tile ($412k)
  - Enhancement to People’s Buffet ($175K)

WHAT WE DO: OUR MISSION

The Office of Homeland Security and Emergency Coordination (OHSEC) mitigates risk and safeguards USDA personnel, customers, assets, and information by leading Government-wide initiatives and championing USDA’s equities in homeland and national security. OHSEC is responsible for Departmental emergency operations, continuity of operations, security clearances, classified information, intelligence and counterintelligence, physical security policy, safety of ionizing radiation, and coordinating all homeland and national security policy, planning, and preparedness activities for USDA.

WHO WE ARE: OUR WORKFORCE

- 65 headquarters-based employees
- 6 Divisions and Office of the Director
- OHSEC FTE includes Emergency Management Program Specialist, Health Physicists and Adjudicators

WHO WE SERVE: OUR CONSTITUENTS

OHSEC’s professional workforce coordinates emergency management and security policy and operations with USDA Agencies and Staff Offices. OHSEC works across the federal government to provide USDA’s perspective on homeland and national security topics.

KEY UPCOMING DECISIONS

- Revise Secretary’s Critical Information Requirements.
- Decide on timeline for training of incoming leaders on emergency and continuity of operations responsibilities.
- Determine scope and implementation for security training for the 100,000-strong USDA workforce (e.g., Active Shooter Preparedness, Human Trafficking Awareness, Counterintelligence, Insider Threat, General Security Awareness, and Border Security).

BUDGET HIGHLIGHTS FY 2016

Besides a small direct appropriation, OHSEC is primarily funded through the Departmental Reimbursable Programs (DRP). The DRP funds the USDA Emergency Operations Center, Continuity Planning Division, Personnel and Document Security, HSPD-12 initiative, and Radiation Safety activities.

FY 2016 Budget Authority

- Homeland Security Appropriated
- DA Appropriation
- Radiation Safety
- COOP
- Emergency Ops
- Personnel and Document Security
- Classified National Security Info
- Facilities Infrastructure
- HSPD-12
WHAT WE DO: OUR MISSION
The Office of Procurement and Property Management (OPPM), an organization under the Departmental Management (DM) within USDA, oversees a $6 billion dollar procurement program and a large, diverse property portfolio that includes more than 20,000 buildings, 17,000 structures, and 40,000 vehicles. OPPM provides leadership, policy guidance, and services in the areas of procurement and category management, real and personal property, safety and health management, and environmental and sustainability programs through 7 divisions. In addition, OPPM oversees the Federal BioPreferred program, Purchase Card program, and Integrated Acquisition Systems. OPPM serves as the procuring office for the Office of the Secretary, DM staff officials, and USDA agencies, as requested.

WHO WE ARE: OUR WORKFORCE
As of September 2016, there are 115 full-time permanent positions across the 7 divisions including 103 staffed and 12 vacant positions. OPPM employs 1 person in Alabama, 1 person in Tabernash, CO, 1 person in Denver, CO, and 24 people in Ft. Collins, CO.

KEY UPCOMING DECISIONS
- Category Management- Identifying future categories of savings.
- Federal Information Technology Acquisition Reform Act (FITARA)
- Labor Compliance - Executive Order 13673, Fair Pay and Safe Workplace

WHO WE SERVE: OUR CONSTITUENTS
OPPM issues Department-wide policy and provides procurement services to DM staff offices and other agencies. We serve the USDA vendor community and stakeholders to include farmers and other groups. We also operate Department-wide procurement systems.

BUDGET HIGHLIGHTS FY 2016
Our overall budget authority is $38.1 million; 1) DA Direct account includes the Office of the Director, Sustainability, Procurement Policy Division, Property Management Division, and Safety and Health Division; 2) Procurement Operations Division has working capital fund (WCF) authority; 3) Procurement Systems Division has WCF authority for its Integrated Procurement Systems; 4) Hazardous Materials Management has appropriated no year funds; 5) LASD receives their funds from agency reimbursable agreements; and 6) BioPreferred receives mandatory funding from the Farm Bill.
United States Department of Agriculture
2016 Presidential Transition
Office of Procurement and Property Management (OPPM)

I. Organizational Overview

Executive Summary

The Office of Procurement and Property Management (OPPM), an organization under the Departmental Management (DM) within USDA, oversees a $6 billion procurement program and a large, diverse property portfolio that includes more than 20,000 buildings, 19,000 structures, and 40,000 vehicles. OPPM provides leadership, policy guidance, and services in the areas of procurement and category management, real and personal property, employee safety and health management, and environmental and sustainability programs through 7 divisions. In addition, OPPM oversees the Federal BioPreferred program and serves as the procuring office for the Office of the Secretary, DM staff offices, and USDA agencies, as requested.

Agency’s Mission/Strategic Plan

The Office of Procurement and Property Management (OPPM) provides department-wide policy, leadership and guidance for procurement, property, environmental stewardship, and employee safety. Ongoing OPPM mission delivery for acquisition, property, environmental and sustainability, and employee safety and health management processes across USDA are in alignment with and support the USDA Strategic Plan.

The Office of Procurement and Property Management (OPPM) does not have an individual Strategic Plan, but ensures that it aligns with and supports the USDA Strategic Plan. Information regarding OPPM programs may be found at: http://www.dm.usda.gov/oppm/.

Mission, goals and objectives for OPPM Program areas:

- **Procurement Policy**
  The Procurement Policy Division (PPD) serves to optimize USDA Acquisition outcomes in order to facilitate and maximize accomplishment of USDA’s agencies missions. PPD aspires to help buying activities optimize acquisition outcomes through comprehensive and innovative Customer Engagement, Compliance and Oversight.

- **Procurement Systems**
  The mission of the Procurement System Division (PSD) is to provide reliable and integrated data solutions, products, and services in support of USDA’s acquisition community, as well as consolidated oversight, guidance, and program assistance to the USDA Purchase and Fleet Card communities.

- **USDA’s Strategic Sourcing Initiative (AgSSI)**
  The USDA’s Strategic Sourcing Initiative (AgSSI) is a collaborative, cross-functional effort that encompasses over 100 subject matter experts across five Category Teams; Information Technology (IT) Hardware, IT Software, Real Property, Fleet and Lab Equipment and Supplies. The purpose of AgSSI is to permanently alter and enhance
the way USDA performs acquisition and procurement activities and functions with the intent of maximizing the return on taxpayer investment with no adverse impact to products procured and mission service delivery. To date, AgSSI has provided approximately $35 million in cost savings and avoidance through the use of changed business processes, shared resources, and consolidated acquisition methods.

One of the highest achievements for the AgSSI team is the ability to align with GSA and OMB on Federal initiatives and for the most part, USDA was ahead of these leading Agencies and was asked to share our business practices in SSI with them and other Federal Agencies. AgSSI complements the Federal Category Management work, providing insight into specific category groups and methods for tracking “Spend Under Management”, as well as having subject matter experts available as new category management policies emerge.

AgSSI is continuing work in each Category Team, identifying new areas to explore for potential savings and avoidance. Additionally, AgSSI is continuing to refine and update the Savings Tracker and Spend Cube to provide more comprehensive insight into USDA’s spending trends.

- **Procurement Operations**
  The Procurement Operations Division (POD) was converted to a Working Capital Fund Activity Center in Fiscal Year 2014, to provide a full range of cradle-to-grave procurement services to the Office of the Secretary of Agriculture, Departmental Management and Staff Offices, and other USDA Agencies.

- **Property Management**
  The Property Management Division (PMD) provides leadership, services and solutions to oversee the management of USDA’s real, fleet, and personal property assets.

- **Sustainability**
  In response to growing concerns about climate change, greenhouse gases, and depleting natural resources, USDA creates sustainable and innovative opportunities for farmers, ranchers, forest landowners, public land managers, and families in rural communities. USDA recognizes the significance of global climate change and utilizes this knowledge to create and maintain conditions under which humans and nature can exist in productive harmony. USDA has achieved a 31% reduction in Scope 1 and 2 Greenhouse gases compared to a 2008 baseline and 29.4% of our total electric energy use is from renewable energy. In its own operations, USDA is committed to fostering a clean energy economy and to improving the environment, complying with environmental laws and regulations, and leading by example.

- **Solar Energy**
  USDA is committed to the use of renewable energy for its operations, including the deployment of photovoltaic (PV) panels. In 2015, USDA installed a 1.6 megawatt solar array at the George Washington Carver Center in Beltsville, Maryland, the largest
Federal PV structure in the region. Throughout the United States, USDA has other large and small PV installations that are helping to reduce the nation’s dependency on fossil fuel-generated power and to save taxpayers’ dollars.

- **Lease Accountability and Strategy (LASD)**

The Lease Accountability and Strategy Division (LASD) ensures effective management and oversight of Service Center Agency leases to minimize costs and improve support for stakeholders and employees engaged in lease management.

As a result of the significant achievements and synergy gained as a result of the Center of Excellence for Leasing project, it was recommended by the Secretary and Mission Area Heads that USDA establish a permanent LASD to be administered through a Program Management Office (PMO) within Departmental Management, Office of Procurement and Property Management (OPPM). LASD will provide portfolio planning services and ensure effective management and oversight of Service Center Agency (SCA) leases, to minimize costs and improve support for stakeholders and employees engaged in lease management. Effective lease management creates the foundation for cost savings, accountability, and strategic space management.

The establishment of an LASD leverages shared resources, improves transparency, and supports data-driven decisions for strategic planning, streamlining and standardizing lease processes, and promoting cost-saving or cost avoidance strategies for the SCAs. LASD will strive to eliminate holdover leases, support long-range lease planning, and become a leader in accountability and compliance for other delegated agencies throughout the Department and the Federal government. This change will create a new organization comprised of a staff of 9 employees who will provide leasing services such as quality assurance reviews, performance monitoring, standardization of lease processes, and reporting to GSA and NFAC status of the leasing portfolio.

- **Environmental Management**

The Environmental Management Division (EMD) manages the BioPreferred program, the Hazardous Materials Management Program (HMMP), and the Sustainability Program.

The USDA Biobased Markets Program, known as the BioPreferred® Program, expands markets for biobased products through a mandatory federal procurement preference program and a voluntary certification initiative. For more information, see: [http://www.biopreferred.gov](http://www.biopreferred.gov).

The Hazardous Materials Management Program (HMMP) has the goal of protecting and restoring Natural Resources on USDA managed lands by prioritizing and addressing contamination in a manner that weighs risks to human health, impacts to the environment, and opportunities to form partnerships to leverage USDA resources.
EMD’s Sustainable Practices Team facilitates the development and implementation of sustainable policies, procedures with the goal to facilitate a net zero environmental footprint at USDA facilities.

- **Safety and Health Management**
  The mission of the Safety and Health Management Division (SHMD) is to develop Department wide policies governing workers compensation and promote and assist the development of USDA safety programs.

**Key mission delivery performance measures**

**Procurement Policy**

**Percentage of Overdue Reports in Contractor Performance Assessment Reporting System (CPARS)**

This information provides details on timely reporting of contractor past performance in CPARS as these reports are critical in helping to predict future contracting outcomes. The following chart shows the percentage of overdue reports by reporting year:

<table>
<thead>
<tr>
<th>Year</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>2012</td>
<td>77.7%</td>

</table>
Decrease the risks for fraud, waste, abuse, and misuse: CCSC has implemented strong monitoring controls and oversight via OMB A-123 processes, including questionable transactions reporting and monitoring, monitoring for inactive cards as well as personnel that have left the agency, and other monitoring reports. CCSC will continue to work towards eliminating the number of open A-123 corrective action plans (CAPS), which has already been significantly reduced from 17 in 2014 to 1 in 2015. Eliminating these CAPS will help address risk areas.

Lease Accountability and Strategy

In alignment with Strategic Goal 5, Objective 5.3, the LASD has maximized the return on taxpayer investment in USDA through effective stewardship of resources and focused program evaluations by eliminating holdover leases with no negative impact to the working condition of employees and no additional cost to the pocketbook of taxpayers.
United States Department of Agriculture
2016 Presidential Transition
Office of Procurement and Property Management (OPPM)

The LASD focuses on streamlining the lease process and improving data integrity by sharing resources throughout the lease management project team and partnering with agencies.

Internal Performance Metrics for LASD are being developed.

Safety and Health Management

On July 19, 2010, President Obama established a 4-year Protecting Our Workers and Ensuring Reemployment (POWER) Initiative, covering fiscal years 2011 through 2016. Under the POWER Initiative, each executive department and agency will be expected to improve its performance in seven areas.
Organization’s History

The Office of Procurement and Property Management (OPPM) was established in 1994 concurrent with the enactment of the Federal Acquisition Streamlining Act and the establishment of Chief Acquisition Officer and the Senior Procurement Executive positions Federal wide. The Director of OPPM serves as the Senior Procurement Executive and is responsible for management direction of the procurement system of USDA, including implementation of the procurement policies, regulations, and standards of the agency. The Senior Procurement Executive directly reports to the Chief Acquisition Officer. At USDA the Assistant Secretary for Administration serves as the Chief Acquisition Officer.

The BioPreferred Program was established under the authority of section 9002 of the Farm Security and Rural Investment Act of 2002 (the 2002 Farm Bill), as amended by the Food, Conservation, and Energy Act of 2008 (the 2008 Farm Bill), and further amended by the Agricultural Act of 2014 (the 2014 Farm Bill), 7 U.S.C. 8102.

Organizational Chart
Biographies of career staff in key leadership positions

Lisa M. Wilusz  
Director  
202-720-9448, Lisa.Wilusz@dm.usda.gov

Lisa M. Wilusz serves as Senior Procurement Executive and Director for U.S. Department of Agriculture’s (USDA’s) Office of Procurement and Property Management (OPPM). Ms. Wilusz has over 20 years’ experience with the Federal government. She began her Federal career in 1995 as a contract specialist with USDA’s Food and Nutrition Service agency and worked four years as a procurement analyst supporting U.S. Department of Transportation’s Research and Special Programs Administration. Additionally, Ms. Wilusz has extensive experience managing enterprise level IT projects.

In her current role, Ms. Wilusz is responsible for providing department-wide policy, leadership and guidance for several functional areas including procurement, property, environmental stewardship, and employee safety. She oversees a $6 billion acquisition program and provides direct leadership for a procurement operations office that manages procurements with an annual value exceeding $500 million. Ms. Wilusz is leading efforts to strengthen USDA’s acquisition workforce and improve acquisition and property management processes across USDA.

As a Presidential appointee to the Ability One Commission, Ms. Wilusz serves as Vice Chair whose mission is to provide meaningful employment opportunities to persons who are blind or have significant disabilities. The AbilityOne Commission oversees a $3 billion procurement program that employs more than 45,000 disabled Americans who supply services and goods to support Federal programs. Finally, Ms. Wilusz oversees the Federal BioPreferred Program, which encourages the development and use of biobased products in Federal and private sectors.

Joseph A. Ware  
Associate Director  
202-720-9448, Joe.Ware@dm.usda.gov

Joseph A. Ware is Associate Director, USDA Office of Procurement and Property Management (OPPM). In this position he provides leadership for policy and oversight for USDA procurement, property, and environmental stewardship programs.

As Deputy Director in the Office of Small and Disadvantaged Business Utilization (OSDBU), he was instrumental in creating and fostering opportunities for small and disadvantaged businesses to participate in USDA contracting. He initiated and led outreach and technical assistance programs for constituents in underserved areas to expand the number of small businesses securing contracts to provide products and services to USDA and other federal agencies.
At the Office of the Chief Information Officer, he directed Clinger-Cohen Act implementation, USDA information technology (IT) capital planning and investment control, IT security and standards, and technical approvals for procurements.

He began his Federal career in 1973 at the Agricultural Stabilization and Conservation Service (now Farm Service Agency) as an economist and as staff assistant in the Office of the Administrator. Also at that agency as project manager for implementation of distributed computing, he initiated and implemented new management and technology functions while providing day-to-day user support for headquarters personnel and state offices.

United States Department of Agriculture
2016 Presidential Transition
Office of Procurement and Property Management (OPPM)
Enterprise Workforce Data

Workforce FY 2009-FY 2016

GS Level Distribution

GS 13- GS 15, 80%
GS 8 - GS 12, 17%
GS 5 - GS 7, 2%
GS 8-SES, 2%

United States Department of Agriculture
2016 Presidential Transition
Office of Procurement and Property Management (OPPM)
Office of Procurement and Property Management (OPPM), employs a workforce of 115 employees that are 100% full time.

Out of OPPM’s total workforce 17% are eligible to retire within the next year.

OPPM Headquarters is located in Washington, D.C which houses 76% of our workforce.

OPPM has 1 field office, located in Ft. Collins, Colorado, and 3 remote employees in other states. (See Workforce data excel sheet for locations).
II. Policies and Regulations

Statutory Authorities

Procurement Policy and Procurement Operations

USDA follows the Federal Acquisition Regulations (FAR) and USDA’s Agriculture Acquisition Regulations (AGAR), a supplement to the FAR. The following provides a list of key legislative and regulatory authorities, none of which have expired or will in the next year.

7 CFR 2.24 (a)(7) and (8) http://edocket.access.gpo.gov/cfr_2003/7cfr2.24.htm
This section of the Code of Federal Regulations outlines the delegations of authority which are made by the Secretary of Agriculture to the Assistant Secretary for Administration who also serves as USDA’s Chief Acquisition Officer (CAO). PPD works to assist the CAO in promulgating the responsibilities discussed therein.

7 CFR 2.93 http://edocket.access.gpo.gov/cfr_2007/janqtr/7cfr2.93.htm
This section of the Code of Federal Regulation outlines the delegations of authority which are made by the Assistant Secretary for Administration to the Director, Office of Procurement and Property Management who also serves as the Senior Procurement Executive (SPE). PPD works to assist the SPE in promulgating the responsibilities discussed therein.

Title 41 of the United States Code (41 U.S.C.)
The purpose of this Act is to enact certain laws relating to public contracts and to:
(1) Provide overall direction of Government-wide procurement policies, regulations, procedures, and forms for executive agencies; and
(2) Promote economy, efficiency, and effectiveness in the procurement of property and services by the executive branch of the Federal Government.

Property Management and Lease Accountability and Strategy

7 CFR 2.93 This section of the Code of Federal Regulations outlines the delegations of authority which are made by the Secretary of Agriculture to the Assistant Secretary for Administration who also serves as USDA’s Chief Acquisition Officer (CAO). PMD works to assist the CAO in promulgating the responsibilities discussed therein.

Public Law 106-580, Federal Property and Administrative Services Act of 1949

Environmental Management

**H.R.2642 Agricultural Act of 2014** The 2014 Farm Bill provides the legislative authority for the BioPreferred Program. The Farm Bill will expire at the end of 2018 and the program will need to be reauthorized.

**Comprehensive Environmental Response, Compensation, and Liability Act of 1980** (CERCLA), aka Superfund) Superfund is a Government program designed to fund the cleanup of sites contaminated with hazardous substances and pollutants.

**40 CFR 300.920 National Oil and Hazardous Substances Pollution Contingency Plan** This plan facilitates the Government’s response to both oil spills and hazardous substances.

**Executive Order 12580** Superfund Implementation and **Executive Order 13016** Amendment to Executive Order 12580. The Superfund Implementation delegates a number of Federal departments and agencies the authority and responsibility to implement certain provisions of CERCLA.

Safety and Health

**Federal Employees Compensation Act (FECA)** Worker’s Compensation for Federal Employees

**Occupational Safety and Health Act (OSHA)** Primary Federal law which governs occupational health and safety in the private sector and federal government.

Important Policies and Regulations

On average PPD issues approximately 8 acquisition policy related documents each year. The following policies were issued during fiscal year 2016:

- **Agriculture Acquisition Regulation (AGAR)**, Updated to include Fire Liability Clause
- **Procurement Advisory 126**, Use of Address Activity Codes for FPDS-NG Contract Reporting
- **Procurement Advisory 125**, USDA Purchase Card Program – Mandatory, Annual Refresher Training Requirements
- **Procurement Advisory 96A**, CPARS Evaluations
- **Procurement Advisory 53A**, USDA IT Acquisition Approval Request
- **Procurement Advisory 101B**, Shared First Policy in USDA Contracts
The following policies are pending and open for comment:

- **Procurement Advisory 53B**, USDA IT Acquisition Approval Request
- **Procurement Advisory 127**, Internet Protocol version 6 (IPv6) Recommended Contract Clause Language

**Environmental Management**

The BioPreferred Program currently has three regulations in process:

- A rule to designate product categories of intermediate ingredients and feedstocks for mandatory federal purchase. This rule was deemed not significant by OMB and is currently in departmental clearance. The rule should be published as a proposed rule in the next 30-60 days. This rule implements the Farm Bill requirement to designate intermediates.

- A rule to designate finished product categories made from intermediate ingredients and feedstocks for mandatory federal purchase. This rule has a work plan in the clearance process at USDA and then will be sent to OMB for review. This rule is the second step to implementing the Farm Bill requirement to designate intermediates and finished products made from those intermediates.

- A rule to designate complex assembly products for mandatory federal purchase. This rule has a work plan in place and has been deemed not significant by OMB. This rule is being drafted and will be proposed in 2017. This rule implements the Farm Bill requirement to designate complex products.

**Sustainability**

- Executive Order 13693 – Planning for Federal Sustainability in the Next Decade (March 2015)
- USDA Departmental Regulation DR-5600-005 – Environmental Management
- The White House issues new sustainability-related executive orders every 4-6 years
- The Sustainable Practices Team facilitates the issuance of new sustainability-related Departmental Regulations every 4-6 years

**Safety and Health**

- DR 4430-004 Workers Compensation Program
- DR 4410-005 Safety Management Program
- DR 4430-005 Workers’ Compensation Program: Return to Work
Overview of the policy/regulation review process

**Procurement Policy**
The Agriculture Acquisition Regulation (AGAR), located in the Code of Federal Regulations (CFR) at Title 48, Chapter 4, is issued under the authorities of the Secretary of Agriculture. It supplements the government-wide Federal Acquisition Regulation (FAR) and provides guidance to Department personnel involved in the procurement of goods and services.

The AGAR is revised as necessary to implement FAR changes or to add supplementary material that is specific and unique to the Department. Title 41 of United States Code (U.S.C.) 1707(a)(1) requires that a procurement policy, regulation, procedure, or form (including an amendment or modification thereof) must be published for public comment if it relates to the expenditure of appropriated funds, and has either a significant effect beyond the internal operating procedures of the agency issuing the policy, regulation, procedure or form, or has a significant cost or administrative impact on contractors or offerors. However, the Department may elect to publish or not to publish any rule in the Federal Register if the rule does not meet the above criteria of significant effect, cost or administrative impact on contractors.

**Procurement Systems**
PSD’s regulatory environment is determined by USDA’s Departmental Regulations. DR 5130-6 is the set of guidelines used for the CCSC Purchase Card program; DR 5400-006 is the set of guidelines used for the CCSC Fleet Card program.

The regulatory environment for IAS security is determined at the Departmental level issued through the Federal Information Security Management Act (FISMA) and the policies for IAS is determined by the Procurement Policy Division (PPD).

**Property Management**
USDA issues two sets of property regulations. The first are Agriculture Property Management Regulations (AGPMR) which are the Department-specific policies stemming from the Federal Management Regulations. The second are Department Regulations which address property issues not addressed in the Federal Management Regulations.

**Environmental Management**
Both the designation process which sets up product categories for federal purchase and the voluntary certification initiative are institutionalized through regulation. Currently, there are 97 product categories designated in regulation and the program designates new product categories periodically through the regulatory process.

HMMD program operates under the Departmental Manual, DM5600-001, and the Departmental Regulation, DR5600-005.

The Sustainable Practices Team’s operates under the requirements of the statutes, policies, and regulations listed in Sections II (a) and II (b) above and E.O. 13693, Planning for Federal Sustainability in the Next Decade.
United States Department of Agriculture
2016 Presidential Transition
Office of Procurement and Property Management (OPPM)

GAO and OIG Audits

Procurement Policy

- **OIG - 03/25/2016** - OPPM's Oversight of Contractor Past Performance Reporting Requirements (PDF), (Report No. 89099-0001-12, Issued March 2016)

- **OIG - 04/28/2015** - Assessment of USDA's Contracting Officer's Representatives (PDF) (Report No. 50099-0002-12, Issued March 2015)

- **OIG - 10/01/2014** - Review of USDA Contract Databases (PDF), (Report No. 89901-0001-13, Issued September 2014)

Procurement Systems

The following audits were conducted by the USDA OIG in the last four years in which the IAS program was subjected to review as part of other OPPM audits.

- **OIG - 50901-01-13** “Review of Contractor Payments”

- **OIG - 92501-01-12** “Review of Procurement Operations”

- **OIG - 89901-0001-13** “Review of USDA Contract Databases”

The following audit was conducted by the USDA OIG in the last four years on the CCSC program:

- **OIG - 50024-0001-13** “Review of the Department’s US Bank Purchase Card and Convenience Check Data”

Procurement Systems

- **OIG - 50099-001-12** “Review of Expenditures Made by the Office of the Assistant Secretary for Civil Rights” [July 15, 2015] Completed on June 30, 2016, except for Recommendation #8. The Procurement Operations Division is awaiting submission of the Unauthorized Commitment documents from the staff of the Assistant Secretary of Civil Rights on/about September 30, 2016
United States Department of Agriculture
2016 Presidential Transition
Office of Procurement and Property Management (OPPM)

- OIG - 50601-0002-21 “Hispanic and Women Farmers and Ranchers Claim Resolution Process” [March 10, 2016] Completion of Recommendations 1 and 2 is due on December 31, 2016, and March 31, 2017, respectively

Property Management

Closed GAO Audits

Open GAO Audits
- GAO - 100195 “Leasing Responsibilities” entrance meeting 11/12/15
- GAO - 100565 “Real Property Disposal Authorities” entrance meeting 8/2/16
- GAO - 100799 “Incentives for Disposal” entrance meeting 8/2/16
- GAO - 100807 “Data Reliability” entrance meeting 8/22/16
- GAO - 100849 “Aircraft Data” entrance meeting 7/27/16

OIG Audits
- OIG - 50024-004-13 “Charge Card Data” 7/13/15
- OIG - 50099-002-21 “Vehicle Misuse” 3/2/16

Environmental Management

- The BioPreferred Program is currently responding to the GAO’s “Sustainable Chemistry Technology Assessment Review” (GAO Engagement Notification 100398).
- In 2015, HMMP was under a GAO audit: GAO-15-35 “Agencies Should Take Steps to Improve Information on USDA's and Interior's Potentially Contaminated Sites”.

III. Congressional Relations and Issues

Overview

Forest Service Airtanker Acquisition

The U.S. Forest Service received Congressional approval to acquire, implement and integrate next generation large air tankers into the current U.S. Forest Service air tanker fleet to support and assist in its firefighting mission. The air tanker fleet modernization acquisition will be
established to permit a minimum (base) purchase of one (1) aircraft with currently appropriated funds totally $65M, as well as include provisions for modifications to the original aircraft and the purchase and modification of up to six (6) additional aircraft as options should additional appropriations be made available in future budgets. Given optimization targets for delivery deadlines, and pending receipt of additional Congressional appropriations, U.S. Forest Service is targeting a 2-3 year delivery window for each aircraft with the final aircraft expected to be delivered not later than ten (10) years after initial contract award.

This acquisition is of significant Congressional interest given the dollar value associated with the anticipated award, requiring departmental approval, as it will impact the U.S. Department of Agriculture’s ability to meet Small Business goals. Total estimated contract costs for the acquisition of the entire fleet of seven (7) aircraft will total approximately $500M and current market research and industry engagement indicates no small businesses exist to fulfill the minimum program requirements.

Property Management

In August 2016, the House Oversight and Government Reform Committee requested a tour of the Beltsville Agricultural Research Center (BARC) in addition to data on all excess real property at BARC and summary data for the entire USDA real property portfolio. The Assistant Secretary for Administration testified in front of the Committee during September 2016 on USDA’s excess property portfolio. This committee is very interested in USDA’s overall portfolio of real properties determined to be excess. Congressman Mica has suggested that USDA should be selling off property at BARC. However, there is a statutory prohibition against doing so. Additionally, the Bureau of Engraving and Printing has approached Agricultural Research Service (ARS) about acquiring approximately 100 acres of land at BARC. ARS and BEP have socialized the idea with congressional staff and are formulating a plan to address the statutory restriction allowing for a successful transfer.

Lease Accountability and Strategy (LASD)

Multiple briefings were conducted on Capitol Hill in 2015 and 2016 by the Assistant Secretary for Administration regarding establishment of LASD. Office of Congressional Relations and Office of General Counsel, and Office of Budget and Program Analysis were involved in all briefings. The LASD received congressional approval in August, 2016.

BioPreferred Program

The BioPreferred Program has been authorized in every Farm Bill since 2002 and reauthorization will be required in the 2018 Farm Bill.

As directed by Congress in the 2014 Farm Bill, the BioPreferred Program performed an economic analysis that examined and quantified the effect of the U.S. biobased products industry. The BioPreferred released a new report on the economic impact of the U.S. biobased products industry on October 3, 2016 entitled “An Economic Impact Analysis of the U.S. Biobased Products Industry.” This new report is a follow-up to the 2015 report mandated by the 2014
Farm Bill. The report showed that the biobased products industry contributed 4.2 million jobs and created approximately $393 billion in value added to the economy in FY 2014. See link: https://www.biopreferred.gov/BioPreferred/faces/pages/articles/EconAnal2016.xhtml

The BioPreferred Program is responding to Farm Bill directives to designate for Federal procurement preference intermediate ingredients and the finished products that are made from those intermediate ingredients. A rule proposing the designation of 12 major categories of intermediate ingredients is scheduled to be published in the Federal Register in October of 2016. A rulemaking package is being drafted that will propose designating approximately 50 product categories of finished products made from designated intermediate ingredients. This rule is expected to be proposed by the end of 2016.

**Hazardous Materials Management (HMM)**

USDA’s HMM program provides oversight and funding for cleaning up contaminated lands in USDA’s property inventory.

USDA agency-specific contamination issues include:
- Forest Service estimates the total cleanup cost to be more than $6 billion, including contaminated facilities and abandoned mines.
- Abandoned mine lands is under particular congressional and OMB interest since the Gold King Mine incident which released 3 million gallons of toxic mine wastewater and tailings into Cement Creek, a tributary of the Animas River in Colorado.
- Farm Service Agency Credit Community Corporation estimates their liability to be at least $8 million for carbon tetrachloride contamination. Carbon Tetrachloride is a probable carcinogen used to fumigate grain until mid-1970’s affecting groundwater at least 150 mid-western rural communities. Ongoing investigations and cleanup is occurring at 62 sites.
- USDA has provided $48 million in HMMA funds to date to address the contamination at the ARS facility in Beltsville Maryland. ARS estimates that it needs an additional $19 million to complete cleanup activities at BARC.
- There are 236 Formerly Used Defense Sites (FUDs) on USDA managed land. The Department of Defense (DOD) has the responsibility to clean up these sites. According to a recent GAO audit, U.S. Army Corps had spent $223 million at FUDS on USDA properties from 2003 to 2013. It will cost an additional $1.4 billion to clean up all of the sites. USDA provides policy and guidance to agencies to ensure proper investigation and cleanup by DOD for these sites.
IV. Internal and External Stakeholders

Important relationships with other Federal Departments or organizations

Procurement Policy and Oversight

Internal Stakeholders

- Head of Contracting Activity Designee POC’s:
  http://www.dm.usda.gov/procurement/hcadlist.htm
- The Acquisition Council’s 60+ internal stakeholders include the Chief Acquisition Officer, Senior Procurement Executive, Heads of Contracting Activity Designees from each USDA buying activity, and other key leaders from across the department.

External Stakeholders

Procurement Policy Division represents USDA by meeting with the following groups that have participants from the 24 CFO Act agencies:

- Federal Acquisition Institute (FAI) – for managing and developing the Acquisition Workforce;
- Civilian Agency Acquisition Council (CAAC) – supports maintenance of the Federal Acquisition Regulation (FAR) System by developing or reviewing all proposed changes to the FAR; and
- Chief Acquisition Officers Council (CAOC) - established to provide a senior level forum for monitoring and improving the federal acquisition system. The Council promotes effective business practices that ensure the timely delivery of best value products and services to the agencies, achieve public policy objectives, and further integrity, fairness, competition, and openness in the federal acquisition system.

In addition, Procurement Policy Division partners with several Federal entities on a regular and on-going basis to support and serve the acquisition workforce to include:

- Office of Management & Budget (OMB) – for work on Mission Critical Occupation analyses associated with the 1102 job series;
- General Services Administration (GSA) – in support of the Federal Acquisition Gateway, Office of Government wide Policy initiatives, Federal Strategic Sourcing Initiative (FSSI), etc; and
- Committee for Purchase From People Who are Blind or Severely Disabled (AbilityOne Program) – in support of first generation agreements with the Commission’s central non-profit agencies (CNAs).
Procurement Systems

The Procurement Systems Division (PSD) collaborates with the following internal and external stakeholders on matters related to its Integrated Acquisition System (IAS) and Charge Card Service Center (CCSC) programs.

Internal stakeholders

- Integrated Acquisition System (IAS) Users - IAS serves a user base of around 5,000 USDA employees from ten (10) Agencies. The IAS user community includes the following roles:
  - Requisitioners
  - Budget Approvers
  - Contracting Officers
  - Other procurement personnel
- The USDA Office of the Chief Financial Officer (OCFO) is responsible for the maintenance of the USDA financial system, Financial Management Modernization Initiative (FMMI), and IAS’s hosting environment at the National Finance Center (NFC). Close coordination and interdependencies exist between IAS, FMMI and NFC, thus regular communication between the organizations is necessary.
- PSD works with the (Office of the Chief Information Officer) OCIO in on the Capital Planning and Investment Control (CPIC). OCIO supports USDA’s technology programs through oversight, governance, and guidance in responding to OMB mandates.

External stakeholders

- Office of Management and Budget (OMB) provides all federal agencies with strategic planning guidance, mandates, and regulatory requirements by which USDA must comply. PSD is responsible for submitting A-123 and Exhibit 300 reports as mandated by OMB.
- The Department of the Treasury manages the Invoice Processing Platform (IPP), to which IAS interfaces. IAS staff must regularly coordinate with the Department of Treasury on technical development or upgrades which may impact the IAS-IPP interface.
- U.S. Bank is USDA’s purchase card provider. U.S. Bank’s Access Online is a web-based electronic access tool designed to be the system source for purchasing card program management and related data. U.S. Bank Government Services Technical Help Desk assists Cardholders and AOs with questions about web-based program management tools.
- General Services Administration (GSA) manages/owns two systems with significant impacts on IAS:
  - Federal Procurement Data System-Next Generation (FPDS-NG) is a congressional database to which IAS interfaces through the PRISM contracts management module. IAS staff must regularly coordinate with Compusearch and/or GSA on technical development or upgrades which may affect the IAS-FPDS-NG interface.
  - The System for Award Management (SAM) combines federal procurement systems and the Catalog of Federal Domestic Assistance into one new system. IAS interfaces indirectly with SAM; vendors recorded in SAM are transmitted to FMMI and in turn to IAS. Furthermore, vendors referenced in FPDS-NG (created via IAS awards) must
also exist in SAM. Therefore, IAS staff must regularly coordinate with OCFO and/or SAM staff on technical development or upgrades which may affect the IAS-system.

- SmartPay2 Contractor - The USDA purchase card is part of a government-wide charge card program initiated by the General Services Administration (GSA) under the SmartPay® Program.

**Procurement Operations**

**Internal stakeholders**

The Procurement Operations Division provides contract support to the following:

- Office of the Secretary of Agriculture, Departmental Management, Agriculture Staff Offices including the Offices of the Chief Information Officer, Chief Financial Officer, Assistant Secretary for Civil Rights, General Counsel, Budget and Planning Analysis, National Appeals Division, Chief Economist, Communications, Ethics, Congressional Relations, USDA agencies that includes the Natural Resource Conservation Service, Food Safety and Inspective Service, Forest Service, Rural Development, Agricultural Research Service, Animal and Plant Health Inspection Service, Farm Service Agency;
- Other USDA Agencies as requested and through their utilization of the Procurement Operations Division’s strategic sourcing contracts;
- Department-wide Blanket Purchase Agreements; and
- Indefinite-Quantity contracts for services such as the USDA-wide Integrated Acquisition System, USDA-wide Category Management Hardware and Software Products.

**Property Management**

**External stakeholders**

- OPPM works frequently with the General Services Administration (GSA) on real property issues, particularly lease delegation authorities and the annual real property report to the Federal Real Property Portfolio. Also, GSA hosts FedFMS (Federal Fleet Management System), which is used by USDA to maintain its motor vehicle inventory.

- OPPM frequently interacts with the Office of Management and Budget (OMB) as a participant on the Federal Real Property Council.

**Lease Accountability and Strategy**

**Internal stakeholders**

- OPPM coordinates with the three service center agencies: Farm Service Agency, Natural Resource Conservation Service, and Rural Development and meets quarterly with the National Food and Agricultural Council (NFAC).
External stakeholders

- LASD works with GSA as they delegate authority to USDA to manage leases.

Environmental Management

Internal stakeholders

- The BioPreferred Program works with the USDA’s Bioeconomy Coordinating Council Committee (BCCC) to advance the contributions of agriculture and forestry.
- USDA Office of the Chief Economist (OCE) chairs the Global Change Task Force (GCTF);
- USDA Office of Operations (OO); and
- USDA Office of Homeland Security and Emergency Coordination (OHSEC)
- USDA Office of General Counsel
- USDA’s CERCLA authority includes enforcement authority. Where USDA is the lead agency, USDA agencies will complete potentially Responsible Party (PRP) searches to determine if PRPs exist and if they are financially viable. Viable PRPs will be required to perform or pay for the work. Where USDA caused the contamination and therefore is the “responsible party”, USDA works with the environmental regulators to complete needed environmental cleanup work.

External stakeholders

- USDA, along with the U.S. Department of Energy (DOE), co-chairs the Federal Biomass Research and Development (BR&D) Board which coordinates the Government-wide research initiatives and activities for the purpose of commercializing and promoting the use of biobased products, power, and biofuels. Members of the BR&D Board also include the National Science Foundation, the U.S. Environmental Protection Agency, the U.S. Department of the Interior, the U.S. Department of Defense, the U.S. Department of Transportation, and the Office of Science and Technology Policy;
- White House Office of Management and Budget (OMB) and Council on Environmental Quality (CEQ);
  - Department of Energy (DOE);
  - General Services Admin. (GSA); and
  - Environmental cleanup authorities and responsibilities with the Environmental Protection Agency (EPA) – In general, USDA Hazardous Materials Management (HMM) has delegated lead authority under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) and EO 12580 for the cleanup of lands/facilities under USDA’s jurisdiction, custody, and control. However, EPA retains authority in cases of emergencies and at sites that are listed on the National Priorities List (NPL). The NPL is considered the list of the Nation’s worse contaminated sites.
United States Department of Agriculture
2016 Presidential Transition
Office of Procurement and Property Management (OPPM)

Safety and Health Management

Internal Stakeholders

- USDA Agencies
- USDA Office of Human Resources Management

External Stakeholders

- Occupational Safety and Health Administration (OSHA) – Compliance
- Department of Labor – Federal Employees’ Compensation Act (FECA), Office of Workers’ Compensation
- National Federation of Federal Employees (NFFE) (Union)
- American Federation of Government Employees (AFGE) (Union)

Stakeholder group overview

Procurement Operations

Management and senior staff of the Procurement Operations Division participates in the Acquisition Council Group (led by the Senior Procurement Executive with the Heads of Contracting Activity Designees), the USDA Strategic Sourcing Group (led by the Branch Chief Acquisition Management Division/Procurement Operations Division with USDA-wide stakeholders), and the Federal Information Technology Acquisition Reform Act (FITARA) Working Group (led by Executive Director of FITARA Operations/Office of Chief Information Officer with USDA-wide stakeholders).

USDA BioPreferred Program Stakeholders

AbilityOne helps more than 45,000 people who are blind or who have significant disabilities find employment. AbilityOne was established by the Javits-Wagner-O’Day Act and is administered by the Committee of Purchase from People Who Are Blind or Severely Disabled (operating as the US AbilityOne Commission), an independent Federal Agency with assistance from SourceAmerica and National Institute of the Blind (NIB). USDA coordinates with AbilityOne to help develop markets for biobased products to be used in Federal Government operations. Numerous biobased products including offices supplies and industrial products categories have been developed and manufactured and qualified/certified in our program via AbilityOne value chain.

Hazardous Materials Management Stakeholders

Office of Management and Budget (OMB), with renewed focus on the potential threats from Abandoned Mine Lands, has taken an active role by attending our Federal Mining Dialogue (FMD) committee meetings. In an effort to leverage additional support for this program the FMD has recently established a SES level FMD Steering Committee. The steering committee membership includes USDA including Forest Service, DOI including Bureau of Land Management and National Park Service, DOE and EPA.
USDA is currently engaged with DOD to negotiate a Memoranda of Understanding (MOU) for investigations and response actions of FUDS on USDA managed lands including access agreement prior to entering and working on these FUDS sites.

V. **Top Issues**

**Hot Topics**

**Procurement Policy**

- Acquisition Approval Request (AAR) - On an ongoing basis over the next six months the Procurement Policy Division will continue to track the effectiveness of the OCIO’s IT AAR process implemented to ensure sufficient and centralized oversight and approval of all information technology investments for the Department and recommend any necessary updates.

- AgSSI SharePoint vehicles [https://ems-team.usda.gov/sites/OPPM-SS/SitePages/Home.aspx](https://ems-team.usda.gov/sites/OPPM-SS/SitePages/Home.aspx)

**Property Management**

- OMB Reduce the Footprint, update is typically due in October of each year. The goal for FY2017 is to reduce the square footage of offices by 328,045 and warehouses by 28,016.

- **Executive Order 13693** “Planning for Federal Sustainability in the Next Decade” which requires vehicle petroleum reduction by 4% by the end of Fiscal Year 2017 and that all new vehicles employ telematics.

**Lease Management and Accountability**

- Improving lease management practices through the establishment of LASD procedures and quality assurance review process for lease delegation requests submitted to GSA.
